REPORT OF CHIEF MINES INSPECTOR ON CAVE-IN

Mr. T. F. Sutherland Says It will be Possible to Salvage Any Ore Remaining in Area

In regard to the cave-in of the Worthington nickel mine near Sudbury, extended reference to which unusual event was made in The Advance last week, Mr. T. F. Sutherland, chief inspector of mines for Ontario, has made the following report and review:—

"At 7 p.m. Monday, October 3, all the men were taken out of the mine. The movement continued during the night and increased. At 8 a.m. next day the main cave-in took place. This was in the southeast shaft, and did not extend beyond the fifth level, 750 feet. The present shaft is in shape below the second level. The old workings caved on the upper level. No person was hurt, not even a scratch. The cause was a slip which allowed a triangular piece of the foot-wall to drop.

"The engineers of the Mond Nickel Company and the Mining Inspectors of the Department of Mines have been watching closely the underground conditions at the Worthington Mine.

"For some years the shaft pillars had shown signs of taking weight, and about four years ago a new shaft was sunk from the 500-foot level to avoid the area in which crushing was taking place. The cave which took place occurred from the surface to the 500-foot level. A daily inspection of this crushed area was made by the engineers at the Mond Nickel Company, and at 6 p.m. on Monday signs of increased pressure and shattering of pillars were noticed. All workmen were withdrawn. At 10 p.m. the resident manager inspected the underground workings and saw that the movement was continuing. The first fall occurred at 3 a.m., Tuesday. After this there was a period without further movement, but at 6.10 a.m., apparently due to the passage of trains on the railway, the movement recommenced and the main cave took place.

"The shaft is an incline, and consequently the movement took place in the hanging wall. The power house and the C.P.R. tracks, being on the hanging wall side, were in the area which settled. The subsidence is shown on the surface for a horizontal distance of about 850 feet parallel to the ore body.

"As regards the future of the mine it will not be a difficult mining problem to sink a new shaft in the solid footwall, cross-cut the collapsed area and salvage any ore in this area."

HOME MINES TAKES OPTION ON WAWA PROPERTIES.

Despatches from Sault Ste. Marie say that the Dome Mines have taken two options on the Wawa silver-lead finds of Mrs. M. E. Dispop, of Wawa, on three claims for \$6000 payable \$1500, September 30, March, July and October. These claims were staked on September 8. One of them adjoins Christie find and another the O'Keefe. Joe Johnston, formerly of the Soo, has also optioned three for \$10,000. Douglas S. Baird acted for the Dome. The options are for 60 days and under it work must start in 15 days.

There is very little work yet done on this field, the O'Keefe claim showing most.

The North Bay Nugget a week or so ago had the following editorial note.—A Chicago doctor states that sixty percent of the infants born of cigarette-smoking mothers die before reaching two years of age. Didn't they used to say something like that about corsets?

High Standing of the Dome St. John Ambulance Brigade

Dome Won the George Wright Shield in 1925 and 1926. In the Coderre Competition, Dome Made Fine Showing in 1927. Dome Stood Well in Provincial General Competition. Dome Congratulates Timmins.

The Advance has much pleasure in publishing the following letter relative to the Dome St. John Ambulance Brigade. When the Dome St. John Ambulance Brigade first started it received a large amount of publicity from The Advance, and this publicity no doubt had much effect in rousing and maintaining interest in this good work at the Dome. The success of the St. John Ambulance Brigade at the Dome was an incentive and an encouragement to the Brigade at Timmins. Consequently, The Advance has a very special interest in the Dome Brigade, and that interest has not lessened recently though information about the Brigade at the Dome has not been so frequently received. The members of the Brigade at the Dome may rest assured that all in Timmins are very much interested in the St. John Ambulance Brigade at the Dome because that Brigade was the pioneer in this camp in this very valuable community work for the benefit of the people. Similar letters to the one given herewith would be welcomed at any time by The Advance and would be read with interest by the readers of this paper.

To the Editor of The Porcupine Advance.

Dear Sir:—In complimenting the Timmins Division of the St. John Ambulance Brigade on the good showing in the various competitions this year, The Advance has shown an interest in a worth-while subject that is appreciated by all members of the S. J. A. B., no matter from what locality.

The amount of labour and study that is required by a team of contestants in any of the competitions before they can do as well as the Timmins Division is not realized by the general public, and the Timmins members are deserving of the hearty support of everybody in all their undertakings. As the Dome Division is not quite as near to The Advance office as our Timmins comrades in first aid, I am taking this means of letting those interested know how No. 44 Dome Division got on this year.

After the winning of the George Wright shield in 1925 and 1926 by the Dome, the rules of the competition were amended so that a team once having won the trophy could not compete as a team again. Only two out of the old four-man team with two new men could enter. This is a good rule, as it prevents one team winning every year, thus retaining interest in the contests.

