

TEMISKAMING BASEBALL TO AFFILIATE WITH O.B.A.A.

Feeling Along This Line Very Favourable to Such Action in the Central and Southern Groups

The fact that the Silver Centre team won the baseball championship of the North Land has given the sport an added interest to the fans in the whole southern and central group district, and already plans are under way to make next season bigger and better than ever. Around Cobalt and Haileybury it is felt to be a pity that Silver Centre, the team that went so far this year, should not have a chance to go farther. The only way that Silver Centre would be able to seek additional honours would be if the Temiskaming Baseball League were affiliated with the Ontario Baseball Amateur Association. Accordingly, suggestions for such affiliations have been freely made. There is now, according to all accounts, a strong probability that the T.B.A. will be affiliated with the O.B.A.A. next season. With this idea in mind, the present officers of the T.B.A. plan to hold the annual meeting of the league next month, instead of in the spring as hitherto. At this October annual meeting the delegates could consider the question of affiliation with the O.B.A.A. and the matter could be decided in time to make it practical. In view of the residence rule and other points, it would not be possible to decide the question with any success at as late a time as next spring.

There were eleven clubs in the three groups of the Temiskaming Baseball League this year. Haileybury dropped out early in the season, but the ten others in the three groups finished out the season. With the affiliation with the O.B.A.A. put into force, many are of the opinion that there would not only be more teams in the league next year, but also there would be greatly increased interest. Others are inclined to believe that the affiliation plan would have drawbacks that would not help affairs along. The question, however, is open now and both sides can discuss the matter fairly and fully. The general feeling will be to adopt the method that will mean the greatest advantage to baseball as a whole in the whole district represented by the Temiskaming Baseball League, and the present is the time to definitely decide upon that plan or method to make the greatest success all round for next year.

COCHRANE FAIR PROVES NOTEWORTHY SUCCESS

Last Thursday Cochrane held its annual fall fair. There was a large attendance at the fair and the exhibits were well worthy of the good crowds. The fair gave unquestionable evidence of the progress being made in agriculture in the district around Cochrane, the display in every department being especially good. This year's Cochrane fair may be written down not only as an attractive success, but also as a complete proof that the district around Cochrane has established itself as an agricultural area of importance. In this connection, it may be noted that in the district of which Cochrane is the centre, there is now groups of farms that will compare favourably with the farms of the South. These farms have good buildings, evidence noteworthy fertility and are well conducted by the farmers owning them.

INCENDIARISM EPIDEMIC SUSPECTED IN THE NORTH

Fires recently at Haileybury, Elk Lake and other places in the North Land have given rise to the idea that a regular fire-bug may be loose in the area, or that the setting of fires has become in the nature of a small epidemic. In none of the cases have the owners of the buildings concerned profited by the fires, and in others the owners have been quite heavy losers, so that it would seem that the fires have been set, if they are of incendiary origin, as suspected, by a person or persons with some type of mania along this line. Investigation is being carried on in the case of some of the fires and it is hoped to bring the guilty to punishment. In the meantime there will be more than the usual care, no doubt, in watching any persons acting at all suspiciously.

OUR policy is to serve our clients with a high resolve to merit their confidence and gratified appreciation.

TIMMINS AND ROUYN MEN STAKING AT LOCHALSH

There is considerable interest at present in Lochalsh area which is west of Sudbury on the C.P.R. Much staking is being done, several prospectors from Timmins and Rouyn camps staking for Northern Ontario syndicates. The prospectors now staking in the area are men with considerable experience in the Quebec and Ontario copper-gold fields, and this fact has given rise to the idea that copper possibilities in the field are now receiving attention. The Lochalsh section has been favourably commented upon by various experts who have visited the field. The present activity may result in the proving up of the district.

GOVERNMENT BULLETIN ABOUT HOME-MADE JELLIES

In making different kinds of jellies the housekeeper very often finds the results of her work to be somewhat uncertain. Sometimes the jelly refuses to harden, or it becomes sticky, or some other trouble crops up. However, a bulletin on Preserving Fruits and Vegetables in the Home, distributed by the Publications Branch of the Department of Agriculture, Ottawa, tells how to avoid these difficulties. It is pointed out that in order to make good jelly it is essential to have fruits that contain pectin and acid. The best fruits for making jelly are those which contain these two ingredients in the proper proportions, such as apples, grapes, currants and plums. Strawberries, blueberries, etc., lack pectin and require the addition of apples or currants which are high in pectin content. When fruit becomes overripe its pectin loses its value for jelly-making. It is therefore necessary to use fruits which is just ripe or slightly underripe. Full directions for making jellies and a number of recipes are given in the bulletin.

Mr. and Mrs. Jos. Berini returned last week from a holiday visit to the South, motoring over the Ferguson highway and visiting Fort William, Port Arthur, Montreal, and other centres east and west, and also touring part of the United States.

KAPUSKASING FAIR SHOWS PROGRESS OF DISTRICT

Good Exhibits in Practically Every Line. Flowers and Fancy Work Particularly Noteworthy.

