SERGEANT GARDNER NOW STATIONED AT COCHRANE

Will Have Charge, under Inspector Moore, of the Northern Part of the District.

A change in the plan of supervision of the Provincial Police in the north land was announced last week. Sergeant Gardner, who has been at Cobalt for some years as second in command, has been transferred to Cochrane. Sergeant Gardner will have the direction of the force in this northern part, his headquarters being at Cochrane. He will, of course, be under Inspector Walter T. Moore, who remains at Cobalt and has charge of this whole North Land.

For the past year or two there has been an agitation to have two inspectors in this part of the North, one with headquarters at Timmins or Cochrane and the other at Cobalt or Haileybury. The plan for making two inspectors has been thought by some to be unnecessary, while at the same time it has been generally recognized that more and more attention is needed in the northern section as the country develops. With Sergeant Gardner stationed at Cochrane, which is the logical place for the main office for the northern section, there should be better direction and more rapid service in case of need. This is a country of large distances and Cobalt is far away for a centre. Cochrane is centrally located and convenient for the work along the Transcontinental and in the immediate district around the town. Under the supervision of Inspector Moore and with Sergeant Gardner stationed at Cochrane the work of Provincial Police in the northern part of this inspectorate should be improved in efficiency.

Sergt. Gardner has been second in charge at the Cobalt office for the past five years. Previous to that he was stationed at South Porcupine, as well as having experience on the Provincial Police force in other centres. Like Inspector Moore he has the confidence of the people in general as an honest and earnest officer.

Schedule for Second Half of Softball Association

Fifteen More Games Announced in the Timmins Softball Association. Players Reminded About Looking After Bases After Games. All Must Wear Running Shoes.

The schedule for the second half of the Timmins Softball Association was announced last week, and is as follows:—

- Monday, July 9—A.S.D. vs. Club Canadiens.
- Wednesday, July 11—Holly Rees vs. Porcupine Power.
- Friday, July 13—Arrows vs. Taxis.
- Monday, July 16—Taxis vs. Porcupine Power.
- Wednesday, July 18—Arrows vs. A.S.D.
- Friday, July 18—Arrows vs. A.S.D.
- Monday, July 23—Holly Rees vs. Taxis.
- Wednesday, July 25—A.S.D. vs. Porcupine Power.
- Friday, July 27—Arrows vs. Canadiens.
- Monday, July 30—Taxis vs. A.S.D.
- Wednesday, Aug. 1st—Holly Rees vs. Arrows.
- Friday, Aug. 3—Porcupine Power vs. Canadiens.
- Wednesday, Aug. 8—Porcupine Power vs. Arrows.
- Thursday, Aug. 9—Club Canadiens vs. Taxis.
- Friday, Aug. 10—A.S.D. vs. Holly Rees.

ning shoes on the field. The members of any team who neglect to do so will be liable to be put off the field by the umpire.

Another matter that players should keep in mind is the fact that each team must see that bases are brought in after every game. At present the bases are brought out to the field for them at each game, and they are expected to see that the bases are properly put away when the match is over. If they fail to do so, they will have to fetch their own bases to the field for the succeeding game.

The first half of the softball schedule has certainly been a big success and the second half should be even more interesting. Softball has taken on remarkably well here this season and it promises to be the big sport in town. There is not only big interest among the players, but also among the spectators. Large crowds gather to watch each game, and it is putting the case very mildly indeed to say that softball is one of the most popular sports in town.

Those who like good sport should follow the softball. This season competition is very keen and the spectators get more than their money's worth at every match.

DOMINION GEOLOGIST PAYS VISIT TO TIMMINS

Major Burwash Here on Way to Herschel Islands in the Far North. Will be Away Two Years.

Among the visitors to Timmins last week-end was Major Burwash of the Dominion Geological staff at Ottawa. Major Burwash left here on Sunday on the way to Edmonton where he will leave the railway line to travel a thousand miles to the far north. At Edmonton he has 16 tons of supplies to take in, including instruments for testing, assaying, etc. His objective is the preparation of a complete report on the geology and mineral probabilities of the Herschel Islands. From Edmonton, Major Burwash will go up the Mackenzie river by boat. He has a number of Eskimos with him. Major Burwash plans to make a complete general and geological report for the Dominion Government in regard to the Herschel Islands. He expects to be away for about a year and a half.

