Good Brakes Prevent Accidents

It is the imperative duty of every motorist to keep his brakes in first-class mechanical condition.

At thirty-five miles an hour, four-wheel brakes should be able to stop a car in 72 feet. But at a 50 mile speed, 150 feet are required.

Some day your life or the lives of others will depend upon your braking equipment.

Keep the highways safe for yourself and others by always having good brakes.

Highway Safety Committee

Hon. Geo. S. Henry, Chairman

Mother's Faith the Theme of Fox Motion Picture

"Four Sons," a Fox production, will be the special feature picture at the Goldfields theatre on Friday and Saturday of this week June 21st and 22nd. In referring to this picture one press review says:—

"Briefly, it is the simple, intensely human story of a mother and her four sons. The theme is faith—the faith of the mother in humanity. In spite of all the troubles that beset the old lady, her confidence remains unbroken.

"There are contrasting backgrounds of America and Bavaria during the war. It is not a war picture, however, there being only a flash of the battlefield, depicting the meeting of the two brothers in opposing armies. This scene is one of the emotional highlights of the picture.

"The role of the mother is beautifully portrayed by Margaret Mann, the sixty year old extra who achieved everlasting film fame through her remarkable performance in this production. The four sons are no less admirably played by James Hall, Chas. Morton, Francis X. Bushman, Jr., and George Meeker.

Others in the large company are Earle Foxe, whose character role is a distinct departure from the usual comedy parts with which this player is identified. June Collyer, Ruth Mix daughter of the noted screen star, Tom Mix, Ferdinand Shumann-Heink, son of Mme. Schumann-Heink, the opera singer, and Archduke Leopold of Austria. John Ford, the man who made "Mother Machree" and "The Iron Horse" directed the production."

PORQUIS JUNCTION HEARS LIBERAL LEADER LAST WEEK

Political Rally at Junction Addressed by W. E. N. Sinclair and Members of His Party Last Week.

A lesplash last week from Porquis Junction says:—

"The method of spending the \$5,000,000 voted by the Ontario Legislature for the use of the Northern Development Branch was the subject of some sharp criticism when members of the party of touring Liberal members addressed a meeting at Porquis Junction this afternoon. W. E. N. Sinclair, K.C., Liberal leader, told the audience the Opposition realized that the money was needed for the development of the country, but the Government should say how it is spent.

"They do not even tell us what they have done with the money and so we have to come and see for ourselves," said Mr. Sinclair. He declared if the Liberals got into power, they would handle the matter on a different basis. They would ask the people what were their needs and requirements. "We need not limit ourselves to five million dollars," he said.

"Tonight the party are in Timmins, where they were guests at a non-political banquet. Informal conferences with prominent Liberals will be held before the party leave tomorrow noon for the South, with Englehart the next stop. Arrangements made to-day would indicate that a meeting is to be held in the railway town tomorrow night, the journey to Haileybury being resumed at midnight.

"At Porquis Junction Mr. Sinclair said there must be development of agriculture if the North Country was to advance. It was all very well to have mines and pulp mills, he said, but the wealth of the country depends on the progress of agriculture, which must keep step with other settlement. To his mind the development of Northern Ontario had been too much along industrial lines at the expense of agriculture, and he thought the settlers had been told too much what they should do and did not have the co-operation to which they were entitled from the Government.

"Mr. Sinclair declared that the settlers had stretches of road in different parts, but "you do not go far before you strike trouble. In a country like this there should be continuous development out from the centre and the roads should keep pace with the settlement. The Liberal leader contended Northern Ontario should get a fairer share of the revenue which came from the North so that better educational facilities and social conditions would be available for the people.

"The liquor question cropped up during the meeting when John Rowlandson, the chairman, said that Ontario, a Province with natural resources second to none, did not need the revenue from liquor sales and should be above getting money in that form. W. Newman, M.L.A. for North Victoria, who rejoined the party today, speaking on this same topic, said that the people, instead of the advanced temperance legislation they had expected, had witnessed the Government make themselves the agent for breweries and the distilleries. He declared that the Liberal party would accept Government control if it was the will of the people, but "there is going to be a limit to the quantity you can buy and there will be some control of the sale."

Friends in town and district will regret to learn that Mr. A. L. Hancock, of Cochrane, has found it necessary to go to Toronto for medical treatment from specialists. Mr. Hancock is a frequent visitor to Timmins and has hosts of friends in this part of the country who will very sincerely wish him a speedy and complete recovery of health.

