CORN FLAKES

## Ten Years Ago in Timmins

FROM DATA IN THE PORCUPINE ADVANCE FILES

“Recently there have been many complaints about animals such as horses, cows, calves, dogs, and what-not, running at large on the streets at night, and destroying gardens, lawns, etc.” This was the opening sentence in an article in The Advance ten years ago, though some owners of lawns and gardens may think it would be all right for to-day. The Advance urged all good citizens to see that none of their animals did damage to the valued property of others. The Advance concluded with the paragraph:—“Good citizens will see to the preventing of any further loss along this line, and those who lack in the qualities of decent citizenship must be taught in some manner or another to consider the rights of others.”

Ten years ago women from all over Ontario gathered at Toronto to assist in conference with the Dominion Food Controller, Hon. W. J. Hanna, in the planning for preventing of food waste and the encouragement of thrift and economy. The head of each municipality in Ontario was asked to appoint delegates to represent the different localities, and Mayor McLaughlin appointed Mrs. J. A. McInnis and Mrs. J. A. Howse as the representatives of Timmins at the conference.

While cleaning up brush and debris at Twin Falls ten years ago for the Abitibi Power & Paper Co. two Swedes were reported to have uncovered an unusually promising gold find in Rickard township, about three miles east of Twin Falls, on the Abitibi river. One prospector said to The Advance “Why the gold is sticking out of the quartz in pieces as big as the end of your thumb, and the ore is well sprinkled with that kind of gold.” There was a great old rush of prospectors into the district. There were stories of veins 20 to 30 feet wide, and everybody had a good time.

The inconvenience of the war days of 1917 is indicated by a paragraph in The Advance stating that in accordance with an order from the Dominion Food Controller no beef will be served at restaurants, on Tuesdays or Fridays. The meat regulation, however, was never really in force here, though for a time there were no potatoes at the local restaurants, and there were the usual restrictions on the use of sugar.

Ten years ago Miss Laura Hughes,

of Toronto, a niece of Sir Sam Hughes, Minister of Militia at that time, gave an address to the Porcupine Miners' Union at Timmins. Miss Hughes emphasized the fact that the people themselves are to blame for the evils there may be in their governments. If liberty and democracy were worth fighting for, she said, they were worth having. They were even worth thinking about and working for. The people—the workers—had the majority, the political power, the majority of the votes and they would have anything and everything they wanted in a political way if they would join together in an intelligent way and work together in their own interests. Any evils that might be were in existence only because the people did not use their political power. Miss Hughes criticized the Government very strongly, especially in regard to war contracts. She suggested that the manufacturers controlled the politicians and the others in authority. She thought price control was more needed than food control. Mr. Wm. DeFeu presided at the meeting. In closing the meeting he said that 75 per cent. of the miners of the Porcupine now belonged to the Porcupine Miners' Union, and he asked the others to join up and give 100 per cent. efficiency to the organization. Mr. DeFeu referred to some of the difficulties of the previous few months. To quote The Advance report of the meeting:—“One of the difficulties was the unfair attitude of the press. They were asking no favours and expecting none, but they thought there should be a square deal for all. The Porcupine Advance, he said, was the only newspaper in the district that had given the men a fair deal. When suggestions of disloyal-

ty had been thrown at the men, The Cobalt Nugget had refused to publish the fact that 400 members of the Union were serving in France, and letters replying to criticisms in other ways had been refused publication by the Cobalt paper.”

A paragraph in The Advance ten years ago referred to a business change in one of the pioneer firms of the camp. The item said:—“Mr. S. I. Bucovetsky has retired from the firm of Bucovetsky Bros., and the business will hereafter be carried on by Mr. Sam Bucovetsky. Chas. Pierce & Sons have taken over the whole big grocery stock carried by Bucovetsky Bros., and added it to their own big stock. Mr. Sam Bucovetsky will centre the attention of his store on dry goods, boots and shoes, furnishings, etc., the grocery department being discontinued to permit of large room and better service to the increasing patronage of the Bucovetsky store.” Mr. Sam Bucovetsky's store ten years ago was in the premises now occupied by F. M. Burke.

During 1917 there were many seizures of liquor coming into the camp, the chief cause for the seizures then being the plan of three or more men who might or might not live together giving in together to purchase liquor, thus attempting to “put one over” on the police and the law as it stood. Ten years ago Provincial Officer Aekroyd was very active here in making liquor seizures.

The Advance ten years ago, as today, was always anxious to record any beauty or oddity of this North. One of the items in The Advance ten years ago was as follows:—“An unusually beautiful appearance of the Northern Lights was visible in Timmins on Saturday evening, the Lights stretching from horizon to horizon and being particularly clearly defined and rich in shades and highlights. The Northern Lights are always wonderful here, but Saturday's showing was a special.”

“Fewer failures in Mining than Commerce” was the heading on an article in The Advance ten years ago. The Advance quoted the president of a large bank in Chicago as saying that without the mining industry the country would be bankrupt. “Mining,” he said, “made Great Britain the world's commercial dictator. Mining made the United States the richest country in the world. Show me a country without mines, and I will show you a people sunk in degradation, and poverty makes cowards of nations as well as individuals.”

