GREAT MINING WEALTH YET TO BE DEVELOPED

Secretary of Mining Association Touches on Many Interesting Matters Relative to Mining.

Mr. G. C. Bateman, secretary of the Ontario Mining Association, recently addressed the Montreal branch of the Canadian Mining Institute. The banquet was held in the Engineers' Club, Montreal, and Mr. Bateman's subject was "Mining as a Permanent Industry."

One of the points especially stressed by Mr. Bateman was that Canada has one of the greatest undeveloped mineral areas in the world.

The great area in Northern Ontario to which the speaker referred contains 2,600,000 square miles, of which only seven per cent. has been exploited, he said. This small proportion of the stores of ore as, he stated, so far produced a billion dollars worth of metals.

Discussing the permanency of mining as an industry, Mr. Bateman traced the part played in history by metals, and showed that the desire for them, particularly the precious metals, has been the driving force of conquest, colonization and national development throughout the ages. In Northern Ontario and Quebec, conquest has been only of nature, and has led to settlement and the establishment of big industries. "A little over twenty years ago," he said, "Northern Ontario was practically an unknown wilderness. Today it is the centre of a large and growing industry. The value of the metallic production there last year was about \$60,000,000, an increase of \$10,000,000 over the preceding year."

"In northwestern Quebec the best organized and the most intensive scientific prospecting the world has ever seen is being done," the speaker asserted. "The northern country might lie dormant for many generations if it were not for the exploitation of mineral deposits."

Other speakers were Dr. J. B. Porter, of McGill University, Major G. G. Ommanney, of the C.P.R., C. Price-Green, of the C.N.R. Major Wheatley spoke of the Empire Metallurgical Congress opening at Montreal this month, to which at least a thousand delegates from all over the Empire are expected to come.

OPENING OF GOLF CLUB HOUSE AT HAILEYBURY

In reference to the fine new club house of the Haileybury Golf Club, The Northern News last week says:—

"No gayer, smarter dance than that which marked the opening of the Haileybury Golf Club's new clubhouse has been held locally. The beautiful location of the building, its appointments, and above all its charming and striking decoration scheme, added to the pleasure of a pleasant occasion. The dance on Friday evening last followed a tea given by the ladies in the afternoon, and the notable event in the club's career was signaled by unusual activity on the links."

"The clubhouse is spacious within, and has wide deck verandahs on the sides facing the lake and the course. A large lounge room, with a handsome fireplace facing the doors, gives ample space for dances, luncheons or teas. Leading off it is the ladies locker room and a completely equipped salle de cuisine. Downstairs is the men's locker room."

"The striking feature of the lounge and ladies room is the colorful scheme of furniture and hangings. This is carried out dominantly in red and black, with orange tones to give a charming suggestion of warmth and lightness. The painted furniture, while following the conventional in shape, does go beyond the ordinary in design. The whole ensemble drew many compliments upon Mrs. R. H. Lyman and the ladies' committee, of which she is chairman. Mr. R. H. Lyman prepared the original plans upon which the building was designed and constructed."

"Affording a pleasant locale for social gatherings, the clubhouse is expected to become a centre for summer season activities."

"The inaugural dance was attended by practically all the Cobalt and Haileybury golfers, by certainly all who were not away and attracted several well known people from out of town, including Mr. and Mrs. R. J. Ennis and Mr. and Mrs. J. J. Denny, of Schumacher, Mr. and Mrs. Angus Campbell, of Bestel, Mr. and Mrs. C. Williams, Dr. and Mrs. Moore, Mr. A. F. Brigham, of Timmins, Mr. and Mrs. Hammond and Dr. and Mrs. Dudley, of North Bay."

"After the afternoon games tea was served to the guests by the ladies, Mrs. G. A. Bagshaw, and Mrs. S. Norfolk presiding at the tables. The floral decorations of the room and tables was especially pleasing."

