

# The Man Who Had No Use For Life Insurance

TRUE STORIES about LIFE INSURANCE by a MUTUAL LIFE REPRESENTATIVE

THIRTY years ago, he was a prosperous merchant with a business worth \$50,000.00. His ambition was to develop it to a value of \$100,000.00.

For months, he resisted all arguments to buy life insurance, but, finally, signed an application and received a thirty-year endowment policy for \$3,000.00.

At the end of thirty years he wanted to retire. But times had changed. His business had not grown, as he expected. Instead of the \$100,000.00 of his early ambition, he salvaged only \$11,000.00!

Accumulated profits had brought the total payment he received on his \$3,000.00 endowment to \$5,200.00.

Thirty years ago he had little or no use for life insurance. Today he says insurance is like an anchor in the cross-currents of life.

Any representative of the Mutual Life of Canada is equipped to tell you about our different policies or write us direct.

### HOPE TO ERECT 500-TON MILL AT CONIAURUM MINE

Sufficient Ore Expected to be Demonstrated Soon. Shareholders Told at Annual Meeting.

The annual meeting of the Coniagras Mines, Limited, was held at St. Catharines on Wednesday of last week and several important announcements were made. Among these was one suggesting that a 500-ton mill might be erected on the Coniagras property in the near future. The sale of the Maidens-McDonald property in DeLoro was also announced formally, as was also the fact that the company had acquired promising properties in the Townships of Montbray and Duprat.

The President, Mr. R. W. Leonard, pointed out that no dividend had been paid for the fiscal year ending Dec. 31st, for the same reason as had prevailed in 1925, namely, the heavy expenditures at the Coniagras Mines, and the active prospecting campaign carried on warranted the directors in conserving the funds to meet contingencies. The company now owned 61.275 per cent. of the capital stock of 1,000,000 shares of Coniagras Mines, Limited.

Operations at the Cobalt property during the year were confined to general salvage work and recovery of further values from the fire debris.

It was pointed out that exploration work had gone ahead rapidly at the Coniagras Mine, and it was anticipated that when the current year's work was further advanced sufficient ore would be disclosed to ensure the continuous operation of a 500-ton mill, which would be constructed if justified.

The total production of silver from the Coniagras Mines to Dec. 31 amounted to 32,685,039 ounces, according to F. D. Reid, general manager of the company.

Capital assets were valued at \$481,823.08, real estate and equipment at \$23,164.57, and capital investment at \$1,655,478.51. Investments totalled \$1,280,091.45, and current assets \$122,936.57. Capital liabilities amounted to \$415,161.37, and current liabilities \$82,238.13. The reserves for contingencies and depreciation were \$348,499.92 and \$21,146.07 respectively. The surplus at the end of the period was \$2,696,527, the balance brought down this year being \$125,498.75.

J. J. Mackan, for 20 years, secretary-treasurer, is retiring, May 1st, but will remain in a consulting capacity with the company.

The directors and officers were re-elected as follows: President, R. W. Leonard, C.E.; St. Catharines, Ont.; Vice-President, Alex Longwell, Toronto, Ont.; General Manager, F. D. Reid, Cobalt, Ont.; Directors, W. G. Watson, Toronto, Ont.; A. L. Bishop, St. Catharines, Ont.; R. L. Peek, Port Colborne, Ont.; H. H. Collier, K.C., solicitor, St. Catharines, Ont.

It is not doing the thing we like to do, but liking the thing we have to do, that makes life blessed.—Goethe.

It's better to be married to a cheerful liar, than to a grouch who always tells the truth.

Even the man who thinks twice before he speaks is often sorry he said it.

When you wear your trousers out—be sure to wear them back again.

### NEW DOME DIRECTOR HAS GREAT FAITH IN THE MINE

Hope that Shareholders May Waken up Some Morning With a Mine in the Greenstones Similar to Others in Area.

The new director of the Dome Mines, Mr. R. F. Segsworth, evidently has great faith in the Dome's Porcupine property. He is in favour of a most aggressive exploration campaign at depth. In reference to the views of this new Dome director, The Toronto Globe one day last week had the following:—

"R. E. Segsworth, the newly elected director of Dome Mines, Limited, is a man who has long been keenly interested in the progress of the industry. One of his early ventures in Northern Ontario was the Seneca Superior at Cobalt. This operation which was conducted by Walter E. Segsworth yielded handsome returns.

