Powerful Skin Remedy Discovered

Dries Up Eczema, Barber's Itch and Skin Eruptions

Must Give Results in 7 Days or Money Back

This wonderful surgeon's prescription now known all over America as Moone's Emerald Oil, is so efficient in the treatment of skin diseases that the itching of eczema often stops with one application.

A few applications and the most persistent cases of Eczema often are healed never to return.

Moone's Emerald Oil is safe and pleasant to use and it is so powerfully antiseptic and deodorant that even odors arising from ulcers, gangrene and cancer are instantly killed.

Moone's Emerald Oil is the original bottle is dispensed by pharmacists. Moiseley & Ball always has Moone's Emerald Oil on hand.

How Thin Men and Women Gain in Weight

McCoy's Cod Liver Extract Tablets, sugar-coated and rich in weight building agents, are easy to take and will not upset or even disturb the most delicate stomach.

These wonderful health building strength creating, weight producing tablets are now sold in every drug store in North America and millions of them are used every month.

McCoy takes all the risk—Read this ironclad guarantee. If after taking 4 sixty cent boxes of McCoy's Cod Liver Extract Tablets or two one dollar boxes, any thin underweight man or woman doesn't gain at least 5 pounds and feel completely satisfied with the marked improvement in health—your druggist is authorized to return the purchase price.

Ask Moiseley & Ball, F. M. Burke, and Sauve's Pharmacy.

90% of Human Ills—Caused by Constipation!

Keep Clean Inside!

Constipation simply means that dangerous and poisonous waste matter is being retained in the body. This waste must be regularly expelled, or all manner of troubles will assail you—indigestion, sleeplessness, rheumatism, appendicitis, skin diseases and other ills. Drugs will not give permanent relief from constipation—they will aggravate it.

Millions of people have found vigorous health by bathing internally with the J. B. L. Cascade. Unlike cheap appliances, the J.B.L. Cascade cleanses the colon from end-to-end. All decaying and germ-breeding matter is washed away. Pure blood—the secret of good health—is yours.

Here are what grateful users say: "Your treatment is a sure relief for constipation." "I would strongly urge everyone to use the Cascade for rheumatism." "The J. B. L. saved my life when appendicitis threatened it."

Get free booklet, "Why We Should Bathe Internally," from Sauve's Pharmacy, the Rexall Store, who will be pleased to show and explain the J. B. L. Cascade to you, or write to Tyrrell's Hygienic Institute, 181 College street, Toronto. Over one hundred thousand satisfied users of the J. B. L. Cascade in Canada alone. Inform yourself to-day.

The Silver Centre correspondent of The Northern News last week says:—"Mr. and Mrs. David Church recently celebrated the sixth anniversary of their wedding and were the recipients of about 200 lbs. of sugar, it being a sugar wedding. Everybody came home wearing a big smile and enjoyed a delightful time."

GOVERNMENT WORKING TO CONSERVE FOREST WEALTH

Ontario Department of Lands and Forests Facing Problems with Courage and Intelligence

The Advance has referred to a recent address at London where Hon. Mr. Finlayson dealt in detail with the forestry problems of Ontario,—a matter in which the North Land has a very vital concern. It may be admitted that for this immediate district the mining industry is the mainstay of the country, but at the same time, lumbering is of such prime importance that everyone should be interested in this line. The forest industry is one of the three basic industries upon which the North Land rests. When Mr. Alec Dewar, of Iroquois Falls, was president of the Associated Boards of Trade, he used every occasion both here and in the south to emphasize the fact that forest, mine and farm formed the great triangle base of this great country and its progress. While all may not agree with his placing of the forestry industries first and foremost all will certainly agree after consideration that the forestry question is so undeniably important that it can not be overlooked. It is not only necessary that people in this North should study the matter, and give the Department of Lands & Forests every co-operation and support in the good efforts being made for the country's advantage in this particular, but keen interest must be roused also in the South. For this reason it is pleasing indeed to see The Toronto Mail & Empire devoting almost a column to the editorial discussion of forestry matters. The Mail & Empire says:—

"Of the returns that Ontario has derived from the exploitation of its timber resources and of the advantages to be obtained from the mere existence of tracts of wooded land in the settled portions of the Province, Hon. William Finlayson, the Minister of Lands & Forests, spoke in his recent address to the Canadian Club of London. Mr. Finlayson referred to the disappearance of the hardwood forests that formerly clothed a large part of western Ontario, and of the depletion of the pine forests of "old" Ontario. He urged that advantage be taken of the opportunities the Ontario Government offers to individuals and municipalities to enlarge the woodland areas of that part of the Province.

