

# "SALADA" TEA

357

In remote and distant parts of the world, fine teas are grown—wherever they grow these teas are procured for "SALADA" blends. The best the world produces is sold under the "SALADA" label. Millions know the satisfaction "SALADA" gives.

## PORCUPINE ROD AND GUN CLUB MAKES GOOD MARKS

The Porcupine Rod and Gun Club weekly shoots are enjoyed by many. As a matter of record the following may be noted:—Week of June 21st, P. C. Young was high gun with 24 out of 25. Week of June 28th, J. Stanton again came through with a close possible, breaking 24 out of 25. Capt. D. Jones was close second with 22 out of 25. Next shoot this (Thursday) evening at 6.15 p.m.

## PROVINCE PAYS \$85,000 IN 1928 WOLF BOUNTIES

Approximately \$85,000 has been paid in wolf bounties this season by the Ontario government. This sum is the largest yet paid out by the present administration, and it represents a kill of 5,491 wolves, an increase of \$85 over the same period last year. The special snare recommended by the Department of Game and Fisheries is said to be the reason for the increased catch.

## LIGHTNING HITS POWER HOUSE AT KIRKLAND LAKE

Firemen Have Strenuous Hour's Work to Avoid Serious Fire Disaster Last Week

Fire caused by lightning hitting the power house at Kirkland Lake last week came close to having very serious results for the town of Kirkland Lake. In fighting such a fire the brigade was naturally handicapped, but by careful work they averted what was generally considered as a serious danger to Kirkland Lake. The Kirkland Lake Northern News tells the story of the incident last week as follows:—

"One crash of lightning on Wednesday afternoon very nearly had disastrous results for Kirkland Lake. The bolt from the storm entered the sub-station of the Northern Ontario Light and Power Co. on Government Road and shorted across to the 25 cycle side of the Frequency Charger with the result that the coils caught fire. An alarm was immediately sent in to the Fire Brigade and within a few minutes Chief Wilkes and his men were on the job. When the Chief saw the nature of the fire, he at once realized that using water was out of the question and the chemicals were put in use. The supply on hand did not have much effect and the call went out to the various mines and stores to release all the chemical extinguishers they could spare. The response was instantaneous, and within a short time, the Teek-Hughes, Lake Shore, Sylvanite, Wright-Hargreaves and Tough-Oakes had sent all the available supply they had. The merchants also responded and fire extinguishers were simply taken from their stock and rushed to the scene of the fire.

"Owing to the dense smoke that filled the building the firemen were handicapped to some degree, as only by the wearing of a gas mask could they approach the scene of the fire and use the extinguishers. It took about one hour before the firemen had the fire under sufficient control that they could return to the hall.

"It speaks well for the mines and merchants that they were so eager to do what they could to help. Most of the help was asked for by telephone. The reason some of the mines were not asked was because the telephone lines to them were out of commission. No doubt had they been within telephone reach, they too would have responded.

"The real damage to the plant was slight. The power was off for about 15 minutes only. The N. O. L. & P. employees started to work on the damaged machine and in record time had it running again.

"There is at the fire hall a quantity of extinguishers, and Fire Chief Wilkes asks those who loaned them to call and assist him in seeing that they are returned to their rightful owners."

## VISIT TO SCHUMACHER L.O.B.A. OF GRAND OFFICERS.

Golden Glow L.O.B.A. No. 742, of Schumacher, entertained Grand Lodge Officer and Sister Rogers, Past Worthy Mistress, of Cobalt L.O.B.A. on Thursday, June 28th.

Lodge was opened in due form with W. M. Sister Williams in the chair. Sister Kennedy, Grand Mistress of Ontario, was received with Grand Lodge honours and presented with a bouquet of golden glows. Sister Rogers was received with a hearty clap of the hands and also presented with a bouquet of golden glows. Sister Kennedy helped to conduct the meeting and delivered the obligation of the Orange Degree to three new candidates, Mr. Zack Hart, Miss Olive Hart, Mrs. Myrtle Mullins. The meeting was closed in due form, with the singing of God Save the King.

Sister Bonnell, Past Mistress of Gold Star Lodge, of Timmins, presented Sister Kennedy and Sister Rogers with a luncheon set in behalf of the lodge. The speakers for the evening were:—Mr. Dave McKenzie, Mr. J. G. Harris, Mr. J. Bonnell, Mrs. Geo. Kennedy, Mrs. G. Henderson, Mr. O. Nilson, Mrs. Gordon, Mrs. Burton, Mrs. Rogers.

