THE BOARD OF HEALTH

MATTAGAMI CO. LOGGING ROAD TO BE TAKEN OVER

A despatch last week from Toronto says:—

"The railway committee of the legislature, meeting this morning for the first time this season, approved of the bill which authorizes a company to be incorporated as the 'Mattagami Railway Company' to acquire and operate three miles of railway line between Smooth Rock Falls Junction, on the C.N.R., and the pulp mill owned by the Abitibi Fibre Company Ltd., at Smooth Rock Falls.

"The logging line in question is one of the assets of the defunct Mattagami Pulp and Paper Company, which have been taken over by the Abitibi Fibre people.

HELD UNDER HEAVY BAIL ON CHARGE OF ASSAULT.

For the third time at police court at Cobalt on Saturday last Mike Gleason was remanded under heavy bail on the charge of assaulting a small boy, Roger Emdon. The remand was made pending the recovery of the boy. It is alleged that the boy was struck by a pair of scissors in the hands of Gleason. The lad was making good recovery from the injury so received, but the other day seemed to receive a set-back and had to be taken back to the Mines Hospital at Cobalt for further treatment. According to the information coming from Cobalt the shears entered the boy's arm underneath, and the lad lost considerable blood. Some complications have since developed and the boy's condition is now considered serious. The story as told to the police about the wounding is to the effect that some children had been teasing Gleason by throwing snowballs at his house. He ran out to chase them away. He had the scissors in his hand at the time, but according to his side of the story he had no intention of using them as weapon, but had simply carried them along with him as he ran out, not really thinking about having them. In his attempt to catch some of the boys who had been annoying him, in some way or another the shears injured the Emdon boy. As so often happens in such cases, the Emdon lad is understood to have been simply an innocent spectator and not one of the lads throwing the snowballs. He is the son of a neighbour and just happened to be on the scene, according to some of the reports of the affair. When it was found that the lad was rather seriously injured Gleason was arrested on a charge of assault. The case has been remanded from week to week on account of the fact that the boy has not recovered as rapidly as might have been expected from a minor injury. The case is now set to come up on Saturday of this week.

Mr. F. E. Cooper, for the past couple of years accountant in the Imperial Bank here, has been transferred to South Porcupine where he will replace Mr. J. P. Michaud as manager. Mr. Michaud has been appointed manager of a branch of the Imperial Bank in the Maritimes.

PREPARATIONS FOR THE WORLD'S POULTRY CONGRESS

Work of transforming the Central Canada Exhibition Buildings at Landsdowne Park, Ottawa, in preparation for the World's Poultry Congress began last week when Mr. J. Oscar Turcotte, Canadian Exhibition Commissioner, and his staff moved out to the grounds and began operations. From now until July 27th when the Congress opens there will be scenes of great activity about the grounds. One of the aims of the Canadian Exhibition Commission is always to be ready to open an exhibition on the actual date set, and this has been one of the features that has made its work favourably commented upon throughout the world. Mr. Turcotte declares there will be no exception in the case of the World's Poultry Congress and that Canada's exhibition will be in place and complete to the minutest detail several days before July 27th.

LAND SURVEYORS AND THE TASK OF OPENING THE NORTH

Reference was made some weeks ago to the work of the land surveyors in the development of the great North Land. In an editorial article recently the Sudbury Star touches on the same question, saying:— "The land surveyors, who have been in the van of development in the settled parts of Eastern and Western Canada, appear to feel that their next big job is in the North Country. One of the greatest tasks before them, said Dr. F. D. Henderson, president of the Dominion Land Surveyors, at their annual meeting at Ottawa, was that of surveying the Laurentian shield which spreads across Northern Quebec, Northern Ontario, and the greater part of Manitoba, embracing over 2,000,000 square miles, or more than half the area of Canada. He spoke of the necessity of mapping any section of the country before its development is undertaken, and said that, at the present rate, it would take 70 years to complete the survey of the whole of Canada.

"But that does not mean that development is going to be held up, for it is now found that, for practical purposes, very satisfactory aerial surveys can be made and that immense areas can be covered very quickly. It will still be necessary, however, to fix the exact geographical position of all the physical features of the country and to ascertain the altitude of different parts.

"After the mapping survey, the geological, forestry and power surveys are of the greatest value in opening up an area such as the Laurentian shield, to which the president of the land surveyors referred. That country he described as containing the world's greatest reserves of pulpwood, the world's richest storehouse of precious and semi-precious metals, and water-powers of enormous importance.

