Kapuskasing's Fine New C.N.R. Railway Station

A description of the new Canadian National Railway depot at Kapuskasing is given last week by The Northern Tribune. The Tribune believes the Kapuskasing station to be one of the finest on the line. The Tribune says:—"Few stations on the 8,000-rail-mile territory of the Central region of the Canadian National Railways can rival the beauty and convenience of the new station at Kapuskasing which was recently opened. Sweeping roof design broken by attractive dormers enhances the external beauty. Asbestos slate shingles add a touch of modernity, which is quite consistent with the progressive nature of Kapuskasing's public buildings. Selected No. 1 pressed brick was selected for the outside walls, and this is set off by a stone trim. Twenty feet wide and extending some 400 feet on either side of the station, the platforms were planned to easily hold large crowds and facilitate passenger and express movement.

"With the advent of spring, considerable work will be done on the station surroundings. It is intended by officers of the National system to engage in road making around the station, and to perform considerable landscape work. When completed, good driveways will lead to the station, which will be flanked by lawns and flower beds. The C.N.R. is noted over the continent for its station beautification programme. Inside the station is a spacious general waiting room, a ladies' waiting room, smoking room and ticket office. There are also baggage and express rooms and an express office. None of the facilities of a large terminus were omitted. A departure from ordinary station design was made when terrazzo floors of a light colour were laid in the public space. The floors were offset by a black border and base which extends around the walls.

"By the use of selected brick to a height of nine feet, the interior wall treatment has been made most effective. From the height of brick to the ceiling, the walls have been plastered and painted a deep cream, which attractively matches the buff brick below. The windows are arched overhead with brick. The ladies' waiting room and the smoking room adjoin the general waiting room, and are connected through brick archways. The doors and fixtures are wrought of best grade clear oak to blend with the terrazzo and brick work.

"Heating is supplied by means of a low pressure modern steam heating plant located in the basement. The plumbing system includes outlets to sanitary drinking fountains. There is ample fire protection. The foundation walls are concrete to grade, and fire hose cabinets have been installed at strategic points in the building. Ample artificial lighting has been provided, and the fixtures have been fashioned in keeping with the beautiful interior. Once the station's external surroundings are completed, the Kapuskasing terminal will be the most attractive from Toronto to Winnipeg, from many points of view."

SOCIAL EVENING AT THE LANCASHIRE CLUB TO-NIGHT

The Lancashire Social Club are holding another of their pleasant social evenings in the Hollinger Recreation hall, this (Thursday) evening, March 27th, at 8 p.m. The evening will be spent in songs and dancing and other novelties. The "Topnotchers" orchestra will provide the best of music. A small charge of a quarter each will be made for admission. Refreshments will be served during the evening.

The North Bay Nugget last week says:—"Miss Sarah Slotnick, of Timmins, is the guest of Mrs. A. Rajesky, Amelio street."

CARUSO'S WIDOW NAMED IN LATE ENVOY'S WILL
 Mrs. Dorothy B. Caruso, widow of the world-famed tenor, Enrico Caruso, receives \$25,000 under the terms of the will of the late Alexander Moore, former Ambassador to Spain and appointed to a similar post in Poland shortly before his death.

FORMER TIMMINS MEN ON KAPUSKASING H.S. BOARD

The Northern Tribune, of Kapuskasing, last week says:—"The feature of the town council meeting on Monday night was the appointment of a high school board. Messrs Wm. Brubacher, Gaston Vincent, C. W. Boast, Tom Shaw, C. R. Murdoch and Dr. John Aiken were the nominees of the council, to which are added Rev. Father Morisseau, representing the separate school board, and T. H. Scott for the public school board. Into the hands of these leading citizens is committed the care of higher education in Kapuskasing. When the board is duly organized and the Department of Education has given it due recognition, they will supervise the upper grade work being carried on in the Diamond Jubilee School now as continuation classes; and of course they will be mindful of the future needs of the town and have before them consideration of the advisability of a separate high school building. It is not likely that any hasty action will be taken in that direction, until the board has functioned for a time in control of the existing facilities for high school tuition here."

