

**NOTICE TO CREDITORS**

Notice is hereby given that all persons having claim against the estate of John Kisul, late of the Town of Schumacher, in the District of Cochrane, who died on or about the 13th day of December, 1926, are required to forward their claims, duly proven, to the undersigned, on or before the 15th day of March, 1927.

And Notice is further given that after the said date, the Public Trustees will proceed to distribute the estate having regard only to such claims of which he shall then have had notice.

Dated at Toronto, this 24th day of January, 1927.

K. W. WRIGHT, Public Trustee,  
Osgoode Hall, Toronto. -5-6.

**BENEFITS FROM MINING INDUSTRY ARE NUMEROUS**

**Huge Wage Bill Annually Means General Advantage to the Country at Large**

The mining industry, possibly more than any other line of industry, confers general benefit on the country in general and is of advantage to all other lines of business. This fact is very fully proven by the following article written by Mr. G. C. Bateman, Secretary of the Ontario Mining Association. Mr. Bateman writes:—

"There has never been a time in the history of mining in Canada when the public was interested in it to such

an extent as at present. This interest, of course, arises from the fact that the public has been making money out of mines. The statement is often made that the average investor in mining loses, and that the profits are made by the insiders and those who know the game. While this may have been true in other cases and in other times it is not the case with Northern Ontario and Quebec. During the past few years the bulk of the profits have been made by outsiders, by people not already connected with mining. During the past five years Ontario and Quebec stocks on the Mining Exchange have shown an appreciation of approximately \$300,000,000, and, compared with this great advance, it is obvious that if the investor had distributed his risk, and made even the most ordinary investigations before buying, that it would have been difficult to lose. So widespread is the interest in mining, and so widely distributed are mining stocks, it seems safe to say that a large proportion of this \$300,000,000 will go to people whose only interest in mining is a financial one.

"In addition to the very substantial benefits which have accrued to the general public, the business man and the manufacturer has also benefited to a large extent. During the past year Northern mines alone paid out between \$40,000,000 and \$45,000,000

for wages, which represents about half of the total, and for supplies and for different services such as power, freight, etc., without taking into consideration dividends of over \$15,000,000, which also find their way into the various channels of trade. These sums are the foundations for many different kinds of business, and are all the more important because they are derived from newly-created wealth. Business men appreciate this fact and how much this business means to them. They are sufficiently impressed with the stability of mining to go to considerable expense and effort to create new lines and improve old ones to meet the needs of the mining industry. A few years ago the major part of the heavy mine, mill and smelter equipment had to be imported from England or the United States. Today the greater part of this kind of equipment can be purchased in Canada, made largely from Canadian materials and by Canadian workmen.

"How important this mining business may be seen by the purchases of one representative Ontario company, whose production amounts to less than 7 per cent. of the total value of the mineral output of the Province, and this percentage can be used as a guidance in estimating the total of such commodities for the mines of the Province.

"The following figures are for purchases during 1926:  
Rock drills and parts .....\$33,000  
Drill steel ..... 28,500  
Fuel ..... 24,000  
Electrical equipment and electrical supplies ..... 23,000  
Iron and steel plates and bars. 14,000  
Mining machinery and equipment ..... 56,000  
Mill machinery and equipment 54,000  
Lumber and building supplies. 50,000  
Office supplies, etc. .... 6,500  
Pipes and fittings ..... 45,000  
Groceries ..... 28,500  
Oils, greases and gasoline ... 15,000  
Rubber goods, hose and belting 23,000  
Miscellaneous hardware and miscellaneous supplies ... 57,500

"The outlook for mining is brighter than ever before, and the next few years will probably exceed any corresponding period in the mining history of this country. This will result in increased distributions by the mines, which will become an even more important factor in the business life of the country. There will also be an increased output of metals which supply the raw materials for the largest section of Canada's manufacturing industries."

**W. H. ALDERSON PAINTS BRIGHT PICTURE OF NORTH**

**Tells Toronto Women of the Coal, China Clay and Other Possibilities of the North Land**

Last week Mr. W. H. Alderson, addressed a meeting of the Business and Professional Women's Club of Toronto his subject being the North Land. He said that if the promises concerning the mineral wealth of the Patricia district are fulfilled, the wealth of Croesus and of the Atlanteans of old will be but mere bagatelles.