"As the building of the Canadian Pacific Railway marked a great new epoch in the history of Canada, so another distinct epoch is coming with the invasion of the hinterland right across the Dominion. The attack on its resources has just begun, but enough of its secrets are known to stimulate development and this will go on with gathering momentum. The wealth that will be taken out of the North Country will be beyond anything that was dreamt of a few decades ago."

SHINING TREE GETTING BACK TO BIG ACTIVITY

Many Prospects Now Being Worked and the Whole District Attracting Attention

Reference to the Shining Tree district by a correspondent suggests the value of the idea of Mr. Harry A. Preston to have the road completed from Timmins to Sudbury, linking up the two or three small strips that need completion. Mr. Preston is enthusiastic on the value of the country south of Timmins, to Sudbury. The correspondent's view of the activities in Shining Tree would justify Mr. Preston's idea along the line of connection with Timmins for this area.

The correspondent points out that the mining camp of Shining Tree, in the district of Sudbury, is working up to some of its old-time activity, with the resumption of work by a number of old claimholders and the infusion of new blood in the Hollinger invasion of Connaught Township where the new copper-gold finds are being developed rapidly.

The Buckingham Mines have re-financed and are working already. Contracts for sinking and general mining having been let and the men are now on the ground.

The Atlas, one of the earliest discoveries of the camp, is increasing its capital stock from \$3,000,000 to \$5,000,000 and is also acquiring new holdings in the district and expects to get to work shortly.

The Holding Mines have been working all Winter, but owing to litigation work has been temporarily halted, but the owners, a group of New York capitalists, do not expect this trouble to last long and will resume operations at an early date.

This same group of operators have been taking options on many properties in the camp, including the Gosselin, the first discovery in the camp, and have already called for tenders and are about to let contracts for 10,000 feet of diamond drilling.

TEA QUALITY STANDARDIZED

You cannot get good tea without paying a fair price for it. Cheap tea lacks strength, freshness and will give less satisfaction per pound.

COBALT THEATRE OWNER PAID FINE ON SATURDAY.

The inspector for the department in connection with the theatres and motion picture regulations was in the North Land last week, and as one of the results of this visit, Malcolm Campbell, proprietor of the theatre at Silver Centre, near Cobalt, was fined \$100 and costs on each of two charges laid against him under the Theatres and Cinematographs Act. Inspector McNamara of the department at Toronto, was the complainant. Mr. Campbell pleaded guilty to having employed an operator who had no license and also to selling tickets without war tax being charged. He had been warned before, the police state.

The committees in charge of the arrangements for the building and financing of the Children's Aid Shelter at Timmins for the District of Cochrane are making satisfactory progress, and it is expected that everything will be in readiness for the starting of actual construction as soon as weather conditions are favourable.

SHUN THE HIGH-PRESSURE TYPE OF STOCK SALESMEN

There is a lot of sound sense in the following from The Oshawa Daily Reporter of recent date:—

"The St. Marys Journal-Argus has the following to say on the perennial problem of fake stocks:

"St. Marys has the reputation of being a somewhat wealthy town, which perhaps accounts for the large number of stock salesmen which flock around here occasionally. A good deal of the stock sold by travelling salesmen is worthless, and it is pathetic to hear of widows and hard-working citizens with no knowledge of financial matters, investing their small savings in enterprises about which they know nothing except what the slick salesman tells them."

"The slick stock salesman comes out in the spring with the robins and begins to do his heartless work. No county in Ontario is free from his machinations but perhaps those counties that have a reputation for wealth have been more often fleeced than the others.

"The only way to deal with a stock salesman of the type referred to is to give him an emphatic 'No' before he opens his prospectus. Once let him get his flow of talk started and the average person is lost. It requires an immense amount of rugged will-power to listen to one of those smooth selling talks and not fall for it sooner or later. So steel your heart and hide your cheque book when you see one of them coming."

DEATH OF MR. T. M. WHITE'S FATHER AT GORRIE, ONT.

The many friends of Mr. T. M. White, for several years accountant at the Timmins branch of the Canadian Bank of Commerce, and prominent here in sporting and other circles, will extend very sincere sympathy to him in the death on Friday morning last of his father, Mr. Robert White. The late Robert White died at the family home in Gorrie, Ont., after an illness extending over several months. He had been confined to his bed for several months through heart trouble. The late Mr. White was for many years a highly-esteemed resident of Gorrie and widely known and greatly respected for his genial good citizenship. He is survived by a widow, two daughters, and one son, T. M. White, now of Chatham, Ont.

A fellow asked his lady friend last Saturday night if he could see her home. She said she would send him a picture of it.

"Hello Willie," exclaimed the kind old man, "how is your dear old Grandpa standing the heat?" "Ain't heard yet," said Willie, "he's only been dead a week."