"The Ontario Government now has five forestry stations. It established some if not all of these partly for the purpose of demonstrating a method of overcoming conditions caused by the removal of trees from a district. It founded the station in Norfolk County to show that the planting of trees would check the encroachment of drifting sands on arable lands. It opened another station in the eastern part of the Province with the same idea in mind. Now it has in the forestry stations sources of supplies of young trees for planting in the Province. It is able under the authority of statutes of the Legislature to use these supplies of young trees to help farmers to plant woodlots on land not suited for the cultivation of annual crops, or to plant shelter belts to protect their homes and farm buildings from the winds. From the forestry stations the Department of Forestry has now from eight to nine million young trees for distribution annually, and it hopes in the future to have twenty millions. In this way it is enabled not only to offer trees to individual landowners, but also to assist municipalities to plant demonstration forests to beautify the landscape, to protect water supplies and eventually to produce timber and wood for sale. Forty townships have accepted the Government's offer and five counties have allied themselves with the Government in the work of establishing larger forests of one thousand acres each or more. The Provincial Government, too, has been studying the larger problem of pulpwood and other timber. At the last session of the Legislature the Government procured the enactment of legislation authorizing it to enter into arrangements for the acquisition of large tracts of land that are unsuited for agriculture but that can be utilized

ed for the growing of timber. It also provided for the appointment of a Forestry Board to investigate "the planting, growth, development, marketing and reproduction of pulpwood on Crown lands and on the lands of Crown lessees, licensees and concessionaires in the Province of Ontario." That Board has been constituted.

"Mr. Finlayson said in London that the exploitation of lumber resources of the Province had yielded \$120,000,000 a year over a period of ten years, and had furnished the Government with a revenue of five or six million dollars a year. He pointed out that under present conditions the timber resources of the Province were not inexhaustible, and intimated that expenditures of money would be required to keep Ontario a timber-producing country. Most people will agree with him that an expenditure of money will be justified if it procures the means of maintaining timber and pulpwood supplies in Ontario and preserving the lumbering industries and those other great industries that are dependent upon the forests for their raw materials."

YOUNG COUPLE WEDDED AT NORTH BAY ON MONDAY.

The North Bay Nugget last week says:—

"A solemn wedding was solemnized at 5.30 Monday morning in St. Vincent de Paul Church when Rose, fourth daughter of Mr. and Mrs. Ernest Gauthier, became the bride of Cleo, eldest son of Mr. and Mrs. P. Peltier. The bride was given in marriage by her father and looked charming in a beige crepe dress with hat and coat to match. After a breakfast served at the home of the groom's parents, Wyld street, the young couple left on the early train for Timmins and points north. The bride's parents entertained the immediate friends and relatives Sunday evening at a fowl dinner. The many beautiful gifts received by the young couple denotes the high esteem in which they are held."

TIMMINS INTERESTS NOW WITHDRAWN FROM GONDREAU

Some week ago The Advance made reference to option taken in the Gondreau district by the N. A. Timmins interests. It was expected that following this option there would be very general activity in the area:

Last week, however, despatches from Sault Ste. Marie said that the Timmins interests, who a month ago took an option on the Kozak find at Gondreau, has relinquished the option and abandoned the claims.

During the month in which the Timmins interests held the option extensive tests were made at different places on the claims, but no diamond drilling was done. The terms were somewhat similar to those given to the Nipissing interests, which controlled the claims some time before the Timmins people took an interest in it. Kozak got a substantial payment and a considerable block of stock, and Timmins undertook to spend quite a sum each month in exploration work. The deal for the Kozak option was made by the Timmins interests through the firm of Alderson, Mackay and Armstrong, of Montreal, and immediately upon its conclusion, Mining Engineer A. Pare, representing Timmins, left for the Kozak claims to commence exploration work.

Up to a few days ago, Nick Kozak had not been informed that the Timmins interests intended to cease operations on the claims, and Sault Ste. Marie mining men are of the opinion that Messrs Alderson, Mackay and Armstrong, through whom the option was taken, will not relinquish their interest in it.

POTTERDOAL MINE STOCK PRIZE AT CHURCH RAFFLE

Port Arthur Church Selects Munro Township Stock for Drawing. Indicates Interest in Mining.

There are indications on every hand these days of the widespread interest in mining and the mining market. One of the specially interesting indications was given last week when a Port Arthur church decided to raffle shares of a mining stock at a bazaar being held in aid of the church. As each person enters the bazaar, a ticket will be received, bearing a number which entitles the holder to a chance on 100 shares of paid-up stock in an Ontario mining enterprise—numbers to be drawn later. At a meeting held to decide on prizes the suggestion was made that mining shares would provide excellent rewards. The idea did not meet with immediate approval, but a canvass of those present revealed that 60 per cent. were proud (more or less) possessors of various mining shares. The question then resolved into what stock would be offered.

It was settled that the stock which showed the largest gain overnight would be chosen. The following morning the shares of Potterdoal had taken a jump of almost 25 per cent., and this was the selection. The holder of the lucky number will, therefore, receive 100 paid up shares of Potterdoal, a stock which is already widely held at Port Arthur, as well as elsewhere.