"With reference to his appointment as a director of Dome, Mr. Segsworth, declares that while thoroughly in accord with the present management, he does favour a most aggressive exploration campaign at depth, to ascertain the possibilities of the zone favourable to gold deposition. Like many others Mr. Segsworth thinks it quite possible that exploration of the Dome up to date has not yielded more than may still be found if aggressive steps are taken to explore the likely ground.

"I was pleased to learn at the meeting that the company are not yet committed to spending their reserves on properties other than the real Dome ground, as I have a great deal of faith, yet unshattered, in the structural and mineral formation with geology of the mine, and join the board in the hope that the shareholders may waken up some morning with a mine in the greenstones similar to other large producers in the immediate neighborhood," said Mr. Segsworth.

"I have often felt with some good reason to believe, that the Dome sediments have been an added asset, which the other mines missed, and from which our shareholders have had so much to their benefit up to the present time with the real mine yet in the making."

Sometimes it seems as if the spirit of good sportsmanship was growing, and then along comes some incident like the publication last week of a notice offering a reward for information leading to the apprehension of the mean criminals who have been persistently destroying property at Ball Park, Lake Ramsay, Sudbury district. Good sports would not destroy public property. It is a particularly unsportsmanlike form of vandalism, and shows especially poor sportsmanship on the part of the petty perpetrators.

### GOOD PRICES PAID FOR LOTS ON NORANDA TOWNSITE

Exceptional prices were realized last week for lots disposed of on the first day of the auction sale of the townsite of Noranda, which was conducted by a Montreal firm.

Although there is not a building of any size on the townsite, as much as \$5,000 was paid for choice 40-foot frontages by purchasers, who were enabled to attend the sale by special trains from Montreal and different parts of Northern Ontario.

One of the interesting notes, apart from the good prices, made in regard to the sale is the fact that Mr. J. J. Carriek, of Toronto, who recently purchased the Townsite of Ronny, at a figure in the neighbourhood of \$500,000 attended the sale. Mr. Carriek flew from Haileybury, a distance of 70 miles in 35 minutes.

### BRITISH EXHIBIT AT THE WORLD'S POULTRY CONGRESS

The British Government's exhibit at the World's Poultry Congress at Ottawa this summer will be an extensive one, and in addition to technical features, will comprise models of the famous poultry farms of Lord Dewar and Mr. Thomas Barron, two of the most noted breeders in England. Hon. Miss Frances Amherst and St. Dunstan's School for the Blind are also intending exhibitors. Official British delegates are Sir Francis Floud, permanent under-secretary to the Ministry of Agriculture and Fisheries, and Mr. Percy Francis, Poultry Commissioner to the Ministry of Agriculture.

Municipal elections for the town of Sudbury will be held on the first Monday in December, instead of the first Monday in January, according to a by-law passed at a recent meeting of the Sudbury town council. This time for municipal voting is the same as that adopted by Timmins for several years, until last year when everything seemed to get behind time.

### MR. MacNAIR GIVES HIS EVIDENCE

FINDS "FRUIT-A-TIVES" BEST CORRECTIVE FOR CONSTIPATION

MR. S. MacNAIR.

Mr. S. MacNair of New Mills, N.B., is one of the thousands who owe much to "Fruit-a-tives". Full of gratitude he writes the simple truth as follows:

"I can honestly say that 'Fruit-a-tives' are the best intestinal regulator I have ever used. Other remedies, and I have tried a great many, cause pain and griping, but 'Fruit-a-tives' always act easily and effectively. I was inclined to be constipated before, but now I am feeling first rate, and most sincerely recommend 'Fruit-a-tives' to everyone."

"Fruit-a-tives" is the sworn enemy of constipation. Made from the intensified juices of fresh fruits combined with tonics, it is a natural medicine. It is not habit forming.

Don't let constipation plague you. Get back the bloom of health, the sparkle in your eye, the feeling that life couldn't be better. Begin at once, with "Fruit-a-tives"—25c and 50c a box anywhere—everywhere.

### PRODUCTION AT THE DOME FOR THE MONTH OF MARCH

Production for Dome Mines, Limited for the month of March is valued at \$324,263, as against \$314,910 for February, and \$344,933 for March, 1926. Production for the first quarter is valued at \$967,026, as against \$1,022,946 for the same quarter in 1926.