At a meeting of the Tisdale township council on July 21st, 1917, the following resolution was moved by councillors McDougall and Easton and carried unanimously:—“That this council purchase from the Geo. Taylor Hardware, Limited, one only Double Tank Chemical Engine, as per specifications submitted, manufactured by the American LaFrance Fire Engine Co. of Canada Limited, said engine and apparatus to be mounted on a Ford chassis, the price to be \$1450.00 f.o.b. cars Toronto.” At a special meeting of the Tisdale council the same week the council accepted a new agreement with the Porcupine Telephone Lines to reduce the rental charge for a business place phone to \$40.00 per year and \$22.50 for a private residence phone. The rate for calls between Timmins and South Porcupine was set at ten cents per call of three minutes, with a rate of two cents per minute over the first three minutes. Councillor D. Mackie was appointed acting Reeve during the absence of Reeve S. Kennedy.

Among the local, personal and district notes in The Advance ten years ago were the following:—“Mr. W. Bounsell is on a visit to Smooth Rock Falls.” “Mr. Bill Oakes, of the Me-

Intyre, has returned from a visit to the east.” “Mr. D. Kerrigan, who has charge of the T. & N. O. greenhouses at Englehart, has been in Cochrane recently with a number of workmen, fixing up the station grounds and planting annuals and perennials. The perennials planted last year wintered well and are looking fine this year. There are many beauty spots now along the T. & N. O. While this sort of good work is in favour The Advance would urge attention along this line at Timmins.” “Mr. C. E. McDowell has been appointed manager of the Ontario Experimental Farm at Monteith.” “Matheson Women's Institute has amalgamated with the Matheson Patriotic Society so as to simplify war work in that good town.” “Mr. J. H. Black, general manager of the Northern Canada Power Co., is in camp on a business trip.” “Mr. and Mrs. P. Lynette, of Toronto, are spending their vacation at the home of their daughter, Mrs. J. E. Newton.” “Mr. Chas. Dalton is back in town after a visit to Toronto.”

“Mr. B. E. Martin has returned to camp after having a successful operation on his throat by Toronto surgeons.” “Mr. Dave McDougall has left the Dome Mines where he has been for a period of six years in charge of the compressor plant.” “This week a merry-go-round is doing a merry business under canvas just across the town line in Moneta.” “Mr. and Mrs. Stanley Kitchen, of Schumacher, are spending their vacation at Mr. Kitchen's old home near Barrie.” “The thermometer registered 95 in the shade Tuesday of this week.” “Acting Chief M. Sally picked up several Austrians lately for travelling without the necessary permits.” “Constable M. Greer returned on Wednesday last from his trip to the East where he spent some extra time on account of an attack of rheumatism. Mrs. Greer and children also returned later in the week from their holiday near Ottawa.” “Those who were so provokingly sure that no one would take advantage of the free lots offered under the auspices of the Board of Trade for the cause of greater production, should see the lots now under cultivation. Those who accepted the free lots are more than pleased with the prospects, and many who did not grasp the opportunity thus offered now wish that they had.” “The tea given on Thursday evening by Mrs. A. R. Globe and Mrs. R. J. Jemmett, under the auspices of the Women's Auxiliary of St. Matthew's church, at Mrs. Jemmett's home, corner of Elm street and Second avenue, proved a delightful success. Cards, dancing, refreshments and music were among the features of the evening, and Mrs. J. A. Theriault and Mrs. J. R. Todd pleased all with their solos. The decorations and arrangements of

the house for the occasion were noteworthy, the “smoking room” being an attraction for the gentlemen, and the artistic decorations, in which daisies, buttercups and flags had appropriate place, pleasing all. The event was well attended and all present passed a very pleasant evening.”

### DISCOVERY OF HIGH-GRADE BY DUPRAT IN MONTBRAY

A discovery of high-grade, made early Thursday morning on Duprat property in Montbray Township, has revealed ore carrying massive chalcopyrite over substantial width, according to official information received last week by Arthur E. Moysey and Company. The force of miners is being doubled immediately. The management expect this new ore will run exceptionally high; also that further development will reveal an extensive ore body. The discovery was made on the property recently purchased by Duprat and is the largest block of ground held by any company in Rouyn.

At Sudbury some days ago Miss Grace Castonguay was sentenced to two months in jail for selling liquor contrary to the Government Control Act. She is the second woman charged with bootlegging to be sent to jail from Sudbury under the new act. A man was found in the place at the time of the raid was fined \$10.00 and costs.

### What Price Vanity

Only those who have experienced the peaceful relief of eye comfort after struggling along for weeks, months and sometimes years, knows the wisdom of proper attention and care of the eyes. Vanity—the fear of a changed appearance—quite often keeps eye sufferers from seeking relief.

This is foolish because rapid strides have been made in optical design, making it now possible to find glasses which will conform to your face. In fact—more often looks are improved by glasses. If your vision is faulty, you should seek an examination at once—and a perfect fitting.
