A HANDKERCHIEF TO MATCH ADDS CHIS TO BRIGHT BLUE WOOL CREPE

There are many points of interest about this chic little day frock, imported from Paris, which might be copied effectively in similar material, or perhaps in crepe or crepe de chine.

The three inverted pleats across the front which are folded over into flat triangular pieces below the hips are smart, as well as the turreted yoke and the separate handkerchief of the material.

Deep fagotting joins the yoke to the blouse, the same irregular line being shown in the back as in front.

ELEVEN FROM TIMMINS AND DISTRICT IN PRIZE LIST.

The prize winners in the word contest, recently conducted as a feature of the Geo. Taylor Hardware, Ltd., silver anniversary observance, were announced last week. Out of a list of thirty prize winners, whose addresses were in different parts of the North Land, including Timmins, Schumacher, New Liskeard, Cobalt, Cochrane and Tomstown, eleven were from Timmins and Schumacher. The winner of the first prize of \$100.00 was a Timmins lady, and of the total of \$250.00 in prizes, over \$150.00 came to Timmins. The announcement of the contest was made in The Advance and again shows that advertising in The Advance secures results.

The following are the winners in Timmins and Schumacher, Miss Barrett being from Schumacher, and the rest from Timmins. The numbers before the names show the standing in the competition:—

- (1) Mrs. J. A. Letellier, 9 Cambrai avenue, \$100.00.
- (3) Jean Duff, \$25.00.
- (5) Marie Thibault, \$5.00 each.
- (6) Marie Thibault, \$5.00 each.
- (7) Marjory Carriere, \$5.00 each.
- (8) Woodrow Walsh, \$5.00 each.
- (9) J. H. Ayotte, \$2.50.
- (13) Doreen Murtagh, \$1.00 each.
- (17) Mrs. D. D. Chisholm, \$1.00 each.
- (27) Mrs. P. C. Young, \$1.00 each.
- (28) Anne Barrett.

AFTER THIS, IT'S NO USE TO SAY, "NOW YOU TELL ONE."

Simply with a sigh, it is said that the following is from the last issue of The Northern News, which is a truthful newspaper and published in the truthful town of Cobalt:—

"Triplets were born to an Englehart family a few days ago, and the unique event reminds Arthur Simpson, who edits the newspaper in the railway town, of a story current in his English home before he crossed the sea. According to Mr. Simpson, a home in his district had been increased by three babies at one birth, and it was desired by his friends to present the happy father with a memento of the occasion. So a silver cup was purchased by popular subscription, and the vicar was asked to make the presentation. The parson did so in a neat speech, and then handed the cup over to the proud pa. But the latter was not altogether sure of his standing, apparently, for he enquired of the worthy preacher if the gift was his very own. He was assured that no one else could claim it. "I don't have to win it three times to keep it, do I?" he pursued, evidently with his mind fixed on the conditions which govern the contest for the football cup, which becomes the property of the club holding it for three successive years. Incidentally a Cobalt woman said last week-end that she knew of one case where seven children were born to one couple in two years!"

Mr. Wagner: "I saw a headline in the paper today that said, 'Seven Men Killed by Ethyl Gas.' Isn't it terrible what we are coming to?"

Mrs. Wagner: "Yes, she must be a very bad woman. How did she kill them—with poison or a revolver?"

DOUGLAS MUTCH WRITES ON RED LAKE SITUATION

Encouraging Results on Dunlop Red Lake and Toronto Red Lake Properties. Work Being Continued.

Only a few months ago the papers were full of "Red Lake Gold Camp." Now, the camp is as badly neglected as it was formerly over-boomed. Yet no one should think that Red Lake is altogether dead or forgotten. It is still a live issue, and many men who ought to know believe that it will yet prove a big camp. Mr. Douglas A. Mutch, well-known in the North Land as a mining engineer and pioneer, recently wrote the following "boost" of Red Lake properties:—

"The outstanding work going on at the present time in Red Lake is that which is being carried on by the Dunlop Red Lake and the Toronto Red Lake. These outfits deserve great credit for the way that they have stuck with the work. Encouraging results have been met with by both outfits and the showings which they have uncovered appear to give considerable promise. During the past summer they have done an enormous amount of work, stripping, test pitting, trenching, etc. They also had the Swedish Electrical Method of prospecting from which they obtained good results. One body of sulphides has been bounded having dimensions of 200 feet by 400 feet carrying appreciable gold values. This body is on the property of the Toronto Red Lake. The sulphides show a large low grade copper body carrying gold. This body has been uncovered in several places on the surface.

"On the Dunlop Red Lake property a body of sulphides has been bounded showing dimensions of 350 feet by 240 feet. This body is of the same character as on the Toronto.

"The immediate programme is to continue surface work and prepare for winter operations. It is intended to diamond drill on both properties this winter. Results will be watched with great interest.

"Certainly the Dunlop Red Lake age giving their unit holders a real run for their money and have all through the piece shown absolute honesty and careful management. The same applies to the Toronto Red Lake. Both properties look like good speculations."

The Haileyburian last week says: "Sheriff and Mrs. Geo. Caldbiek spent the week-end in Timmins on a visit to their son, Mr. S. A. Caldbiek and Mrs. Caldbiek."

The little girl returned from church deeply musing on the sermon, in which the preacher had declared that animals, lacking souls, could not go to heaven. As the result of her meditation, she presented a problem to the family at the dinner table, when she asked earnestly: "If cats don't go to heaven, where do the angels get strings for their harps?"—Pure Oil News.
