C.N.R. GRANTED APPEAL IN CASE BY KAPUSKASING MAN

The granting of the appeal and the issue of an order for a new trial by the First Divisional Court, Osgoode Hall, Toronto, entered by the Canadian National Railways against the verdict of the jury at the assizes last fall which awarded S. Alexander, of Kapuskasing, \$4,221.10 damages for the loss of a leg as the result of a fall from the Continental Limited in May 1927, means that the case will be tried over again. It was tried last fall before Mr. Justice Rose and the jury brought in a verdict in favour of Mr. Alexander. The latter had sued for \$20,000.00, alleging that the employees of the railway had been negligent in not closing the vestibule door on the day coach and that as a consequence he had been thrown from the steps of a car when the train stopped with a very noticeable jar and perk. The accident occurred as the train was pulling into Kapuskasing station, and the defendants held that Alexander was standing on the steps of a tourist car behind the first-class coach, and not ahead, as he had claimed. They had a young lady passenger who swore that she had seen him pass through the first-class coach. The railway also suggested that the plaintiff had been engaged in the illegal handling of liquor at the time of the accident, suggesting that it was his attention to this that had contributed to his falling off the train.

UNIVERSITY REGISTRATION

The total university registration in twenty-three universities of Canada in 1927 was 42,546, including 26,569 men and 15,977 women. These figures are "exclusive of duplicates between federal universities." The total registration in universities and colleges was 57,164 of which 38,789 were men and 18,375 women.

UNITED STATES CAPITAL FOR CANADIAN MINING

Corporation Formed in New York to Finance Northern Ontario and Other Canadian Mines.

Information coming from New York last week indicates that announcement is soon to be made of a new corporation financed entirely by United States capital for the development and financing of mining enterprises in Canada. Prominent financiers of Chicago, Boston and New York have underwritten the entire capital of the new company, and only Canadian mining enterprises are to be developed and financed by it.

It is understood further that the corporation will devote itself almost entirely to properties in Northern Ontario and Central and Northern Manitoba. Some enterprises in Northern Quebec may also be financed.

Alexander M. Bilsky, of Montreal and New York, is to be actively identified with the new company, it is learned. Mr. Bilsky is well known in mining circles in Canada, as well as in leading financial circles across the line.

HAD FINE VIEW OF TWO FINE SPECIMENS OF MOOSE

The Haileyburian last week says:—"Passengers and crew of the M. S. Keego had a splendid view of two fine moose on the lake shore near Mill Creek last week-end as the boat was making her regular trip back to port here in the afternoon. The animals were standing near the water's edge and, as the boat was running close in to shore to escape a quantity of driftwood, they were near enough to get a good look at the "kings of the forest." Capt. Burns states that at times the moose is in the habit of crossing to Burnt Island and he thinks that this was the intention of these two when they arrived at the shore. The lake was rough at the time and the animals did not attempt the crossing but stood gazing at the boat until they could no more be seen. They did not appear to be at all alarmed."

ILLEGAL TO SELL OR USE FIREWORKS IN ACTON.

The people of Timmins whose nerves are just recovering from the effects of the setting-off of fireworks on the streets, preferably at the heels of passersby, will be interested to know that at least one town in Ontario has enforced a by-law making the sale and the discharge of fireworks alike illegal. Indeed, there are some who will hope that Timmins may follow suit before the July First fireworks are ready. For literally weeks before the twenty-fourth of May, at all hours of the day and night, fireworks were discharged in improper way. The police did what they could to lessen the nuisance, but it would appear that nothing but total prohibition for a season or so will teach sense to some. One of the favourite tricks of some louts, usually some fellow, overgrown everywhere but in the brains, was to throw fireworks behind people passing along on street. These simple louts found some delight in the nervousness of their victims. The louts did not apparently stop to realize the harm that might be done. Some women were afraid to walk down street, knowing that their nerves were not in shape to stand the shock that the firecracker form of humour inflicted. Report has been made of more than one case where ladies have had parts of their stockings destroyed by the explosion of fireworks behind them. One baby in a carriage threatened to go into convulsions from fright following the sudden explosion near the carriage of one noisy type of firecracker thrown by some fellow whose proper home was near Kingston or Orillia. All will admit that youngsters of all ages, enjoy the use of fireworks on celebration days. But if they can not use the privilege with some sort of regard for the feelings and rights of others and without endangering human life and health, the privilege is not likely to be long continued. Some years ago the town of Acton, Ontario, took drastic action to remove this particular danger and nuisance. Under the heading, "A Dangerous Practice," The Acton Free Press last week commented editorially as follows:—"It seems to be a foregone conclusion in many places that the Twenty-fourth of May and fireworks are inseparable. And each year, following this holiday, there is accounted the usual toll of accidents. The regrettable part of it all is that the toll is generally on the children who are given liberties on this day with fireworks to please them. This year at least five children in Ontario were injured and three buildings destroyed as a result of fireworks on the 24th. No doubt many more minor accidents occurred which were not reported. Like many more, the editor can well remember his own burned fingers from the fireworks of his day that were not reported to anyone. In Acton it is now illegal to sell or discharge fireworks within the corporation boundaries. The result has been that there has been a gradual dying out of the custom and now very few are guilty of disobeying the law. Fireworks in the hands of children are a dangerous amusement and the action of the council years ago in illegalizing them was a credit to their forethought."

Mr. and Mrs. Leblanc, of Montreal, were Timmins visitors last week.

An Appeal to all Civic Officials

Millions of dollars damage to Ontario's crops are caused by weeds. The Weed Control Act seeks to control this menace. Municipal councils and officers have important responsibilities in carrying out this act. Weeds on highways must be destroyed by the "Road Authority." Weeds elsewhere must be destroyed by the owner or occupier of the land. An Inspector shall be appointed by each municipal council to see that these terms are complied with.

Most civic bodies are energetically discharging this obligation and when action is not being taken, residents should communicate with the members of their municipal council.

Every precaution is needed to wipe out the weed menace. Clean seed plus weed destruction at the proper time to prevent spread of weed seeds will bring your district greater profits from clean successful crops.

Re-roof with Rib Roll

for SAFETY, PERMANENCE and BEAUTY

Rib Roll Roofing is a patented Metal roofing which meets the high standards required for Council Standard Brand.

But Rib Roll is not only first in quality. Its appearance is extremely attractive. It is used on houses, cottages, barns, implement sheds, garages, school houses, churches and other buildings.

Rib Roll lasts. Its extra heavy coating of galvanizing resists the wear and tear of rain, snow, hail, frost and heat. It prevents fire-loss from sparks falling on the roof.

Easy to Put on New Roofs or over Old Ones

Rib Roll is made in sheets 5, 6, 7, 8 and 10 feet long. These sheets fit snugly together, eliminating leaks and chinks.

It is easy and quick to put Rib Roll on new roofs. If you are re-roofing there's no need to take off the old wood shingles or paper roofing. Ask us for instructions.

See the Rib Roll Agent now for full particulars, or send us the ridge and rafter measurements of your roof for free estimate of cost. No obligation.

Local dealers wanted in some localities.

Send me circular 28 and free sample of "Rib-Roll" Roofing.