KIWANIS CLUB DOING GOOD WORK AT KIRKLAND LAKE

The Kiwanis Club at Kirkland Lake, according to the opinion of the people in general in that town and district, is doing excellent work and filling a very useful place in the community life. The meetings are held in the hall of the United Church, the ladies of the church doing the catering. From the results, it would appear that the arrangement is an excellent one, the hall being a commodious one and the luncheons being very attractive. At the luncheon on Thursday of last week Kiwanian W. D. Cuthbertson, of Timmins, was among the visitors. The speaker for the day was G. A. Macdonald, editor of The Advance, and president of the District of Cochrane Children's Aid Society. The address was a brief review of the history of the Children's Aid movement in Ontario from the days when the need for the work was urged so eloquently by J. J. Kelso, a Toronto newspaperman, until the present time when it may be said that tens of thousands of children have been advantaged to say nothing of the value to the country in the betterment of citizenship. A number of illustrations of cases actually handled by societies in the province—of course, without names or other details to identify them—were given to show exactly what the work was like. The speaker also referred to the good work being done by the Temiskaming Children's Aid and the interest and capability of the superintendent of that society, Mr. John McCracken. The Temiskaming C. A. S. at present had a campaign in progress to build a new shelter, and the speaker suggested that the Kiwanis Club do anything and everything possible to assist the Temiskaming Society whose work would naturally make particular appeal to the members of the Kiwanis. There were about 60 or 70 present at the meeting, which was conducted in very effective way by President Gerald D. O'Meara.

Mrs. S. (in restaurant): "Just look at that Scotchman eating over there."

Mr. S.: "I see the man, but what makes you think he is Scotch?"

Mrs. S.: "He licked his spectacles after eating his grapefruit."—Clipped.

ROUTS OLD THEORY

Archie Compson, famous British professional golfer, who has routed the old inferior complex theory regarding the standards of British and United States golf, by stating that the United States golfers aim at a theoretically higher standard of perfection than do their British contemporaries. There is no inferior complex, as United States amateur psychologists would have us believe.

Good-bye, Flies and Mosquitoes!

Unless you're a Flit user, you have no idea how soon you can rid your home of every fly and mosquito. Flit kills quicker, and is easier to use, in the handy Flit sprayer. Spray into cracks and crannies to kill roaches, bed bugs, ants. Flit vapor does not stain. Try the quicker Flit method today!

SISCOE GOLD SINKING THE SHAFT DOWN TO WIDER ORE

Grade Averaging Around \$13.00 per Ton According to Reports from Amos, Que.

A great many in Timmins are directly or indirectly interested in the Siscoe property near Amos, and so will find time for the following from a correspondent at Amos, Que.:

"Encouraged by the results of six months' milling operations and by recent developments at the 500 foot level, Siscoe Gold Mines, Limited, is preparing to extend its operations by deepening the shaft to a depth of 700 feet and commencing development of two other vein systems from which promise of further ore developments have been obtained.

"Up to the present time Siscoe has been regarded as a high grade proposition as the ore on the upper levels has been found across comparatively narrow widths but of such richness that almost 85 per cent. has been recovered by amalgamation. Recent sampling at the 500-foot level, it is reported unofficially, has given results which would indicate a change of conditions, a slightly lower grade of ore having been indicated over a much greater width at this horizon. Sampling is still in progress and it will be several days before the results are known but officials are said to be hopeful of continued improvement in widths as the vein is opened up at greater depths. Deepening of the shaft, it is said, will be started almost immediately.

"Operations at the Siscoe property, it is learned from authoritative sources, are being carried on at the present time on a quite profitable basis. The mill, which was started in January, is now treating an average of 90 tons of ore a day from which a recovery of more than 90 per cent. is being obtained. Mill heads are averaging in the neighbourhood of \$13 per ton and current production is valued in the neighbourhood of \$1,100 per day. The total value of the gold output from Siscoe up to the end of May was \$125,000 and from this amount, despite the usual trouble in tuning up a mill, a handsome profit was realized. Results of the proposed development programme below the present bottom level will determine the policy of the company with regard to enlargement of milling capacity. The management is anxious to put several years ore in reserve before embarking on any such enlargement."

"The Siscoe Mine is unique among the newer gold properties in that gold has been mined practically from the grass roots and although comparatively little has been heard of the operation, it was among the first producers of gold and was the first property in Quebec to make regular shipments of gold only. The Siscoe mine is located on Siscoe Island on Lake Klenawisk in the townships of Dubuison and Varsan, about 45 miles south of the town of Amos. Four levels have been opened up from a 500-foot inclined shaft and apart from the ore already mined and milled it is reported sufficient ore is in sight to keep the mill supplied to capacity for another 12 months. In addition the vein has been picked up below the 500-foot level by diamond drilling. Meanwhile an aggressive development campaign is being mapped out for the property at greater depths and attention will also be paid to several other promising areas on the property."

Seek Complete Roll of 38th Battalion, C. E. F.