In its report of the recent "Father and Son" banquet at New Liskeard United Church, The New Liskeard Speaker says:—"The treat of the evening was an address by Rev. J. D. Parks, of North Bay. Mr. Parks took up the question of boys' work and treated the subject in a manner which was entirely new to most of his hearers. Many of his deductions will cause considerable thought to those who have had the work at heart in New Liskeard."

Sanction Refused for Northern Mines Railway

The Northern Mines Railway and Development Co. was refused power to build a narrow gauge line from Gold Pines, in the district of Patricia, to a point in the township of Kent, in the Woman Lake area, by the railway committee of the legislature on Monday at Toronto.

Members of the legislature from the northern section were unanimously against the project a narrow gauge railway. The bill asked power to have \$2,000,000 of capital stock to operate mines and mineral lands and deposits, including coal, oil and gas, to treat ores, and metals and to acquire and develop water power, real estate, and personal property as it may require.

They also asked the right to construct and control telegraph and telephone lines, gasoline stations and many other features. The bill was defeated by a vote of 12 to 5.

The same bill was before the last session of the legislature but was then turned down also.

Interesting to West Cornwall Folks

A local Cornishman has sent the following little poem to The Advance for publication. It will be of much interest to Cornishmen, and to many others. The writer of the verses, while sending his name along with the verses, does not wish the name published but uses instead a nom de plume:—

CORNWALL
 (By Old-Timer)
 Hast thee iver ben to Cornwall,
 Don roon Land's End way,
 Caught the fish at Newlyn
 And smacked off in the bay.
 Not far away is Skiddy,
 With its gate big floating docks,
 Anden the distance Cam Brea hill
 With its ancient Druids' rocks.

There's Shuffley, too, close to Redruth,
 Where they used to smelt the tin;
 The old red river rushes by,
 And tatie-cakes wash in.

There's Camborne, too, close to the say,
 With its famous Dolcoath mine.
 The tin is there the experts say
 But they sure can "shoot the line"

SCHUMACHER FIREMEN TO HOLD ANNUAL BALL, APRIL 28

Schumacher Fire Dept. has announced that its annual Firemen's ball will be held this year on Friday evening, April 28th, in the McIntyre Recreation hall. Literally hundreds of people in the district look forward with much interest to the Schumacher Firemen's annual ball, and so April 28th should be marked in red ink on the calendar for next month.

The Northern Development Commission of the Toronto Board of Trade is expected to join with provincial representatives in a tour through Northern Ontario during the early summer months. The party will go west to the end of the Great Lakes and then circle the North via C.N.R. and T. & N. O. R'y. lines.

STIMSON'S SECRETARY KILLED IN LONDON
 Mrs. Pearl L. De Maret, of Washington, special stenographer to Secretary of State Stimson, Chief United States Delegate to the London Naval Conference, who was killed when she accidentally fell from the window of her room in the Mayfair Hotel, London.

"ON WITH THE SHOW" AT THE GOLDFIELDS THIS WEEK-END

The special for this week-end at the Goldfields theatre is the offering, "On With the Show," described as the first 100 per cent. natural colour, talking, singing, dancing picture—a Warner Bros. Vitaphone production in technical colour. The picture has been well-received generally and has received some flattering press notices, one of which is given herewith:—

Regina Crewe in the New York American: "It was Warner Bros. who gave us the first talkie. Now they have again revolutionized the motion picture industry with "On With the Show." Its mighty success means just one thing: In another, say, two years there won't be a photoplay in black and white photography presented on Broadway. As the film mounts from one height to another it is safe to say that every audience will drown out the sound device with applause. That's what they did last night at the Winter Garden. And it was none too great a tribute to pay to this musical revue. For it equals anything the old play-house has ever seen."

