DROPPED DEAD AFTER DRINKING CUP OF COFFEE

Two minutes after drinking a cup of coffee in the Globe Cafe at Sudbury on Monday morning, Ernest Duchane, aged 39, fell dead upon the floor. Duchane had been released a few hours previously from Burwash in what the jail farm surgeon considered to be first class health. An inquiry was commenced into the death.

BIG COPPER-GOLD DEPOSIT AT MARRIOTT MINES, LTD.

A correspondent writing from Rouyn, Que., to The Mail and Empire says:—The Marriott Mines, Ltd., is the name of a new mining company which is to engage in the mining industry of Northern Ontario and Northwestern Quebec. The new company, headed by an Ottawa firm, was successful in securing the big discovery group of claims which has attracted attention toward the continuation of the copper-gold field of Rouyn into the Province of Ontario. Samples taken from the Marriott deposit appear to be most important, brought to light on surface in this field since the discovery of Noranda and Waite-Montgomery. Large bulk samples show massive chalcopryite, and with the analysis showing over 26 per cent. copper. Detailed sampling has not yet been done, but samples taken from test pits across a width of 15 feet and over a length of 150 feet are indicative of a very important deposit. Assays also show values of close to \$5 per ton in gold and silver, which fact suggests a valuable by-product.

The Marriott Mines lie in Marriott Township in Ontario, immediately adjacent to the boundary of Quebec. Arrangements are being made at once to send in a diamond drill for the purpose of tapping the downward extension of the deposit as preliminary work to installation of a mining plant.

PRODUCTION REPORT OF THE VIPOND FOR MARCH

The monthly report of the Vipond Consolidated Mines, limited, as issued last week shows that for the month of March there were 7,781 tons of ore milled. Bullion to the value of \$63,200.00 was shipped during the month.

YOUNG BOYS SAID TO HAVE STOLEN DYNAMITE STICKS

An unusual story comes from Cobalt last week. According to the tale some Cobalt lads, aged about twelve or thirteen, secured 56 sticks of dynamite which they cached in crevices in the rock about a mile and a half behind the Hudson property. The lads say they found the explosive. The other side of the story is to the effect that the dynamite was taken from a warehouse. Among the thing the boys are said to have done with the dynamite is the placing of one stick of the explosive in a short piece of iron pipe, after which they attached a fuse and lit the same, but the fuse failed to work. The cache was found through information given by one of the lads concerned, it is said. The boys need to have impressed upon their consciousness that lads should not fool around with explosives. In this mining country where explosives are in general use, it is the duty of every parent to make children hold dynamite in the very sincerest respect.

PRIZES FOR ESSAYS ON HIGHWAY SAFETY PLANS

"What My School is Doing for Highway Safety" is to be the subject of a provincial wide essay contest which has been launched under the joint auspices of the Ontario Motor League and the Ontario Safety League. The prizes which will be awarded on June 5, 1927, will have a value of six hundred dollars and the contest is divided into two sections, one for children under 12 years of age and the other for students between 13 and 16 years of age. The contest will be closed on May 20 and the prizes awarded three weeks later.

The rules governing the contest are: (1) any school child in Ontario may compete, (2) the composition must be written in English prose and must not consist of more than 200 words, (3) the composition must be the sole work of the pupil submitting it, and in the pupil's own handwriting, (4) the composition must be written on ruled paper, with a margin on the left side, written in ink, on one side of the paper only, and confined to one sheet if possible, (5) neatness, spelling and general composition will be taken into consideration in awarding the prizes, (6) the full name, age, name of school, and street address of the pupil must be written at the bottom of the paper, (7) in rural schools the name of the principal, post office address and number of rural delivery route must be given, (8) to the one subject chosen, a description of what your school is doing to promote safety, or what you think it could do and should do, is valued more highly than a general discussion, (9) the contest will close on May 20, 1927, (10) the decision of the judges will be final.

Pupils desiring to participate in the contest are asked to hand their essays in to their teacher who will give them to the principal to forward to the Ontario Safety League headquarters in Toronto.

Mr. Rose is presiding as examiner at the Timmins High School for the Stationary Engineers' examinations being held today (Thursday).

FORWARD LINE OF THE SCOTTISH FOOTBALL TEAM

'Ivanhoe' Writes Second Article on Team to Play at Timmins on July 1st, 1927.

Relative to the Scottish Football team, scheduled to play at Timmins on July 1st on their tour this summer in Canada, "Ivanhoe," the noted Scottish sporting editor, writes a second article as follows:—

"It is a little difficult to say what will be recognized as the strongest forward line. No doubt opinions will differ in Canada as they do at home, but a line possessing all the attributes of combination and finish would be Archibald, Gallagher, McGrory, Cunningham and McLean. These five are good enough to represent Scotland against England, only Gallagher happened to be born in Ireland, although he would dearly like to be able to play, if only once, in a Scottish side. Gallagher is unique amongst British forwards and it is a stroke of good fortune that he is going to tour because, in the ordinary course of things, he will not continue for many more seasons. As a matter of fact, Celtic thought he had given up the game at the end of the last season, but Patsy had other notions. Some of his achievements for Falkirk were as fine as anything he ever did as a member of the Celtic team who won all there was to play for. By no means endowed with great physique, Gallagher has survived encounters with opposition that would have terrified other men of his size. He has a swerve that is positively immitable. He is a 'Will o' the Wisp,' the despair of half-backs and backs, who marvel where he gets his energy. A volume could be written about the wonderful goals he has scored after working a devious way through an entire defensive phalanx.