"The dance in the evening, which was informal, was held under the auspices of the directors, and the wives of past and present directors acted as hostesses. Supper was served by the lady members, with Mrs. Pickard and Mrs. Haentschel presiding at the office and tea tables."

"The Ladies' one club game tie was played off on Tuesday afternoon at the Haileybury links between Mrs. Kilpatrick and Mrs. Lyman, the former winning the game."

NOTEWORTHY PROGRESS ON SCHOOL ADDITION

Excellent progress is being made on the work of construction of the new addition to the public school building in Moneta. Messrs Martin and Chamberlain, of North Bay, who have the contract for the work, are not only keeping well within the scheduled time of construction, but they appear to be even ahead of schedule. One reason for the good speed attained has been that no waits for materials, and so no delays have arisen from this cause, as too frequently occurs. The steel for the building reached here within ten days of the date of ordering, which is remarkable time. This, of course, might be set down as more or less good luck, but most of the excellent progress made in the work has not been due to luck but to good work and good judgment. Practically all the materials used in the work are being bought from town firms and so there are no delays in having orders filled. From present indications the work with all be completed ahead of scheduled contract time. The contractors expect to hand over the addition, all completed, by Sept. 15th.

CONIAGAS WITHDRAWS ITS OFFER OF FINANCING

Last week's issue of The Northern Miner says:—
 "Coniagas directors have withdrawn the offer of their company to finance the construction of a 500-ton mill on Coniaurum following objections raised by one of the Goldale directors. Some other form of financing will have to be arranged and it is believed in Toronto that an offering of stock will shortly be made Coniaurum shareholders."
 "The offer of Coniagas to loan \$800,000 at 7 per cent., plus a bonus of 80,000 Coniaurum shares, was approved by the majority of stockholders at a special meeting held in St. Catharines on Friday. Objection to the plan was raised by Goldale and one other large shareholder. In view of this the Coniagas directors have decided not to proceed with the scheme."
 "Some months ago Coniaurum shareholders approved of an increase in capital from \$5,000,000 to \$6,000,000. At that time it was estimated a sum of \$600,000 would be required to erect the mill and bring the property into production. To arrange for

these funds it was proposed to sell 200,000 shares at \$3 to the stockholders. Further development work was undertaken on the property and treasury funds spent in this manner and it was then found of \$800,000 would be required to carry out the erection of the mill and complete development."
 "A meeting of the directors was held late in July to discuss ways and means to raise the money. Several proposals were discussed. The suggestion the company make an issue of bonds did not meet with approval. The sale of stock was fully gone into but there was doubt as to the success of this. There was no assurance that Goldale would take up its allotment and there was also some doubt about Coniagas. Finally the board decided to borrow the money from Coniagas. It was decided Coniagas would lend Coniaurum \$800,000 at 7 per cent. Under the terms of the loan Coniaurum would have no principal payment to make until after the mill had been in operation for one year. Payments were then to be made at the rate of \$100,000 a year for five years and the balance due the fifth year. These proposals were approved by the stockholders' meeting of Friday. Goldale

