**Fire Chief Oversees  
Fire Drill at Shelter**

Last week a kindly citizen who visited the Children's Aid Shelter to deliver a present of ice-cream for the youngsters, asked what provision was made for the youngsters to leave the building in case of fire. He was told of the fire escape from both the upper stories and also that the verandah on the front offered a ready means of escape for those in the front of the second story. He thought that fire drill might be of value and when Fire Chief Borland was consulted he agreed. He did more than agree; he kindly volunteered to visit the Shelter and put the youngsters through a regular fire drill. Chief Borland visited the Shelter on Saturday last week and showed the youngsters just how to act in case of an alarm of fire. He made it so interesting that the youngsters thought it a great game. On their first trial the children not only got out of the building in good time and good order, but the chief was impressed with the fact that some of the older ones, without being told to do so, looked after smaller children and saw that they came along without any difficulty. Fire drill is now a regular practice at the Shelter. There are about 25 children at the Shelter, ranging in age from 2½ to 15 years. As they follow instructions given them in the best way they are able to do the fire drill in very effective manner. When Mrs. Condie, rings the bell they are ready for all eventualities and take their places and following their parts like well-drilled soldiers.

**SUGGESTS SHORTER ROUTE  
MATHESON TO PORCUPINE**

Would Connect Matheson to Porcupine Direct, by Way of Shillington, Hoyle, Etc.

Last week The Advance received the following letter which explains itself. It may be noted that the proposal would not likely find favour with those along the roadway from Porquus Jet. to Hoyle as it would divert traffic from the south now passing over this section. The advantages of the proposed shorter route are set forth in the letter itself, which is certainly well worth attention and consideration:—  
Shillington, June 18th, 1929  
To the Editor of  
The Porcupine Advance.  
Dear Sir:—In a recent conversation with some certain parties reference was made to the completion of the Matheson to Porcupine road, direct, through Shillington, Vaders, and on to Hoyle, making the distance only 28 miles from Matheson to connect up with the Porquus to Timmins highway a little north-east of the Hoyle station, mileage 21½, whereas to follow the same road to a point about 8½ miles west of Shillington and then be diverted at Lot 4, German township, Con. 1, to follow the old Indian trail from Moose Lake to Barber's Bay, joining the same Porquus to Timmins highway exactly at mileage 10 in the sixth concession of German, making the two long legs of a triangle, about 11½ miles each, while if the road was completed straight west 9 miles it would cross the gap. Thus, the distance causes a loss of 13 or 14 miles each way, or say 26 miles on the round trip. Now, the 10 to 11 miles following the said trail northwest to Barber's Bay is through a country that is absolutely valueless, unless it is to grow blueberries or scrub jackpine. On the other hand the direct road would open up a farming section wherein each half lot would be available for settlement with possibilities as good as any in the North. In fact, many of the lots have been built upon, but because of the long delay in the completion of the road the people have been compelled to give up and seek other homes.

Now, sir, this road has been slashed, burned and stumped for 4 or 5 years and there are still some of the settlers hanging on by their eyebrows, so to speak, waiting for the Government to keep faith with them. Now the grading of this 9 miles and a bridge across the Frederikshouse river, as we have shown, would save the motoring public immensely. Say at only ten round trips per day that would be a saving of 260 miles for one car; or for one month of 30 days there would be a saving of 7800 miles; or for the season of 4 months, only, it would be 31,200 miles. Compute the saving of people's time, wear and tear of car, lubrication, and consumption of gasoline, and you have some startling facts.

There is, of course, another routing that has to be resorted to when this half-made route is too wet, which is:— from Matheson to Shillington, 10 miles; Shillington to Monteth, 7½ miles; Monteth to Porquus Junction, 6½ miles; Porquus Junction to Hoyle, 21½ miles; a total of 35½ miles: Add to this the distance to Timmins, which is the unknown to me. But the point is: Why is the whole public compelled to go via Porquus Junction thirty-five miles, or via Barber's Bay, say thirty miles, instead of having the few thousands of additional money spent to make it possible for all who so desire to go the direct way, rather than trot the circle?  
Respectfully yours,  
J. H. DOEY,  
Shillington, Ont.

