Mrs. Newton	90-111	201
Mrs. Sutherland	46-82	128
Mrs. Lowe	88-100	188
Mrs. McCoy	108-74	182
Mrs. Peer	111-87	198
Mrs. Pierce	166-120	286
Mrs. Robbins	127-113	240
Mrs. McRae	148-70	218
Mrs. Dougherty	68-28	96
Mrs. Williams	173-111	284
Mrs. Meyers	74-79	153

FINDER SHOULD RETURN THIS MONEY AT ONCE.

Last week a local citizen lost a roll of \$81.00 in bills between Woolworth's Store and 41½ Third avenue. He has not been having the best of luck recently, and the money lost represents an immense amount to him at the moment. It is all the money he has in the world for the time being and its loss is accordingly a very serious matter. If someone has found the money, will the finder please return it at once to the police station? It sure is needed and needed badly.

LOOK OUT TUNNEY

Some place in a tiny bed, Where, nobody knows, Just a little sleepy-head, Reaching for his toes, Rose-leaf hand and dimpled knee, Hair all damp and curled, Lies a baby who will be Champion of the world.

HON. JAS. LYONS AGAIN TO BE CONSERVATIVE CANDIDATE

According to a despatch from Sault Ste Marie, Ont., the Conservatives there will hold a convention on November 3 to nominate a candidate to contest the riding of Sault Ste Marie at the coming election, and it is a foregone conclusion that Hon. James Lyons will be the candidate. As yet no opposition to him has developed, the dry forces apparently waiting for him to make an announcement on the Ferguson policy before taking action.

SPECIAL MEETING VIPOND MINES ON NOVEMBER 24

Vipond Consolidated Mines, Limited, has sent out notices calling a special meeting of shareholders at noon, November 24 next. This cancels the previous notice calling a special meeting for October 26. The purpose of the meeting is to consider and, if deemed advisable, confirm by-law No. 30, authorized by directors, covering an agreement for the purchase of all the property and assets of the British Porcupine Mines, Ltd., for 250,000 fully paid shares of Vipond Consolidated Mines, and considering other business.

OPENING OF NEW JEWELRY STORE ON SATURDAY LAST

Last Saturday morning was the official opening of the new store of Adrien T. Pommier, corner of Third Ave. and Pine St., South, and a large number of people took advantage of the splendid offerings for the opening of this handsome new store. One feature was the splendid window display of uncut precious stones, this drawing large crowds. It is the intention to always have at least one window in the new store with a display of odd stones.

For the opening day a special offer was made to the first hundred ladies and gentlemen making a purchase, and the handsome house thermometers offered to the ladies and the indestructible pearl tie pins for the gentlemen were exhausted early. The new store is an added attraction on the corner of Pine and Third, considerably brightening up this busy section.

An Eskimo couple and their summer home on Bache Peninsula.

Mr. George P. MacKenzie, three members of the R.C.M.P. and a native carrying timber for the foundation of the new government building.

First party of the Government expedition to land on Bache Peninsula, August 1926.

ESTABLISHED FARTHEST NORTH POST

The farthest north customs house, post office and police post in Canada was established late in the summer by the Dominion Government party that patrolled the Arctic archipelago in the steamer Beothic, and three men of the Mounted Police were left to man it. The post is situated on Bache Peninsula, on the east side of Ellesmere Island.

WAS A MAN OF ABSOLUTE HONESTY AND INTEGRITY.

In a reference to the death of Mr. Patrick Scully, of Sudbury, father of Mr. Jas. Scully, of Timmins, The Ottawa Journal on Monday of this week says:—"In the death of Mr. Scully, Sudbury lost one of its oldest and most respected citizens. Although ill for some time, his death came as a great shock to the community and surrounding district. For the 35 years of business life in Sudbury Mr. Scully had established for himself the proud reputation of being a man of absolute honesty and sympathetic to all good causes, and his death will be deeply regretted by all his fellow citizens. The high esteem in which he was held was attested to by the beautiful floral and spiritual offerings and telegrams of condolence which were received by the family from all parts of the continent."

TWO RECIPES OVER RADIO INSTEAD OF ONLY ONE

Among radio fans a story being told about a Toronto man who was instructed by his wife to be sure and tune in and secure a certain baking recipe that was to be broadcast from a particular station at a time duly announced in advance. Obediently the husband did the required tuning-in; carefully he started to write down the recipe as it came over the wire; and then gleefully he began to enjoy the affair as two stations were plainly audible giving different recipes. The one was the baking recipe and the other was a recipe for reducing. Combining the two as they came in over the air, the result, written out by friend husband was as follows:—

"Hand on hips, place cup of flour on the shoulders, raise knees and depress toes and mix thoroughly in one-half cupful of milk. Repeat six times. Inhale quickly one-half teaspoonful of baking powder, lower the legs and mash two hard-boiled eggs in a sieve. Exhale breath naturally sit into bowl. Attention! Lie flat on the floor and roll the white of an egg backward and forward until it comes to a boil. In ten twenty remove from the fire and rub smartly with a rough towel. Breathe naturally, dress in warm flannels and serve with fish soup."

