

# Timmins and District Notes

Rev. Fr. Theriault returned this week from a visit to Montreal.

Mr. and Mrs. Henry Murray, of Ottawa, were Timmins visitors last week.

"Sun Baths" will restore your health. At 51 1/2 Cedar street, north. (Lady in attendance). 16p

Born—In Timmins, Ont., on Sunday, April 18th, to Mr. and Mrs. E. S. Adams, 107 Birch street north, a son (Charles Samuel.)

Get your blood in good condition by taking "Sun Baths" at 51 1/2 Cedar street, north. (Lady in attendance). 16p

Sunday, May 9th, will be Mothers' Day. Special services are being planned at all the churches for the day in honour of "Mother."

Many friends will regret to learn of the illness of Miss Morris, daughter of Mr. Morris, caretaker of the Central Public School. Miss Morris is undergoing treatment at the Providence hospital and all will wish her complete and early recovery.

Mr. Wm. O. Sutherland, of Hamilton, was a Timmins visitor last week.

Born—In Timmins, Ont., on Saturday, April 17th, 1926, to Mr. and Mrs. Dayton Ostrosser, a son.

Friday evening, of this week is the date of the At Home under the A.F. & A.M., for which invitations were issued recently.

The Brethour correspondent of The New Liskeard Speaker last week says:—"Mr. and Mrs. Jozebovitch are visiting friends in Timmins."

"Well, is this really Spring?" a settler from the district was asked this week. "Sure it is," he replied, "the roads are simply awful."

Classes in dressmaking and millinery were held last week at Monteith under the auspices of the Women's Institute.

The Taylor Hardware Company have had an unusually good window design of Alabastine, and a photo has been taken of the window to enter in the competition conducted by the Alabastine Co.

All will regret the continued illness of Mr. Jas. Scully, and sincerely wish him a speedy return to his old-time health and strength.

The Kiwanees will supply you with home cooking for this week-end. Tea and sale at Meyer's Drug Store, Saturday afternoon, April 24th. -16

Mr. D. Ostrosser has been making repairs and re-painting his store, damaged by fire some weeks ago. The store is now ship-shape once more, and bright and neat.

The annual meeting of the T. A. A. A. (usually known as the Grounds Committee) will be held shortly, the date to be announced in the course of the next few days.

Mr. John Mangan has joined the staff of the Bank of Nova Scotia here, commencing his duties last week. He will reside with his aunt, Mrs. M. C. O'Neill.

According to letters recently received in town, Mr. and Mrs. W. H. Browne, formerly of Timmins, where Mr. Browne conducted a photographic studio, are now living in England.

A refreshing cup of tea may be had at Meyer's Drug Store next Saturday afternoon, April 24th, when the Kiwanees are holding a tea and food sale from 2 to 6 o'clock. -16

The next band concert will be on Sunday evening, April 25th, after the church services. It will be in the Goldfields Theatre as usual, and there will be a special programme of good music.

Rev. M. H. Hall, pastor of the Timmins Baptist church, left yesterday for Toronto to attend the Baptist Bible Union Convention being held in the city April 22nd to 24th, at Jarvis street Baptist church.

A young lady organizer for the Ontario Motor League was in town this week securing members here for the Ontario Motor League and apparently met with good success. It is probable that a meeting for a branch here will be called when a good membership is secured.

Some of the Southern Ontario daily newspapers recently have published the statement that the big circus concerns have agreed among themselves to discontinue all street parades. Doing away with the circus parade would be going away with one of the biggest joys of youth, and never again would the proverbial Scotsman be able to see a circus.

The next regular meeting of the Town Council will be held on Thursday evening, May 6th, commencing at 7.30 p.m. The meeting nights are the first and third Thursday of the month, and on account of there being five Thursdays in April, the next meeting will be three weeks away from the last unless a special meeting is called in the interim.

### MR. W. T. SAMPSON JOINING STAFF OF ARGONAUT MINE

Mr. W. T. Sampson is leaving the Hollinger to take a position at the Argonaut Mine, near Dane. He will take up his new duties on May 1st. There will be very general regret at the removal of Mr. and Mrs. Sampson from Timmins, as they have hosts of friends here, and they will be much missed in many circles. Mr. Sampson has been in the Camp since 1913 and is one of the most popular and highly-regarded of the old-timers. He has taken an active part in church and other circles, being one of the wardens of St. Matthew's church. Mrs. Sampson has given valuable services to the community through her active interest in Children's Aid Society work and other good causes. While regretting their expected departure from Timmins Mr. and Mrs. Sampson will be followed by sincere good wishes from a host of friends.