Last year Major Burwash returned from Baffin's Land where he made explorations for the Dominion Government. He also reported on the plan proposed of sending reindeer to the far north for the benefit of the Indians and the Eskimos. Under all the circumstances he did not consider the plan practical. His report referred to the plenty of seal, bear and other wild life in the far north. On his return last year from Baffin's Land Major Burwash was accompanied by Capt. Munns, of Haileybury, who left this part of the North some twelve years ago. Capt. Munns was generally believed to have lost his life in the North, but instead had been hale and hearty, though a thousand miles from railways and far from communication with the outside world, except on rare occasions. He had been running a trading post in the far north.

During his visit to Timmins Major Burwash spent some time at the Jones-Porter Mine in Deloro township. Major Burwash visited the mine last spring. Inspecting the property on this visit he was greatly pleased with the progress made. He said he saw a wonderful improvement. There is a large ore body in the shaft and drifts and the property seems to be developing into a mine of importance. Major Burwash and John Jones, the prospector and promoter of the Jones-Porter property, first met some 800 miles from a railway, in that new country west of the Belcher Islands. Major Burwash was with Rev. Mr. Walton at the time they met the Jones party, that being some twelve years ago.

Major Burwash has spent about eighteen years in the Baffin's Land area, visiting there for the Dominion Government at different times. Among his finds was a deposit of galena running 50 per cent, and also showing silver and lead. He traced the ore body for about 12 miles.

On his present trip to the Herschel Island, Major Burwash will investigate and report especially on the geology and the chances especially for oil. He knows the country possibly as well as any man alive and has a working knowledge of the Eskimo language as well as the Indian dialects in the district. The Government reports by Major Burwash for a great many years have been recognized as most informative and authoritative.

Acton Free Press:—England has, by act of Parliament, settled on a fixed date for Easter. It would avoid much confusion if this and other countries adopted a like plan and had Easter settled to fall at the same time each year.

ASSISTANT GEOLOGIST LEAVES CIVIL SERVICE

T. L. Gledhill Retires from Department of Mines to Enter Commercial Life.

During the past year or two several outstanding men have left the Ontario civil service to take up other employment with other private concerns. In each case, it is understood, the reasons for each of these changes seem to hinge on finances. Surely Ontario is able to pay as high salaries as private firms. The work done by these mentioned civil servants in each case is very important. "The labourer is worthy of his hire."

The latest to break away from the Ontario service is T. L. Gledhill, for the past three or four years on the staff as assistant geologist. In discussing the matter, a Toronto correspondent says that T. L. Gledhill, for about 15 years connected with work for the Ontario Department of Mines, and for another dozen years or more on the roll of useful and helpful civil servants, as assistant geologist, is leaving the Government service to enter commercial employment. Originally from Kinross, he had a brilliant record at Toronto University and in post-graduate work, and his services were requisitioned by the Department for survey work during a number of seasons before he joined the permanent staff. He is a specialist in the pre-Cambrian formation.

The Department not long ago also lost E. W. Todd, assistant geologist, for similar reasons. The Government scale of salaries is not sufficient to hold men when corporations decide that they need their services.

Beware of shortcuts. Unless you're lucky there's no substitute for hard work, but even hard work won't get you very far without intelligence.

A clear cold soup... a club sandwich... a slender glass of "Canada Dry"

LUNCHEON in summer is always a problem. Appetites lag. The weather is uncomfortable. "Why," you wonder, "did I ever invite anyone on a day like this!"

It isn't really as bad as that. Serve cold foods. Cold boiled ham, for instance. Or a club sandwich. Start off with a clear soup—cold. And accompany your luncheon with a slender glass of "Canada Dry."

This is a delicious ginger ale, especially in hot weather. It has a thirst-quenching dryness to it. It has a mild and mellow flavor which gives zest to the simplest meal. It is made from finest quality Jamaica ginger and other absolutely pure ingredients. By a secret method of carbonation "Canada Dry" retains its delightful sparkle long after the bottle is opened. And it mixes well with other beverages. Order "Canada Dry" today.

"CANADA DRY"

Made in Canada by J. J. McLaughlin Limited, Toronto and Edmonton. Caledonia Springs Corporation Limited, Montreal. In U. S. A., Canada Dry Ginger Ale, Incorporated, New York