In answer to a delegation waiting upon him recently, Hon. Wm. Finlayson said that the highway between Parry Sound and Sudbury will not be built this year. It will take two or three years to complete the Ferguson highway and until that is done the Government does not feel justified in starting any other highways, according to the report of what Mr. Finlayson said to the delegates.

Copper Coin That Looks As if it Might be Gold

The Advance has seen a number of interesting coins in the past few months since a number of coins in the possession of a local man were reviewed and tempted others to bring forward their treasures in the way of old and rare coins, but none seen to date hold any more interest than one shown The Advance last week by Mr. Thos. E. Flynn. This coin of Mr. Flynn's is evidently a half-penny one, though this is not stated on the coin itself. The coin is dated 1853, and certainly is not a copper coin as copper coins of to-day go. It is bright as gold and has something of the feel of gold about it. One explanation of this is that it is made of pure copper and not of copper alloy as all the present-day copper coins are made. A more interesting theory was given to Mr. Flynn, however, by a friend one time when they were discussing coins and other things. This friend said that in the fifties or sixties two men stole a gold brick but were so closely pursued that they got rid of the stolen brick. They were caught and sentenced to life imprisonment for the offence and later confessed that they had gotten rid of the gold brick by throwing it into the copper smelter at the mint. At the time the gold brick was thrown into the smelter where the copper was melted for making the copper coins, there was a new issue of half-penny pieces being made. As soon as the authorities knew that the copper coins had been "tainted" by the addition of gold, no further coins were issued from this smelting and all those that had been issued were at once recalled. Only a very few of the gold-copper coins remained outside and the one in Mr. Flynn's possession is considered as probably one of this very small number. If this is the correct explanation Mr. Flynn's coin is likely to be very valuable, as a high price is said to be set by coin fanciers on this particular issue of copper coins that were "sweetened" by a gold brick. The copper coin in question has the head of Queen Victoria on the one side. The edge is not milled, but is higher than the face of the coin. On this account the coin will not ring clear like the ordinary flat coin.

PERHAPS IT IS A CASE OF TAKING LEAVE OF SENSES

(From The Huntingdon Gleaner)
 While listening to a church service broadcast from the Cathedral of Notre Dame, a Parisian wireless listener also smelled the smoke of the candles in the church. Mystified, he set radio engineers the difficult problem of discovering whether small sensations might be picked up accidentally by the microphone. It has, however, been a curious mixing of the sensations. Certain people, it seems, can receive a brain-message corresponding to one sense when another sense is stimulated. Taste sensations are not infrequently produced at the sight of food—hence the expression, "making one's mouth water." It is well known that a cornet player may be put right off his stroke by the sight of a person sucking a lemon. Color-hearing is another form of this abnormality. Many people see colour- and colour combinations when they hear the sound of motor-car horns, while others can discern colours in the rattling of knives and forks in a restaurant kitchen. There is one woman, it is said, to whom milk tastes yellow, sweets taste blue, and all unpleasant tastes are brown.

The next meeting of the Timmins town council will be held on Monday afternoon, April 14th, commencing at 4 p.m.

The Only Larks in America

Fifteen minutes car drive from the Empress Hotel, Victoria, is the only colony of skylarks on the continent of North America. This sweetest of all songsters, of whom Canadian children read in all anthologies of British poetry, but which they have never seen or heard in actual life in their own country, save in this one section of the Dominion, has been acclimatized at Victoria successfully. They are to be found in considerable numbers among the oaks to the north of the city, on the slopes of Mt. Tolmie, at the Colwood Golf course, among the orchards of Gordon Head, in the deep meadows near Elk Lake, and from the flower-scented grounds of Butchart's Gardens. Photographs show the Gardens with inset of the English skylark.

TOWNSHIP OF TISDALE
NOTICE TO DOG OWNERS
 Notice is hereby given to all Dog Owners that their Dog Tax must be paid on or before April 1st, 1930.
