WHY HOLLINGER IS TERMED THE WORLD'S GREATEST

As an Individual Producer of Gold, Porcupine's Big Mine Has No Equal

A week or two ago a visitor to Timmins asked the question: "Why do you refer to the Hollinger as the largest individual producing gold mine in the world?"

The answer was: "Because it is the fact!"

The visitor was from the United States, and though he asked if there were not larger producers in South Africa, the question was only half-hearted, and he was quite satisfied when told that though several South African companies had much larger production, the production represented the output of several individual mines controlled by one individual company in each specific case.

Then, more hopefully, he queried "But what about the great Homestake Mine of Nevada?" This was a famous mine in his own country, and noted for being the greatest producing mine in the big republic from which the visitor came. If the Hollinger could surpass the Homestake, the visitor was willing to take off his hat to the Hollinger.

Figures and facts, comparing the two great mines, as recently published in The Mining Review were accordingly hunted up and shown to the enquiring visitor.

Homestake in its 50 odd years of operation has produced \$197,561,748 and has paid in dividends \$48,826,924. Hollinger in fifteen years has produced \$106,000,000 and has paid in dividends \$35,000,000.

The highest annual production ever attained by Homestake was in 1917 when output amounted to \$6,693,517. Last year, Hollinger's best to date, gold to the value of \$15,786,405 was produced and this year's record will be even higher.

At the present rate of production Hollinger will accomplish in point of gold production Homestake's fifty year record in a period of about twenty years.

When the train pulled out at noon that day from the Timmins station the visitor was standing on the platform of the observation car. He was looking across at the Hollinger's big gold manufacturing plant. And he had his hat in his hand!

Flattery is praise you think you don't deserve. It is difficult to recognize flattery.—New York Evening Telegram.

SAYS SIX MILLIONS INDICATED ON HOWEY

Lorne D. Howey, staker of the discovery property bearing his name at Red Lake, told The Northern Miner that the diamond drilling campaign performed by Dome indicated six millions of ore down to 500 feet, without going beyond the 971 foot length of cross trenching done on surface. This estimate, he said, was predicated on the bore hole plans and assay sheets turned over to Mr. J. A. Hammell, president of the Howey Red Lake company.

The Northern Miner also says that no definite news on the financing of the property had reached Mr. Howey lately but he was expecting word within a week. He declared Mr. P. A. Robbins was working closely with Mr. Hammell.

CONIAURUM MAKING GOOD PROGRESS IN DEVELOPMENT

Last week in an article on the Coniaurum The Toronto Telegram says:—

"It is still touch and go whether Coniaurum begins work immediately on a 500-ton mill or waits until spring to erect a thousand-ton unit. Everything is in readiness to begin work on the smaller unit, and it is possible that this work will be gone ahead with and certain structural changes made which will permit its increase to a thousand tons very shortly after.

"Development underground at the property is well up to time and everything is in readiness for extensive stopping on all levels. Further ore is opening rapidly and Coniaurum is likely to run the highest millheads of any mill of its size in Porcupine. Very thorough assay plans have been kept, and it is stated on authority that, even including some quite low-grade, the mine will be able to run an average nine-dollar head without difficulty, while this can be raised appreciably if wanted.

"The most important discovery to date has been the picking up of the McIntyre's No. 11 vein on the Coniaurum. This discovery is arousing intense interest in the north, as it has been located on the 1,100-foot level on the Coniaurum, whereas its corresponding position on the McIntyre appears to be at 1,800 feet."

FUNERAL OF THE LATE DANIEL JOSEPH McMAHON

In reference to the funeral of the late Daniel Joseph McMahon, of Timmins, announcement of whose death was made in The Advance last week, The Haileyburian in its last issue says:—

"A former well known Haileybury resident, who, for the past few years had been living in Timmins, Mr. Daniel McMahon, died in that town on Friday night last after an illness of only a few days. He was stricken on October 3rd, with septic poisoning, was taken to the hospital and had apparently recovered and went to his home, when on Friday the trouble recurred and he was again taken to the hospital where he passed away at midnight. He was 42 years of age.

"The late Mr. McMahon was an old timer in the North Country. He lived here for many years and went to Timmins only a few years ago. He leaves two children, a son, Daniel Joseph, aged 9, and a daughter, Mary, aged 6. Mrs. McMahon died here in May, 1920. There are also three brothers surviving, John, of Ottawa, and Daniel and Edward of Rochester.

"The funeral was held here on Tuesday evening following the arrival of the body from Timmins and interment was made in the Roman Catholic cemetery beside the remains of the late Mrs. McMahon. A great many friends and acquaintances here join in extending sympathy to the surviving relatives."

INCREASE IN McINTYRE EARNINGS FIRST QUARTER

Comparison Made With First Quarter of Previous Fiscal Year of Big Mine

(McIntyre Porcupine Mines, Limited, in their statement of earnings for the first quarter of their present fiscal year—the quarter ending Sept. 30th, 1926, show an increase in net earnings (before plant depreciation), of \$76,943, compared with the corresponding quarter in 1925, but a decrease of \$37,785 from net earnings for the quarter ending June 30th, 1926.

Operating earnings for this year's first quarter show an increase of \$76,496 over the first quarter of 1925, but a decrease of \$30,000 from the quarter ending June 30th, 1926.

The gross recovery from ore for the first quarter of the present year shows an increase over the same quarter of year ago of \$77,682, but a decrease of \$35,769 from the last quarter ending June 30th, 1926.

