GENEVA MAY CONSIDER PULPWOOD POLICY HERE

Restrictions on Export May Come Before the League of Nations. Please Page Mr. Barnjum

There are opposing views on the matter of embargo and export imposts on pulpwood. At present, Ontario has an embargo on all pulpwood from Crown lands. There are some who would like to see this embargo widened so that it would include all pulpwood in the province. In general, however, the tendency in the North Land, is favour conditions about as they are. There is a general fear that with an effective embargo placed on all pulpwood it would mean a lowering of the price of pulp. At boards of trade meetings and other similar gatherings the question has been discussed, and there are many who apparently believe they could settle the whole question off-hand one way or another. Such people are not fully seized of the intricacy of modern trade and industry. The thoughtful man knows that it is difficult to see just where a problem may start or end. An illustration of this idea may be taken from the pulpwood embargo question itself. Those who believe it is a domestic matter that Canada may settle in simple fashion either by embargo or lack of embargo should read the following despatch from Washington, D.C. this week. The despatch says:— "While Canada may not be directly represented at the conference, Canada's restrictions on the export of pulpwood and logs is pretty sure to come up at the international conference to be held on Geneva on Oct. 17 and succeeding days to discuss import

and export prohibitions and restrictions.

"The United States has accepted an invitation from the League of Nations to participate in a conference on trade restrictions, and has appointed its minister to Switzerland, Hugh Wilson, to represent this country. The chief concern of the United States at the conference will be Canadian restrictions on exports. The most important of these are the embargoes which exist in Ontario, Quebec and Nova Scotia on the export of pulpwood cut on Crown lands and the export duty which British Columbia imposes on all logs exported from that province to another country.

"At the last meeting of the trade barriers conference, held in Geneva last May, at which Canada was not directly represented, it was agreed that a tentative convention would be prepared for submission to the conference which opens shortly in Geneva. That convention is now in draft form. It asks the nations of the world to agree that import and export prohibitions and restrictions, except when imposed for motives of health or morals of a community, are wrong and should be abolished. Only in extraordinary emergency would trade barriers be recognized, such as war or other national crises.

"In the introduction to the report of the May conference, Canada is mentioned as an example of a country which uses export restrictions as a protective measure 'to force foreign consumers to buy the finished products in the country where the raw material is produced. They may hinder or even prevent the development of an industry producing the finished product in a country of large consumption.'

FIRE THOUGHT INCENDIARY CAUSES LOSS AT OTTAWA

Damage estimated at \$90,000 was done by fire believed to be of incendiary origin at Ottawa at an early hour on Sunday. The fire destroyed the big warehouse building of A. J. Freeman, Ltd., the big departmental store at the capital city. The insurance is understood to be around \$80,000, so the loss will be nearly covered. According to the despatches from Ottawa, four young men averaging in age from 18 to 23, were seen loitering around the warehouse early in the morning by Mrs. J. R. Morris and her sister, Mrs. Oliver Houle, who live opposite the building. Mrs. Morris who was awakened by their loud talking, told the police she actually saw one of them light a torch and thrust it through the window of the building. The two women were able to give details of the men's appearance to the police.

LEAVES FOR ENGLAND AFTER 15 YEARS IN NORTH

Many friends in the district who knew Mr. Sorgat through his connection with fire brigade matters will be interested in the following paragraph from the last issue of The Cochrane Post:—

"Mr. Alex Sorgat, who for the past fifteen years has been with the Northland Post, except for the three years active service overseas, has left the local printshop, and accompanied by Mrs. Sorgat and their whole family, left yesterday for Montreal, where they will take the steamer 'Regina' to London, Mr. and Mrs. Sorgat's old home. During his many years in town, Mr. Sorgat has always been an active member of the Volunteer Fire Brigade, and acted for several years as Secretary. He also was elected member of the Public School Board for two terms, and up to the time of his leaving, was Secretary-Treasurer of the Cochrane Agricultural Society and Secretary of the G.W.V.A. and later of the Cochrane branch of the Canadian Legion. His many friends wish him the best of success for the future."

