

Permits Available Now for Kamiskotia Assessment Work

Prospectors Who Wish to Do Work Now Should Apply to Mining Recorder's Office. Not Compulsory to Do Work. Prospectors will be Protected. Mr. A. F. Kenning, M.P.P., Gets Matter Straightened Out.

Recently there has been much anxiety in regard to claims in the Kamiskotia area. Prospectors believed that it was necessary for them to do their assessment work this year, or lose the claims, while the same time announcement was made that on account of timber licenses covering parts of the Kamiskotia area no assessment work or other activity by prospectors or others would be permitted this summer, on account of the danger of fire. Some of the prospectors took their troubles to Mr. A. F. Kenning, M.P.P., and the latter with the promptness and keen interest that

he has shown to every public matter in the interests of his constituents, at once took up the question with the Department of Mines in Toronto. He placed the case fairly before the Government and the result of his good work may be summed up as follows: Prospectors who do not wish especially to go on with assessment work in Kamiskotia areas affected by the timber license regulations may hold the work in reserve and will have the usual protection in this matter given in the case of areas where there are reserved timber areas. That is they need not do the work, but still will not lose the claims. On the other hand, prospectors who for any reason desire to do their assessment work this summer may secure permits for this by applying at the Mining Recorder's office.

The disposition of the matter is clearly outlined by the following telegram received from Hon. Chas. McCreary, Minister of Mines for Ontario: Toronto, May 18th, 1927. A. F. Kenning, M.P.P., Timmins, Ont.

Parties wishing to do assessment work in Kamiskotia must get permission from Mining Recorder, and submit to regulations laid down by fire officer on the ground. Mining Recorder will notify deputy fire ranger of such permits, and prospector must also notify ranger when he is to start work. Where deemed fair, portion of extra expense in fire patrol shall be assessed against claims-holders. Arrangements cover Jamieson, Robb, McDiarmid, Loveland, Byers, Cote, Massey, Turnbull and Godfrey. —CHARLES McCRAE.

DEATH OF DR. WOODBURY NOTED EDUCATIONALIST

Father of Mr. Vincent Woodbury, Passes Away at Oakland, California, Aged 83 Years.

Brief mention was made last week of the death of Dr. Charles J. Woodbury, at Oakland, California. Dr. Woodbury on more than one occasion visited his son, Mr. Vincent Woodbury, at Timmins, and here he had many friends, attracted by his literary gifts, his personal charm and his most agreeable disposition and high type both of intellect and heart.

The late Charles Johnson Woodbury was born at Beverley, Massachusetts, on September 15th, 1844, and so was 83 years of age at the time of his death. He came of an old and prominent American family that came from England in 1624 and settled in New England, where for generations they have taken prominent and helpful part in social and public affairs.

Thirteen Browns Go West

Mr. and Mrs. Brown with their 11 children, photographed on board the Cunard liner Ausonia, from which they disembarked at Quebec this week. The 13 Browns are going to take up land in the West and are enthusiastic over the prospects for their future. It is Mr. Brown's proud boast that none of his family have ever required the doctor's help, and their ruddy faces and keen eyes indicate their magnificent health and good spirits.

DUNLOP TIRES

THAT splendid appearance of Dunlop Balloons is no guess-work. That rugged road resistance is not there by chance. That adequate resiliency was no blind selection.

You receive the benefit of thirty-three years of honest thinking, careful planning, judicious experimentation when you buy DUNLOP TIRES to-day.

SEES PASSING OF POET'S HEALTHY "BAREFOOT BOY"

The "barefoot boy with cheeks of tan" is passing like the old "hoss" and buggy, says Charles Sheard, writing in Hygeia. Because we live in glass houses behind glass windows and ride in shut-in, glassed-in automobiles, we are paying for childhood up for the white shirt, the white collar and the leather boot.

Cheeks of tan and inward joy are gone, with sunshine no longer on our faces. People do not realize that there is more beneficial and curative effect in the gray light of a cloudy day outdoors than there is in the air of our so-called solariums.

Sunlight cures rickets and plays a big part in stamping out consumption. The rays of the sun materially increase the iron content of the blood and help to keep us from becoming anemic. The thyroid gland is said to be richer in its secretion during the summer when we get more sunlight and a few minutes exposure daily to has nearly doubled in a few weeks the sunlight has nearly doubled in a few weeks the amount of phosphorus in a baby's blood.

Beggar (at the door): "I've lost my right leg."
Stude: "It's not here."

CANADIAN WRITES PRIZE

Toronto, Ont.—A recent literary contest held by a high-class American periodical, which offered \$10,000 for the best novel, has been won by a Canadian, Miss Mazo de la Roche, of Toronto, against 1,200 competitors from Great Britain, United States and other countries. The book which Miss de la Roche wrote is entitled "Jalna," and has its setting in the Province of Ontario, a fact which will add much interest to its publication from a national standpoint. The \$10,000 prize is over and above the royalties and serial rights, which makes the award one of the most notable ever won by a Canadian.

She: Should evening dresses ever be worn to bridge parties?
He: No, in playing bridge it is only necessary to show your hand.

Mary had a little ring, 'twas given her by Joe, and everywhere that Mary went, that ring was sure to go.

She took the ring with her one day, when she went out to tea, where she might show it to the girls, who numbered twenty-three.

And when the girls all saw the ring they made a great ado, exclaiming with one voice: "Has it at last got round to you?"

Delightful Holiday Location

Algonquin Park, in Ontario, is one of the Dominion's charming holiday spots, particularly for the lover of fishing, canoeing and other aquatic sports. Here a canoeist is shown making his way through the passage which leads into St. Andrew's Lake, one of the beauty spots of this delightful holiday resort.—Canadian National Railways photograph.

Hollinger Stores Limited

Flags for the Holiday in all sizes from 5c. to \$3.50 each. Both Union Jacks and Canadian Ensigns

The Doll Dressing Contest closed Wednesday. We hope to award prizes Saturday

Hollinger Stores Ltd

In the early eighties the late Charles Woodbury entered the business field, specializing in oils and establishing a big business known as the Woodbury Oil Company. After proving his high ability as a business man, Mr. Woodbury retired from business in 1905, and through the rest of his life devoted his exceptional abilities and energy to literary and educational matters.

On his visits to Timmins the late Dr. Woodbury made innumerable friends who recognized in him an exceptional spirit. At the Kiwanis Club this week reference was made to his death and the sorrow of those who knew him and the sympathy felt for those bereaved.

The late Charles Woodbury passed away at Oakland, California, on May 11th, 1927. In April he was taken ill with a throat affection. Everything possible was done to save this valuable and beloved life but despite transfusion and other medical efforts, he passed away on May 11th. The funeral was held from his late residence and the love and esteem in which he was held was fully demonstrated by the tokens of appreciation and the evidence of genuine sorrow among all the wide circles in which he was known. Three daughters and two sons survive, one of the latter being Mr. Vincent Woodbury, of Timmins.
