Teacher's Bowling Scores for Week of April 11th

The following are the scores for April 11th for the Teachers' Bowling:

A. TEAM			
N. McLeod	109	101	210
V. James	124	158	282
W. Jackson	100	185	285
B. Gowan	70	115	185
G. Hughes	—	98	98
Dummy	90	—	90
Total	493	607	1100

B. TEAM			
M. McDonald	118	148	266
H. Sprague	91	175	266
M. Morrison	113	153	266
C. Robinson	56	173	229
E. James	117	113	230
Total	495	762	1257

C. TEAM			
C. McDonald	102	189	291
F. McDonald	93	149	242
G. Everett	79	214	293
M. Tackaberry	159	131	290
K. Monck	144	162	306
Total	577	845	1422

D TEAM			
O. Ramsay	94	184	278
M. Smith	177	141	328
M. Dodge	137	97	234
I. Carruthers	179	169	348
H. White	88	134	222
Total	675	725	1400

SUB TEAM			
A. Fortune	53	61	114
H. Grant	144	81	225
G. Hughes	88	98	186
Standing of teams: A. 3; B. 5; C. 8; D. 8.			

A saleswoman representing some sort of an advertising scheme recently talked 35 minutes to the Sudbury town council. The councillors at first flatly refused to entertain the proposal but the lady kept on talking until she finally landed an order. The 35 minutes talk cost Sudbury \$95.00.

Save Money! Make your own hard or soft soap by using waste fats and ~

GILLETT'S PURE FLAKE LYE

It costs less to make soap than to buy it! FULL DIRECTIONS WITH EVERY CAN

ALSO USE GILLETT'S LYE FOR ALL CLEANING DISINFECTING SPRAYING ETC.

Value of Horticultural Society to Community

There was a very timely editorial published recently in The Gananoque Reporter, the article reading in part as follows:—

"Spring is here again, and one's thoughts naturally turn to making of a garden. Some of us perhaps visited the old home in the country during Easter week, and we there saw the first preparations for the farm garden. The windows of the spacious farm house were filled with boxes, in which the tiny plants were breaking through the soil. As soon as they are large enough and the weather is warm enough, they will be transplanted within that 'love-some thing,' a garden. A garden is a nursery, where baby plants are cared for until they grow to be big plants and give us flowers that we enjoy seeing or food which we like to eat. Plants are alive, just as you are, but they cannot run around; they must stay in one place all the time. They want plenty to drink, lots of sunshine, and room to breathe. So we set aside a place where they grow in sunshine, and where we can water them and keep other plants away, and keep our baby plants from being crowded. Wouldn't you like to make a garden? The first thing to do is to decide what plants you want in your garden. You can have flowers or food, which we call vegetables; or you can have both if you wish. Seeds cannot be grown in the garden outdoors until spring really comes, and the sun has melted all the snow and ice and warmed up the ground. But some seeds can be sown indoors before that time, in a box of earth set in a window where it will get the sunlight. Later these plants can be put in the outdoor garden."

Commenting on this editorial, The Perth Expositor says:—

"The horticultural societies give leadership to each community in garden efforts and home beautification. For almost thirty years the Perth Society has done excellent work for this town. Many societies exist today, and people are now finding out what Perth people found out years ago that a horticultural society is an excellent institution. Societies are holding their annual meetings, some early, some late, but the main thing is to get the people interested and in the garden in plenty of time. Perth's society will this year urge the people of this town to plant bulbs, flowers and shrubs and to make beautiful gardens, so that the town may be made still more beautiful. You will very shortly receive an invitation to join the Perth society, and as the premiums you receive are worth more than the membership fee, co-operate with the officers by selecting your option promptly."

Grand Jury Recommends Jail for Cochrane Area

In its presentment to Mr. Justice Wright at Cochrane last week the Grand Jury embodied a recommendation that a district jail be erected for the District of Cochrane. Mr. Justice Wright in addressing the Grand Jury had referred to the inconvenience and expense entailed by the lack of jail facilities at Cochrane. Prisoners had to be kept at Halleybury and then brought to Cochrane for trial. The plan was not a desirable one for many reasons, as the judge suggested, and in its presentment the Grand Jury took occasion officially to call attention to the situation and point out the need for a jail at a centre like Cochrane. Mr. Justice Wright told the jury he would forward the recommendation to the proper authorities for consideration.