A McIntyre official in explaining to The Toronto Star this decline in net earnings, operating earnings and gross recovery, compared with the last quarter of 1926, pointed out that the first quarter of each year is usually the poorest while the last is the best. "You will find if you check it up," he said, "that earnings on recovery for this first quarter are well above the average per quarter of last year. The mine manager having an objective for the year usually takes up the slack in the final quarter by sweetening up the ore. When he begins the new year he goes back to the old basis which he used in the first, second and third quarters."

The comparison of earnings for the quarter ending September 30th, as given by McIntyre are as follows:—

First quarter September 30th, 1926.
Gross recovery \$963,799.99
Costs, including development 519,979.35

Operating earnings \$443,820.64
Non-oper. revenue 25,990.04

\$469,810.68
Less: Provision for taxes for period 20,256.70

Net earnings before plant depreciation \$449,553.98
First Quarter September 30th, 1925.
Gross recovery \$886,117.82
Costs, including development 518,793.82

Operating earnings \$367,324.00
Non-oper. revenue 24,000.99

\$391,364.99
Less: Provision for taxes for period 18,754.40

Net earnings before plant depreciation \$372,610.59

The thing that amazes us is that the Hall-Mills trial is less than a month away and neither Tex Rickard nor C. C. Pyle has even made a bid for it.—Edward Hope in New York Herald Tribune.

Canadian Pacific Rockies

The Perfect Vacation

Let it be a vacation without regrets this summer—at Lake Louise, Banff, Glacier, or any of the nine bungalow camps in the Canadian Pacific Rockies. What a tonic for tired brains and frayed nerves! Appetite regained and sleep-sure nights

in the Playground of the Continent

Sports? Anything you like. Golf, motoring, dancing, fishing, climbing, swimming, riding; in the sweetest, purest air on earth. Swiss guides for Alpine climbing, courteous attendants, and hotel service that makes Canadian Pacific famous the world over.

POULTRY ASSOCIATION MEETING ON FRIDAY

To-morrow (Friday) night, at 8 p.m., there is to be an important meeting of the Porcupine Poultry and Pet Stock Association in the town hall, Timmins. All interested in poultry, dogs, or other pet stock should be sure to attend, as final arrangements are being perfected for the big annual show. It is desired to have the largest possible attendance to-morrow night so that everything will get away to a big start for the big show.

IMPORTANT COPPER ASSAYS ON QUINTE GOLD PROPERTY

Work has been resumed on the Quinte Gold Mines, Limited, located in Teek Township, Kirkland Lake District, which has been lying dormant since 1912. General Manager E. S. Hill reported that dewatering operations were under way, and the three-hundred-foot shaft cleared to a depth of 200 feet. Assays taken at that level disclosed 16 per cent. of copper, no gold and no silver. Mr. H. Leslie, formerly associated with the Dome and Goudreau mines, is on the property, and will make an examination and a report. The machinery is being oiled preparatory to sinking to 1,000 feet, and motors have been ordered. The company is adequately financed for the present. Some 200 acres are embraced in the holdings, and it is the purpose of the officials to develop the copper potentialities of the mine. To this end a concentrator mill will be installed early as can be arranged.

NEW S.A. DIVISIONAL OFFICERS AT NORTH BAY.

Major and Mrs. H. Cameron have arrived at North Bay and taken up their new duties as Divisional Officers for this district of the Salvation Army, in succession to Major and Mrs. Knight, who have been transferred to St. John, N.B.

Major and Mrs. Cameron were given very hearty welcome to North Bay on Sunday at special services there.

Mrs. Cameron was in charge of the corps at North Bay a great many years ago and so is known to some at the Bay who remember earlier days of the Army there. Major and Mrs. Cameron have recently been stationed at Toronto East where their command was very successful.

CORNISH SOCIAL CLUB EVENT SATURDAY NIGHT.

On Saturday, Oct. 23rd, the Cornish Social Club are holding their first meeting at the Hollinger Recreation Hall, Timmins, at 7.30 p.m. At the executive meeting on Oct. 15th, it was proposed to start off with a Whist Drive and Dance, and a short programme of instrumental and vocal music. Refreshments will be served during the evening. The officers and executive of the Cornish Social Club extend a hearty invitation to all Cornish people of the district to be present and make this first social evening a real success.

Scotland has cold Winters, but ear-muffs are unknown there. The Scotchmen figure they might be invited to have a free drink.—New York American.

A Treat is in Store for You

If you are a constant user of Carnation Milk, you already KNOW. But if you are not, then we say, sincerely and confidently, that a treat is in store for you.

For you will get wonderful results in cooking with Carnation Milk. For baking, for sauces and gravies, for puddings and frozen desserts, Carnation is unsurpassed.

It is fine in coffee, too; and with fruits and cereals. Then, especially, will you appreciate Carnation's creamy-delicate taste and color—and its economy—cuts cream bills in three.

Treat yourself to the goodness which has made Carnation the world's leading brand of evaporated milk.

Your grocer sells Carnation. Be sure to ask for it.

BREAD PUDDING—2 cups Carnation Milk diluted with 2 cups hot water, 1/2 cup sugar, 1 tsp. vanilla or 1/2 tsp. grated nutmeg, 1/4 cup melted butter, 2 cups stale bread crumbs, 2 eggs, 1/2 tsp. salt. Prepare crumbs by grating on a coarse grater. Soak the bread crumbs in the hot diluted milk. Beat eggs slightly, add the sugar, salt, and vanilla to the soaked crumbs; stir until well blended. Pour into an oiled pudding dish, set in a pan of water and bake in an oven of 300° F. About one hour is required for baking. This serves eight.

Write for a free copy of Mary Blake's Cook Book. Address Carnation Milk Products Co., Limited, Aylmer, Ont.
