FORMER TIMMINS BANDSMAN LEADER AT KIRKLAND LAKE.

Mr. H. Buzza formerly a member of the Timmins Citizens' Band has been appointed band leader of the Kirkland Lake band to succeed Mr. T. J. C. Smith. Mr. Buzza took over his new duties last week, there being a big attendance at the first practice to greet the new band leader. In referring to the appointment, The Kirkland Lake Northern News last week said:—"Mr. Buzza has had considerable experience in leading bands, his latest charge being at Calumet, Mich. He announces a class for beginners to be held on Mondays and Saturdays from 7 to 8 p.m. This is a good chance for young fellows to learn an instrument."

STAKING BOOM NORTH OF SUDBURY RECENTLY.

Recently there has been a regular flurry in prospecting areas in the Sudbury mining division. Prospectors from Sudbury and also from the Cobalt and other camps have been going in to the area and there has been considerable staking done. A rush was started when some prospectors returned from Stackpool about one hundred miles from Sudbury on the C.N.R. These prospectors told of reported rich finds and also that there was a prospecting and staking boom in progress in the neighbourhood of the claims of W. E. Smith and the Duluth interests associated with him, in the properties in Genoa township. The discovery is said to consist of a rich showing of galena which, while narrow on the surface, widens to about 25 feet at depth. One drill is now working on the property, and officials are quoted as stating that a small mine is assured. In addition to the discovery claims Mr. Smith and associates have acquired considerable adjoining territory in Genoa and Marion townships along the strike of the mineralized belt.

Over eighty boys have signed up at the Cobalt Y.M.C.A. to take swimming lessons this season.

Care of Skin, the First Line of Defence, Says Eminent British Physician.

The following special appearing in The News of the World should be of particular interest in this camp, especially in view of methods advocated here for counteracting the dangers from rheumatism, colds, bronchitis and pneumonia among mine workers:—

"One of the foremost in the campaign which has been inaugurated against rheumatism, Dr. R. L. G. Llewellyn, has made important pronouncements regarding preventive and remedial measures. In a recent address to a committee of the House of Commons Dr. Llewellyn pointed out that rheumatism is particularly rare in Lancashire and Glamorgan, and other mining centres, and suggested that the facilities already at hand should be utilized for preventive treatment. A most valuable asset was the pithead bath. The doctor insisted that in the prevention of rheumatism the care of the skin is the beginning of wisdom. "As the climate of this country is notoriously changeable," he declared, "and the rheumatic subject extremely sensitive to weather changes, and as the climate will not adapt itself to the worker, the worker must adapt himself to the climate. Further, as an efficiently acting skin is our first line of defence against weather changes, our obvious duty is to tone up the miner's skin so as to be able to resist the weather changing from hot to cold and dry to damp. And this can be done by the alternating application of hot and cold water to the skin's surface, simulating, in short, the contrasts of temperature with which the skin has to contend from day to day and from hour to hour. Massage could also be done under the supervision of the colliery doctor, and in this way many a case of incipient rheumatism could be nipped in the bud. Utilized thus, industrial bathing establishments in mines, factories, etc., could play a large and ever-increasing role in the prevention of lumbago, sciatica and other forms of rheumatism. Municipal bathing establishments could also be used for like purposes, and in this way a truly national campaign could be initiated against rheumatism."

What Dr. Llewellyn says in regard to rheumatism and kindred ailments applies equally to the matter of colds, bronchitis and pneumonia.

W. H. MORGAN ELECTED PRESIDENT OF THE N.O.F.A.

North Land Football Association Expresses Its Sorrow at the Death of the late W. A. Field.

A special general meeting of the N.O.F.A. was held on Saturday, May 26th in the town hall, Timmins, with a full quota of members present. Past President H. G. Laidlaw occupied the chair and in opening the meeting he referred very feelingly to the late W. A. Field, president and O. F. A. representative of the N. O. F. A., who passed away recently. The services of the late Mr. Field to football and other amateur sports, and his outstanding qualities as a citizen and a man were referred to, and at the conclusion of Mr. Laidlaw's remarks an expression of condolence was passed by the meeting to be sent to the bereaved family. Among the delegates present were:—Messrs W. H. Morgan and E. Duxfield, McIntyre; S. Wheeler and H. Alford, Holly Rees; M. McDonald and P. Andrews, Dome; W. A. Devine and F. Y. Utley, Lancashires; J. Gordon, Cornish; J. Cowan and J. Bodell, P.D.F.L., vice-president A. Roberts, Sr., and a representative of the Lake Shore team of Kirkland Lake.

The secretary, W. H. Wilson, read the minutes and also the applications for membership. The minutes were duly passed as read, and the applications of the following elected to membership in the N.O.F.A. for 1928: McIntyre, Dome, Cornish, Holly Rees, Lancashires, Lake Shore and the P. D.F.L. and the Kirkland Lake Football League.