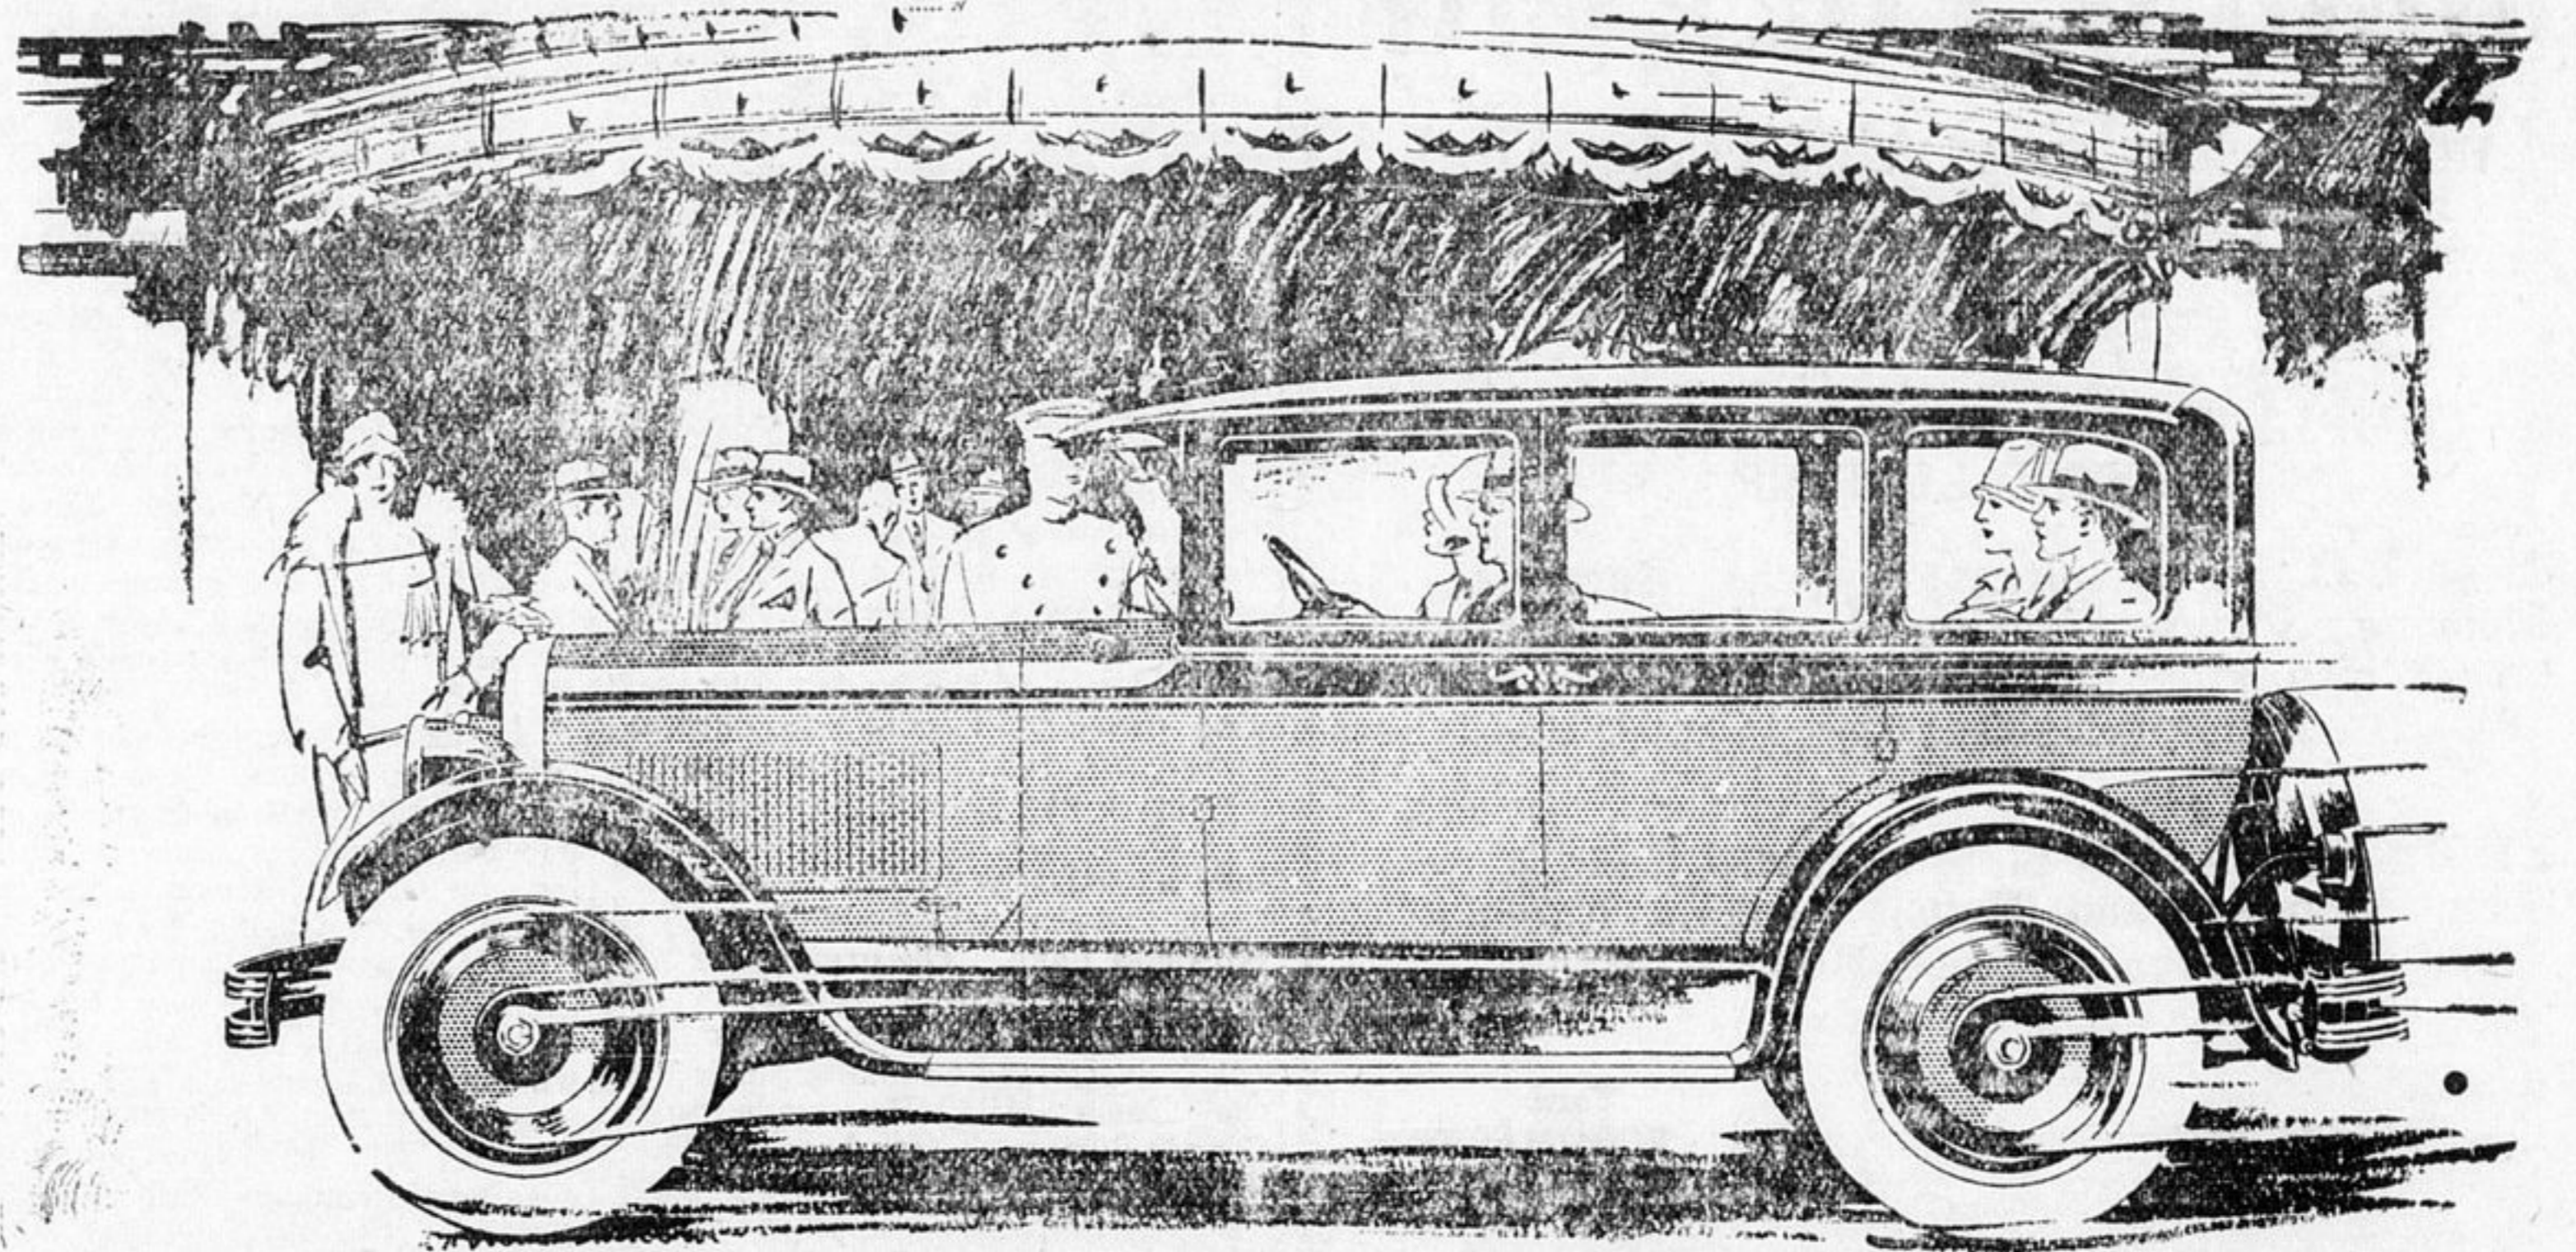

objected to this and submitted a counter scheme to raise money through the sale of stock.

"Coniagas had in no way committed itself to the loan and in view of the objections decided to withdraw their offer. Coniaurum still has upwards of \$100,000 cash in the treasury and it is expected means of raising the funds in another manner will be found shortly."

FIRE RANGER AT ROUYN SAVES LIVES OF FOUR

Fire Ranger Michaud, of Rouyn, showed a courage and coolness some days ago that resulted in the saving of the lives of four people. Mr. E. Labelle with his wife and two children were in a speed-boat making for the landing at Rouyn when a canoe paddled by O. Charlemont came along, the two colliding and both boat and canoe overturning. Charlemont