The battle of man versus the of the Canadian north. But he has a

pedition is Jack Hammell, one of the The most amazing treasure hunt in most colorful figures to come out of interest is the prize money—and for he history of the world is taking the north. For a quarter of a cenplace to-day in the Canadian north, tury Hammell has been a leading counts It is a line stretching from the Yukon figure in mining circles. He was o Ungava. Before the end of June responsible for the staking and deover two hundred prospectors will velopment of Flin Flon; he is president of Howey, Harker and Green have joined in the quest, in addition Stabell; he has grub-staked more roughing it with the best of themtogether—and he is still on the job.

> During a lull between deals Jack Hammell dreamed his dream. He visualized an army of prospectors carried to and fro by giant planes—and in less than a month the dream became an actuality. Northern Aerial Minerals Exploration, Ltd., was form ed; over two million dollars was subscribed, mostly by important mining companies; ten aeroplanes were ordered; bases were established at strategical points across the pre-Cambrian shield, and prospectors, geologists, engineers and pilots flocked to the Hammell standard.

planes are in service and over fifty prospectors are in the field. Before the end of June the army will be up the map is on. Old-timers say that to full strength.

There was no need for Hammell to always keeps his word. send far for men. Old timers spoke joenlarly of Jack's circus, but they LAW ENFORCEMENT NOT rallied round him, almost to a man. One of the first to enlist was Sandy McIntyre, discoverer of the famous McIntyre Mine. Big Tom Creighton, a veteran of the Flin Flon trail, is directing operations at a base. Other men, deservedly famous in the history of mining, are in charge of prospecting parties scattered throughout the

Hammell himself is directing operaready to take him into the firing line as soon as a discovery is reported. Day after day he checks over maps and reports compiled by his geologists hap-hazard about his methods. To it is going to be cracked open scientifically; mile by mile and acre by acre. "By using the aeroplane," he told

me, "we are going to do in five years what it would take fifty years to ac complish in the ordinary way. Every prospecting party we place in the field When you consider that our prospecting force alone will comprise over 200 five years I expect to see a dozen new mining fields opened up in Manitoba,

wholesome contempt for men who reu last week's Kirkland Lake Nor- The commander-in-chief of the ex- tire just because they are rich. 'Pikers,' he calls them. Men whose only Hammell it's the race alone that

> He told me of the inspiration which lies behind this prospecting company. In jerky sentences he spoke of breaking new trails, inspecting prospects, prospectors than any dozen men put and the worst. It seems that the north 'got him'; gave him a new outlook on life, a new vision. He came to regard the north as those earlier pioneers regarded the west-it was a country to work for. Year after year he plugged ahead. He developed prospects, grub-staked prospectors and acted as a connecting link between the bush and Wall Street. He made a fortune for himself and fortunes for at least a dozen prospectors. But that wasn't enough. He dreamed his

"I'm going to crack it open," he said. "I'm going to prove what geologists have been saying for years. I am going to give the five best years At the present time four large of my-life to this job of developing the north country.'

And so this battle of man versus Jack Hammell will win-because he

## BAD IN KIRKLAND LAKE

Reference was made last week to the statements made by a beer inspector in regard to law enforcement at Kirkland Lake. As noted last week these statements were promptly refuted by Mr. A. F. Kenning, M.P.P. for this riding and by Gen. V. S Williams, commissioner of provincial police. In a wire to the Government at Toronto Mr. Kenning said:-

tions at headquarters, but less than a "As Kirkland Lake is in my riding, mile away his private plane is moored I wish to emphatically deny that conditions exist at that point as menand field men, for there is nothing the Liquor Control Board has made statements about conditions which are use his own expression he is going to not true. Have investigated condiminister of the department, stated perance Act."

## THE NEWSPAPER OFFICES

It will be recalled how Larose was credited with throwing a blacksmith's hammer at a fox, hitting a slab of silver in a piece of rock and so uncovering all the wealth of Cobalt-in the newspapers. Also, perhaps, how Benny Hollinger pulled a Porcupine quill from a hole in the rock, found the tip gilded with gold, and so the riches of the Porcupine came to be known—in the newspapers. And only one guess is allowed as to the newspaper! Probably the best of all, however, is the one in 'Don't Quote Me,' in The Toronto Star last week. Here

is the paragraph: "The mining market may have "gone to the dogs" the last couple days but a bow-wow gets credit for discovering one of the richest strikes on Vancouver Island, according to Harry Tanner, coast prospector. One day he heard his dog barking furious-

ly and when he went to see what it

was all about, found him scratching
