

CHILDREN HAVE TO CHEW IT— AND THEY LIKE THE CRISP SHREDS SHREDDED WHEAT

With all the bran
of the whole wheat

You don't have to coax children to chew Shredded Wheat—the more they chew it, the better they like it—and that means sound teeth and healthy gums. Just the food for growing youngsters. So delicious and so easy to serve.

AN EASILY MADE DESSERT

Caramel Pudding, one of the most delicious desserts one can serve, and one especially loved by children, can be said practically to make itself. Here it is:

Place an unopened can of Borden's Eagle Brand Condensed Milk in a kettle of boiling water and simmer for two and a half hours, being careful not to let the kettle boil dry. Remove can, cool and chill. Remove top of can, cutting along the side of can—not the top—so that the contents may be removed whole; place on a serving dish and garnish with broken nut meats and whipped cream. To serve individually, cut in slices, garnish with nut meats, and whipped cream—or use plain unsweetened cream, with or without garnish.

SOFTBALL HAS MADE BIG STRIDES IN POPULARITY

(Fort William Times-Journal)
Those who have seen the present bicycle develop recall how scornful those who rode the high wheels were of the cowards who refused to take the chance of pitching over the handlebars, but preferred to ride what was ignominiously termed a "safety" bicycle. They hardly guessed that a few years would make the high machine as dead as the extinct dodo.

Softball may not kill the other kind of baseball, but it has had the same effect as the safety bicycle, in that it has made everyone do it. Softball has had the merit of putting thousands right on to the diamond instead of having the same thousands sit on the bleachers or in the grandstand watching 18 men go through the motions.

But the real graduation of softball has only taken place this year, when it became a sport, like all other sports, in which the old controversy about amateurism and professionalism raged. No one would have thought, when the first softball games were being played on corner lots that the day would so soon arrive when softball leagues would really have to take under their serious consideration the question of whether a softball player were an amateur or a professional. One would as soon have accused a sportsman of being a professional tiddler as a professional at softball.

PET DOG SAVES LIFE OF HIS MASTER NEAR SIMCOE

The thought and cleverness of a pet dog resulted some days ago in saving the life of the gentleman who owned the animal. The general opinion is that had the dog failed in cleverness in this instance the man would have lost his life. The story is told last week by The Simcoe Reformer as follows:

"That John Vary of Toronto, who spends his summers at the old homestead, Pt. Dover, is not a victim of moomoxide poison, is attributable to the sagacity of his Pomeranian dog. Finding in the afternoon that his automobile was not functioning properly, Mr. Vary was giving the engine an overhauling, when he was overcome by carbon monoxide gas. Sensing that something was amiss, the dog escaped through the side door of the garage and, running to the house, made so much ado that Mrs. Vary went out to ascertain what the trouble was, and found Mr. Vary unconscious on the floor. Assistance was immediately available. Mr. Vary was carried into the house. Dr. Cook and Dr. Struthers were soon on the scene and succeeded in resuscitating Mr. Vary, who has a fair chance of complete recovery."

HOWEY ENCOUNTERS GOOD ORE AT 1000-FOOT LEVEL

A correspondent who has just returned from an inspection of the Howey Gold Mines' property, and particularly the four faces below the 500-foot level, states that each face is unmistakable ore more fully mineralized in zinc "sphalerite," iron pyrites, galena, etc., than was observed in levels above 500 feet a year ago. At the 1,000-foot level, 100 feet east and crosscutting south, first-rate ore was encountered four days ago. This was struck four feet than Horace G. Young, mine manager expected. A portion of the fact, not fully opened out, at this depth shows exceptional values. He further states that the Howey mine is a newer, bigger, better mine below the 500-foot level than it proved to be above.

Financial Post.—In the States the small town is beginning to oust the big cities for industrial leadership. The movement has not caught hold in Canada, but it will prove beneficial in national life if it does.

REPORT S.S. NO. 1A TISDALE FOR MONTH OF SEPTEMBER

Standing of the Pupils in the Various Classes at South Porcupine School for the Past Month

The following is the report of S.S. No. 1 A. Tisdale, for September:—

Senior Fourth—B. M. C. Shaw, principal—Isabel Wilson; Ilean Kaufman and Joe Cosenline, equal; Tiberius Wright, Bruno Ceconi, Sulo Luhta, Harry Verner, Marshall Hamilton, Grenville Childs, Stella Besbalko, Bill Liscum, Laura Luhta, Hedley Varker, George McJanet, Hazel Mahon, Mary McIntosh, Marie St. Paul.

