Meets every 1st and 3rd Tuesday of the month.  
All visiting brethren welcome  
FRED JOHNSON, W.P.  
H. COOK, REGISTRAR

**Cornish Social Club**  
P. VARKER, President  
R. BURMAN, Secretary-Treasurer, Box 1507, Timmins  
Meetings held in Hollinger Recreation Hall, third Saturday of each month. Open to all of Cornish birth or Cornish Associate.

**Schumacher L. O. L. NO. 2975.**  
Meets on the Second and Fourth Thursday of each month at the Schumacher Orange Hall. All visiting members welcome.  
J. C. BONNELL, N. R. TARIO  
W.M. R.S.

**Lancashire Club**  
The Lancashire Club of Timmins meets in the Hollinger Recreation Hall the First and Second Saturdays in each month at 8 p.m. Lancashire people are welcome and may bring friends by invitation only, which may be obtained from the Secretary or President on application, or from any member of the Committee.  
H. UNSWORTH, President  
MRS. T. RICHARDS, Sec.-Treas.  
Box 1037, Timmins, Ont.

**TIMMINS LODGE No. 1815.**  
United Brotherhood of Carpenters and Joiners will meet every 1st and 3rd Tuesday of each month in the Miner's Union Hall, 2nd Ave. at 7.30 p.m.  
P. J. BEAUDIN, Financial-Secretary.  
-35-46

**The Caledonian Society of Timmins**  
Open to native-born Scots and Scotswomen and those of Scottish descent.  
Membership fee, \$2.00 per year for ordinary members and 50c. per year for associate members.  
Meetings every second and fourth Friday in the month in the Hollinger Hall.  
W. SHEWAN, President  
L. McCLURE, Secretary.

**RAISIN BREAD SUPREME**  
When you buy a loaf of our raisin bread it is gone before you know it. The children will locate it and help themselves every time they experience that "gone" feeling. The adults, too, are always ready for a slice of it. To be on the safe side buy several loaves at a time. No chance of it getting stale. Make our bakery your sources of supply.

**JOHN WATT Baker**  
Third Ave., Timmins

## PORCUPINE HAS GIVEN CANADA ITS PLACE AS THIRD AMONG WORLD'S PRODUCERS OF GOLD

Canada now ranks third among the world's gold producers, being exceeded only by the Transvaal and the United States. The latter has decreased in gold production from \$101,000,000 in 1915 to \$45,300,000 last year, while Canada has increased from \$19,000,000 a dozen years ago to \$35,700,000 for 1926. Canada is accordingly fast on the way of taking second place as a world producer of gold.

It is the Porcupine that has given Canada its high place in the world's gold production. Since 1910 the Porcupine has produced a total of close to \$200,000,000 in gold. Last year Porcupine's contribution to gold production was \$23,680,605, or seventy-five per cent. of Ontario's gold production. Russia, with a production of \$18,000,000 in gold in 1926, is fourth on the list of the world's gold producers, so it is easy to see that Porcupine may now be considered as a good third in the world's producers, with fair chance of being second at no very distant date.

Porcupine was first seriously prospected in 1909. Among the prospectors here at that time may be mentioned: Benny Hollinger, Alex Gillies, Sandy McIntyre, Barney McEnaney, Jack Wilson, Harry Preston, George Bannerman, T. Vipond, and others. The names of some of these prospectors are preserved in successful mining properties of the present day. The first mine to be worked in the Porcupine was the Hunter at Golden City. The Hollinger and Dome, however, soon outlasted the first mine. The Hunter has been idle for years, while the Dome and Hollinger have developed into big propositions. The Hollinger is the largest individual gold-producing property on the continent and bids fair to take the first place as a regular "gold factory." The McIntyre, after some years of discouragement, has won outstanding success and is now one of the big producers, with an assured future of still greater progress. The following is the production of the Porcupine since the first bullion was made in this camp:

Year	Value
1910	35,539
1911	15,437
1912	1,730,628
1913	4,294,113
1914	5,206,606
1915	7,462,111
1916	9,391,408
1917	8,229,744
1918	7,767,907
1919	9,941,803
1920	10,597,572
1921	13,103,526
1922	18,374,658
1923	17,313,115
1924	22,135,534
1925	24,733,120
1926	23,680,606

