BANQUET TO BE GIVEN TO THE R.B.P. GRAND MASTER

A banquet is to be given on Monday evening, Aug. 27th, commencing at 6 p.m., by the Royal Black Knights of Ireland Preceptory No. 868 in honour of the visit of the Grand Master, R.W. Rev. R. A. Spence, of Dundalk, Ont. The banquet will be in the Trinity United Church, Schumacher.

BOY CONSIDERED THE PUNISHMENT WAS UNFAIR

The Pas (Manitoba) Herald last week told this one:— Two little boys were naughty and the teacher kept them after school, making them write their names 500 times as an added punishment. On hearing this, one little boy burst into tears. The teacher asked what was the matter. "Tain't fair," he cried "his name is Lee and mine is Schniekel-fritzer."

ALEX GILLIES REPORTS ON RED LAKE ACTIVITY

The Haileyburian last week says:— "Mr. Alex Gillies, well known mining man, who has spent the summer in the Red Lake district, was in Haileybury for a day or two early this week. He came on here after spending a couple of weeks at his home in Toronto and has since returned to the more western part of the province. "Mr. Gillies states that there is greater activity in the Red Lake section this year than at any time since the first rush of prospectors a couple of years ago. He also states that there are all the indications of important developments, particularly at the Howey Gold Mines, where everything is encouraging. Everybody in the district is working, according to Mr. Gillies. There are no idle men and no men waiting and watching for developments. All are working with a will and are confident of the future of the district from a gold mining standpoint."

HAILEYBURY SPORTSMAN CATCHES 20-POUND TROUT

The story of the capture in Lake Temiskaming of a 20-lb. trout is told by The Haileyburian last week as follows:— "A. J. Carson, one of the most enthusiastic of local anglers, caught what is believed to be a record trout in Lake Temagami last week-end. The big fish weighed almost twenty pounds and gave A. J. a couple of hours of the hardest work he ever experienced on a fishing trip. He was trolling with a copper line about two miles from the town of Temagami when he hooked the big fellow. From that time on he had what he terms the most interesting two hours he ever spent, before the fish was finally tired out and could be coaxed near enough to the skiff for safe landing. On Monday morning the trout was placed in Mr. Carson's window downtown, where has was the centre attraction and proved the envy of all the local anglers. Later it was sent to Toronto to be preserved and mounted as a lasting testimonial to A. J.'s skill with the rod."

SIXTY MINING COMPANIES WORKING IN QUEBEC AREA

There are sixty mining organizations and enterprises at work in the gold area of Quebec, in the Cadillac-Malartic-Dubuisson sections south of Amos, according to a chart prepared by Stobie, Furlong and Company's Montreal and Quebec offices. The majority of this surprisingly large number are located in the Malartic area. The list shows. Bousquet Cadillac Section: Canadian Enterprises, Gold Formations Options, Connell, Graham-Bousquet, Davies, Thompson Cadillac Mine, La Reine Mining Co., O'Brien Mine, Cummings Trudel, Dorval, Cartier Malartic, Ranger Cadillac, O'Brien, Montreal Exploration, Pandora Gold Ltd., Astoria Rouyn, Rubec, Canadian Enterprises. Malartic Fourniere Section: Thompson Malartic, Pre-Cambrian Holdings, O'Brien, Norrington, Dev., Co., Lartie Mining Co., Pre-Cambrian Holdings, Thompson Cadillac, Sladen Malartic, La Reine Mining Co., Sladen Malartic, Cartier Malartic, Harriaraw Syndicate, Grover Daly, Bidgood, Malrobie Mines, Windfall Rouyn, Sladen Malartic Cummings Trudel, Sladen Malartic, Malartic Gold, Abbey Mines, Lucky Tiger, Windfall Rouyn Fourniere Gold Mines, Demara, Crewoken, Sudbury Basin., Duparquet Malartic Syndicate, National Exploration, Valco Mines, Coffin, Malavar Mines, Don Rouyn. Dubuisson Section: Malartic Extension, Siseoc Gold Mine, Parker Island, Sullivan Mine, Parker Island, Martin Mine, Unison Mine, Dubisson Mining Co., Lorette, Stabell Mine.

Wall Street Journal:—Crime may be a disease but if so it calls for arrest cure.

NO RACE ON FOR THE FAR NORTH, SAYS HAMMELL

President of N.A.M.E. Says Hudson Bay Area is Big Enough for All Exploring Area.

In an interview with The Northern Miner recently Mr. Jack Hammell, president of the Northern Aerial Minerals Exploration Co., treated with amusement the story told by several of the daily newspapers that there was a race on between exploration companies to get into the Hudson Bay area. He stated emphatically that there was no thought of any such race, so far as the N.A.M.E. was concerned as the Hudson Bay area was large enough for everybody.

"My instructions to my men, in all parts of Canada, is to give as much assistance as possible to any other parties seeking minerals in the northwest territory," said Mr. Hammell.