**FORMER IROQUOIS FALLS MAN  
DIES AT KIRKLAND LAKE**

The Northern News last week says:—"Duncan John McInnis, a resident of Kirkland Lake for the last five years, passed away at the Red Cross Hospital, on Sunday, June 16th, in his 53rd year. Coming to Northern Ontario from Inverness Co., Nova Scotia, some twenty-two years ago, the deceased had resided in Iroquois Falls, Copper Cliff and Cobalt before coming to Kirkland Lake. He was on the police forces of both Iroquois Falls and Copper Cliff. For the past four and one-half years, previous to his last illness, he was employed at the Teck-Hughes mine. Deceased was a widower, his wife having died in Nova Scotia twenty-three years ago. His only surviving relative is his son Charles, residing in Alberta, who had not arrived at the time of the funeral.

"The late Mr. McInnis was a member of Algonquin Masonic Lodge, Copper Cliff. He was well-known to Masons locally, having visited Doric Lodge on a number of occasions. He was also a member of the Orange Order. The funeral, which was under Masonic auspices, was held Tuesday evening, at 6.30 from the Masonic hall, Rev. J. F. Anderson officiating. The pallbearers were H. A. McDonald, Wm. Shane, Ross Pyne, Geo. Gill, Jack McLeod and Murdock McLeod. Floral tributes were received from the following: Mr. and Mrs. Geo. Gill, wreath, Doric Lodge, wreath, Algonquin Lodge, Copper Cliff, wreath, L.O.L., Kirkland Lake, wreath; Mr. and Mrs. Dave MacDougall and daughters, spray, Miss Grace Sheppard and E. Hagan, spray and Mr. and Mrs. George Latchem, spray. The body was temporarily placed in the vault at Kirkland Lake cemetery, awaiting the arrival of his son."

New York Sun: Colonel Lindbergh (to his bride): Pardon me just a few minutes, I think there is a newspaperman caught in the propeller.

**GOLFER GIVES LOW-DOWN  
ON ROYAL GAME OF GOLF**

Humorous Description of Golf and Golfers Evidently Written by a Man who Has Played the Game

An enthusiastic golfer has passed on the following article from an exchange on the Royal game of golf:—

Golf is a form of work expensive enough for a rich man to enjoy it. It is physical and mental exertion made attractive by the fact that you have to dress for it in a \$200,000 club house.

Golf is "what letter-carrying, ditch-digging and carpet-beating would be if those three tasks had to be performed on the same hot afternoon in short pants and coloured socks by gouty-looking gentlemen who required a different implement for every mood.

Golf is the simplest looking game in the world when you decide to take it up and the toughest looking after you have been at it ten or twelve years.

It is probably the only known game a man can play as long as a quarter of a century and then discover that it was too much for him in the first place.

The game is played on carefully selected grass with little white balls and as many clubs as the player can afford. These balls cost from 75 cents to \$25.00 and it is possible to support a family of ten people (all adults) for five months on the money represented by the balls lost by some golfers in a single afternoon.

A golf course has eighteen holes, seventeen of which are unnecessary, and put in to make the game harder. A "hole" is a tea cup in the centre of a "green." A "green" is a small parcel of grass costing about \$1.98 a blade and usually located between a brook and a couple of apple trees or a lot of "unfurnished excavations."

The idea is to get the golf ball from a given point into each of the eighteen cups in the fewest strokes and the greatest number of words.

The ball must not be thrown, pushed or carried. It must be propelled by about \$200 worth of curious looking implements, especially designed to provoke the owner.

Each implement has a specific purpose and ultimately some golfers get to know what that purpose is. They are the exceptions.

After each hole has been completed the golfer counts his strokes. Then he subtracts six and says, "Made that in five. That's one above par. Shall we play for fifty cents on the next hole, too, Ed?"

After the final, or eighteenth hole, the golfer adds up his score and stops when he has reached eighty-seven. He then has a swim, a pint of gin, sings "Sweet Adeline" with six or eight other liars and calls it the end of a perfect day.

