claims. For years prospectors had been concentrating on gold, overlooking the copper possibilities. The gold content of many stakings had not been sufficiently attractive. Now these were beginning to be appreciated and the word had gone out that the new camp's geology was identical with that of Noranda. It was, in fact, identical, and the only question was how the values held.

Figures were quoted by Mr. Kenning to drive home the importance of Ontario's mining industry. In the past twenty years one billion dollars had been spent, \$600,000,000 in supplies, wages and machinery. Today money at the rate of \$60,000,000 a year was being spent in Ontario by the mining camps of the north. If people would give the same attention to mining as they did other lines of industry the returns would be much greater in proportion. The mining industry had gotten away from the speculative basis. The mining of gold was now down to a manufacturing basis and it was a question of cutting costs. Hollinger, he estimated, was good for another twenty-five years, at least. The North was not looking for sympathy, but for money for profitable investment. It was the speaker's wish that the Kiwanis Club of Pembroke would some day visit the gold mining camp and see for themselves. He would like to see a syndicate of ten, twelve or fifteen Pembroke people interest themselves in keeping one or two prospectors in the field, and he held no misgivings as to the success of the venture. Prospectors of today were more than prospectors in the accepted sense of the word. They were engineers and geologists.

Member for This Riding Advises His Home Town in the East to Share in the North's Riches

Mr. A. F. Kenning, M.P.P., for South Cochrane, spent Christmas at his old home town of Pembroke, Ontario, and while there took occasion to "boost the North Land." In an address to the Pembroke Kiwanis Club Mr. Kenning pointed out that big things were going on in this North Land, and he advised his old home town to "get in" on the development of the country. In reporting the address to the Kiwanis, The Pembroke Standard says:—

"That Northern Ontario was on the eve of a mining development during the next five or ten years which would eclipse any previous record and that Pembroke could and should set about to participate in the financial benefits which were bound to accrue, was the message which Fred Kenning, M.L.A. elect for South Cochrane, brought to the Kiwanis Club at Monday noon's luncheon. At least two new copper-gold fields had been uncovered within the last few weeks which gave every promise of becoming second Rouyns. These were in Ontario, in the Porcupine area, Hollinger Consolidated had just paid \$230,000 for a group of these claims and if values were maintained, and there was every reason to believe they would, Ontario would soon boast of two new Norandas.

"Mr. Kenning is a Pembroke-born boy, having left here over twenty years ago for the North Country, where he has since lived continuously with the exception of four years overseas. He is at present on a visit to his mother here. He took as his subject for his address before Kiwanians the development of the North Country during the past twenty years and the promise for the next few years of development which he predicted would be on an unprecedented scale. There was a record attendance at Monday's luncheon, many of his former school chums being present. He was introduced by Willard Beatty as one of the "Young old men" of the North Country.

"At the outset Mr. Kenning said it was one of the hardest things he