Jr. IV—L. Johnston, teacher—Annie Michalak, Wanda Bezba'ko, Patrick Cunningham, Betty Gallagher, Paul Mercier, Sylvia Parkko, Joseph Stern, Muriel Miller, Eino Luhta, Lily Niemi, Jack Bridges; Madeline DaRosa and Kenneth Myers, equal; Violet Burke; Mary Frumkin and Nell Train, equal; Sirka Wuori.

Jr. III—M. McNab, teacher—Lilia McKay, Arne Manner, Tuulikki Vikstrom, Billy Webster, Rudolf Bezba'ko, Kirsti Vikstrom, Vieno Kauto, Natalie Kastynk, Preston Hamilton, Stella Brown, Dorothy Farrill, Carmel Kavanagh, Norma Pamplin; Alice Mercier and Hubert Cook and Betha Londry, equal; Omer Chusian, Harold Helmer, Robert Richards; Robert Purvis and Arnold Coort, equal.

Senior Second—Phyllis Pamplin, Eva McLeod, Nellie Shuktrinski, Dora Kernesky, Arlene McJanet, Douglas Pamplin, George Dogue, Roy Kihards, Edwin Kuusela, Pa. LaForest, Mary Toderan, Ralph Dysart, Leuto Walli, Bessie Verner, Reino Ranhaala, Charlie Eyer, Lewis Pyke, Viola Laffin.

Jr. Second—Laura Koski, Olga Genacki, Margaret Gooding, Jack Webster, Verko Torneanen, Charlie Grovanella, Pete Aquino, Raymond McCann, Vincent Aquino.

Sr. III—M. Laurel Thorpe, teacher—Wolodymyr Solonyuk, Dora Kobzey, Rauha Vallenis, Beulah Raynor; Florence Lloyd and Irene Deacon, equal; Elina Wuori, Beatrice Smith and Bob Gallagher and Delphise Dagenais, equal; Dora Dillon, Mike Kostynk; Louis Dagenais and Rosie Myronyk, equal; Jack Deacon; Hildreth Childs and George Nunnella, equal; Ruth Verner.

Sr. I A—Rose M. Donlevy, teacher—Lena Holovitch, Eino Kautto, Billy Dagenais, Jean Smith.

Sr. I B—Dorothy Deacon, Jessie Hamilton, Irene Disher, Isobel Rapsey, Marion Giovaneila, Ellen Mahon, Aura Valenius, Betty McIntosh, Eileen Lowry.

Sr. Primer—Lily Boyko.

TELLURIDE GOLD MINES, LTD., SETTLE CLAIM OUT OF COURT

The action brought by P. M. Fleming against the Telluride Gold Mines Limited, in the Supreme Court at Halleybury last week was settled out of court. In the terms of the settlement the defendant company admitted the full amount of the claim, \$4,300, made a substantial payment and arranged to pay the balance with costs. The counter claim was abandoned. C. F. Tuer, of Halleybury, handled the case for the plaintiff and John F. Lennox & Company for the defendant.

SISCOE GOLD MINES MAKES DENIAL OF FALSE REPORTS

The secretary of the Siscoe Gold Mines Ltd., has issued the following statement:

"The office of the Siscoe Company has been besieged with inquiries regarding certain rumours which are in circulation casting doubt as to the validity of the company's title to its properties.

"Whether or not those rumours are being circulated by those interested in damaging the company's shares we cannot say, but we take this opportunity to officially advise all shareholders of Siscoe stock that there is no foundation for such rumours. The titles have been passed on by the company's solicitors and declared absolutely clear.

"The management of the company is issuing this warning to its shareholders in order that they will not be deceived by irresponsible and vicious rumours."

C. A. BYAM LIBERAL CHOICE IN TEMISKAMING RIDING

C. A. Byam, of New Liskeard, well known all through the North, was the unanimous choice of the Liberal convention at New Liskeard last week for a candidate to carry the Liberal standard in Temiskaming at the present provincial election. In Timmins Mr. Byam is well-known on account of his several visits here as inspector for the Fire Underwriters.

A. J. Kennedy, M.L.A., New Liskeard, the present representative in the local house, is again the choice of the Conservative party for the riding, so with these two popular men in the field a keen contest may be expected in Temiskaming this election.

New York Times.—After many tests scientists have come to the conclusion that tears are probably the most powerful germ-killers in the world, the vital property being a chemical called lysozyme. During experiments with human tears it was found that one teaspoonful of the pure chemical contained in them possessed an antiseptic potency equal to more than a hundred gallons of salty water against certain eye bacteria.