The election of president to fill the place left vacant by the recent death of Mr. W. A. Field, resulted in W. H. Morgan being elected by acclamation as president. Mr. S. Wheeler was elected by acclamation as the O. F. A. representative.

It was suggested that the Goodyear cup be given to Kirkland Lake district for local competition, and that this would relieve the situation here.

The Dickson cup will be the first one played for locally and entries for this close on June 9th.

Permission was given to play the Boxer cup series in June.

The matter of Neil Dougall's suspension was discussed among the delegates and action was taken to have this suspension enforced.

A general discussion of other football topics ensued, and it was felt by all present that a better understanding was the outcome of all the re-organization.

The entries for the Ontario cup must be in before July 1st, and it is hoped that more than one of the local clubs will enter for this competition.

POOR SPORTSMANSHIP TO SPEAR MASKINONGE.

In several places through the North country and now in Lindsay itself, men have been fined for spearing maskinonge. That, apart from the fact that it is against the law, is a piece of rotten sportsmanship on two counts. It is poor sportsmanship at any time to use lights and a spear in taking game fish and is particularly rotten sportsmanship to do so in the spawning season.—Lindsay Post.

NO DIVIDING LINE

(Hamilton Spectator)
The ruling of the first Divisional Court at Toronto in an appeal taken by a local motorist that "highways are not, by law, divided into right or wrong sides," and that "subject to legislation, the user of a highway is entitled to travel along any part of the highway provided he exercises due care in regard to the rights of others," will result, we think in the immediate designing of the necessary legislation. It seems to be just another case of having, for years, taken for granted something that has no basis in fact.

The North Bay Nugget last week says:—"Here's one for the book. Last Friday George Winton, dog-catcher, captured and impounded a dog. On Sunday when he went to feed her, he was greeted by the proud mother of six healthy pups. George gave the dog an extra piece of juicy steak to celebrate the event."

VIPOND CONSOLIDATED REPORT FOR THREE MONTHS

Official report for Vipond Consolidated for three months ended April 30, 1928, shows that 20,745 tons of ore were milled and bullion to the value of \$155,600 was recovered. During March a shoot of ore was encountered at the 500-foot level. This at first looked quite promising, but further work proved it relatively unimportant.

This report compares with that issued for the three months ending January last, when 21,085 tons of ore with a value of \$149,400 were reported.

Englehart has formed a softball league, with three teams in the league and more likely. This is another indication of the general interest growing in the North Land (indeed, all over the Dominion) in softball.

Shaws drug store at Cobalt was entered some days ago and twenty dollars in cash taken. A clerk in the store was on the premises as late as three o'clock in the morning, having been kept up through an automobile accident. At that time everything seemed all right, so the time of the burglary must have been between three o'clock and eight in the morning.

HIGH CLASS SECURITIES

OUR managers are kept in constant touch with the investment market through the Bank's own Bond Department at Head Office.

You may be assured of careful attention and conservative selection if your investments are handled by one of our branches.

A Substitute for Time!

Think of being able to eliminate Time, to bring the future—even 20 years or more hence—into the present.

This is the great contribution Life Insurance makes to modern living. It enables you to guarantee to your family at the present time all you are likely to earn in the years to come, even if you do not live to earn it.

—And, it must be remembered, upon this future earning power rest the destinies of your wife and family.

Recent researches have led The London Life to offer The Earning Power Series—a true substitute for Time.

They provide protection over your productive period (to ages 60 or 65); or, by the Interchange Privilege, for your entire lifetime.

Examples of Rates Earning Power Series to Age 60

Amount	Age	Premium	Rate to sum assured
\$10,000	20	\$110.50	1%
10,000	30	125.00	1 1/2%
10,000	40	154.50	1 3/2%

The Earning Power Series are Annual Dividend policies, the triumph of 1927 in low cost life insurance protection!

THOMPSON-CADILLAC NOW INSTALLING TEST MILL.

The many in Timmins and district who are financially interested to more or less extent in the Thompson-Cadillac will be interested in the following information now given out:—

The new ten-ton test mill for Thompson-Cadillac is in course of installation. Meantime, drifting at the 100-ft. level of the No. 2 shaft has opened up for a width of about 12 feet. Drifting has been carried along the vein for a distance of about 40 feet and this is to be extended as rapidly as possible.

The No. 1 shaft has already reached a depth of around 170 feet and is being driven to a first objective of 300 feet. Following the completion of the shaft to that depth, a station will be established and lateral work commenced at that horizon. Later plans involve the continuation of both shafts to a depth of 500 feet, and should developments warrant, a larger mill will be installed.

(The Cobalt Northern News says: "Mrs. L. McLaughlin is spending a few days in Timmins with her daughter, Mrs. W. Phillips.")
