

**MR. AUSTIN NEAME IN CHARGE OF MINES RESCUE STATION**

Mr. Austin Neame, well-known throughout the district, and for some years in charge of first aid work at the McIntyre Mine, has been placed in charge of the Ontario Government

Mines Rescue station at Timmins. He is at present awaiting the arrival of the equipment and is getting everything in readiness for the efficient conduct of the new station. His appointment to the position was dated for his duties to commence on Dec. 1st, and so he is hard at work making arrangements and

and studying the situation so that the very best results may be obtained.

The Mines Rescue Station building is the new structure erected at the rear of the Timmins fire hall. The station will be equipped with the very latest apparatus and equipment for mine rescue work, including gas helmets, pul-

motors and every other appliance that may be of service. The station will be used to serve all the mines of the district in case of need. In addition, Mr. Neame will have classes in first aid, rescue work, etc., for the advantage of the men in all the mines. There will be a general opinion that the govern-

ment made an excellent choice in Mr. Neame.

There were several nights last week when radio reception here was remarkably good. Evenings with clear, keen, biting, cold seem to be specially favourable for radio reception in this North.

# The Connor Representatives

## will be here Monday, December 9th

Now is the time to have a Connor Thermo Electric Washer demonstrated in your home

Special terms and prices while the factory representatives are in town

### The New and Better Connor Thermo Electric Washer

**The Insulated Tub**

which keeps the water hot for the washing, and keeps it from heating up the room.

**The New Connor "Thermo" Washer**

has the life and strength of two ordinary copper tub machines. It has the regular nickel-plated copper tub inside of a heavy steel outside tub or body.

**The Improved Agitator Action**

that washes quicker and cleaner, and is easier on the clothes.

**The Automobile Enamel Finish**

that requires no attention to keep clean, and will look new ten years from now.

**The Quiet Operation**

which indicates no wear on the parts due to absence of friction on motor.

**The Easy Control**

a touch of the finger to start or stop the water action.

**Covered by a 12-year Conditional Guarantee—**

This is the most liberal guarantee ever given with an electric washer—and we would not dare give such a guarantee unless we were certain that, with reasonable care the machine would last for many years longer.

## Puts a Washer in Your Home

The factory representatives are here to demonstrate to you the superiority of the Connor Thermo Electric machine over countless others

The Connor Thermo tub is an exclusive feature; the result of 54 years research and experience in the manufacturing of washing machines. The inside nickel plated copper tub is made of 18 ounce copper, as against 14 to 16 ounces copper being used by some manufacturers, and is protected by another steel tub of 22" gauge galvanized steel. Between these two tubs is a sheet of insulated material which retains the heat of the water twice as long as an ordinary copper tub machine, and insures the life and strength of two ordinary copper tubs.

## This Souvenir is yours - Free !!

A useful souvenir is given away entirely free to everyone presenting the coupon below properly filled in and presented at our store during the first three days of this sale. No souvenir is given to children.

### The Saving of the Connor Thermo Washer

There is absolutely no boiling or any strong bleaching or cleaning solutions needed to wash the clothes when a Connor Thermo Gyrator does the work. The strong water action of the agitator alone forces the soapy water through the dirty clothes, and cleans them faster regardless of how soiled they may be. The Connor water action is different; a current of soapy hot water is forced through the clothes by the Connor Agitator. The clothes are not dragged through the water, torn, or worn. Clothes washed in a Connor are cleaner and last longer.