J. B. TYRRELL'S ANSWER TO W. M. SUMMERHAYES

In Regard to the Kirkland Lake Gold Mining Co. Property.

Mr. D. B. Hanna, president of Kirkland Lake Gold Mining Co., has sent out a circular letter announcing the resignation of Mr. F. L. Culver as President and Director, and the election of his successor. In addition the president enclosed the report of Mr. J. B. Tyrrell in reply to Mr. M. W. Summerhayes. In regard to the report by Mr. Summerhayes, Mr. Tyrrell says:—"The report, judging from the many favourable comments on the Mine, would indicate that the writer has a good opinion of the property. It is very unfortunate, therefore, that some glaring errors have been made in his figures and calculations."

"Mr. Tyrrell criticises Mr. Summerhayes' conclusion in respect to the 2,100 foot level. 'The list of assays given,' he says, 'gives a length of 252 feet with value of \$30.80 over 5.5 feet. By various arbitrary reductions, purely imaginary, he cuts his assay value to \$20.92 and at the same time shortens the ore shoot from 252 feet to 222 feet. But for 110 feet this drift was widened and resampled across total width, the samples being given in his exhibit 9C2 though these samples are neglected and omitted in his computations. In fact the rich ore shoot on this level for a length of 252 feet has been proved for an average width of 6.85 feet with an average value of \$31.35 per ton. But the drift does not and never was intended to show the full width of the ore."

In concluding his report Mr. Tyrrell says:—"In addition to the increase both in tonnage and value over and above those stated in the report, the shareholders may rest assured that just as soon as the mill is tuned up the costs and loss in extraction will be reduced to a minimum in line with the other mines in the Kirkland Lake district. I am confident that the high costs, and heavy losses in extraction predicted by Mr. Summerhayes in his report will not be realized in our operations, as previous results on the Mine under Mr. Sixt, our present mine superintendent, showed much lower costs and higher extraction. These factors will add materially to the profits from the operations."

"I cannot do better than repeat Mr. Summerhayes' own statement that 'the future prospects for the Kirkland Lake Mine are excellent,' with which opinion I thoroughly agree."

WAS ONE OF THESE POST OFFICES IN TIMMINS?

A couple of weeks ago The Advance carried a local note announcing the visit to Timmins of two gentlemen connected with The Midland Free Press. Last week in an editorial note The Free Press had a word or two to say in regard to an incident noted in a couple of post offices in this North Land. Could one of these post offices have been Timmins? It scarcely matters. The moral in any case is worth noting. The following is the item as published in The Midland Free Press:—

"During a recent visit to the northern section of Ontario, a couple of Midlanders were attracted by streams of people entering and leaving certain office buildings. Following the crowds, they found both were Post Offices, but were amazed at the untidy littered appearance of the floors. In both offices the floors were covered with advertising dodgers or bills, which the box-holders threw away as soon as they got their mail. As it was shortly after six in the evening, there was a steady stream of people calling for their letters, but not one was seen to carry away a single dodger. The floor did not look unlike some of the drugless 'drug stores' which abound in the north, but as an advertising medium, the money spent for those bills was absolutely wasted."

Nova Scotia Noted For Its Hunting Facilities

BIG BULL, NOVA SCOTIA

CALLING A MOOSE

BEAR ARE PLENTIFUL IN NOVA SCOTIA

Reports of excellent big game hunting in Nova Scotia this season have been received at the tourist department of the Canadian Pacific Railway in Montreal. Hunters have returned with tales of super-moose, seemingly endowed with more than usual cunning, thus adding to the interest in this sport. A large section of the interior is a maze of beautiful lakes, woods and streams where moose are plentiful despite the fact that about 1,200 bulls are killed by hunters each year between October 1st and November 15th, the open season. Cow moose and young calves are protected. Water approaches to the hunting grounds are but a short motor-ride from Digby and Annapolis Royal on the Dominion Atlantic Railway. Many hunters penetrate the wilderness by canoe from south Milford at the head of the Liverpool chain of lakes, or by motor truck which

transports hunters, guides duffel and canoes to Kedgemakookee and other haunts of the moose. Some of the best guides are the Micmac Indians, there being also plenty of efficient white guides at Del Thomas's South Milford Camp and Kedgemakookee. But one bull moose may be bagged each season by a hunter. The majority of moose are killed each year in 13 of the 18 counties. Moose and caribou are plentiful on Cape Breton Island but the hunting of these animals at the present time is

prohibited on the Island. Bear and wildcat, for which there is no closed season, roam the woods of Nova Scotia. Ruffed grouse, woodcock, snipe, wild geese and many other varieties of small game are plentiful and afford the hunter every opportunity of an excellent hunting holiday. The province too is a mecca for the angler. The many streams and lakes abound with salmon and trout. Off the coast tuna, cod, haddock, pollock and flounder fishing is extensively indulged in.