BELIEVES HUDSON BAY RAILWAY PLAN IS GOOD

Mr. Cyril Young, Superintendent of Development, Canadian National Railways, and well known in this North Land, has just returned from a visit to The Pas and Northern Manitoba. He inspected the Hudson Bay line projected, the Flin Flon, Sherret-Gordon and other gold and copper properties. He has had some 25 years' experience in the North and a wide knowledge of mining, pulp and paper and other development. His opinion is accordingly of value, and of especial interest, perhaps, in view of the fact that Ontario's own railway is steadily progressing to Hudson Bay. This is what Mr. Young says:—

"The country north of the Hudson Bay line is going to give Canadians another surprise in mining. 'There is more ore blocked out and indicated by diamond drilling at the Flin Flon Mandy and Sherret-Gordon than we mined in Cobalt in 20 years. Actually, as Cobalt put the T. & N. O. railway on the map of Canada and led to the finding of Kirkland, Timmins and Rouyn, and created home markets for settlers, so it is only balanced judgment to visualize the same thing occurring along spur lines north of the Hudson Bay branch line feeders to make this Hudson Bay line pay, then the public will be using one hundred per cent. judgment in facilitating their construction.'

He was very bashful and she tried to make it easier for him. They were driving along the seashore and she became very silent for a time. "What's the matter?" he asked. "Oh, I feel blue," she replied; "nobody loves me, and my hands are cold." "You should not say this," was his word of consolation, "for God loves you and your mother loves you, and you can sit on your hands."

PROSPECTING WORK ON BIG SCALE IN QUEBEC

A despatch from Toronto this week, as published in The Montreal Star says:—

"N. A. Timmins, Inc., is carrying out one of the most comprehensive prospecting programmes in Northern Quebec known in the history of Canadian mining. This concern has secured from the Quebec Government a concession on 200 square miles of land away north of Chibougamma, and understood to be approximately 250 miles north of the Transcontinental Railway. Details of this concession have been kept quiet, but a number of parties have been working there quietly for some months past. The extent of the operation can be judged from the fact that a large airplane is kept busy about one week every month carrying supplies in from the company's base on the railroad at Semeterre to the various prospecting parties. What results have been to date are not known as the country is somewhat inaccessible and is dependent on airplane transport. Word filtering out from occasional prospectors, however, is to the effect that something substantial has been uncovered. It is understood that arrangements have been completed between the Quebec Government and N. A. Timmins, Inc. whereby the former will reserve a number of blocks of prospecting ground each containing about 200 square miles exclusively for the Timmins group and that the latter has agreed in return to take them one at a time and prospect each area thoroughly. If minerals are found, the Timmins interests get the areas."

KIWANIS ENJOY SPECIAL ORCHESTRA MUSIC MONDAY

Business Matters Dealt With at Weekly Luncheon. Mr. E. H. King Speaks on the Crusade to South.

The regular meeting of the Kiwanis Club at their luncheon at the Empire Hotel on Monday was largely taken up with business matters. Special reference was made to the series of high-class concerts to be given in the next few months under the auspices of the Kiwanis Club, with the proceeds going to worthy causes. The first of these concerts will be the Grosjean Marimba-Xylophone Trio, at the Goldfields theatre on Wednesday next, Oct. 12th. The proceeds from this event will go to the local Victorian Order of Nurses. Further particulars as to these concerts will be found elsewhere in this issue.

A very special attraction for the luncheon was the pleasing orchestra present for the occasion. This orchestra included: Gene Colombo, violin; W. H. Wilson, piano; C. E. MacDonald, traps and drums; and Victor, the wonderful accordion player. The orchestra delighted all, and there was special attention for the gifted accordion player. Victor Dorigo is one of the outstanding players of the accordion and has won wide fame by his talent. Victor, as he is usually known is a recognized master of the accordion.

