### TAX CHANGES SUGGESTED IN THE DOMINION HOUSE

Parliament will not meet until February but there is a very strong feeling in Liberal circles that the new budget will see reduction in the income tax, the sales tax, the excise tax, further abolition of nuisance taxes and revision of the tariff on steel and iron products.

In view of the strong sentiment throughout Canada for the government control of liquor it is expected that the government will not put into effect any legislation with regard to prohibition of liquor to the United States. Such a move, it is held, would not gain any great political support and would injure powerful brewing and distilling interests.

One of the features of the coming session will be the report of the Beatty Commission on salaries of technical and professional men in the public

### POTTERDOAL PREPARING FOR THE SHIPPING OF ORE

According to advices from Matheson this week, development work has been resumed on the Potterdoal mines property in the Painkiller lake area. A gang of men are now at the property and it is planned to do considerable work underground. A large tonnage of ore is said to be ready for shipping and will be taken out immediately and sent to the Noranda smelter. The ore is understood to be of good grade, averaging between 12 and 15 per cent. copper.

service. It is expected that the recommendations for a salary revision will be acted upon by the government. The adjustment of the finances of the Canadian National Railways and the tariff will undoubtedly feature the next session. The transfer of Manitoba's natural resources and the Ontario divorce bill are also on the programme.—Ottawa Journal.
