

**ATTENTION HOUSEHOLDERS**

Wrap all Garbage in paper. Keep your Garbage can covered. Use plenty of Chloride of Lime which can be procured at the Town Hall, free. Household users using well water must boil it for at least 20 minutes. All outside toilets must be made fly proof.

By Order of THE BOARD OF HEALTH

**FALL FROM LOCOMOTIVE ROBS WORKMAN OF MEMORY**

Wm. Lanke, Sioux Lookout, an employee of the Canadian National Railways, is suffering from loss of memory, following a fall from the top of the engine. While at work on the engine he fell down, his head striking the rail. He is in the hospital and has suffered a complete loss of memory as a result of the accident. He will recover all right, however, it is said, and be none the worse for the accident.

**Mr. R. A. McInnis Resigns as Manager of Abitibi Company**

**Mr. J. E. Patterson Appointed Mill Manager in Succession. New Manager has been Superintendent for Two Years Past and Stands High with the Company and the Men Alike. Mr. McInnis Gave Outstanding Service to the North Land as well as to the Town and Company.**

Announcement was made last week of the resignation of Mr. R. A. McInnis as manager of the Abitibi Power & Paper Co. mill at Iroquois Falls, and the promotion of Mr. J. E. Patterson to the place of mill manager. The announcement was of more than ordinary interest, and there was especial regret because of the fact that the change means that Mr. McInnis will leave this North Land. Mr. McInnis not only served the Abitibi Company in effective way, but he gave outstanding service to the North Land. In his removal from the North, this land will suffer a very serious loss in good citizenship. In referring to the change The Broke Hustler, Iroquois Falls own newspaper, says: "Mr. McInnis has been much more than simply manager of the mill. That he was more than manager is proven by the fact that every man in the mill and town feels that he has lost a personal friend, and while they are pleased that Mr. McInnis has in his new field a greater opportunity, yet they regret keenly the loss of his personality to this district. Outside of the town Mr. McInnis' field of effort has been very large. In a town like Iroquois Falls which, in the earlier days, was cut off except by railroad, the whole community looked to the manager of the mill, much as a growing family looks to their dad for service and direction. Mr. McInnis freely accepted this added responsibility and gave up practically every evening, through years, to the personal and social life of the town, taking an interest in all societies which tended to improve conditions or generally do good in the district."

Mr. McInnis first joined the company in 1914 at Montreal. He was appointed manager in 1917. In the official announcement last week Mr. L. R. Wilson, managing director of the Abitibi Power & Paper Co., says: "An organization was built up that is second to none in the industry today, and it is largely to the initiative, ability and work of Mr. McInnis that the present results have been obtained. It is only natural these should be recognized elsewhere as well and that an offer be made to him that he couldn't, in justice to himself, refuse; but in severing his connections with the Abitibi I can confidently say he is taking with him the very best wishes for his future success of the entire organization, the directors and officers of the Company."

In appointing a successor to Mr. McInnis, the Abitibi has held to its policy of not going outside the organization. Mr. J. E. Patterson, for the past two years superintendent of the mill, has been appointed manager. Mr. Patterson is well-known in Timmins, on account of his active connection with sports, and there will not only be hosts of goods wishes here for him, but also a general belief that he will make good on ability and merit. In speaking of the new manager, The Broke Hustler last week said: "If the people are unlucky in losing such a man as Mr. McInnis as manager, they are lucky in having to succeed him another outstanding example of a man who has made his own way and cut out for himself an outstanding niche in the pulp and paper industry. It is a long cry from the days in 1913 when Mr. Patterson first started in with the company driving the mail by dog team through the bush trail from Porquis Junction, to his present proud position as manager of one of the largest newsprint mills in the world. While everyone regrets the departure of Mr. McInnis and wishes him success in his new field of endeavor they cannot help but congratulate themselves in having, as his successor, a man who has grown up among them and has proven his worth."

"Another important change in regard to the Abitibi is mentioned as follows in Mr. Wilson's announcement last week: "Recognizing the advantage of more specialized laboratory research work it has been decided to separate entirely from the operating organization the research laboratory. In order to facilitate this work a new company has been formed called the Abitibi Research Corporation, of which Mr. R. W. Hovey has been made president and manager."

**LARGE QUANTITY OF GOLD DUST FOUND NEAR PORQUIS**

**Geo. and Mike Holgovitch To Have Preliminary Hearing To-day on Charges Arising from Gold Found**

Recently Chief C. McInnis and Officer J. Cushing, of the Tisdale Police Force, searched a motor car driven by Mike Holgovitch, and found a small quantity of gold dust on Mike. They then visited the farm of the Holgovitchs, near Porquis Junction, where dust to the probable value of around \$3,000.00 was discovered. A large quantity of the gold dust was found under a coil of hay in the field, and there was more in a can. The result of the searching and the finding was that charges were laid against the brothers Mike and Geo. Holgovitch relative to the illegal possession of gold. The two men will come before Magistrate Atkinson at South Porcupine to-day (Thursday) for preliminary hearing on the charges.

Too many "solid citizens" are solid from the ears up, suggests The Rutland Herald.