"Tall, flaxen-haired Andrew Cunningham, of the iron limbs, provides a striking contrast. No Scottish team is complete without him. England fears no man more. He has beautiful action when working the ball. Apart from the object of serving his partner, or throwing a pass through the middle for the centre to score, Cunningham's main purpose is to get position for a left foot shot. With a short jab-like swing he can strike a tremendous blow, and if the ball goes true, as it generally does, the safest thing the goal-keeper to do is to get right out of the way—it will save him trouble even if he loses a goal.

"Between Gallagher and Cunningham there should be plenty of scope for McGrory to repeat his goal-scoring harvest of the past season. He likes the low straight pass sent along in front of him so that he can go racing though to shoot as he goes. But he is as deadly with his head, for in meeting a ball thuswise with the impetus of the dash through behind him, he will put as much force into the impact as the majority of players can impart with the feet.

"These are some of the chief personalities in the Scottish eighteen. It is certain that the Scottish game will be displayed in all its intricate charm, and with that blend of vigor and dash which has made Scotland the supreme football power of the world in recent years.

"The officials who will travel with the party are Mr. Robert Campbell, vice-president of the Scottish Football Association, who will be in charge, Mr. Thos. N. Colquhoun (Clydebank), Mr. Wm. McIntosh (Dundee), and Mr. James Philip (Aberdeen), members of Council. E. McGarvey, of Celtic, has been selected as trainer.

WHERE THEY MAKE ALL THE HIGH-PRESSURE SALESMEN

Regular Schools to Teach the Gentle Art of Separating People from Their Money.

More than once recently some disgruntled good citizen has asked the question:—"Where is sin do all the high-pressure salesmen come from? There are certainly enough of these gentlemen on the warpath and Timmins gets more than its share of these gentry. The whole North, indeed is a promised land to the high-pressure fellows. Often, the number of them does give rise to real wonder as to where they all come from. This question is answered in the last issue of The Northern Miner. Now, The Miner would add help to information if it would tell a troubled world how to get rid of the brutes. In the meantime this is the way The Northern News explains their presence:—

In the larger cities of Canada and the United States, including Toronto and Montreal, are schools for the embryo salesmen of shares of all kinds. These are fitted up like classrooms, with school desks, blackboards and chalk, maps, teacher's desk, and all the equipment of a schoolroom. Young men and young women are taught the arts of approach, argument and closing by past masters in the business of high-pressure. Many of the pupils go no further in applying their education than to sell stock to their relations and friends. Some develop ability in selling stocks to strangers and become valuable to themselves and their employers. It is not uncommon for a good salesman to make \$200 to \$300 a week the year round.

The rural routes in public imagination, are held to be the best place for these salesmen to operate but actually they get their easiest business in the cities. To the person unacquainted with stocks and bonds and their vendors it is not easy to distinguish between the salesman offering a legitimate proposition and the peddler selling something that was only "made to be sold." But by their raz ye shall know them. There is something about the slick salesman that gives him away to the person of acute perception.

A man who attended one of the promotional schools for the purpose of learning their methods writes:

"Stock promoters go to school just as you and I did. It has been my doubtful privilege to sit in the classroom of one of these stock jobbing training schools. The curriculum of the modern stock promoting training school comprises bucket shops, phone rooms, blind pools, mergers, stockholders' committees, fractional share scheme, reloading, one-call system, telephone razz, tap system, tipster sheets, puts and calls.

"I have sat in these classrooms under the guise of being a youthful advocate of the stock promoter's axiom 'get the money.' True, we were not permitted to realize that this was the ultimate objective. We had been gathered there ostensibly for the purpose of receiving a training in the gentle art of selling securities, about which we knew nothing, to a gullible public who knew less. The entire process was clothed in the garb of metriculous respectability. We were

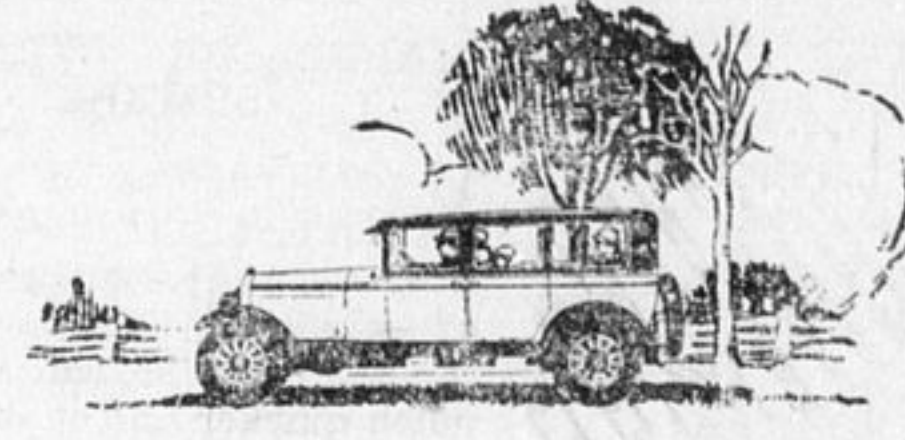

impressed with the fact that we were in reality embryonic philanthropist, passing on to our friends the opportunity of a lifetime."

OVER TEN THOUSAND BIRDS AT OTTAWA THIS SUMMER

The World's Poultry Congress of 1927 to be held in Ottawa from July 27th to August 4th will be the greatest of all Congresses held thus far. There will be over ten thousand live birds on exhibition, some six thousand delegates will be in attendance, and all of the buildings at Landsdowne Park, Ottawa, where Central Canada Exhibition is annually held, will be filled with exhibits. The Dominion Government, all of the nine provinces of Canada, the United States, Holland, Poland, Russia, Great Britain and many other countries besides a host of manufacturers of poultry industry accessories such as incubators and breeders, will have displays. Sessions of Congress will be held at the Auditorium from 9.30 a.m. to 12.30 p.m., daily and Congress Exhibition will be open from 1 p.m. till 10 p.m., daily.
