LIST OF NOXIOUS WEEDS REFERRED TO IN NEW ACT

Growths Considered as Noxious Weeds When Growing in Cultivated Crops or Pastures, or on Roads.

Elsewhere in this issue will be found extended reference to the new act relating to noxious weeds. Naturally, there will be interest in what plants are considered as noxious weeds, and the following list answers the question. While the North Land at the present moment is not specially affected, it can not be too much emphasized that "prevention is better than cure." Under the terms of the act:—

1. The following shall be deemed noxious weeds when growing in cultivated crops or pasture:

Bladder campion (Silene latifolia, Mill, Britten & Rendle).

Ox-eye daisy (Chrysanthemum leucanthemum, L.)

Perennial sow thistle (Sonchus arvensis, L.)

White cockle (Lychnis Alba, Mill.)

Wild mustard (Brassica arvensis, L.) Ktze.

Wild oats (Avena fatua, L.)

Canada Thistle (Cirsium arvense, L.) Scop.

2. The following shall be deemed noxious weeds when growing on roadsides, streets in cities, towns and villages, along transportation and power lines, municipal ditches and vacant and waste lands:

Bladder campion (Silene latifolia, Mill, Britten & Rendle).

Field bindweed (Convolvulus arvensis, L.)

Ox-eye daisy (Chrysanthemum leucanthemum, L.)

Perennial sow thistle (Sonchus arvensis, L.)

White cockle (Lychnis alba, Mill.)

Wild mustard (Brassica arvensis, L.) Ktze.

Wild oats (Avena fatua, L.)

Blue weed (Echium vulgare, L.)

Canada thistle (Cirsium arvense, L.) Scop.

Chicory (Cichorium intybus, L.)

Couch grass (Agropyron repens, L.) Beauv.

Doeks (Rumex crispus, L., and Rumex obtusifolius, L.)

Ragweed, common (Ambrosia artemisiifolia, L.)

Ribgrass (Plantago lanceolata, L.)

Russian thistle (Salsola kali, L.)

Stickseed (Lappula echinata, Gilib.)

Stinkweed (Thlaspi arvense, L.)

Tumbling mustard (Sisymbrium altissimum, L.)

Wild carrot (Dausus carota, L.)

Wild barley (Hordeum jubatum, L.)

Cinquefoils (potentilla sp.)

Burdocks (Aretium, sp.)

Hawkweeds (Hieracium, sp.)

Field peppergrass (Lepidium camp-estris, L.)

Sow thistle, annual (Sonchus oleraceus, L.)

Sow thistle, spiny-leaved (Sonchus asper, L.) Hill.

Prickly lettuce (Lactuca scariola, L.)

MIDSUMMER DANCE TO BE HELD ON FRIDAY, JULY 22

Invitations have been issued by the A.S.D. Club for a midsummer dance in the McIntyre recreation hall, Schumacher, on Friday evening, July 22nd. The A.S.D. orchestra will furnish the music for the evening. Dancing will commence at 9 p.m. Refreshments will be served. Admission is by invitation.

To know a thing should be done, and not do it when called upon, is something like filling up the gas tank and starting the engine running without throwing in the clutch. Knowledge is latent power, but it is worse than worthless if not used, it is waste.

Stop Bleeding AT ONCE PREVENT BLOODPOISONING WITH DOUGLAS' EGYPTIAN LINIMENT

time going as far north as Moose Factory. He never became a factor or had full charge of a post, preferring, as he expresses it, to remain independent and enjoy more liberty and greater freedom. For many years he has had his home in Haileybury on Browning Street West and he surely enjoyed the celebration on Friday and revelled in the memories of other days. He has a clear recollection of the time of Confederation and the excited interest which all took in the formation of the new Dominion.

"It was particularly interesting to meet and talk with these pioneers of the early times on the occasion of the Diamond Jubilee and their presence officially at the grounds in response to an invitation by the chairman of the committee, Mr. G. F. Summers, was he outcom eof a happy thought and lent and added solemnity to the commemoration ceremonies.

"In addition to those who were awarded the prizes, Mrs. C. C. Farr had a place of honour at the ceremony as the widow of the founder of Haileybury and there were several others who were among the town's early residents who joined in the celebration.

"S. St. Louis won the prize for the largest family on the grounds. He was present with Mrs. St. Louis and ten children, and the whole family was not there either."

WOLVES ARE HARD TO HIT EVEN WITH THREE SHOTS

The Powassan News says:—"Jack Hummel saw a big black bear in his clearing the other day. Now he's carrying a rifle in the hope of getting another glimpse of bruin. On Sunday evening James Gibson of Ruth Lake had three shots at a wolf which he espied from his veranda, but Mr. Wolf evidently made a safe getaway. Jim was satisfied his sheep would be safe that one night, anyway."

KAPUSKASING YOUNG MAN "JUMPS INTO THE HOSPITAL"

Pumping from the running board of one car into the path of another, and eventually landing in the hospital is the recent work of one young fellow from Kapuskasing. While in a state of intoxication, according to the police story, after the police had duly investigated the matter, a young man named Cousineau, jumped from the running board of the car on which he was travelling, into the path of another auto, with the result that he will spend the next few weeks in a hospital cot. Cousineau sustained a compound fracture of the leg and a number of lacerations in the head. He was knocked fifteen feet by the car which struck him, and which was driven by a resident of Valrita, near here, named Landswerk. The police report indicates that Cousineau was proceeding from Kapuskasing to Valrita, riding on the running board of a car, and when Landswerk approached, got off on to the road. He was taken to the hospital.