The fall fair on Saturday last at Kapuskasing proved beyond doubt the fact that the country round about that thriving centre has great agricultural possibilities. There was an impressive display by the Dominion Experimental Farm at Kapuskasing, showing market produce, grain, flowers, etc., but these were not in competition. The farmers from the district were the competitors in the fair and the showing they put up in practically every line left no doubt of the district's standing as an agricultural country. There was a good showing of horses, both heavy and light. In the line of cattle, the Holstein seems to be the favourite in the district, and standard-bred stock seems to be popular with the farmers generally, which is certainly good business. No doubt the good work and the advice of Mr. R. Smith Balantyne, Mr. L. H. Hanlon and Mr. Beisler, of the Experimental Farm staff, has had much to do with the exceptional progress made by the farmers around Kapuskasing.

In grain, roots, vegetables and other lines the Kapuskasing Fair had a very creditable array of good exhibits. Stock in general, as well as poultry, were well represented.

If the farmers of the Kapuskasing area distinguished themselves at the fair, they were outside nevertheless by the ladies. The display of fancy work was a remarkable one and it would be difficult for many old-established fairs to excel it. The examples of sewing, lace, fine needlework was striking indeed. Much special attention was given to a wonderful rug of elegant workmanship and most artistic design, the work of Mrs. J. Belanger. It was a genuine work of art, the design, with its wonderful raised work and the beautiful handwork, making a rug that delighted the eye and made a outstanding appeal on account of its beauty and quality.

In bread, cakes, canned fruit and vegetables, the Kapuskasing Fair also took a leading place, and all round it may be said that the fair was a complete credit to those in charge and to the district represented.

The Northern News last week says: "Mr. and Mrs. C. Kemsley, who have been on a motor trip to Sturgeon Falls, Ottawa and Toronto are spending a few days with Mrs. Kemsley's parents, Mr. and Mrs. R. B. Holmes, before returning to their home in Timmins."

GREATLY IMPRESSED BY HOLLINGER AND McINTYRE

Porcupine Camp Generally Interested and Pleased the Mining Congress

Among the very interesting accounts of the Empire Mining and Metallurgical Congress tour through Canada, the report of A. B. Parsons, associate editor of Engineering and Mining Journal is noteworthy for its comprehensiveness. In the issue of Engineering and Mining Journal last week there is a very informative article, very profusely illustrated by half-tone photos of mining scenes around the North. The following part of the article will be of special interest in this camp:—

"At 4.30 p.m. the Congress left Kirkland Lake for Timmins where the members were the guests of the mining companies at a ball, which, to quote The Porcupine Advance, was 'the most perfectly planned and biggest event of its kind ever held in the North.' The next day was devoted to visits to the mines and mills of the district. The Hollinger, of course, attracted the biggest crowds, but thanks to the presence of many buses and automobiles, it was quite possible to see several of the properties and many took advantage of the opportunity. The Hollinger's splendid shaft equipment, the underground crushing stations, and the haulage arrangements, as well as the mill and cyanide plant were inspected and admired. A. F. Brigham, Hollinger's manager, was at the office to greet visitors.

"The new McIntyre shaft also was a centre of interest. Harry Kee, the superintendent in charge of sinking was on hand to give as much information as anyone wanted. An interested visitor was William T. Anderson, formerly of South Africa, who declared that the entire undertaking improved upon the most recent practice on the Rand. R. J. Ennis, manager of the McIntyre, and James Denny, mill superintendent, showed a large number around the plant and sent several parties underground.

"Robt. Dye, manager of the Vipond

entertained a number of guests, and various parties took trips to the more distant properties. During the first half of 1927 the Porcupine district, with eight mines contributing, produced gold to the value of \$12,156,000, with an average recovery of about \$6.75 per ton. Hollinger, incidentally, is now crushing close to 6,100 tons of ore per day, though the understood objective is 8000 tons."

A college education will help a boy with brains, while one without brains will be neither better nor worse for the experience.

Profit and Loss Account

Balance at Credit July 1, 1926	\$100,932.39
Earnings for year ended June 30, 1927	678,433.31
Reserve for Federal Income Tax	\$ 16,981.24
Dividend on 6% Cumulative Preferred Stock	217,138.55
Balance	545,245.91
	\$779,365.70

Magnitude of Operations
The following condensed statement of the operations of the utility companies which Power Corporation of Canada, Limited, controls, or is substantially interested in, is indicative of the magnitude of its operations:

	1926	1927
(1) Combined gross earnings for the fiscal period	\$12,974,984.90	\$14,681,610.14
(2) Net earnings for the same period available for Reserves and Common Dividends	1,891,703.65	2,072,651.83
(3) Total k. w. hours generated during 1926	850,000,000	1,153,262,000
(4) Total plant capacity (horse-power)	400,000	436,600
(5) Projects under development		48,000
(6) Undeveloped power sites		263,000
(7) Total ultimate capacity of plants		747,600

Power Corporation of Canada, Limited, owns 33.67% per cent of the outstanding Common Stock of these utilities.

"Why do I deposit in two Banks?"

"It's just straight business, that's all. Part of my savings I put in the bank around the corner. This account we use freely to get enjoyment out of life, and to meet the payments on our home.

"But it's the other account that puts the backbone into my estate. Immediately I opened this account my 'banker' placed a \$10,000 cash bond in a safety vault for me.

"According to the agreement my deposits amount to only 2 1/2% per year but cover interest, principal and all. Should I become totally laid up the 'Bank' pays me \$100.00 a month. And when I die my wife gets the whole \$10,000 bond in cash just the same.

"I learned of this plan through some of my successful business friends, who finance this way. Some people call it life insurance."

The above illustration simply shows how your plans for yourself and family can be made effective by insurance. Let one of our trained representatives 'diagnose' your needs for you.
