NEW MANITOBA FRAUD LAW SIMILAR TO ONTARIO'S

Present "Blue Sky" Legislation In Manitoba to be Replaced as Not Working Out Well

Recently The Advance had reference to the legislation planned by Manitoba to prevent stock frauds, especially in regard to mining shares According to despatches the new legislation in Manitoba in this regard is to be similar to that passing now through the Ontario legislature. The reading.

According to the information to hand, one of the effects of the present blue sky legislation is to deter the establishment of head offices of mining companies in Manitoba, something the officials of that province believe they will encourage by the proposed legislation.

The bill, which is entitled an act for the Protection of Investors, provides for the registration of brokers and salesmen, with wide powers to the attorney-general to investigate, and with penalties that will enable the act to be enforced. All persons who sell securities, whether acting as offi cials or salesmen of companies, or not, will come under the legislation, if passed.

said that since the development at the Flin Flon, there had been a considerable impetus to mining development, Queen, Labor leader, that the municiand there has been great activity in the formation of mining companies and syndicates, all of which had stock and securities to sell to the public. Mining development was to be eneouraged, and there was only one way to do it, and that was by letting money for investment come in, and at the same time against the operations of unscrupulous salesmen.

variation-no waste.

amazing."

It. Col. F. G. Taylor, K.C., Conservative leader, said that seemed a remarkable proceeding.

Mr. Major said the reason was because they wished mining organizations to have their headquarters here. At the present time the legislation did not permit that, and while companies sold their securities in the province they got their charters, elsewhere, and the province had no control over the licensing of those companies in the meantime. Colonel Taylor said he did not see how mining companies should be subject to special legislation such as that proposed.

Decrease in Porcupine Camp Due to Mill at Hollinger Being Off Seven Days Owing to Disaster

Returns received by the Ontario Department of Mines from the gold mines of the province for February show a decrease of more than 20 per cent, in the tonnage of ore milled as compared with January, but less than 19 per cent. in the decrease in value of bullion recovered. This temporary setback was due principally to the disastrous fire which occurred at the Hollinger Mine on Feb. 10, and was the cause of a loss in milling of about seven days. The figures of ore milled and value of bullion recovered are shown below.

showed decreases both in ore milled and value, while at the Kirkland Lake eamp a slight decrease in value was observed, against an increase in tonnage of ore milled. Monthly fluctuations are to be expected from the Kirkland area, where the ores of the principal mines are high-grade, but are occasionally subject to dilution with lower grade material derived from exploratory and development work.

During February producing mines Dome, Vipond, Ankerite and Paymaster. Kirkland Lake (8)-Teck-Hughes, Lake Shore, Wright-Hargreaves, Sylvanite, Argonaut and Associated Goldlinger.

MINING THE FOUNDATION

correction.

xRevised figures subject to slight

OF ALL THE WORLD'S WEALTH Cecil Rhodes, the South African mining magnate, once said: "Mining has been the foundation of the world's wealth from the beginning of time. The governments rich in mineral have always been the richest and strongest governments on earth. Remember, man who produces gold, silver, lead and copper is creating the raw material of wealth. Every stroke of his pick, every echo from his drill, adds to the wealth of every man's business in the world."

HIGH-GRADE SAMPLES FROM RUN OF THE PRESS

Toronto Mail & Empire: - A Toronto controller wants to know if there is any difference between stealing a dollar and stealing a million dollars. There is the trifling difference that one crime usually involves a term in jail.

Sudbury Star:-"A Quebec wood carver, just dead originated the eigar store Indian. Consequently, he has many monuments to his name around the country."

North Bay Nugget:-A Toronto young man is suffering from a broken finger sustained in shaking hands with a friend. In other words he is laid up with the grip.

Frederickton Mail: There will aiways be need for homes. There isn't light enough in a motion picture house to play bridge.

St. Catharines Standard:-New York City enforces the closing of cabarets at 3 a.m. If a patron cannot be robbed before that hour, he deserves to be sent home.

NO MORE CASES SMALLPOX REPORTED AT HAILEYBURY

The Haileyburian last week says: "No further cases of smallpox have been reported in Haileybury and indications are that the disease was controlled in time to prevent anything like an epidemic. The scarlet fever, of which there were several cases, is also dying out gradually, although there are a few homes still under quarantine."

ANNUAL MEETING OF GOLD HILL MINES ON SATURDAY

The annual meeting of Gold Hill Mines, Limited, is to be at Haileybury on March 31st, according to notices sent to the shareholders. Aside from routine business, several changes in the by-laws are to be considered. The first is in respect to the transfer of shares of the company and the execution of stock certificates; the second provides for the holding of meetings of the directors and shareholders at places other than the head office; the third amends by-law No. 1 and fixes and declares the quorum required at all meetings of shareholders, and the last regulates the time at

Brief reference was made last week to the find at the 500-ft. level at the Vipond Mine, In commenting last The Porcupine area, as expected, week on this find The Toronto Mail and Empire said:-

"The latest reports from Vipond indicate that the discovery made at the 500-foot level early this week may be quite important. A width of twelve feet had been cut up to yesterday and the wall on the far side of the vein had not yet been reached. For this reason it had been possible to determine the strike and, therefore the width directly across was not known. Several high-grade sections were encountered and the average in order of output were as follows: grade across the twelve feet was about Porcupine (6)-Hollinger, McIntyre, \$15 to the ton. The discovery was the result of crosscutting operations towards a favourable zone indicated by diamond drilling some little time ago. This was the only hole put in field, Kirkland Lake Gold, Barry-Hol- | the immediate vicinity, so that officials have no knowledge as to the extent Monthly output of Ontario gold of the body. It is their intention, it is said, to attempt to find its exten-Total value sions on the 400 and 600-foot levels crude bullion after enough drifting has been done at the 500 to determine the dip and the strike."

MANY HAVE PECULIAR EXPERIENCES AND ESCAPES

An editorial note in The Sudbury Star last week said:-

"A good many fear that Lindbergh will fly once too often and meet disaster. Still, one can never tell what may happen, or how. Bobby Leach went over Niagara Falls in a barrel unharmed, and later slipped on a orange peel in the street, receiving injuries which caused his death. Many men went through the Great War unscathed only to some home and meet death through some simple misadventure."

The Sailor, Toronto:-There are many starved souls in overfed bodies.