was able to save himself but the family in the boat were in grave danger when Michaud, who had noticed the accident from the shore, jumped in and rescued the four. No one was the worse for the accident, except that the man, the woman and the youngsters received a big ducking.

STUDEBAKER
 Made in Canada

This 4-Door Studebaker Dictator Sedan
 Companion car to the famous Commander

Now **\$1555** Think of it!
 including front and rear bumpers, shock absorbers, etc.—more than \$100 in extra equipment without extra cost.
 and \$1685 f.o.b. Walkerville, Ont.
 Government taxes to be added

The Studebaker Dictator is the most powerful sedan in the world of its size and weight, according to the ratings of the Society of Automotive Engineers.

And according to all comparisons it is the greatest value ever offered—a bargain in quality at its new One-Profit price!

You must see it to appreciate its beauty—ride in it to know its comfort—and drive it to know its abundant flow of smooth, eager power!

\$100 worth of extra equipment without extra cost

All Studebaker models have more than \$100 worth of extra equipment, including front and rear bumpers; shock absorbers; engine thermometer and hydrostatic gasoline gauge on the dash; and coincidental lock to ignition and steering. Equipment also includes 4-wheel brakes; disc wheels; full-size balloon tires; no-draft ventilating windshield (exclusively Studebaker); oil filter; automatic windshield cleaner; rear-view mirror; rear traffic signal light; cowl lights and two-beam acorn headlights, controlled from steering wheel.