G. Jones	25
G. Doner	25
W. Booth	25
R. L. Fraser	25
A. Boyd	25
E. Lafferty	25
K. Bragg	25
F. Loney	25
T. McDonagh	25
J. D. Brady	25
J. Kennedy	25
J. Thomas	25
B. Jacobs	25
T. Blackman	25

**KEEP YOUR TAIL LIGHTS BURNING IN THE TOWNSHIP.**

The Township of Tisdale police have been very carefully enforcing the speed laws and other regulations for the safety of the public on the roads. Chief McInnis and his men, however, have been looking with a lenient eye upon cases where tail lights have been wanting. It is found now that in the matter of tail lights there is too much carelessness, and the number neglecting the tail lights has grown so that there is now danger of accident from this source. Accordingly the township police intend to "tighten up" in the matter of regulations regarding tail lights. Consequently, motorists will do well to make a special note of the matter and so avoid the usual unpleasant consequences. Hereafter, in the Township of Tisdale, remember to keep your tail lights burning.

In a recent issue The Cochrane News tells of a peculiar accident that happened the other day when a horse attached to a wagon, loaded with lumber, ran away and swam the Abitibi River with the wagon and lumber making the other side of the river in an exhausted condition. Several parties who saw this incident report the remarkable strength of the horse had in doing a feat of this kind:

**IMPORTANCE OF EARLY SEEDING OF FALL WHEAT**

Just as Important for Success with Fall Wheat in Northern Ontario as it is with Spring Grains.

Writing to The Advance last week Mr. L. H. Hanlan, Experimental Station, Kapuskasing, says:—

"Early seeding is just as important for success with fall wheat in northern Ontario as it is with spring grains. Experiments conducted at the Dominion Experimental Station, Kapuskasing, Ontario, indicate that fall wheat should be sown in northern Ontario in the month of August for best results.

"In 1923, Dawson's Golden Chaff fall wheat was sown at intervals of seven days between dates of seeding, commencing on August 18th, until six different dates were under test. The dates sown in 1923 and yields obtained per acre in 1924 are as follows: August 18th, 28.5 bushels; August 25th, 26.5 bushels; September 1st, 19.5 bushels; September 8th, 13.3 bushels; September 15th, 9.2 bushels, and September 22nd, 6 bushels. These figures show a gradual decrease in yield as the date of seeding became later.

"Fall wheat is occasionally killed out by spring frosts no matter when sown, but the chances for success are much greater when the land is prepared in good time and the seeding done early in August. It must be remembered, however, that the above figures are for one year only."

**MAN KILLED WHILE ON THE CANADIAN NATIONAL TRACKS**

The danger of walking on the railway tracks is again illustrated by an item in the last issue of The Red Lake Lookout, published at Sioux Lookout. This item says:—

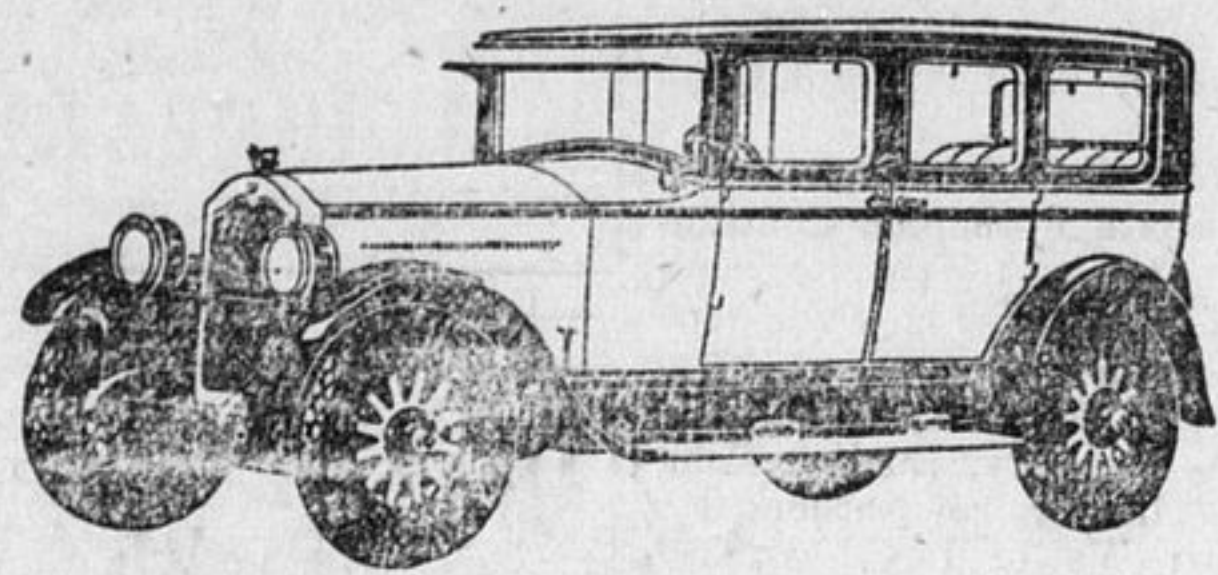

"As No. 1, west-bound train, on Sunday last was travelling near MacDougall's Mills, it overtook Allen Storey, aged 58, who was walking the tracks. Word was received here on arrival of the train of the unfortunate accident, and the Chief of Police, Tom Cunningham, and two or three others, went away immediately to take charge of the remains, which were fearfully cut up, and brought them into Sioux Lookout. The late Mr. Storey, it seems, had a farm north of Dryden, and was very deaf and was overtaken while trespassing on the tracks."

This one is from The Binghampton Press: "Yes, oaks grow from acorns, but you may not be that kind of a nut."