"With high Government officials mining engineers, geologists and capitalists going in and out of this North Country and examining and tabulating its resources, it can only follow that speedy development is on the way," he continued. "The greater part of the existing interest is attached to the mining industry which in 1914 was valued at \$48,295,959, and in 1926 was worth nearly twice that amount."

"It is not only precious metals which are the lure that tempt prospectors and miners. There are those who affirm that Ontario coal fields are not a mere possibility, but an actual fact. Oil prospects, furthermore, are considered as certain and it may yet be that Ontario will head off Alberta in the matter of the petroleum future. Of the porcelain clay deposit which lies on the Mattagami River, it is stated that it is the biggest commercial discovery that has been made in Canada for some time. Its usefulness will be found in the manufacture of paper, paint, linoleum, textiles, and all kinds of enamelled vitrified work. The statement is also made that it is equal to the finest English china clay, an important fact, considering that English clay deposits are nearing the exhaustion point."

There are still over 150,000 square miles of practically unknown territory in Ontario, an area larger than that of the British Isles, the speaker stated. Having dealt at considerable length with the basic industries of agriculture, lumbering and mining in the province at large, Mr. Alderson then touched on the tourist traffic.

**EUCHE, BRIDGE AND 500 BY ALTAR GIRLS' SOCIETY**

A eucche, bridge and five hundred will be held in the parish hall, Timmins, on Wednesday evening of next week, Feb. 9th, under the auspices of the Altar Girls' Society. A first-class orchestra will provide good music for the event, and refreshments will be served during the evening. The Altar Girls' Society events are always pleasant and enjoyable and the card party next Wednesday evening will be up to the usual high standards.

**SATISFACTORY RESULTS AT THE MARCH GOLD MINES**

According to reports from South Porcupine recently very satisfactory results are being met with in the diamond drilling operations at the March Gold Mines. The diamond drilling campaign was started a month ago and the sixth hole is now being drilled. The veins have been cut anywhere from 55 to 250 feet below the 300-ft. level. So far only one blank was struck in the drilling. Commercial values were secured in five out of six holes. The intention is to continue the present campaign and the whole property will be drilled from the underground workings.

Development of the 170 and 300-ft. levels is being actively carried out. So far about three-quarters of a mile of lateral work has been completed on the two levels. On the 300-ft. level work is now over to the Ankerite line, the mill handling 103 tons a day.

**CHORAL CONCERT SUNDAY BY SPECIAL REQUEST**

Schumacher Choral Society to Give Sacred Concert in the Goldfields Theatre

By special request, the Schumacher Choral Society will give a grand choral concert in the Goldfields Theatre, Timmins, on Sunday evening, Feb. 6th after the church services. The programme will consist of choruses, quartets, trios, duets and elocution. The Schumacher Choral Society programmes are always popular here and will no doubt attract a large crowd for the Sunday evening event. Previous concerts given here have delighted all by their excellence. The Schumacher Choral Society has a chorus that is a very decided credit to all concerned,—leader and members alike—while the individual talent is especially worthy of note. The Schumacher Choral Society programmes always have variety, as well as excellence, and never fail to delight lovers of music. The event on Sunday evening will be no exception, and no one who enjoys the best of music should miss the very attractive programme to be given Sunday evening in the Goldfields Theatre after the church services.

**ANGUS CAMPBELL COBALT. MOVING TO GOWGANDA**

Mr. Angus Campbell, well-known throughout the North, for his special interest in sports, particularly hockey and for other public activities, is leaving Cobalt to reside in Gowganda where he will be manager of the Castle-Trethewey mine. Mr. Campbell has been about twenty years in the Cobalt camp, where he has been on the staff of the O'Brien mine, latterly as assistant manager. Mr. Campbell was one of the organizers of the N.O. H.A. and has also been prominent in the O.H.A. He played with various hockey teams in the early days of Cobalt, and latterly has been in much demand as a referee for games throughout the North. Mr. Campbell took interest also in educational and other public matters in Cobalt, being for years on the school board and giving other good service. His removal from Cobalt will be a loss to that town, but the gain will be Gowganda's.

A Chicago professor recommends alfalfa as a food for human beings who wish to be healthy and wise. In other words, he tells the people to go to grass, says The Windsor Border Cities Star.