## BAKE YOUR OWN BREAD

HOME-BAKED BREAD IS BEST OF ALL

## SUITABLE VARIETIES OF CEREALS FOR THE NORTH

Every Settler who can Should Grow Three Acres of Barley Says Kapuskasing Farm Superintendent.

Writing this week to The Advance, Mr. J. P. S. Ballentyne, superintendent of the Experimental Station at Kapuskasing, says:—

"In a climate such as is found in Northern Ontario it is very important that varieties of cereals suitable to the district be sown. Where ripened grain is desired, for instance, only early maturing varieties should be selected.

"At the Experimental Station, Kapuskasing, during the past five years, three varieties of wheat, viz., Huron, Marquis and Ruby have been grown and gave yields of 28 bushels, 14 lb., 26 bushels, 15 lb. and 19 bushels, 29 lb. respectively. Five varieties of oats were grown as follows: Victory, Gold Rain, Banner, Alaska and Liberty, and gave the following yields for a three-year average: 67 bushels, 15 lb., 65 bushels, 16 lb., 63 bushels, 28 lb., 53 bushels, 31 lb., 42 bushels, 5 lb. respectively. Liberty is a hullless variety and is well adapted for feeding poultry or young stock. Alaska is a very early maturing variety and should be grown by the average settler who wishes to have mature grain. Barley is one of the best grains for this district and should be grown by every settler. Four varieties have been grown at this station the past four years, namely, O.A.C.-21 Manchurian, Himalayan and Duckbill and gave the following yields, 39 bushels, 42 lb., 39 bushels, 9 lb., 32 bushels, 28 lb. and 39 bushels, 15 lb. It is interesting to note that the Canada Milling Company of Montreal, has found O.A.C.-21 barley a splendid variety for malting purposes and is assisting, with prize money, the Field Competition for Registered Barley. Every settler in the north who can grow three acres of Registered Barley should do so."

### NIGHT HAWK PENINSULAR AGAIN SEEKING CAPITAL.

Night Hawk Peninsular Mines is again seeking capital to carry on the development of its large property near Connaught. Despite the presence of large bodies of low grade ore, with only occasional good pockets, the property recently was promising to make good by development of richer ore on part of the property. To carry on the work further capital is needed and this is being sought. While negotiations were under way, the Night Hawk encountered more bad luck in the fact of the decision of the Northern Canada Power Co. to close down the Indian Chutes plant of the former Great Northern Power Co. The Northern Canada intends to supply the Great Northern customers from the company's other plants which are on a 25-cycle basis, the Indian Chutes plant being 60-cycle. The change means the installation of expensive equipment by the Night Hawk and for the present the mine is not financially prepared for this. As a consequence unless the Night Hawk secures additional capital at once, it will be necessary to close the mill down. It is understood that preparations along this line have already been made.

## CANADA LEADS IN NEWS PRINT PAPER PRODUCTION.

Few Canadians realize that by the end of 1926 Canada will be producing over one-third of the world's newsprint and 45% of the raw material entering into newsprint manufacture. Canadian newsprint production has been steadily increasing and in 1925 our total production about equalled that of the United States, returns for the first two months of the current year indicating a distinct leadership on the part of Canada.

Canada's programme of expansion involves the installation of eighteen new machines during the past year. This provides for an increase of 1715 tons in daily capacity bringing the 1926 production up to 1,750,000 tons and making a possible two million ton production in 1927. No new installations are contemplated for the industry in other producing countries with the exception of one machine in England and one in Finland.

Canada produced 1,522,000 tons of newsprint in 1925. Canadian pulp and pulpwood were used in 612,000 tons or 40% of the newsprint manufactured in the United States, making a total of 2,134,000 tons, or 42.7% of the world's estimated production coming directly or indirectly from Canadian resources. Allowing for the proposed new mills coming into operation, the world production of newsprint in 1926 is estimated not to exceed 5,250,000 tons of which Canada will produce 33.4%, while her raw material will enter into 45% of the total.—From the monthly letter of the Royal Bank of Canada.

By a vote of 380 for and 23 against the ratepayers of Haileybury last week favoured assistance to the Sisters of Providence to rebuild their hospital in that town.

## Red Lake Mineral District

Prospectors and Mining men can obtain canoes and all necessary supplies from our stores at HUDSON and WINNIPEG. HUDSON is the most convenient starting point for RED LAKE and has fewer portages than any other water route. We operate a transport system between HUDSON and RED LAKE and are prepared to handle consignments large and small. For further particulars apply to

Hudson's Bay Company.

at Hudson—Rolling Portage P.O. Ont., Sioux Lookout, Ont., or Winnipeg, Man. -14-17.