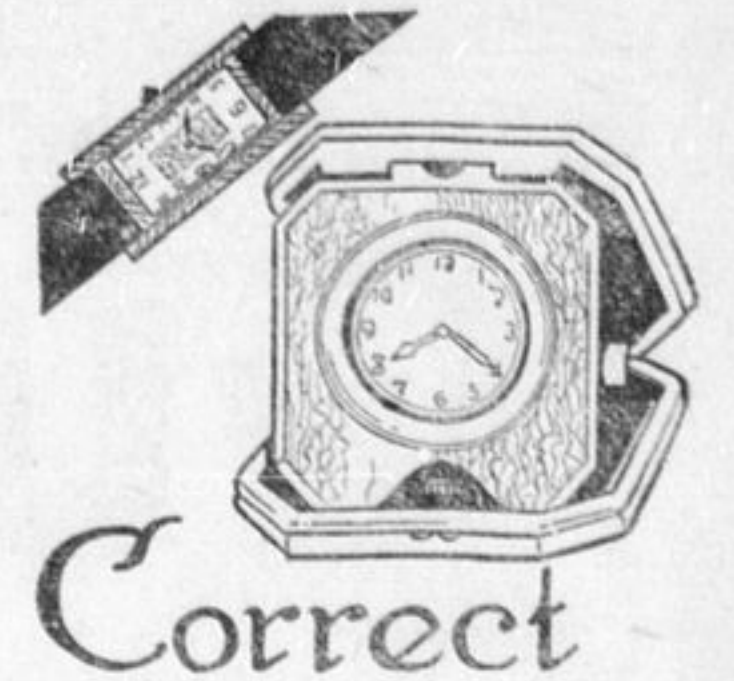

There was no regular speaker for Monday's meeting, but Mr. E. H. King gave an informal talk on his experiences during the recent Crusade to the south. This was much appreciated.

SMALL PURSE FOUND ON THE STREET THIS WEEK

One of the youngsters at the Matagami public school found a small sand-coloured purse on street this week, and turned it over to the principal of the school, who in turn has turned it over to The Advance, and The Advance in turn will turn it over to the rightful owner, on the idea that one good turn deserves another. The purse is a good one, though not particularly valuable, and the contents are not of very great value either, being only a pair of gloves and a couple of tokens from a local club. The owner may have the purse by calling at The Advance office and proving property and so on.

Mrs. Murphy—an' do ye think he looks loike his father?

Mrs. Flanagan—Oi do, but don't ye mind that, Mrs. Murphy, just so long as the child is healthy.

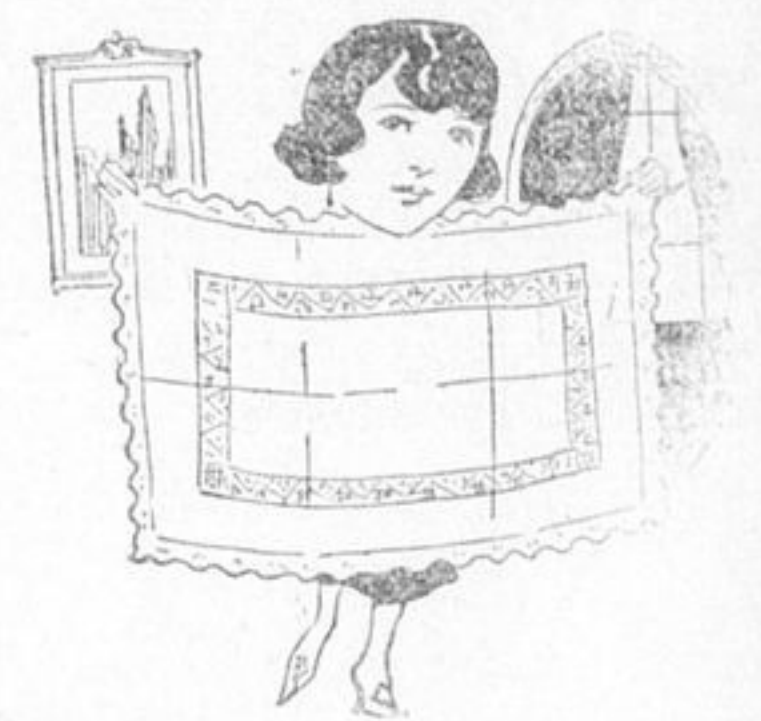

Correct TRAVELLING CLOCKS

MEETING ON TUESDAY TO ORGANIZE BASKETBALL

All Interested in Basketball to Meet at Hollinger Hall Tuesday, Oct. 11th, at 8 p.m.

A meeting to organize for basketball for the season is called for Tuesday evening next, Oct. 11th, at 8 p.m., in the Hollinger Recreation hall. All interested in Junior Basketball are specially urged to attend. For this game the Geo. Taylor Hardware trophy is the coveted prize, and there has been great interest shown in the game during past years. For the last two seasons the plan has been adopted of having two series of games,—one before Christmas, and the other series after the New Year. This plan is handicapped unless the organization is completed early, so that the first series may not be delayed or crowded. This year it is particularly desired to get away to an early start, so as not to be crowded for time for the first series. This idea is accordingly specially impressed upon all interested in the game of basketball. An early start means a good first series, and a good first series will assure that the second half will be a record-breaker. So, all basketball players and enthusiasts are now urged to help the game along by immediate organization and arrangement of plans and schedules. All basketball fans should make a special point of being present at the meeting in the Hollinger Recreation hall on Tuesday evening, Oct. 11th, at 8 p.m.
