Winnipeg Business Men to Visit Timmins This Month

Party to Make Tour of the Mining Fields of Northern Ontario, Including Timmins, Kirkland Lake, Cobalt and Sudbury. "To Bring Home to Manitoba the Great Value of Mining in Ontario."

Announcement has been made at Winnipeg to the effect that a party of Winnipeg business men will pay a six-day visit this month to the mining centres of Northern Ontario. The party will be headed by Col. H. F. Osher, president of the Manitoba Chamber of Mines, and will leave Winnipeg on October 22nd. The places to be visited will include Timmins, Kirkland, Cobalt and Sudbury.

In referring to the purposes of the tour, Mr. L. D. M. Baxter, secretary of the Chamber of Mines, says that it was felt that an actual personal review of the great mining projects of Ontario would do much to bring home to Manitoba the great value of mining within the borders of Ontario. Arrangements are now being made so that the visiting party will be able to inspect the big mines of the North.

When Mr. H. Webb was president of the Timmins Board of Trade the suggestion came from a friend in Winnipeg that a visit be paid the Northern Ontario mines. It was argued that although Manitoba was comparatively close to this area of Ontario, there was not the interest shown in Northern Ontario mines that might be expected. Ontario, for instance, showed much more attention to Quebec mining development than did Winnipeg to the mines of Onta-

rio's North Land. Then in the matter of business and trade there was the same indifference and lack of knowledge of the North Land. It was believed that in many ways there could be a more intimate connection between Northern Ontario and Manitoba with advantage to both parties. Winnipeg people expressed the opinion that there was an investment field for them in the Northern Ontario mining industry while there was also room and opportunity for good trade and commerce with generally mutual advantage. The Timmins Board of Trade gave friendly consideration to the suggestion of the Winnipeg business people, and when a visit to this North was planned Timmins promised the heartiest welcome and co-operation in making the visit a success. The matter proceeded to the extent that partial arrangements were made for a tour of the North Land by a party of business men, but for some reason or other the matter was dropped at the time at the Winnipeg end.

Despatches from Winnipeg indicate that there is much interest being shown at present in the proposed tour of Northern Ontario's mining areas this month. It is considered that not only should the visit prove of great general interest, but business men will also be able to learn much about the influence of mining upon the supply business as well as the best way to handle business originating in the mining fields. After six days spent in the several mining areas referred to, the party will return to Winnipeg on October 22nd. At the present time the exact itinerary, the dates at which the different camps will be visited and other details of the tour have not been announced, but it is understood that plans are rapidly being perfected for the event. The number that will take in the tour has not been given out as yet, but it is thought from the interest roused that Winnipeg business interests and the mining fraternity will be well represented on the occasion.

Just think, when you are killing a little time, you may be murdering an opportunity.

REPORT BEING PREPARED ON CHINA CLAY DEPOSITS

Col. R. B. Harkness Returns from Mattagami River Area after Studying Field for Ontario Government.

Last week Col. R. B. Harkness, Commissioner of Natural Gas for the Province, returned to Toronto, after some time spent in the china clay fields along the Mattagami north of Cochrane. He made an interim report on the china clay deposits to Hon. Chas. McCrea, Minister of Mines for Ontario, but no announcement is to be made in the matter, it is understood, until the complete report is written and ready. The tests in the clay fields will not be completed until the end of the present season, and it is said that no report of any kind will be available to the public until the tests are actually over and the whole situation reviewed and considered.

Col. Harkness spent some time in the North supervising the Ontario Government's tests of the china clay deposits along the Mattagami. The tests are in the nature of different drillings and other exploratory work. Drilling and other work is still in active progress.

