

Quickly Digested SCOTT'S EMULSION

**MANY AND VARIED USES
FOR LIGHT PLANES HERE**

Government Machines Carry Food, Tools, Hose, and Prove Very Practical in Use Here.

The "Moth" type of planes have certainly proved their usefulness and practicability in the North Land. In a recent issue, The Toronto Globe touched on former criticism of this type of flying machine, and in view of the fact that the North is necessarily so interested in all phases of flying, because of the fact that planes have proved of such value to this country of long distances, the article is given herewith in full:—

When the Ontario Government purchased its first Moth light aeroplanes there were a lot of critics who sang the old song: "You'll be sorry just too late."

"For detection, sketching, and similar light duties, they're 'jake,'" said the critics, "but in any other capacity they're next to useless."

But what do the year's flying records, now in course of tabulation at Queen's Park, show? Well, they show, in one instance, at least, that the critics, to recall a still older popular song should "keep their foot on the soft soft-soft pedal." For, during the six weeks from June 22 to Aug. 7 a single Moth machine, from the Sudbury inspectorate, carried 1,445 pounds of provisions in to a party of 10 working on the construction of a steel tower and phone line 30 to 50 miles from the railway.

Round trip by canoe took two men, four days. Carrying as much as 235 pounds at a trip, the plane made this same round trip in 1 hour and 35 minutes. In addition to provisions, insulators and sundry other tools and equipment, urgently needed and overlooked in the original inventory, were flown in. The problem of getting water to the top of the 400-foot hill on which the tower was being raised, and for mixing the concrete for the piers, was solved by means of a motor fire pump and 600 feet of hose which were also flown in to the spot.

The Moths have made themselves useful in still another capacity this year. On frequent occasions they have been used by officials to keep tab on the wanderings of tourist parties in the bush. One of these parties started from a point in Mississauga East, District of Algoma, without a permit (as required) from the Forestry Branch. A day later, the Chief Ranger, flying on a phone line survey, spotted their camp smoke on Graveyard Lake, zoomed down, landed, checked the crowd up, made them take out a permit, and threatened the guide with cancellation of his license if he ever "pulled such stuff" again.

Canadians Turn to Florida for Carefree Winter Season

Semi-tropical Florida is again drawing large numbers of Canadians for the winter season. It is becoming more popular every year—principally because it is so near, its climate is so inviting, and it offers such an array of interesting sports and pastimes peculiar to that part of the country.

Where else but Florida can one enjoy better such an exciting novelty as Tarpon fishing—or aqua-planeing—or speed-boating—or polo. Where else can one motor for miles through avenues shaded by graceful palms—or by great citrus groves of ripening oranges and lemons—or along the shore of the Atlantic. There's golf, too—all winter long.

Arrange now to spend your winter months in Florida—any Canadian National Railways Agent will gladly supply you with information about rates, routes and its resorts. 44T.F.

Census Report Portrays Mechanism of Distribution

A report has just been issued by the Dominion Bureau of Statistics giving in detail the results of a postal census of Trading Establishments taken in 1924, the main figures of which were issued in the Bureau some time ago. The object of the census was to obtain a measurement of the mechanism of distribution in Canada. Statistics have long been available relating to population and, more recently, regarding the production of commodities. The mechanism, however, by which commodities have been distributed to the ultimate consumer, has in the past been subjected to but slight quantitative measurement. Information regarding this mechanism is of great economic and social importance and the present report represents a first step to meet an urgent need.

To bridge the gap between producers and consumers, or, in other words, to perform these services which finally place products of all kinds in the ultimate consumer's hands, requires a large amount of capital. The report shows, for some 67,000 establishments which reported, a capital investment of more than a billion and a half dollars. Sales amounted to \$1,600,000,000. Forty per cent. of independent retail stores in cities of 50,000 population or over had sales of less than \$10,000, and twenty-three per cent. had sales of less than \$5,000. A grouping of stores according to size of capital investment shows that 70 p.c. of the retail establishments reporting, operated on an investment of under \$10,000, while the same percentage of wholesale-retail stores extended into the \$60,000 class and 70 p.c. of wholesale stores reached into the \$90,000 group. Apart from general and departmental stores, grocery establishments had the largest amount of capital invested. In retail establishments working capital was roughly twice fixed capital, in wholesale-retail establishments it was roughly 2 1/2 times, but in wholesale establishments working capital was nearly 4 times as great as fixed capital. Many other interesting facts about trading establishments are shown in the report.

Beware of the man who promises more than you have a right to expect.

Sault Ste. Marie Star.—We note that heroines in novels still turn pale in exciting situations, and yet we were under the impression that nothing could make the modern girl turn pale—except soap and water.

Details of Amalgamation of the Two Power Systems

Proposed Formation of New Company to Take Over Northern Ontario Light and Power, and Northern Canada Power. Amalgamation Will Result in Improved Service to Customers.