The dividend record of the Porcupine mines is a noteworthy one. For the year 1926 three mines, Hollinger, Dome and McIntyre, paid to shareholders the sum of \$8,510,268. So far this year the above three mines and the Vipond have distributed over five and a half million dollars, the exact figure being \$5,555,334. Up till the end of 1926 this camp paid in dividends \$55,665,566, and, with the disbursements so far this year the total exceeds \$61,000,000. To date the Hollinger has paid out over \$40,000,000 in dividends, Dome Mines over \$11-

**Nearly \$200,000,000 Produced by Mines of Camp Up to July 1st. The Hollinger Alone Has Produced Over \$120,000,000 in Gold. Production Shows Steady Increase. Further Expansion Assured for the Near Future. Porcupine Camp Producing About \$2,000,000 a Month in Gold.**

500,000, and the McIntyre in excess of \$6,500,000. Vipond paid its first dividend this spring, and it amounted to \$67,500.

In considering the mines of the Porcupine, it is always well to remember that "the surface hasn't been scratched as yet." The men most closely in touch with the situation here agree that the chances are the best for more Hollingers, Domes and McIntyres to be developed in the district. In 1910 there were only two producers, Hollinger and Dome, in the camp. This year eight producers have been on the list and still others, notably the Coniaurum, are expected very shortly to join the producers. The Coniaurum is understood to be planning a 500-ton mill, and is believed to have the ore to justify the step.

**Hollinger**  
The Hollinger mine at Timmins is usually credited with being the greatest individual gold-producing mine in the world. It represents one of the most intensive developments in the mining world. Operations have been carried down more than 3,000 feet. There are over 60 miles of underground workings in this big gold factory. The plant covers an acreage of over six acres, and close to 3,000 men are employed the year round. At present 6,500 tons of ore are handled every day and plans are under way to increase the tonnage to 8,000. The total ore reserves, as at Dec. 31st, 1926, were over \$65,000,000. Last year 1,932,559 tons were milled, the average value per ton being \$7.99.

**McIntyre-Porcupine Mines**  
The McIntyre is one of the big mines of the Dominion. Its new shaft, to a depth of over 4,100 feet, is the deepest gold mine shaft on the continent. The McIntyre is producing at the rate of about \$4,000,000 in gold a year. Ore reserves are in the neighborhood of \$15,000,000. The new McIntyre shaft is one of the most perfect pieces of work of its kind to be found on the continent. The total production of the McIntyre to date is \$29,853,313. The McIntyre is planning enlarged mill capacity, it is understood, and a general expansion of business.

**Dome Mines**  
The Dome Mines has had a total production to date of \$36,998,742 in gold. Dividends of \$11,214,173 have been paid to shareholders. Dome last year failed to keep up with the flattering record of the other big producers in the camp, but if the Dome were in another camp it would likely be considered as an unusually good mine. Production continues around \$300,000 per month. For the first six months of this year production and profit figures were about the same as last year. Exploration is being carefully carried along at depth and big things are expected from this. The sinking of a winze to the 3,000-ft. level is just about completed, and when this is completed the property is to be thoroughly explored at depth.

**Vipond Consolidated**  
Vipond has been developed to a

depth of close to a quarter of a mile. Porcupine Crown, Thompson-Krist and Inspiration properties, all adjacent, were added to the Vipond's holdings. The plant of 300 tons capacity has been running at about 265 tons daily, and profits have been close to \$500 daily. Ore reserves are developed well in advance of the requirements of the present mill. The McIntyre has paid \$6,204,908 in dividends up to March 31st, 1927. The total value of ore reserves run past thirteen million dollars.