At the present time the china clay deposits are of very special interest to the Government in view of the fact that there is a noticeable demand these days for the extension of the T. & N. O. line north of Cochrane, to tap these fields. Naturally before running the line through the area in question the Government is anxious to have some definite knowledge of the possibilities of the china clay beds. Men in Cochrane who have given attention to the matter and who have prospected the area or otherwise studied the potentialities of the district, for years now have been enthusiastic regarding the Mattagami china clay deposits. They hold that for extent and for the quality of the clay, the Mattagami deposits are indeed noteworthy. These people also point to other resources of the area in question, and urge the immediate construction of railroad facilities. Should the line be run west to tap the china clay deposits, it is very probable that soon there would be a continuation to Kapuskasing, a comparatively short distance away. Men in Cochrane and Kapuskasing and in the country between are very enthusiastic as to the value not only to the North but to the whole province by the intensive development of the area referred to. In the meantime, however, the Government is making its own investigations and the result will naturally depend on the outcome of the reports and reviews to be submitted. In the meantime, it is safe to say that the various reports, and especially the one in regard to the Mattagami china clay fields will be awaited with the keenest interest. In the whole matter the Government is maintaining most praiseworthy reticence, but there is a general feeling of hopefulness and expectancy among those interested in the clay deposits.

There is a wealth of difference between being dissatisfied and unsatisfied. The value of a dollar depends somewhat on who has the spending of it.

MARRIAGE OF RAMORE YOUNG LADY AT NORTH BAY

St. Mary's Cathedral, North Bay, was the scene of a pretty autumn wedding on Thursday morning of last week, when Pearl, daughter of Mr. and Mrs. C. Coughlin, of Ramore, became the bride of Horace Cousineau, son of Mr. C. D. St. Germain, 68 Ferguson street, North Bay. Rev. J. L. Kennedy, rector of the cathedral, officiated and the happy couple were attended by C. D. St. Germain and Mrs. J. A. O'Donnell, sister of the bride.

The bride looked charming in a gown of powder blue georgette with hat and shoes to match and she carried a corsage bouquet of roses and lilies-of-the-valley. Following the ceremony the wedding party repaired to the home of Mr. and Mrs. C. D. St. Germain where breakfast was served. Mr. and Mrs. Cousineau will reside at 35 Second avenue east, North Bay.

POSSIBLE TO MOTOR TO KAPUSKASING NEXT YEAR

One of the important announcements made by Premier Ferguson during his visit to the North Land last week was that it would be possible to motor from Toronto to Kapuskasing next year and that by late fall the road would likely be completed through to Hearst. The premier said that next year would find an enormous number of United States cars in the North seeing this great country. The announcement by the Premier is a very important one. The advantage to the development of the country through the tourist trade is very evident, but the opening of the roads referred to will have a still more noteworthy effect in providing roads for the settlers of the districts concerned. The area west of Cochrane holds considerable settlement, but the lack of roads has been a great handicap. The linking-up of the existing roads and the construction of new roads necessary will give the country a very desirable help along to success in settlement. Once upon a time, The Advance questioned the advisability of building a "highway" west of Cochrane, as proposed by some enthusiastic Cochrane people. That was years ago when it was specially apparent that roads for settlers was the great need of the section. With the highway and roads for settlers meaning the same thing, as they do now in this case, there should be very general approval and enthusiasm regarding the announcement of Premier Ferguson, the special friend of the North, who has kept the needs of the settlers constantly before him during his term of office.

CANADIAN FIRM OPEN FINE NEW BUILDING IN BOSTON

One hears a great deal about the expansion of United States industry in Canada; therefore, it is interesting to note that Canadians can, and do expand their business on the other side of the border. This was emphasized at the recent opening in Boston, Mass., of the magnificent new building of the Salada Tea Company—a Canadian enterprise with worldwide ramifications.

The building was opened by the Honourable P. C. Larkin, in the presence of Governor Fuller of Massachusetts, Mayor Nichols of Boston, and leading State and city officials. Referring to the imposing nature of the building, and the fact that it was the largest in the world devoted to the packing of tea, each speaker commented upon the success which had attended this great Canadian enterprise in the United States field.

Architecturally the building is a handsome ten-storey structure, and enjoys the distinction of possessing a pair of the finest bronze doors in the world. These doors, which are the work of Henry Wilson, an English sculptor, were awarded a medal by the French Salon, where models were on exhibition this spring. They are said to rank in beauty with the doors of the cathedrals in Milan and Mayence.

The interior of the building is notable for the remarkable collection of tapestry, carvings, cloisonne were metal work and ceramics. Great Buddhas, which have seen centuries pass, gaze patiently with folded arms upon a modern business. Richly coloured Oriental rugs transform the floor into gay garden patches with aisles of marble. In the great windows some of the smaller and rarer pieces present themselves to the passing public.