Amalgamation of Northern Canada Power Company Ltd., and Northern Ontario Light & Power Co. Ltd. has been agreed upon by the directors of the two companies, and will be placed before shareholders for their approval at a special general meeting to be held in Montreal on Monday, December 10, 1928. These companies are both subsidiaries of Canada Northern Power Corporation, Ltd., which owns over 90 per cent. of the outstanding Common Stock in each case, and as they both operate in the mining fields of Northern Ontario, the amalgamation has been arranged with a view to effecting economies in operation, permitting of improved service to customers of both companies and allowing the free interchange of surplus power from one system to the other.

The amalgamation plans provide for the formation of a new company the Northern Ontario Power Company, Limited, with an authorized capital of 25,000 shares (\$100 par) of 6 per cent. cumulative convertible preferred stock and 500,000 shares of no par value Common Stock, and the exchange of securities of the new company for those of the amalgamating companies on the basis of one share of preferred for each preferred share held and 2 shares of no par common for each share of common now held by stockbrokers of Northern Ontario Light & Power Company, and 3 shares of common stock in the new company for each 2 shares of Northern Canada Power stock outstanding.

The intention of the directors, should the proposed scheme be ratified by shareholders, is to immediately inaugurate payment on the Common Stock of the new Company on a \$2 a share

basis. This will mean that Common shareholders of the existing companies will be in receipt of the same dividend return as at present.

In sending out proxies for the special general meeting at which the shareholders of the two companies will be asked to ratify the terms of the proposed plan, President A. J. Nesbitt says: "For some time past your directors have been considering the bringing about of the amalgamation of Northern Ontario Light & Power Co. Limited and Northern Canada Power, Limited, with a view to effecting certain economies, permitting the free interchange of surplus power from one system to the other and better service to our customers.

"After having studied the proposed amalgamation from all angles, the directors of both companies are unanimously of the opinion that the best interests of the shareholders will be served by their ratification of the amalgamation agreement enclosed herewith, which has been approved by the board of directors of both companies.

"The agreement sets out in detail the proposed capital structure of the amalgamated company, the conditions attaching to its preferred stock, its power and by-laws.

It is the intention, if the proposed agreement is ratified, to commence payment of dividends on the common stock without nominal or par value of the new company at the rate of two dollars per share per annum, which will give to the common shareholders of Northern Ontario Light & Power Co., Ltd., and Northern Canada Power Limited, the same dividends as they have heretofore been receiving on their respective holdings of common stock."

REPORT FOR OCTOBER DOME PUBLIC SCHOOL

Standing of the Pupils in the Various Classes for the Month of October.

Fourth Class—Bruce Stovel, Mary Cartonick, Peter Robertson, Ross MacPhail; Maisie Yeomans and Sidney Hughes, equal; Melville Murthy, Harold Millions, Charlie Armstrong, Clarence Cronk.

Senior Third B.—James Phillips, Harry McLean, Jenny Doran, Billie Cartonick, Bazel Doran; Sydney Thomas and Joe Woods, equal; Irvin Richardson Frances Johns.

Senior Third—M. E. Watson, teacher—Grace Murray, John Karpuk, Erica Larkin, Franklin Hall, Annie MacPhail, Roddie MacPhail, Dick Stone, Tom Webb, Catherine MacPhail, Beatrice Spiers, Joseph Baker, Ina Parsons, Arnold McGinn, Ida Tanney, Billie Millions, Eva Baker, Alex Shumilak,

Junior Third—Orry Costain, Frank Parsons, Joseph Mitchell, Neil Pirie, Hattie Baker, Stanley Millions, Vivian McCaffrey, Alex McGinn, Elsie Armstrong, Marguerite Lalonde, Cervin Stevens, Billy Miner, Edmund Richardson, Mary Shumilak, Ruth Doran.

Second Class, W. Blanche Marshall, teacher—Betty Jordan, Arthur Moyle, Marjorie Costain, Donald Pecore, Stevie Ustianyk, Denis Pullin, Jack Burke, Joyce Hughes, Annie Cartonick, Buddy Robertson, Frank Miner, Lloyd Doran, Mabel Tanney, John Shumilak.

First Class—Dorothy Cox, Mary Curtis, Patsey Uren, Jack Pecore, Betty Michell, Audrey Bennett, Harry Banasiuk, Water Baker, Jim Murphy, Norman Fraser, Bobbie Rickward, Marjorie Spiers, Kenneth Harvey, Avylin Cronk, Elsie Parsons, Reggie Luby, Billie Richardson, Bobbie Chevier, Doris Woods, Reggie Butler.

Primary Room, A. V. Morris, teacher—St. Primer—June Philbin, Kathleen Pecore, Teresa Miner, Iris Webb, Tonnee Procopio, Lea Mozzocoto, Johnnie Vesala, Sloco Ustianyk, Stewart McGinn, Agnes Robertson.

Jr. Primer—Laura Millions, Marian Jordan, Kenneth Thomas, Marian Cox, Elizabeth Banisuk, Billie Honer, Marie Fraser Alice Robertson, Violet Hedges, Celia Donylak.
