

South Porcupine Ties, 2-2 With Port Colborne Team

South Porcupine Team Puts Up One of the Best Intermediate Hockey Battles Staged in Recent Years in the O. H. A. at Toronto. Great Battle to Watch, Say Reports.

At Toronto on Saturday night the South Porcupine hockey team made a great name for itself by the great game put up in the O.H.A. series for the Allen Cup. The Advance correspondent at South Porcupine, Mrs. F. Hamilton, accompanied the team to the South, and writing from Toronto this week says:—"Our boys created such a favourable impression Saturday night that Toronto fans are kicking about the second scheduled match being taken to Niagara. I heard some say it was better than some of the pro. games that have been staged here. The boys are up against a team fully 200 lbs more weight than themselves, but after the first period of uncertainty, and getting used to this ice, they had the best of the play all through. Port Colborne's strong man is the goalie. All our boys did well, but Murray was our spectacular man. I never saw our boys in better trim."

Among the interesting and lengthy reports of the game in the city papers, the following from The Toronto Globe gives a good picture of the game:—"In one of the best intermediate struggles in recent years the Port

Colborne O.H.A. finalists and South Porcupine, N.O.H.A. winners, played a tie game, 2 to 2, at the arena Saturday night. Those who missed the struggle missed one of the best games of the season.

The opening period was Port Colborne's, they outscoring the Northerners 2 to 1. Merrill counted first for the Ports in 11:20 and Kilpatrick made it 2-0 two minutes later. South Porcupine scored five minutes later on a fine combination play from Spence to Jemmett.

The second period was a continual rush from one to the other, both teams passing up golden opportunities through missing passes in front of an open net, and others by over-anxiousness on the part of the puck-carrier through not working close enough in. The session ended with no goals, and on the play the Porcupine team appeared to have a slight edge. In this period Thornton, in the Northerner's net, and Moore, for the Ports, made some great saves. Thornton pulled a new one on the fans by occasionally skating out of his net, one time nearly 20 feet after a rolling puck when the carrier had been unbalanced by a

check at the Porcupine defence. The penalties in the first two periods were evenly divided, one to each team in both frames.

The third period opened fast. Porcupine tore right in, and on a dashing rush by Murray, the stocky left defence player of the "Porkies" the red light glowed behind Moore after two minutes of play. Murray was knocked out a few minutes later on a rush by Kilpatrick, but no penalty was given. Merrill was soon benched for tripping, following Murray who gave too energetic a check to Nixon. Jemmett got the gate a while after, and the Ports buzzed around Thornton like a swarm of bees. He managed to weather the storm, however, though at one time Morrill had three in succession on him. Just before the period ended Kilpatrick was penalized on a rush up the ice, and he started to argue with Referee Harold Farlow, who promptly made it a five-minute penalty, which banished him for the balance of the game.

It was a great battle to watch. Both defences body-checked with plenty of vigour.

All the Port Colborne team played well. Russell Cross, who partnered with Kilpatrick on the defence was especially strong. He is a great rusher and made some brilliant forays. The forward line of Nixon, Mountain and J. Cuthbert did good work, the latter giving a fine exhibition at mid-ice. Mountain was great on the attack, but had his hands full with his opponent most of the time. Morrill and Curtis Cross went well, the former being at his best the last period.

RESULTS LAST WEEK IN McINTYRE BOWLING LEAGUE

Arnott's Team Took Four Points, So Did Starr's and McMillan's.

Weber's and Heggart's divided honours with 2 points each. Arnott's took 4 from McMillan; Starr's won 4 points from Angrignon's; MacMillan's took all 4 points from Heggart's; Starr's won 4 from Weber's; Angrignon's won 3, and McMillan 1 point.

Arnott registered the highest league cross alley to date, with a beautiful total, 954 in 3 games. This will take some beating.

Angrignon's 3—Arnott's 1.

For South Porcupine "Dutch" Cain and Murray, who teamed on the defence, showed some of the most rugged body-checking that has been witnessed here this winter. Jemmett was effective in centre and "Eagle Eye" Spence, on left wing, proved tricky, a good puck-carrier and a strong shot. McHutecheon was steady at all times, while Gagnon and Saunders did not weaken the forward line while they were on the ice.

The second game at Niagara Falls Monday night will be a contest worth while seeing, as both teams have speed in abundance and check strongly at all positions.

Port Colborne—Moore, goal; Kilpatrick and R. Cross, defence; J. Cuthbert, centre; Nixon and Mountain, wings; substitutes, Morrill and C. Cross.

South Porcupine—Thornton, goal; Cain and Murray, defence; Jemmett, centre; Spence and McHutecheon, wings; substitutes, Gagnon and Saunders.

Referee, Harold Farlow, Toronto.

IMPROVEMENT SHOWN BY ANNUAL REPORT OF DOME

Considerable Progress and Development Under Way. Prospects Look Good.

The annual report of the Dome Mines, given out last week, indicates considerable improvement in the position of the mine. There is considerable progress and development under way, and the general prospects are excellent. The usual conservative tone is maintained in the report, but the facts and figures as given, indicate that the position of the mine is improved.

In the matter of the financial statement, the figures show that the net excess of current assets over current liabilities is \$4,208,256, as compared with \$3,234,179 the previous year. This includes dividend assurance fund of \$2,350,573, which compares with \$2,219,431. Net income for the year amounted to \$1,960,585, an increase of \$175,750. Surplus increase was \$547,424.