MINES PLAY LARGE PART IN PROSPERITY OF PROVINCE

Hon. Chas. McCrea Delivers Characteristically Optimistic Address at Barrie Last Week

What is termed "a characteristically optimistic address" delivered by Hon. Chas. McCrea at Barrie last week is reported at length by The Barrie Examiner in its last issue. As Hon. Mr. McCrea spoke almost exclusively on mining affairs the address has a very particular interest for readers of The Advance. The following is the report as given by The Examiner:—

"In a characteristically optimistic address before the Conservative Association of Barrie in Oddfellows' Temple, Monday night, Hon. Charles McCrea, Minister of Mines, emphasized the part which the development of Ontario's mining industry in the north was contributing to the prosperity of not only of the province but the entire Dominion.

"Hon. Mr. McCrea has just returned from a winter's sojourn in Bermuda for his health and although greatly improved, still displays the effect of his illness. His customary 'fire' was lacking but his address delivered in a quiet unassuming manner, was nevertheless both instructive and educating. There were about 150 present, it being midnight before the Minister finished, following a very late start.

"In Ontario," the Minister of Mines said, "the veil has been drawn aside to reveal to the world outstanding riches in mineral wealth which no other country in the world can point to. We are producing wealth mounting into the millions.

"Some people do not grasp the magnitude of our mining industry; some are prone to size it up through the medium of the stock market, but the stock market is not the mining industry, it is merely an indication of what is going on—of the hum of business development, leaping ahead in bounds startling the world, with capital pouring in millions to develop the pre-Cambrian Shield now in the process of being 'cracked open.'"

"One cannot look around without realizing the tremendous part which the mining industry is playing in the upbuilding of this province. It gives employment to 20,000 men, from 30 to 35 per cent. of the wealth produced is paid out in wages, 40 per cent. in equipment and supplies and 30 per cent. in taxes and dividends.

"These dividends do not lie idle. They go back to further open up the country. Older Ontario feels the purchasing power of this wealth, it is giving added impetus to business. This year we expect to add twenty million to our production, bringing the total to \$120,000,000. This means greater employment, greater factory expansion and greater buying power.

"Here Hon. Mr. McCrea digressed to say that the Dominion Gov't., which was claiming credit for the country's prosperity, was playing little, if any part, in Ontario's mining, forestry or agricultural development.

"But the Dominion Government has a part to play. Ottawa's duty is to regulate the great fiscal lever, to determine how much of this great wealth remains in Canada for the benefit of our people and how much is allowed to go out for the benefit of peoples other than British."

"Up to 1928, he said, Ontario had

produced \$1,515,000,000 from its mineral areas, in the space of forty years. "Of this the silver mines produced \$264,500,000 and paid \$96,000,000 in dividends and the gold mines of the province, in the same period, produced \$281,600,000 and paid dividends amounting to \$83,000,000.

"Just think that over," said Mr. McCrea, "and then reflect that we have only just nicely begun—284 millions of dollars in dividends in 25 years paid by the three great metallic producers of this banner province.

"He then went on to quote more enlightening figures. In the space of a quarter of a century wages had increased 261 per cent. Labour employed was 50 per cent. British and the bosses 85 per cent. Canadian.

"This pre-Cambrian shield of ours is the greatest metal bearing area in the world," he went on. "It is of identical formation to the mines of South Africa, India and Brazil now working to a depth of 7,000 feet and ours is scarcely scratched. Let that sink home. Is there not justification for optimism? Why, the first chapter is being pritten now.

"It is only a few years ago since our S.P.C. graduates had to go south to get employment. To-day the mines and power companies cannot get enough of these fine young men to fill the cream of positions offering themselves.

"I have had the duty of assisting in laying down the policy under which this development has and is taking place. We have been telling the world about it. We have invited foreign capital to come and help us 'crack it open,' and the response has been millions of new money. We have tried to give these strangers a square deal and to display a sympathetic attitude. Whether or not we have succeeded, I will leave with yourselves."

"Hon. Mr. McCrea made reference to the fund for scientific research, now amounting to \$5,000,000, to the new copper refinery at Sudbury costing \$4,000,000 and which would distribute \$750,000 in wages alone.