In referring to the beauty of the new building, Mr. Larkin said:—It isn't extravagance, really. It is good business to make surroundings attractive.

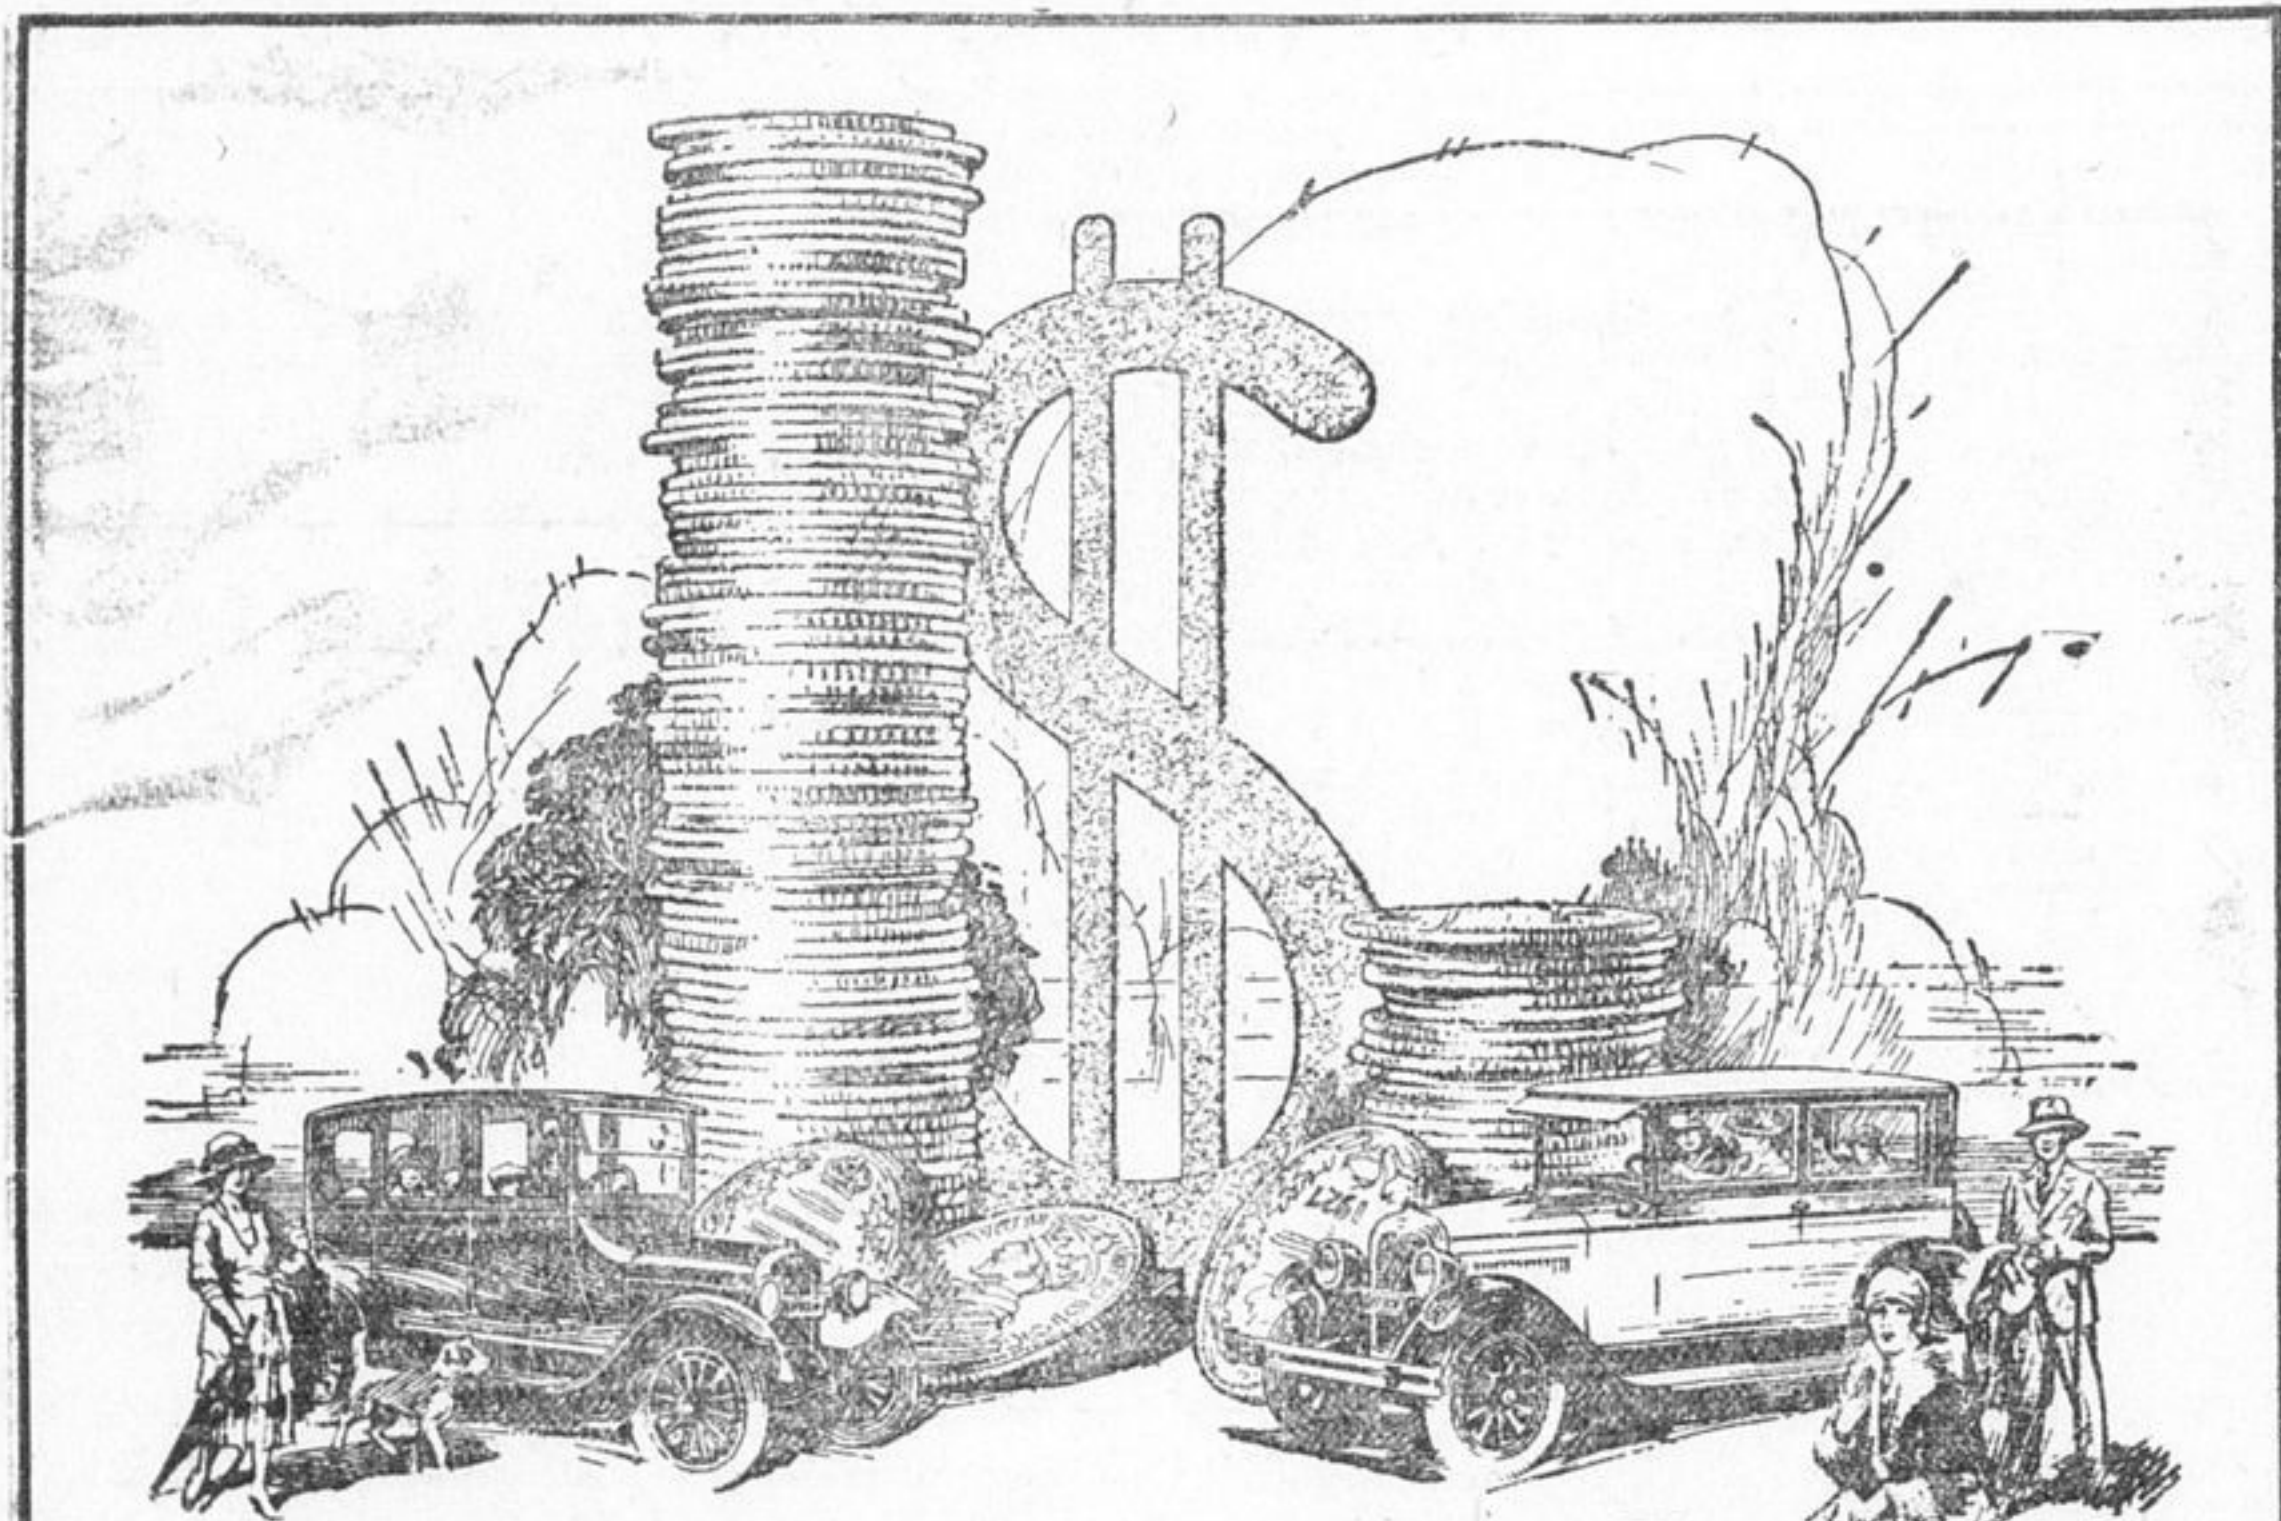

Time waits for no man, but Flynn claims the timer waited for Tunney.—North Bay Nugget.

Making the Canadian Dollar Go Farther than Ever Before

IN the purchase of the common commodities of life, the Canadian dollar has decreased in value during the past decade.

But, in the purchase of an automobile, the dollar is now worth one hundred to two hundred per cent more than it was seven to ten years ago—is worth more, in fact, than ever before in history.

While constantly raising the quality standard of its products, General Motors of Canada has

increased the purchasing power of the Canadian car-buyer's dollar. . . .

- . . . by the economies of volume purchasing and production,
- . . . by the close co-ordination of resources and facilities,
- . . . by improved labor- and time-saving methods of manufacture,
- . . . by sharing with Canada the savings effected by increased production.

In quality and in value, the Canadian dollar now goes farther than ever before in the purchase of a General Motors car.
