The Porcupine Toy Shop under the auspices of the First South Porcupine Boy Scout Troop expect to finish their work this week. Toys have been sent to thirty-five settler's families in Western Manitoba. Toys are also available for local distribution. These toys have been repaired and painted until they look like new. Harry Martin with his fret-work machine and jig-saw has made numerous mechanical toys and puzzles. Toy engines of motors and trains have been rewound and the parts bonded together. The Girl Guides have contributed largely to the success of this toy shop. They have given the use of their headquarters. They have dressed dolls, made scrap books and repaired story books. The Dome and Schumacher Scouts have helped materially in collecting broken and discarded toys. The South Porcupine Scouts have given an evening and afternoon a week for six weeks and for the last ten days have given every evening to the work. Any good accomplished by the toy shop is due to those boys and girls who put their whole heart into the work. Toys may still be contributed and would be thankfully accepted as they are working energetically now on toys to be distributed locally at Christmas.

Premier Ferguson Plans Stopping of Communism

Organized effort on the part of the Ontario Government to put down communistic propaganda and activities in this province was forecast this week by Premier G. Howard Ferguson. In commenting on the present Sudbury case, the Prime Minister stated that the Government as a whole was deeply interested in the outcome, and was prepared to take every means within its power not only to bring offenders to justice in this instance, but to "root" communism from all other parts of the province that might be affected by it.

Mr. Ferguson stated that he was busy at the present time collecting certain information. As soon as he had that in his possession, the axe, he intimated, would fall.

Last winter and summer Royal Canadian Mounted Police were called in by the Department of Education to deal with circulation of communistic literature among the pupils of the Northern Ontario travelling-car schools. The "Mounties" speedily put an end to the practice, and, according to Premier Ferguson, there have been few complaints since.

Ski Club to Have Hike This (Thursday) Evening

BUROWSKI LIKELY WILL BE HANGED TOMORROW

All lines of effort to prevent the hanging of John Burowski at Parry Sound tomorrow for the murder of Thos. Jackson, a farmer who went to the assistance of a couple of men in an automobile stalled in the ditch near Parry Sound, have failed so far and the probabilities are that Burowski will be duly executed when his reprieve, granted last week, expires. According to the police case against him, Burowski was one of the robbers holding up a mail coach on the railway near Parry Sound. They are said to have used a stolen auto to make their escape, but were chased by others in another motor car. The auto in which Burowski was travelling according to the police took the ditch and the aid of Mr. Jackson, a farmer residing nearby, was enlisted to draw the car onto the road. In the meantime the pursuing car arrived on the scene and a revolver battle ensued. Mr. Jackson was hit by bullets from the alleged bandits and died as a result of his injuries. After Burowski's arrest he denied being with the robbers and refused to give any information as to his companion or companions. Last week, however, while under sentence to be hanged on Friday last, he gave his lawyer information that was supposed to throw light on the matter and free him from the crime of actually firing the shot that killed Jackson. The man was given a week's reprieve and the new evidence was thoroughly investigated. The authorities after careful enquiring have decided that the supposed "new evidence" is of no material value and does not alter the case to any degree. Burowski now admits knowing who the men in the motor car were, but claims he did not know anything about their actions on the day of the murder until they picked him up on the road where he was walking. The common feeling will likely be that it does not make much difference whether Burowski fired the fatal shot or not if he was one of the gang. If he was one of the robbers, legally, as well as morally, he is responsible for the crime with the others. It would no doubt be a difficult task to prove beyond a doubt which of the men may have fired the shot that killed Jackson. Even if the shot was a stray one from the guns of the pursuers of the robbers, the moral responsibility would rest with the robbers who were the cause of the whole trouble. It would be a good thing if Burowski were hanged and his companion or companions also secured and hanged, so there would be no doubt as to the actual murderer securing his deserts, and the incident being a warning to robbers and other malefactors that Canadian law punishes the lawless.

VOCATIONAL CLASSES SUCCESSFUL THIS YEAR

Total Enrolment is 326. Class for English, the largest; with Electricity a Close Second.

At the meeting of the Advisory Industrial Committee in connection with the evening classes at the Timmins High School, Mr. J. W. Treleaven, principal of the High School, this week submitted a report of the classes that shows they are proving useful and successful this year as in past terms. Mr. Treleaven's report shows that the total enrolment this term is 326. The total fees paid are \$858.00, with fees of \$39.00 refunded or cancelled. The apparent difference between the number enrolled and the fees paid is explained by Mr. Treleaven's report as due to the fact that Mr. Danard's class in arithmetic is chiefly made up of students in electricity who had not enough mathematics to carry on with the course in electricity. The classes this term have been well-attended and regular. Mr. Treleaven reports. He recommends that the class in geology be discontinued, only two taking this course.

The following from Mr. Treleaven's report showing the classes, number enrolled and the instructor in each case, should be of interest:—

Shorthand and typing; 22 enrolled; Miss Gowan, instructor.
French conversation; 12 enrolled; Miss O'Reilly.
French II; 16 enrolled; Miss Laberge.
Chemistry and assaying; 6 enrolled; Mr. Cheadle.

Bookkeeping; 19 enrolled; Miss MacNamara.
Electricity; 46 enrolled; Mr. Anderson.

Cooking; 6 enrolled; Miss Halliday.

MAY INSTAL RADIO AT HOUND CHUTES FALLS

The many friends of Leonard S. Caveney will be interested to hear that he has accepted a position with the Canada Northern Power Co., and is now located at the Hound Chutes power plant near Fountain Falls, Ontario.

"Len" was prominent in all the social and athletic affairs when attending the Timmins High School, and he usually had the honour of being selected to team with Jack Leng in representing the town of Timmins at any of the athletic meets held in the province.

It is altogether likely that Len will install a radio transmitter at his new location in the near future and keep in daily radio communication with his parents, Mr. and Mrs. M. J. Caveney, who are now located at Des Quinze Falls, Quebec.