Mrs. Geo. Kennedy, Grand Mistress of Ontario, and Mrs. Rogers, of Cobalt were the guests of Mrs. Green, First avenue.

The new banner for Golden Glow Lodge of Schumacher, was unfurled in Timmins on Friday, the 29th of June, by Sister Kennedy, Grand Mistress, L. O. B. A. of Ontario.

This banner is the work of Mr. Green, of Schumacher. The work was much admired by those who had the honour to be present when it was unfurled and also when it was dedicated by the Rev. Ivan Kennedy, of Schumacher, on Sunday, the 1st of July.

## \$100,000 REPORTED PAID FOR SEAT ON EXCHANGE

It was reported last week that T. U. Fairlie, who has recently organized a new brokerage firm, paid the record price of \$100,000 for a seat on the Standard Stock and Mining Exchange, Toronto. The bid, accompanied by a marked cheque, did not bring any of the members already on the exchange, and the directors had to dispose of one of the five new seats recently created, to meet the application. Mr. Fairlie recently disposed of his interests in Ussher, Fairlie and Co., Limited, and has announced the formation of a new firm, Fairlie and Company, Limited.

## REGULAR AIR SERVICE MONTREAL TO HAILEYBURY

Company Giving Service From Rouyn to Quebec May Add Longer Trip to Their Air Service.

Everybody in this North Land should be interested in air service plans, because this is a country of long distances where the airship offers special benefit in the way of speed transportation. Not only is it important that there should be as many air services as possible in the North Land itself, but also that communication should be established, if at all practical with outside cities. For this reason there should be more than passing attention given to the following editorial from The Haileyburian last week:—

"Haileybury is again the centre of an air service to various parts of the North Country, with the arrival of Mr. Bret Pliske, managing director of the General Airways Limited, in a Fairchild monoplane last Thursday night. Mr. Pliske visited Haileybury and Rouyn early in May and has since been completing the organization of the service. With him is Ross Baker, air mechanic, and they have already made trips to Amos and the Malartic Mines. No regular schedule is being followed, the plane taking men to any point desired. It has a cabin capacity of four passengers.

"Mr. Pliske made his first trip by air to this district on June 20, with a party composed of Sir Geo. Bury, retired vice-president of the C.P.R., L. Brochu, of Montreal, and a reporter from La Presse. They flew from Montreal, passing over Haileybury, and motion pictures were taken on the trip.

"Other directors of General Airways Limited include Captain Roy Brown, formerly of the R.A.F., who is credited with bringing down the famous German ace, Richtofen, in the Great War and Mr. W. M. Brawley, who was in Haileybury for a short visit on Monday.

"Mr. Pliske states that his company has decided to inaugurate a regular service from Montreal to Haileybury and points in Northern Quebec. He expects that a multi-motored plane will be used on that route. At the present he is piloting the plane on its trips from here to the mining districts but expects to have an assistant pilot in the near future. He is located at Hotel Haileybury."

## NORANDA'S WONDERFUL GRADE OF ORE SHOWING

Commenting upon the grade of the ore recently encountered at the Noranda, Sidney Norman in the Canadian Mining World, published by Stobie, Forlong & Co., says, "If that grade is maintained, there will be but one other mine on the North American continent producing similar product—United Verde Extension, of Arizona, which for years maintained an average copper content of between 10 and 11 per cent., but with far less precious metals value. The less than a million ton now in reserve at the Arizona mine is estimated to contain an average of 8 per cent. copper, which is very close to official Noranda figures and two per cent. less than the unofficial reports regarding the new ore. At present rate of production, Noranda will produce around 30,000 tons of copper metal this year and will move into eighth place among all the

copper producers of the continent. But for the fact that the largest producers in the States are made up of several or many contributing units, Noranda would occupy even higher place. Emphasizing the exceptional high-grade ore yielded by the Quebec mine, it may be mentioned that the average copper content of all smelting ore produced in the United States in 1926 was but 4.75% while the average of all concentrating ore in the same year was but 1.24 per cent. As to the precious metal content, the average for all copper ores produced in the United States that year was 31 cents per ton—one-sixteenth of Noranda's official average and one-thirty-second of the unofficial average credited to the ore body now being developed."

## ACONDA PROSPECTING UNEXPLORED CLAIMS

D. B. Rochester, President of the Aconda Mines, says an active exploration and development campaign has been mapped out for about seventeen of the company's Kamiskotia claims which have hitherto not been prospected. Mr. Rochester expressed enthusiasm for the outcome. Work done to date has proved the existence of ore but the values obtained have been very erratic.