"We are not gunshooting. Anything we may find will be announced to the world.—The territory we are heading for is 50 times or more as large as Ontario's mining areas and there is plenty of room for as many parties as want to go there.

"If we find anything, and there is every reason to believe that we will, we will want neighbors. We are out to make money, it is true, but we also want to open up the country, and want to help others to do so. Men who have vision and courage enough to go into that far country are deserving of every assistance we can give them."

"Men who are prominently connected with other companies which are heading for Hudson Bay and thereabouts are 'riding with us,' in a good many cases, in N.A.M.E."

"It is my belief that we can be of material assistance to each other. The real idea is to create a new Canada up there, not lend expression for selfish and greedy motives. Say for me that this idea about 'racing' is all the bunk."

N.A.M.E. now has 60 prospectors in the field. Men are spread from Fort Hope, Joe Lake, Savant Lake, Favourable Lake, Island Lake, Sandy Lake and God's Lake. C. S. Johnston is in charge of these men.

Tom Creighton is in charge of another party working out of The Pas, north to Reindeer Lake, Northern Manitoba and Saskatchewan and along the Hudson Bay railway to Fort Churchill.

Two planes are now on the way from Winnipeg to British Columbia, from where they will fly into the northwest territory to investigate believed deposits of galena, copper, gold

and quartz and placer gold. In the meantime the "Patrick and Michael," with 20 prospectors aboard, has passed Belle Isle en route to Hudson Bay. These prospectors will be left on either side of the bay. The boat also has supplies on board for two years, together with a large amount of gasoline. One plane is also flying men into Hudson Bay country. N.A.M.E. now has seven planes at its disposal, sufficient for all present planes. These include 4 Fairchild's, 1 Fokker, 1 Leoning amphibian and 1 DeHaviland moth.

LOOKING FOR OLYMPIC CONTESTANTS IN NORTH

In the last issue of The New Liskeard Speaker there is a discussion of the possibility of the North Land being represented in future Olympic gatherings. In its editorial reference The Speaker says:— "Can we discover a Joe Wright! a Percy Williams! an Ethel Catherwood! or a marathon champion! Are we of the Great North heading for a place in the sun at the next Olympic gathering! Judging by the number of aspiring athletes to be seen daily at our beach doing a little training it seems very probable. These champions in the making are to receive some tangible encouragement in their aspiring efforts. "Proud as we are of the achievements of our gallant athletes at Amsterdam, still more proud would we be if the north had an entry or two at the next Olympic. "Under the banner of the Kiwanis Club of Liskeard there will be held on Labour Day the biggest sports gathering in the history of Temiskaming. Can we find our champion athlete? Is he in our town? at the Wabi Iron Works? at Hill-Clark-Francis, at the High School or possibly at Hanbury, Englehart, Kirkland Lake or Timmins? "Pass up the cigarettes, cut out the late nights, and get into real training for a month. The prizes will be well worth while. Watch the press for full particulars in later issues."

St. Thomas Times-Journal:—Every community should seek to encourage athletics. Niggardliness should not be the policy when this matter is considered. Children should have the necessary equipment and opportunity to develop their bodies as well as their minds. Money spent to develop athletic prowess is money well spent. It will return a hundredfold in better and more aggressive citizenship."

Macon Telegraph:—If, as reported, Colonel Lindbergh seeks oblivion, he might by flying across the Atlantic with a lady passenger.

SHREW EATS TEN OF HER YOUNG ON RAILROAD TRIP

The following interesting paragraph of natural history is from a recent issue of The North Bay Nugget:— "A shrew, a type of tropical rat, with a litter of 12 young, found in a shipment of bananas received by Gamble-Robinson, Ltd., and exhibited in Sayer's drug store for several days, was forwarded to Queen's University, Kingston, by a member of the student body for the purpose of adding the animal to the collections in the natural history museum. When the animal and its litter reached destination it was found that the mother had consumed all but two of her young. The little animal will be mounted and placed on exhibition in the museum."

CENTENNIAL EDITION OF THE PEMBROKE NEWSPAPER

The Pembroke Old Home Week and Centennial proved worthy of the progressive town of Pembroke, and one of the most interesting events in connection with the hundred years of Pembroke's history was the issue of a special number by The Pembroke Standard-Observer to celebrate the occasion. This special number contained 56 pages of most interesting matter in connection with the history of Pembroke. It was profusely illustrated and was of the greatest interest and value to all interested in Pembroke. That the newspaper should have the equipment and the enterprise and ability to turn out this immense and readable number must be a matter for the greatest pride and satisfaction to Pembroke. It is often said that a town may be judged by the newspaper it supports, and on this theory it would have to be admitted that Pembroke is a mighty good town. Which it is! Thousands of people all over the Dominion and from many states of the United States gathered in Pembroke last week and sang the praises of the town in no uncertain voice.