During 1927 629,580 tons of ore were hoisted, against 656,521 in 1926. Tonnage sent to mill was 543,300, against 555,700. Bullion recovery was \$4,631,744, against \$3,940,090, average yield being \$7.42, against \$7.09 in 1926. (Provision of \$444,247 was made for depreciation of plant. The latter is now carried at \$2,968,936, against which is depreciation reserve of \$1,793,190.

General Manager H. D. DePencier in his report says quite important additions to the ore reserves have been opened up in the vicinity of working stopes. This called for considerable development work in the form of drifting, cross-cutting, sub-levels, etc.

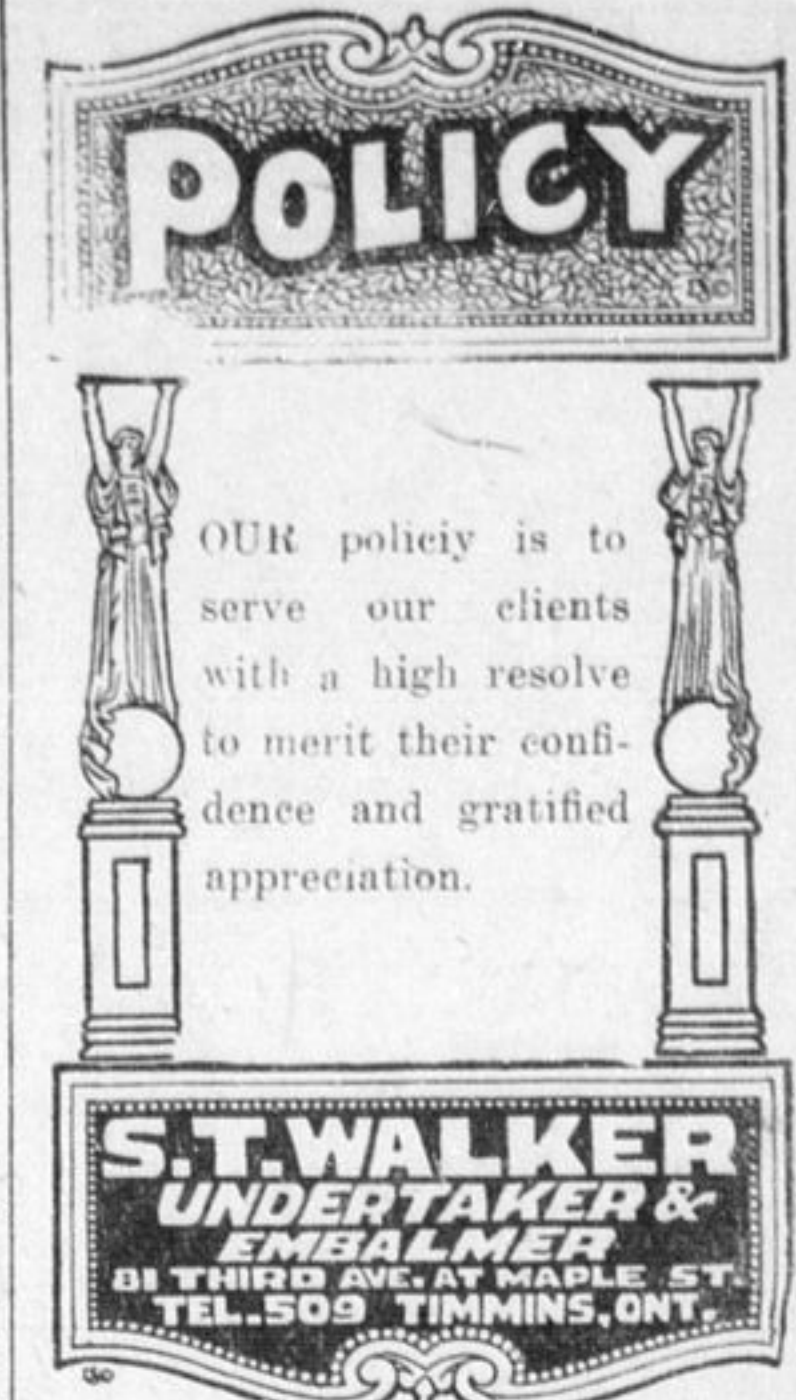

Other important developments outlined by Mr. DePencier include the opening up of some ore on the 8th, 9th, 10th, 11th and 12th levels by cross-cutting and drifting in the greenstones north of the sedimentary basin. A cross-cut on the 13th level has not yet reached the point where ore may be found.

On the 8th level ore found is not important. On the 9th level one shoot has been drifted on for 290 feet and had been stoped to its upper limit. From this shoot 25,618 tons, averaging \$6.89 have been drawn and 20,000 tons of broken ore still remain.

North of this shoot another small shoot has been found and driven on for 200 feet, averaging \$5.31. At the 10th level this same zone has been reached and opened up disclosing ore for a length of 285 feet, with an average width of 30 feet. The average of sampling done to date is \$5.84. On the 11th level the same ore-shoot has been reached by 251 feet of cross-cutting. A stope sill has been cut here 320 feet long and averaging 25 feet wide. This produced 5,650 tons, averaging \$7.80 per ton. The same ore zone has been reached on the 12th level, drifting east and west, started at the end of the year.

The ore partially opened up in the greenstone from the 8th to 12th levels, together with additional ore found in the course of stoping in the old stopes will it is estimated, equal the ore milled from the stopes during the year as far as tonnage is concerned, but the gold content will be lower.

The broken ore in the stopes now stands at 500,000 tons.
