He had to marry them both to decide between them
COMEDY SERIAL
July 1st—Friday & Saturday—2nd
"SENOR DAREDEVIL"

Starring
KEN MAYNARD & DOROTHY DEVORE

Out of old Mexico came Don Luso after receiving word that his father needed a fighter. Afraid of no one but a winsome wisp of a girl, he upheld his father through stirring gold-camp battles and won the name of SENOR DAREDEVIL at the risk of his neck.

He's not a kissing man but he can love and he doesn't mean maybe.

COMEDY NEWS

4th — Monday & Tuesday — 5th
"The Lady of the Harem"

with
Ernst Torrence and Greta Nissen
and a well-known supporting cast, in a scene of ardent romance—while the fate of death and disgrace hangs dagger-like over their kisses.
NEWS SERIAL

To Use Calcium Chloride on Pine Street South at Present

Experiment for Dust Laying to be Further Tried Out in Moneta. Ton Allowed for Use on Athletic Grounds. Further Discussion of Mining Exhibit. Other Town Council Business.

The regular meeting of the town council was held on Monday afternoon. Mayor E. L. Longmore occupied the chair, and Councillors F. Francis, A. G. Carson and W. H. Pritchard, were present. There were considerable routine business dealt with in effective way, and the council meeting was concluded in good time, the proceedings being over before half-past five. There was no time wasted in useless discussion, though all matters were given due consideration.

The Timmins Amateur Athletic Association asked for some calcium chloride to lay the dust on the athletic grounds, especially before the big football match on July 1st. The request was granted, the town to supply one ton of the chemical on hand for this purpose.

The Football Club also asked for permission to rope off part of Pine street for the community street dance to be given in honour of the visiting Scottish team on Saturday evening, July 2nd. This permission was also granted, the resolution allowing the roping off of Third avenue from Pine to Spruce street, one block. This was the block roped off last year for the Moose dance.

A petition was received from a number of ratepayers on Wendue avenue asking for a surface water line there. The matter was referred to the waterworks committee and the town engineer.

A petition submitted registered objection to a by-law expected to be considered by the council to impose a fee of \$50.00 for a license on each dairy in town. The Mayor explained that there was no by-law yet before the council in the matter, but that he understood that some of the larger dairy owners were expected to approach the council with a view to having a new by-law for the regulation of dairies. When the large dairy owners were heard, the stand of the petition received, which represented those with only one or two cows, could be considered.

The matter of the payment of insurance premiums on some children whose father is ill in Italy and the family drawing support from the Workmen's Compensation Board, was again before the council. The Mayor could not see how the town could pay the premiums without establishing a precedent that would lead to all sorts of difficulties. Eventually, it was suggested that the insurance company take up the matter with the Compensation Board to see if that body would approve the carrying of the premiums and agree to the paying of the same.

Mr. J. H. Tomlin, whose exhibit of mining specimens of the Porcupine, and display of maps, at the Kiwanee Fair, created so much interest and attention, was again at the council meeting relative to the closing down of the exhibit in town. He said that he was carrying it on at a loss and could not afford to continue doing so. He had been urged to interview the council, as a great many people felt it would be a decided loss to the town if the exhibit were dropped. It would cost about \$50.00 a month to continue it. The exhibit, he explained, was of great use to prospectors and visitors to town. The Government also made free use of it and praised it highly. Timmins had no information bureau for mining and prospecting matters and the exhibit answered this purpose. He had innumerable enquiries regarding mining matters and the service given was no doubt of great value to the town.

Mayor Longmore said that he had viewed the portion of the exhibit shown at the Kiwanee Fair and it was certainly very creditable indeed. It would be a pity if the exhibit were closed but he did not know whether the town would be warranted in making a contribution to assure its continuance. The mayor said he was more interested in the exhibit's possible usefulness to local prospectors and miners than to its use by outsiders. Councillor Francis called attention to the fact that the Provincial Government found it of value, and he suggested that the Government accordingly might contribute to its maintenance. The mayor thought that perhaps the Government and town might co-operate in supporting it, and he agreed to discuss the matter with the Minister of Mines and see what may be done. There was a general opinion among the councillors that it was a worthy cause, but it was felt that the matter should be deferred until there was a larger representation of members at the council board.

The usual quarterly grants to the Volunteer Firemen were authorized. Payrolls, debenture payments, accounts and other routine bills were ordered paid. Several rebates on water rates for due cause were authorized.

