**AMOS DISTRICT PROVING  
VERY PROMISING AREA**

Many Claims Showing Excellent Results in Section Near Amos, Quebec Province.

A correspondent writing from Amos last week says that public recognition of the importance of the large area in Northern Quebec, of which Amos is the centre and also the general headquarters, is gradually becoming general.

In the past the Hurricana operations have been considered as the only mining being done in this section, but Amos is the headquarters for several important fields. Cadillac, Fourier-Malartic, Upper Hurricana, Upper Bell River and the Fisher fields include the Townships of Cadillac, LaMotte, LaCorne, Malartic, Fourier, Varsan, Dubuisson, Bourlemarque, Villebon, Dalquier, Barraute, Landrienne, Bousquet and Joannes.

In all these townships important discoveries have been made and while any intensive development has hitherto

to been confined to six or seven properties, this summer will see several gangs of from 10 to 14 men at work on many new properties which will next winter be in shape for shaft sinking and serious development.

The Continental Gold Mines Ltd. is working the Peacock and Durval Claims in Landrienne township. Trenching has disclosed that they have an extension of the big Fisher shear zone and some strong quartz veins have been uncovered with some excellent gold showings. A contract has been let for 2,000 ft. of diamond drilling to test the veins at depth. As soon as the diamond drilling on the south ore zone of the Fisher Prospecting Syndicate's properties is finished the drill will be moved to the Continental ground.

Robert Wilson, who has done a lot of scouting around Amos for the Hollinger has located some claims in Barraute township on the strength of some copper finds there on Range VI. There has not been sufficient work done yet however to disclose whether they are of sufficient importance for the company to go on with them.

Then in the Township of Bosquet in the south shore of Kick-Kick the Northern Quebec Exploration Company is developing some good showings. The properties of this company are old stakings which were made in the rush of 1911 into Kick-Kick and they are probably the only claims staked in that early rush that have always been kept in good standing throughout all these lean years of mining interests in Quebec. The company is now opening up several veins which have good gold showings.

On the west end of Kick-Kick lake Montreal interests are developing some narrow quartz leads in the greywacke and conglomerate of the Temiskaming series of sediments. While narrow the veins are very rich in gold and under competent geological advice there will be a lot of work done on them this year. Excellent camp buildings have been erected and Capt. Ross of Montreal will report as work progresses.

**DIAMOND DRILLING AT  
OSTROM GOLD MINES**

Diamond drilling is progressing favorably on Ostrom Gold Mines Boston Creek district. The veins drilled show a widening at depth with increased mineralization. It is hoped to start the third thousand feet of drilling the end of this month and the management are confident this amount of drilling will give them the necessary information for purpose of sinking of shaft.

**WATER IN RIVER THREE  
FEET HIGHER THAN USUAL.**

The water in the Mattagami River this week is fully three feet higher than normal for this time of the year, indicating the amount of rain that has fallen recently. On Friday last there was a particularly heavy fall of rain general over a wide stretch of country hereabouts. The raise in the river has made the rapids, such as Windigo rapids and Pigeon rapids more difficult to navigation especially for canoes.

H. Ellis Gridley, formerly clerk and treasurer of Bucke township, who has been held at Haileybury for some weeks past on charges of theft in connection with municipal funds, was released on bail last week pending trial. The date of trial has not yet been set. Bail was awarded in the sum of \$2,000.00.

**EVERY COMMUNITY SHOULD  
HAVE AN ACTIVE TOWN BAND**

Town Band Gives the Ideal Medium for Musical Self-Expression

As noted before in these columns an effort is under way at Haileybury at present to organize a town band, and the Haileyburian is lending its editorial columns to the advocacy of the idea. The Advance has already published one of the editorial articles in The Haileyburian, and here is another that should prove of interest to towns that have bands and towns that have not. The Haileyburian says:—

"We should have a band. It is a community asset. This fact is being recognized to a greater extent every year. "Music for everyone and everyone for music," should be the growing aim of every community.

"Musical training through the band is in accord with the trend of the times, which is placing greater emphasis than ever before on an enjoyment of music and SELF-EXPRESSION through ensemble playing.

"It makes music a 'live subject' to the entire population. This is reflected in a better understanding of the value of music in the educational scheme and a truer appreciation of its role in the development of the individual and the improvement of group life. With its cheering and inspiring music, its picturesque uniforms and its general usefulness to the town, the band merits, and receives, the enthusiastic support of the public.

"In addition to these advantages a band is quickly and easily developed and is a most attractive medium for musical expression. But its very usefulness and the ease of first development have somewhat blinded us to what it may, under wise guidance, ultimately accomplish. For the band is capable of development similar to the symphony orchestra and in certain ways the music of the band is superior to that possible from an orchestra of any kind. Sustained organ-like effects of great power and loveliness are possible as from no other musical means, to state but one of the unique effects of which this type of organization is capable."

**ONLY ONE MOURNER AT THE  
GRAVE OF OLD PRESIDENT.**

Manson Courtney, died at the Mines hospital at Cobalt last week and was buried at Silverland cemetery. He was 84 years of age, and one neighbour from Firstbrook township, was the only mourner following the remains to their last resting place. The old gentleman had made a living by selling wood from his farm in Firstbrook. He lived alone in a shack on the bush farm for the past twenty years, making friends with none, and when death came he had no friends except the kindly neighbour. Efforts were made to get in touch with relatives in Southern Ontario but these efforts brought no response. There were no relatives in this part of the country and the old gentleman had no one to respect him in death, except that one neighbour who was of the true type of neighbour,—the type of neighbour that has made the North Land possible and livable.