"I want you people to realize that a sound, energetic policy of a government toward a development of such great magnitude as our mining industry is not only necessary, but vital. Everybody in Barrie will benefit from it. The C. N. R. will have increased traffic with this expansion, manufacturing and agriculture will feel it. I want you to grasp its significance; it's your business and your family's business to do so. Take a sustained interest in the public welfare of your province. It is easy to let down. Men in public life don't get a chance to let down, but the rank and file are very apt to do so. Your continued interest will make for peace, contentment and happiness. I humbly submit that the Conservative party is the best avenue through which you, as citizens, can contribute to the development of your province. Keep Barrie one of the anchor posts of Conservatism in this section of the province. It's worth while fighting for. We want to work with you, because our business is your business; it is big business, too, and it is going to be bigger."

"In his opening remarks Hon. Mr. McCrea paid high tribute to Barrie's contribution down through the years to the public life of Canada. It was indeed a proud record, he said, Barrie has sent out into all parts of Canada and the world men of high repute, integrity and ability, men who had coupled the lustre of good names with high achievement. He also said that the lot of the public man was not the sinecure which most people imagined.

"Major Knowles, who presided, referred to Hon. Mr. McCrea as "the man from the north who had done great things," and who had been returned by acclamation in his constituency at the last provincial election.

"In a space of twelve or eighteen months both federal and provincial elections will be a thing of the past. We have got to get ready and organize. You cannot win elections with one or two months' effort," said the major.

"W. J. Blair, a former Sudburyite, introduced Hon. Mr. McCrea, as a young man who had gone into a pioneer country a product of the north itself, and had succeeded in placing the mining industry, by sympathetic treatment on a stable and prosperous basis."

Hudson Bay Co. Factor Married at Sudbury

Despatches from Sudbury tell of the marriage there last week of James Grant, Hudson's Bay factor at Peterbell, in the far north, and Miss Etie. Lloyd, a native of England. Mr. Grant was for ten years the Hudson Bay factor at one of the posts in the Moose Factory area. He had come out to this country from Scotland and was consequently a stranger in a strange land. He met some time ago a young lady who came out to Moose Factory from England, and it was this young lady that he wedded at Sudbury last week. The ceremony was performed by Rev. Dr. Wylie at the minister's home on Elm street, Sudbury. The despatches describe the bride as charming in an attractive gown of white chiffon and carrying a bouquet of sweetheart roses. The gown had been made entirely by the bride herself. The couple were unattended. After a day's honeymoon in Sudbury the couple left again for Peterbell post to take up residence there.

Pembroke Standard Observer:—A Chicago millionaire, who is a native of Guelph, is giving that town a large modern hotel, a golf course and a large playground. Guelph is not the only city, who has native sons able to do something big for their home-town, but possibly it has never struck them that there is no better way to dispose of their wealth.

SHEET STEEL CEILING
Stop falling plaster; end unsightly cracked ceilings. Easy to put up quickly and once up they stay. No dust or dirt. Easy to clean or paint.

GALVANIZED SHINGLES for The Roof
Handsome, inexpensive, fireproof, easy to lay over old roofs—permanent. Get the facts. Ask your tinmith or carpenter.

GALVANIZED SIDING for Outside Walls
Three attractive patterns. With building paper are warm, dry, windproof. Easy to put on and paint.

GET THE FACTS AND SAVE YOUR MONEY

BEAUTIFUL—FIRE-PROOF
Sheet Steel Ceilings look well, resist fire effectively. Add brightness to halls, stores, churches, schools, kitchens and bedrooms. Do nothing till you get the prices and full particulars.

Kenogami Prospector Found Dead in His Shack

Word this week from Swastika tells of the finding of the dead body of John B. Hardwick, a man of 50 years of age, in his shack at Kenogami. Death apparently resulted from his shooting himself when in a state of despondency or melancholy induced perhaps by pain and trouble. He is understood to have suffered quite seriously from stomach trouble. When found by his partner on the claims, Hardwick had apparently been dead for around 48 hours. He was dead in a chair with a rifle resting on the table and pressed against his chest. He was shot through the heart and it would appear that death has been instantaneous. The Provincial Constable at Swastika and Dr. Edis, the coroner, investigated the death, but in view of the circumstances it was not thought necessary to hold a jury inquest. The late John B. Hardwick was formerly in the tailoring business at Cobalt, but for some time past has been engaged in prospecting. He and his partner had a promising claim at Kenogami, but recently Hardwick has been suffering considerably from stomach trouble and is reported to have been depressed as a consequence. According to the despatches from Swastika he left a note saying that he "could stand the pain no longer."