Mayor Longmore explained that he had asked the Fire Marshal's Department for a comprehensive report on the buildings in town with a view to safeguarding the public from loss of life and property through fire dangers. The department had sent Capt. Rit-

chie here to make a complete survey of the town. When asked in regard to the progress made in this report, Fire Chief Borland said that Capt. Ritelie had made a careful inspection of all hotels, theatres, boarding houses, schools, apartment buildings, etc., and his report was now in preparation. The owners of buildings would receive notice of his recommendations in a few days. The notices would take two forms—the one form being a request for certain changes or improvements, and the other an order to have them done. In the case of the orders, there was a penalty of \$100.00 per day for every day passing after the fixed date without compliance to the order. A copy of the report will come to the fire chief and it will be his duty as a deputy fire marshal for the Province to see that the recommendations and orders are fully observed.

Councillor W. H. Pritchard brought up the question of the use of the calcium chloride purchased by the town for dust-laying. It had been decided previously to put the chemical in the "business section of the town" and as this was a broad designation he asked if the councillors had any definite recommendations as to any particular blocks. Eventually it was decided to use the calcium chloride on the south end of Pine street through Moneta.

A letter was received from the executive of the N.O.F.A. inviting the mayor and council to take part in a civic welcome to be given to the Scottish Football team to play here on Friday of this week, July 1st. The reception will be at 4 o'clock at the band stand, Spruce street, near the T & N. O. station. The mayor and council accepted the invitation and will all attend the formal reception to the visiting football team.

BRITISH NORTH AMERICA ACT: FOUNDING CANADA

The Act Under Which Canada Achieved Nationhood and Makes Steady Progress.

In this issue of The Advance it is fitting that reference be made to the British North America Act, the basis upon which confederation has been built. The following is another of the series, "Confederation and After—Sixty Years of Progress:—"

The original Dominion of Canada, formed July 1, 1867, by the British North America Act, was composed of four Provinces, Ontario, Quebec, Nova Scotia and New Brunswick. Manitoba became the fifth Province in 1870; in 1871, British Columbia became the sixth; in 1873, Prince Edward Island became the seventh; in 1905 Alberta and Saskatchewan became the eighth and ninth Provinces; Yukon became a Territory in 1898 and all the rest of Canada is "The Northwest Territories." The British North America Act may be termed the "Written Constitution" of Canada, although in Canada there is much that is unwritten in that Constitution which has been defined as "the totality of the principles more or less vaguely and generally stated upon which we think the people should be governed."

The difference between the Constitution of Canada and that of the United States has been described (by the Hon. W. R. Riddle) as, speaking generally, amounting to this: "In Canada anything unconstitutional is wrong, however legal it may be; in the United States anything unconstitutional is illegal however right and even advisable it may be."

There is no provision in the B.N.A. Act for amendments thereto, the reason being that when the Provinces of Lower and Upper Canada were united, in 1841, into the Province of Canada, the old Lower Province was largely populated by French-Canadians, almost all of whom were Roman Catholics and much attached to their old laws and customs; the remainder of the people of the new Dominion were largely English-speaking and Protestant, in general attached to English law and customs. While the French-Canadians were willing to enter into a contract with their English-speaking brethren, they were not willing to enter to a contract which could be varied by the more numerous English without their consent.

Still there is no difficulty in having an amendment made when desired. It is brought about in this fashion; an Address to the Sovereign is passed by both Houses of Parliament at Ottawa asking for the amendment specified. According to the unwritten Constitution, the vote on the Address must be unanimous (or practically unanimous) or it will not be forwarded to London. When the Address is received by the Colonial Secretary in London, the desired amendment to the B.N.A. Act is passed by the Imperial Parliament as of course and without debate.

The legal conception of the powers of the Parliament of the Dominion

and the Legislatures of the Provinces is that they are a grant by the Imperial Parliament through the B.N.A. and amending Acts. But it is a mistake to infer from this that such powers are limited and delegated. Lord Selborne laid this down definitely saying, "the...Legislature has powers expressly limited by the Act of the Imperial Parliament which created it and it can, of course do nothing beyond the limits which circumscribe those powers. But when acting within those limits, it is not in any sense an agent or delegate of the Imperial Parliament, but has and is intended to have plenary powers of legislation as large and of the same nature as those of the Imperial Parliament itself."

Why wait until you are in this unfortunate man's position? FLYOSAN kills MOSQUITOES as surely as it does FLIES. Harmless. Will not stain fabrics.