Toronto Mail and Empire: It will be ten years on Saturday since Alcock and Brown flew across the Atlantic. It is well that this pioneer feat in aviation should be remembered, for it took place eight years before Lindbergh's memorable crossing, when airplanes were less trustworthy and powerful and knowledge of weather over the ocean much less accurate and complete than it is now.

**Moyseys Win Two Games  
In Softball Last Week**

Playing a postponed game with the Moose on Thursday evening and a regular schedule game with the Monarchs on Friday, Moyseys showed that they are real contenders for the first half of the softball title. They won both games very decisively. Saunders pitching for the Brokers in both games was very effective, while his team-mates played good ball and welded their bats for plenty of extra runs. Thus the result of neither game was long in doubt.

Moyseys playing on Thursday walloped two of the Moose pitchers for 14 runs, while the best that the Moose aggregation could do was two runs, the game ending 14 to 2 for the Brokers.

On Friday, Moyseys got their revenge on the Monarchs when they trimmed that team to the tune of 9 to 4. Campbell pitching for the Monarchs was inclined to be a little wild, while Saunders was more steady, and had better support from both the infield and outfield, which helped considerably in the deciding of the game.

By Innings: Runs  
Monarchs ..... 0 2 0 1 0 1 0—4  
Moyseys ..... 3 0 0 1 2 3 x—9  
Batteries—Campbell and Lauzon; Saunders and Stephens.

"Hello Brown—I see you landed that big job last week. Did you get it at a fixed price?"  
"Oh yes, the price was fixed all right, but I didn't do the fixing."—Ex.

**Getting Skinnier  
Every Day**

Something Must Be Done and Done Right Now—Quick

Tens of thousands of thin, rundown men—yes, and women too—are getting discouraged—are giving up all hope of ever being able to take on flesh and look healthy and strong.

All such people can stop worrying and start to smile and enjoy life right now for McCoy's Cod Liver Extract Tablets are putting flesh on hosts of skinny folks in all parts of the world every day.

One woman, tired, weak and discouraged, gaining 15 pounds in five weeks and now feels fine.

And this shows what faith the makers have in McCoy's for they say: if any thin person don't gain at least 5 pounds in 30 days your money will be refunded—and only 60 cents for 60 tablets—Economy size—\$1.00. Ask for them at Moisley & Ball, F. M. Burke Limited, Sauve's Pharmacy or any drug store.

**Here is  
Real Food Value**

WHERE is there another food so supremely good to eat, and at the same time as "good for you," as VELVEETA?

This Kraft creation is the result of a brand-new idea in cheese-making... the discovery of a way to include greater quantities of Vitamins, Lactose (milk sugar), Calcium and other valuable milk minerals than it was ever possible to put into a cheese product before.

These elements, added to the choicest Canadian Cheddar cheese, give this velvet-smooth,

exquisitely flavoured delicacy the food-values of a super-cheese

Made with painstaking care, safeguarded by pasteurization, and as digestible as milk itself, VELVEETA is especially good for children—and they love it!

It spreads like butter... melts, dissolves and blends with other foods for every cooking purpose... or it may be sliced.

VELVEETA is sold only in ½-lb. carton

It tastes like a Confection ~

DELICIOUS DAINTY, containing an astonishing amount of nourishment is Quaker Puffed Rice. Tempting morsels that no appetite can resist, yet full of food elements in a form for easy digestion.

Quaker Puffed Rice is the rice grain thoroughly cooked and steam exploded to eight times normal size. The millions of tiny food cells in each grain are broken down, thus releasing for easy assimilation all the energy of fine white rice. The puffing gives the grains a crunchy, toasted texture with the flavour of nut meats. It tempts the appetite and satisfies it, too.

Both children and grown-ups relish Quaker Puffed Rice. When other foods fail to entice, it stirs up lagging appetites. Serve at any meal or between meals, direct from the package or warmed. Use milk or cream, or fruit, jelly or jam. You will have delicious variety from ordinary foods.