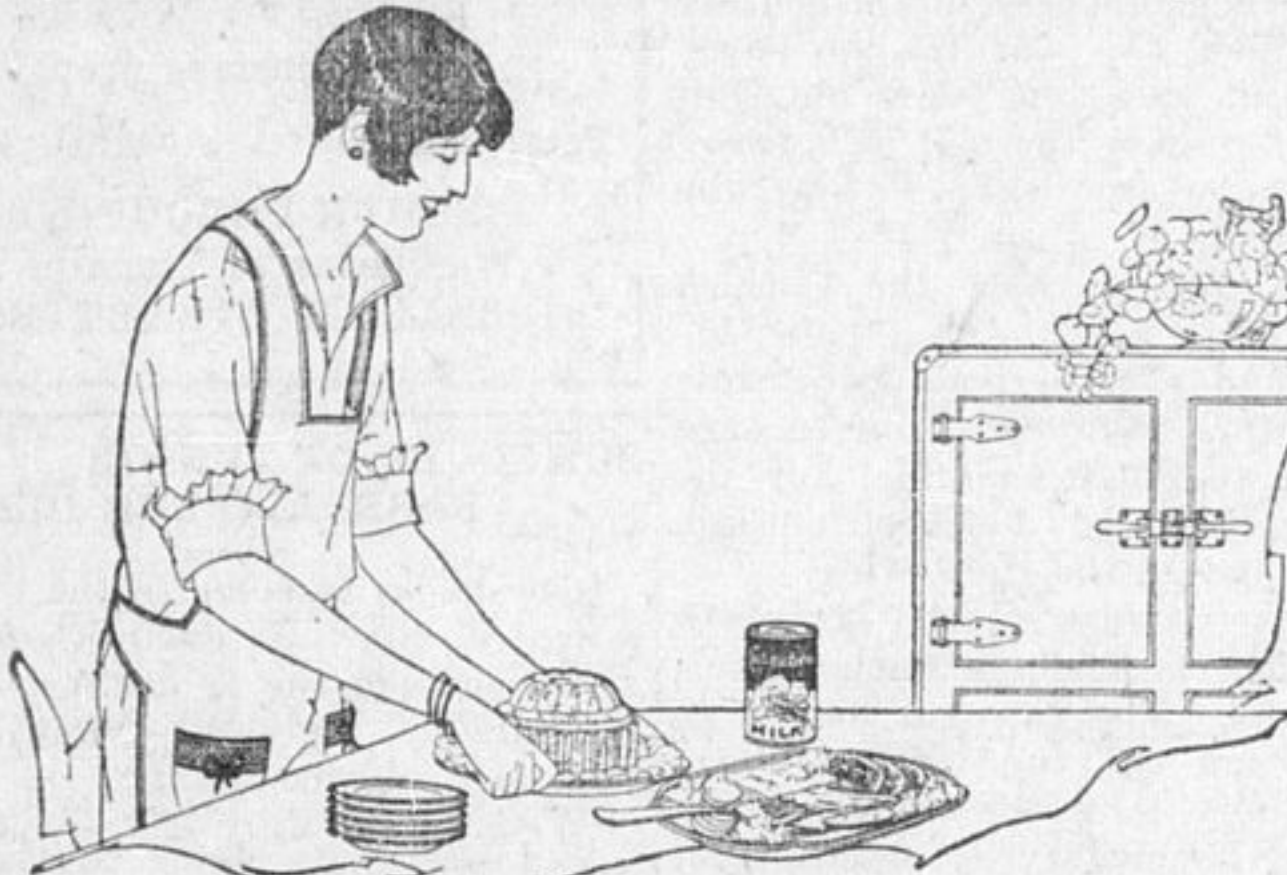

Experience is a dead loss if you cannot sell it for more than it cost you.

# Clean up the Source of WEEDS

- 1 In vacant lots and partially cultivated fields.
- 2 In fence corners where the plough-share cannot penetrate.
- 3 Along the roadways of your district.

Each year weeds destroy Ontario's crops to the extent of millions of dollars. You must help rid your community of this menace by co-operating in every way. See that your own land is clear. Report weed growths on roadways, vacant properties or uncultivated fields to your representative on your local council or to your weed inspector.

Thus you will be doing your duty in exterminating one of the greatest enemies of successful farming—noxious weeds.

Write for Bulletin, "Weeds of Ontario."