All in this district interested in the 38th battalion are particularly requested to note the following and govern themselves accordingly:—

38th Battalion, C.E.F.
To the Editor of the Porcupine Advance Sir:—The 38th Battalion, C.E.F. are anxious to prepare a permanent nominal roll of every man who ever served with that Unit and I would appreciate it if all ex-members of the old 38th Battalion would forward their permanent address to me at 172 Woodfield Road, Toronto.

L. G. Dewsbury.

"Mother," cried little Mary, as she rushed in to the farmhouse they were visiting, "Johnny wants the Listerine. He's just caught the cutest little black and white animal, and he thinks it's got halitosis."—Canadaink.

MISSING FROM HOME AND MAY BE IN NORTH COUNTRY

Effort Being Made to Locate William E. Preston, Formerly of Fort Francis, Ont.

Chief of Police L. McLaughlin last week received a letter, together with a circular and particulars, seeking information in regard to William E. Preston, who has been missing from his home since Sept. 5th, 1928. The letter is from Wm. Bain, chief of police at Trenton, Ontario, who is circularizing the whole country in effort to locate the missing man. It is believed that Preston may be somewhere in the North Land. He was working Northern Ontario as traveller for the "House of Hoberlin," clothing firm, at the time of his disappearance. As a matter of fact he was last heard from at Creighton Mines. His relatives are very anxious to secure information about his whereabouts. Anyone in this town or district who may happen to know anything about the missing man would be doing a helpful act by passing on the information to Chief McLaughlin or sending it to Chief Bain at Trenton, Ont. In the advertisement elsewhere in this issue the following description is given of the missing man: "William E. Preston—Aged 45 years, height, 5 ft. 10 inches; weight, 150 lbs.; dark brown hair, dark blue eyes; false teeth in upper and lower jaws. This man is a person of refined habits; a graduate druggist, practiced for 12 years in Fort Francis, Ontario, but owing to ill-health left the drug business for an open-air occupation, and was employed by the "House of Hoberlin," as traveller. He worked the Northern Ontario district and was last heard from at Creighton Mine, Ont. He is a member of the Masonic fraternity and a Shriner. Any information obtained to assist in locating him will be deeply appreciated by his anxious relatives, and suitably rewarded."

NOT FIREPROOF

"You have made your hero too inflammable, I'm afraid," said the critic to the young author. "To begin with, he has a lantern jaw. In Chapter II, his whole face is lit up; in Chapter III, his cheeks flamed.

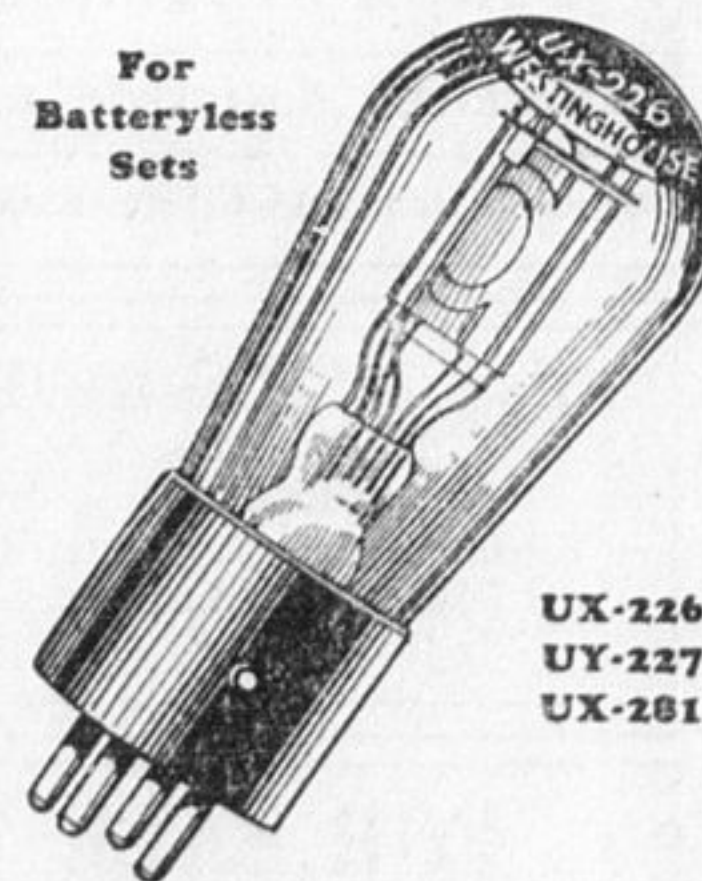

"He gave a burning glance in Chapter X; and after blazing with wrath and boiling with rage he administered a scorching rebuke in the last five pages."
