

THE LIVING WORD

IT used to be customary to refer to printing as the "art preservative of art". Very nice and all that but reminiscent of cold storage and embalming. Conditions today have done away with all that, and now printing is the driving force of business in all its phases.

We are fully equipped to supply all your wants in all classes of modern printing.

Whilst specializing in mining forms, we also handle commercial work such as posters, letterheads, etc., to the entire satisfaction of our many customers.

We also print catalogues, booklets, illustrated pamphlets with despatch and credit to both our clients and ourselves.
