The New Liskeard Speaker of Thursday, August 11th, tells of the marriage in that town of Miss Lamb, a former member of the teaching staff here. On Monday, August 8th, Laura May, daughter of Mr. and Mrs. A. Lamb, became the bride of Terence George Honer, of Kirkland Lake, the ceremony being performed by the Rev. M. N. Omond. Luncheon was served at the home of the bride. The wedding was a very quiet one, only the immediate relatives being present. The bride and groom left on a motor trip to Toronto and from there will take a boat trip up the Great Lakes. Upon their return they will reside at Kirkland Lake. The groom is a brother of Mr. Walter Honer, of the Dome Mines, and some years ago came out from Ireland to take a position in the Dome Mill. He made many friends during his stay here as did also his bride during her two years' teaching, and all join us in wishing them every happiness and prosperity on their journey through life.

IMPORTANCE TO CANADA OF THE MINING CONGRESS

In an address to the Rotary Club at Ottawa this week, Mr. John McLeish, director of the Dominion Mines Branch, referred to the fact that the holding of the second triennial Empire Mining and Metallurgical Congress in Canada was significant of the importance with which this country's mineral resources and mining industries were regarded both in London and throughout the Empire. This triennial gathering, which held its first meeting in London England, in 1924, is composed of the leading mining experts within the Empire. It will spend six weeks in Canada from August 22 to September 28, and the members will visit all the chief mining centres in the Dominion. A session will be held in Ottawa on August 24. The visit of the Congress would give Canadians a unique opportunity to show not only the mining developments but the mining possibilities of the country and the great future which lay ahead, Mr. McLeish said. Canada had one of the greatest mining fields left in the world today, only a small percentage of which had been prospected. The results however had been so satisfactory that exploration and development must be greatly accelerated. Capital was needed to develop the industry and while it was welcomed from any source, he, with other Canadians, would prefer to see the development of natural resources financed as far as possible within the Empire. Given the requisite capital it was difficult to escape the conviction that mining progress during the next 10 years would equal if not exceed any similar period in the history of Canadian mining.

The Rouyn Miner last week says:—"Archie" MacDonald, the National Express clerk, who broke his leg a few days ago, has left for his home in Timmins to recuperate. "Archie" was on his way home in the dark when he slipped into culvert at the side of the road and broke his left leg."

Now packed in Aluminum.

**PICTURES OF LINDBERGH LANDING AFTER HIS FLIGHT**

The first authentic pictures of the epochal landing of Capt. Lindbergh, America's "Ace of All Time," after his 3600 miles flight, alone, over the Atlantic, will be shown on Friday and Saturday of this week at the Goldfields theatre, in addition to the regular programme of pictures. Frenzied crowds greeted Lindbergh at his landing at Le Bourget field, then besieging the U.S. embassy in efforts to get a glimpse of the brave pilot. The pictures at the Goldfields theatre on Friday and Saturday should prove of unusual interest, as everybody is greatly interested in Capt. Lindbergh and his achievement.