Dome and Timmins No. 1 team tied for second place in 1927. In the Coderre (Dominion-wide Miners) competition, out of 17 entrants the Dome was 3rd in Stretcher Drill, 4th, in

MAY BE FOUR NEW ONES IN THE N.O.H.A. THIS SEASON

According to reports current now there may be four new teams entering this coming season in the N.O.H.A. These four new ones are quoted as being Schumacher, Cochrane, Kapuskasing and Kirkland Lake. The fact that authority for this story seems to be centred around Haileybury, and the further fact that the same reports give the idea that it is not known yet what may be the intentions of Cobalt and New Liskeard (which are much nearer to Haileybury than the four places named as new entries) leave room for question as to the correctness of the reports. At the same time, many who are usually "in the know" affirm quite seriously that when the annual meeting of the Northern Ontario Hockey Association convenes at North Bay in a few weeks, one of the important matters to be dealt with will be the applications of the four places named. In case the rumour is well grounded, there will need to be a re-arrangement of groups or some plan to get over the difficulty of the distances to be travelled in the case of Kapuskasing entering the league.

ST. JOHN AMBULANCE DANCE WAS ENJOYABLE FEATURE.

The dance under the auspices of the Timmins Division of the St. John Ambulance Brigade, which was held on Thursday, Oct. 6th, in the Hollinger Recreation hall, was a successful and enjoyable event, about 100 couples being present.

The members of the brigade made a fine showing in their fine uniforms and all worked hard in their endeavour to give everyone present a good social time. Tommy Stephens was unable to attend, on account of sickness, his place in this popular dance orchestra being taken by Cyril Morris. The music was of the best and plenty of it with generous responses to all encores. A fine lunch was served by the wives and lady friends of the brigade and the committee in charge wish specially to thank those who assisted in this manner, also to A. P. Dooley for the generous gift of large canister of tea.

The brigade made announcement that owing to the success of this dance the event will become a regular monthly feature, being held on the first Thursday of each month throughout the winter season.

San Diego Union:—The only thing harder for a wife than laughing at her husband's jokes is laughing at the old joke she has for a husband.

The Long Look

ONE of life's greatest problems was solved when business men carried over into domestic life the "long look"—the practice of looking and planning ahead, which has proven the secret of every successful business enterprise.

The college days ahead, clearing off the mortgage on the home, comforts for the sunset years of life—all can be planned with definite assurance of happy consummation.

Such is the great contribution of modern life insurance! And London Life policies on the "reduced premium" idea are built for the purse of the average family man.

For example, a man age 30 can purchase \$10,000 life insurance on the famous Jubilee plan for \$3.52 a week (payable annually) and subject to reduction by dividends. Your premiums when reduced by dividends could never total the amount of this policy; yet all the while the cash value is steadily mounting and the protection is always there. Ask any of our representatives for particulars.

Individual work, and gained 6th place in the aggregate, not 7th, as was stated last week.

In the Provincial general competition, out of 35 entrants, Timmins was 13th, and the Dome 18th. We congratulate Timmins on their doing so much better in this than the old Dome Division.

The names of the Dome members constituting the teams are as follows: Coderre trophy—S. H. Phillips, E. J. Uren, Harry Bunting and H. H. Costain. In the George Wright shield, Fred Richards took the place of E. J. Uren, the others being the same.

The honours won by the Dome and Timmins teams will be an incentive to go after the competitions stronger next year. May the best team win! Yours truly,
A COMPETITOR.

TRIGGER CAUGHT AND BOY DIES FROM GUN SHOT

A despatch last week from Sault Ste. Marie, Ont., says that Eugene Elman, 16-year-old Brimley boy, was killed while on a duck hunt when the trigger of a shot gun caught and exploded the shell. The shot entered his right lung. The boy, his brother, Robert Elman, aged 15, and J. C. Milligan, aged 14, were duck hunting and were in a small boat at the mouth of the Waishi River, a short distance from the Elman home. The gun was lying in the boat. As Eugene reached over to pick it up the trigger caught and discharged the whole shot entering his chest.

CONSERVATIVE DOCTOR PRESCRIBES CASTOR OIL.

Right on the eve of the big national Conservative convention in Winnipeg, The Toronto Mail & Empire actually gave this yarn space on its front page. A famous physician once prescribed castor oil for an infant belonging to one of his smart patrons. "But doctor," protested the young mother, "castor oil is so old-fashioned!" "So are babies!" retorted the doctor as he made out his bill.

London, England, newspaper:—The old-time practice of kissing the bride received a jolt at a recent Rowan County wedding when an awkward-looking guest was asked if he had kissed the bride, and replied: "Not lately."