UNUSUAL FEATURES AT HAILEYBURY CELEBRATION

In connection with the celebration at Haileybury of the diamond jubilee of confederation there were some features worthy of special note and in which the people of this North Land will have particular interest. In reporting the matter last week The Haileyburian says:—

"Two Haileybury residents were awarded prizes at the Jubilee Celebration on Friday as being the longest continuous residents of the North who attended the ceremonies which marked the Dominion's sixtieth birthday.

"These were Mrs. A. Miron, who received the prize of a \$5 umbrella as the lady who had spent the greatest number of years in the district, and Mr. George David McLaren, who received a fine new cane in the gentlemen's class.

"Mrs. Miron first came to Temiskaming with her parents sixty-one years ago at the age of six months. She is a daughter of the later Mr. and Mrs. Edward Piche, who settled in those early times on the east shore of Lake Temiskaming and who were among the very first white people in this North Country. For a long time now Mrs. Miron has been a respected resident of Haileybury and her presence at the celebration, with her sister Mrs. A. Burwash, who had been in the North for fifty-nine years, formed a link with the past that touched the hearts of many old timers.

"Mr. McLaren, who won the other prize, was born at Chicoutimi, Quebec, on April 8th, 1853. His grandfather came from Scotland and settled in the New World many years before that time. Mr. McLaren recalls vividly his first trip into what we know as the North in September, 1873. He was in the employ of the Hudson's Bay Company and came up to the post at what we now know as the Old Fort on the Quebec side of Lake Temiskaming at the Narrows. In his trip from Chicoutimi the greater part of the journey was made by water, the distance between Montreal and Ottawa being practically the only stretch on which there was a railway. By steamer, rowboats, stages and finally by canoes, the party eventually arrived at their journey's end. Mr. McLaren came to the Old Fort the same year as the late C. C. Farr, and for many years thereafter he worked for the Hudson's Bay Company, at one

GOOD PROSPECTS FOR THE PAYMASTER MINE

Ore Improves at 200-ft. Level. New Plant Arriving. Production Likely to Increase

Recently a party of prominent shareholders of the company, including Mr. E. H. Walker, the president, visited the Paymaster mine and were much pleased with the general progress being made. Both surface and underground work was considered as satisfactory and there was general hopefulness and confidence expressed for the future. There was particular interest in the new equipment being added to the property. There have been eight carloads of machinery delivered at the property this week. Part of this machinery and equipment is understood to be from the Comstock mine in Nevada, one of the famous gold properties of this continent. This machinery is in the finest shape and has been tested and found good. The Paymaster in its past work has shown that it believes in getting the very best, the whole equipment being of the highest grade and chosen with clear understanding of the work to be done. The Paymaster plant is recognized as a regular model for a new mine of its type.

Good progress is being made in regard to the mill extensions and other additions to the plant to be installed. Some excavation work has been done for the foundations and work is well ahead of schedule. It is expected to have the complete equipment ready and everything in shape so that a production on the basis of 1500 tons per day will be possible by the middle of next January.

It is stated on official authority that ore drawn of late from the 200-ft. level has shown a distinct improvement in grade over the general average milled to date. Considerable quantities of ore showing visible gold have passed through the mill recently and in general the grade for the current period promises to be somewhat higher than formerly. Tonnage has also been increased and production figures which are given in the Ontario Government bulletin as something over \$26,000 for the first quarter of 1927, are likely to show an increase for the third quarter. Production at the present time is at the rate of about \$10,000 monthly. Milling has recently been brought up to around 200 tons per day.

Announcement is also made that the shaft porphyry body has been opened up by a haulage drift to the west and to date has shown better values than those of the ore taken from No. 1 ore body on the 300 ft. level. Good milling ore was found in the shaft and in the station at 300 feet, all of which went through the mill. Drifting east is proceeding at a depth of 475 feet on the United Mineral Lands property and cross cuts south and north have been started. The south cross cuts are expected to intersect the continuation of Ankerite's No. 1 vein.

Mother: "I just knew he'd win something in his athletics."

It's not exactly the hours you put in, but what you put in the hours.

SILVER IN COBALT FOUND UNDER THE SIDEWALK

"All the romance," says The Northern Miner, "has not departed from Cobalt. Under the sidewalk alongside the road leading by the O'Brien Mine, one of the best travelled ways in the central part of Cobalt camp, leasers have found a three-inch high grade vein. This is on the original Chambers-Ferland property, scene of one of the earliest workings in the camp, the ground being a small piece wedged between Nipissing, O'Brien and LaRose. The leasers are a small local syndicate headed by John Shaw. They are now sinking on it, having proved a long enough length to indicate something worth while. They took up the lease last fall but were able to do very little work. The find has just been made. The three-inch width is heavy in cobalt and silver. Typical pieces seen by The Miner should run one to four thousand ounces. About seventy bags of this material are piled up. Examination of the old underground workings shows no work near this point."

The Diamond Jubilee celebration at Kirkland Lake was especially well carried through and most creditable to all concerned. There was one "fly in the ointment," however, and that is that the Canadian Legion and others concerned in putting on the day may also have to put up a deficit. All returns had to be secured through the sale of tags, and the crowd of over 200 contributed only about \$200.00, or at the rate of 10 cents each. If Kirkland Lake had a closed-in grounds the admission fee would have been set at 50 cents at least, and \$1.00 would not have been too much for the entertainment provided.