BARRE ALSO HAS HAD THIS CONTEMPTIBLE KIND OF CUR

In a column of comment published in the Barre Examiner last week there was the following paragraph of particular interest here. It may be noted here that not only Barre but nearly every town of any size at all, has had undesirable experience with the type of cur referred to by The Advance in the first place and mentioned by The Examiner last week. The Examiner's paragraph is as follows:—

"There appears to be a job awaiting the K.K.K. up in Timmins where a man, or male, as the Porcupine Advance describes him, has been jumping out from behind trees to molest passing women. The police have received numerous complaints with regard to the annoyance and in an effort to catch the perverted fool fathers and husbands of the women are assisting the police by conducting a still hunt. In other words they are also doing some hiding behind trees and bushes. Barre had an experience of this kind a few weeks ago when one offender was given a few hours to shake the dust of the town from his feet and another was obliged to pay a stiff fine for saying: "Hello, dearie," and taking a lady by the arm."

METEOR EXPLODES WHILE PASSING OVER ORILLIA

The Orillia News-Letter last week says:—

"Splashes of colour—myriad shades of blue, yellow, orange and green—flashed across the Orillia sky shortly after seven o'clock Saturday night when a giant meteor fell. Some say it fell into Bass Lake, and attest to hearing the thud and seeing the splash. Some thought it fell in Quinn's Bush. Duck hunters on Lake Simcoe were splashed by fragments raining around them, and a Toronto boy, digging for worms saw a bright flash strike on the top of a nearby tree and then fall to the ground. Running to the spot he found a fragment of the meteor, still hot and smoking and surrounded by a faint blue flame. Waiting for it to cool, he picked it up and took it home to his parents. Port Credit claims to have been the scene of the landing of the meteor. Buffalo mistook it for an airplane on fire. The actual exploding of the meteor responsible for the many fragments rained from Buffalo to far North of Orillia is said to have taken place somewhere between Toronto and Hamilton.

"That as may be, buried in the earth, water and stone of Ontario are fragments of an exploded planet born millions of light years beyond our solar system, and prophetic, some scientists affirm, of the eventual fate of the Earth."

Ottawa Journal:—With the opening of the social season the girls will switch from the sunlight to the limelight.

ECZEMA

New Ointment Gives Quick Relief—or Money Back

Mental Star:—In the city thousands of families move every May day. The great majority do so not because it is necessary that they should, but because they have cultivated the moving "bug." It has entered into their blood and they pay the penalty every first of May in the shape of trouble aplenty—and a new home. Many of them occupy the greater part of the ensuing year in settling down, and no sooner have they become comfortable than they discover it is time to pull up stakes and move once more. It seems useless to argue with such people.

If you want to be free of the intolerable itching and burning pain—if you want your skin clear of unsightly inflammation—use "Sootha-Salva". This prescription of a famous physician soothes the irritated surfaces—destroys the germs which are causing the disease—and quickly clears the skin of every trace of Eczema. 50c at all druggists. It costs you nothing if you do not benefit. After using two boxes of "Sootha-Salva", if you are not satisfied, just return the empty tin to Fruit-a-tives Limited, Ottawa, Ont., and we will refund your money.

Children Love It....
You can always depend on it
EMPTY a "Dorothy" Can into a milk jug, add as much water and stir thoroughly with a spoon. The result is fresh, rich, creamy milk, ready for drinking. *Children love it.*
It is good for cereals, puddings, rice, custard, berries or other fruits. Use it for anything—just like ordinary fresh milk. It is so easy for children to digest—easier even than fresh milk—because "homogenized". The fat globules of the cream are broken down under 2000 pounds pressure.
Purity is guaranteed. Try it. Look for Baby Dorothy on the label—"Our Emblem of Purity".

Enthusiastically Endorsed from Coast to Coast by Every Westinghouse Representative

NEVER before have Westinghouse dealers welcomed a radio with such enthusiasm as the *New Westinghouse Consolaire*—All are unanimous in declaring it to be "the greatest forward step in radio since the introduction of the AC Radio-tron" . . . *And they KNOW Radio!*

You will be convinced of the truth of this statement the first time you hear this amazing instrument. It will instantly win your admiration too, for here is an achievement that surpasses in performance anything you would expect to hear years from now—here is a radio that offers new fascination, new thrills . . . establishing a distinctly new standard of value!

How was this accomplished? Westinghouse—pioneers in radio—have for years carried on the most extensive research ever attempted by any radio manufacturer. This great store of knowledge has been utilized by Westinghouse, in combination with unequalled manufacturing facilities, in achieving this radio masterpiece.

New attainment in super-sensitive circuits . . . new exclusive tone modulator . . . new synchro-dynamic speaker . . . new distinctive cabinet design—new magnified illuminated tuning—These are but a few of the many features offered by this *New-day* radio. See and hear it for yourself.