**Paymaster**  
The Premier Paymaster mine in Deloro township started production last year, and has good prospects. It is one of the Deloro township group of promising properties. Whereas the ore found in other mines of the Porcupine district is in the form of veins which occur in schist or sheared keowatin in close proximity to intruding bodies of porphyry, yet on the Paymaster Mine the chief asset in the way of ore is the porphyry formation itself, in which mineral is uniformly distributed. Paymaster has one of the most complete and up-to-date small plants on the continent, and everything is kept right up to the highest standards. The mill capacity is 300 tons a day, but plans are now under way to increase this capacity to 1,500 tons. The Paymaster is a low-grade proposition compared to other properties in the camp. A width of 100 to 120 feet contains gold indicated at \$3 to \$5 per ton. This dike has been thoroughly sampled through operating a mill for some months, and work is now in progress of enlarging the milling plant to 1,500 tons daily capacity. Extremely low costs are indicated on the strength of the great width of the deposit.

**Coniaurum Mine**  
The Coniaurum is likely to be the next producer in the Porcupine camp. This mine is a consolidation of the Newray, Armstrong-Booth and Goldale claims. Considerably over \$1,000,000 has been spent on the development of the property. Work has been carried to a depth of 1,500 feet. A lot of ore has been developed, and this is thought to be continued from a depth of 1,500 feet to 2,000 feet.

**Other Properties**  
In addition to the properties mentioned above there are a number with unusually promising prospects. It is understood that there is great likelihood of the Hayden Mine in Ogden township being re-opened at an early date.

A re-organization of the Consolidated West Dome Lake took place this year. The mill was closed down a short time ago, pending refinancing and the carrying out of a further development programme. Recent development work has opened up interesting possibilities on the old West Dome. Preparations are now under way for more extensive development, and this will be carried down to the 1,200-foot level. Lateral work will also be started on the old West Dome

ground as soon as power is available there.

The March Gold, which started production last year and closed down some months ago, owing to lack of finances, is resuming an extensive development campaign at once. The company has been reorganized, and money is now on hand to pay off the debts and carry out the proposed programme. Three more levels are to be opened up.

Ankerite Mines, which is being operated by the Porcupine Development and Finance Company, started milling last year. The mill here is running about 200 tons a day, and some improvement has been apparent in the grade of ore. There is a likelihood of increasing the tonnage here. The shaft is down 600 feet.

**Opportunity for Capital**  
The Porcupine camp offers practically unlimited opportunity for the capitalist who is ready to invest his money in likely properties. The Porcupine is awaiting such capital to further develop the resources here.

**Kamiskotia**  
The most important new area opened up in several years past is the Kamiskotia district. Here the copper-gold discoveries have attracted world-wide attention. There have been a number of properties in Kamiskotia sold to the big mining companies, practically all of whom have investigated Kamiskotia. The Hollinger, together with practically all of the other big mines, has properties in Kamiskotia, but in regard to these claims the Hollinger has followed its usual business policy of saying nothing about the matter. The Hollinger is proceeding with the business of testing out the properties, and that is all there is to it. The general opinion seems to be that Kamiskotia is going to prove a big camp, with many mines to add to the prosperity of Porcupine.

**MILLINERY OPENING AT THE FRENCH SHOPPE, HERE**

The French Shoppe, in the Hotel Goldfields block, Pine street, Timmins, announces its fall showing of select millinery. This year Gainsborough and Marlborough hats are featured, but there are also attractive designs in the latest types of other popular and approved models. The opening is announced for to-day, Thursday, Sept. 1st, and the ladies will find a visit to the French Shoppe a pleasing attraction, the store holding a wide variety of interesting and pleasing examples of all the latest and best in the season's modish headwear.

**BUS FROM SWASTIKA HERE OVER HIGHWAY ON SUNDAY**

The first bus to reach Timmins over the Ferguson highway from the south came here on Sunday last and attracted more than passing attention. This bus was from Swastika and Kirkland Lake and brought about twenty visitors to town for the day. Though not as large nor as elegant as some of the many buses owned in this camp itself, the visiting bus was a nice one, and being the first outside bus to reach here over the roadway it came in for much notice. It left again on Sunday for Swastika on its return trip.

TIME TO BUY FUR COATS

Our next season's models in fur coats of every description are now on display and we are busy showing out customers what is to be worn by well dressed women who are particular regarding their furs. We shall be pleased to show you also if you will call. We make furs to order and we also renovate and remake fur garments for our patrons.