### COPPER FIND REPORTED AT BOSTON CREEK NOW.

The latest report of a noteworthy copper find in this North comes from Boston Creek. On the Johnston property not far from the Boston Creek station, exploration is understood to have disclosed an interesting deposit of copper ore. The deposit has a width of about six feet, it is said. It is generally believed that the development of the property will prove it to be a particularly promising one. The necessary work of development will be much facilitated by the fact that the property is so close to the railway, and accordingly there is no transportation problem to overcome.

### DAYLIGHT SAVING STILL HEARD FROM OCCASIONALLY

After being the order of the day during part of the war time, daylight saving has been generally sidetracked as a fad that has little to commend it. Occasionally, however, it bobs up again like the cork from a pickle bottle through into Lake Opeongo. A recent editorial note in The Sudbury Star says:—

"Haileybury paper is moderately boosting the daylight saving idea for that town, and reports that the council does not accept the proposal with great favour. There is no doubt that daylight saving in the Summer months is a boon to that portion of the public who indulge in sports of any kind, but in the majority of communities there is quite a pronounced sentiment against the practice—of putting the clock ahead an hour, upsetting the routine of young children and straining the nerves of their mothers. Then again, the lack of uniformity in the daylight saving scheme makes considerable inconvenience for the travelling public, accounting for much of the disfavour in which the proposal is regarded."

### REV. FR. KNOX TO CONDUCT SERVICES FOR HOLY WEEK.

Rev. John Knox, S.J., is remaining in Timmins for Holy Week. Father Knox will conduct the services of the Three Hours on Good Friday, noon to 3 p.m., in the Church of the Nativity. Rev. Fr. Knox and Rev. Fr. Lally conducted the mission at the Church of the Nativity, these services concluding last week. Rev. Fr. Lally left on Monday, but Father Knox remained in Timmins for the Holy Week services.

### WATER BOUGHT AT RATE OF A DOLLAR PER GALLON.

One dollar a gallon for drinking water was the cost of that supposedly common thirst-quencher when delivered to the consumer in the huge Arizona desert camp built by Paramount to house 2,600 men and 1,800 head of stock during the filming of "Beau Geste," which famous film is coming to the Goldfields theatre Timmins, on Monday and Tuesday of next week, April 18th and 19th.

While a well had been sunk with a capacity of 50,000 gallons a day this water was not used for drinking. That was brought from Yuma, 30 miles away, by automobile, mule pack and desert sledge to the isolated camp.

Ronald Colman plays the title role in "Beau Geste," P. C. Wren's mystery story of the French Foreign Legion in the African deserts. The other featured players in the picture, which Herbert Brenon directed, include Alice Joyce, Noah Beery, Mary Brian, Neil Hamilton, William Powell, Norman Trevor, Ralph Forbes and Victor McLaglen.

According to despatches the lumber mill of Pacey Bros., which was moved last fall from near Uno Park to a point near Chemin's, was destroyed by fire recently. The cause of the fire is not known. The mill will be rebuilt at once, it is understood.

### The World's Favorite Milk

CARNATION Milk could not be the largest selling brand of evaporated milk in the world did it not appeal to more people than any other brand. And it does. It appeals because of its wonderful smoothness and richness, its purity and uniformity. Carnation quality is tested and protected right from the cow to your pantry shelf.

Carnation is the most completely useful milk you can buy. Use it undiluted in place of cream at one-third the cost of cream. Diluted, Carnation adds richness to all cooking and is superior for other milk uses. Carnation is pure, fresh milk—evaporated to double richness and kept safe by sterilization. Order several tins or a case of 48 tins from your grocer.

Send for a free copy of Mary Blake's Cook Book. Address Carnation Milk Products Company, Limited, Aylmer, Ont.

CARNATION COCOA FUDGE—Three cups granulated sugar, 2 tablespoons cocoa, 1 pinch salt, ¼ cup Carnation Milk, 1 tablespoon butter, 1 teaspoon vanilla, 1 cup nut meats. Mix dry ingredients with Carnation Milk. Boil without stirring until candy makes a soft ball when tested in cold water. Add vanilla and butter. Set aside until cold. Then beat nuts in candy. Knead fudge like bread dough. Press down in buttered tins and mark in squares. The chilling and kneading of the fudge make it deliciously creamy. It never is grainy or too hard.

It looks creamy  
It tastes creamy  
It is creamy
