TIMMINS, ONTARIO, THURSDAY, JULY 3RD, 1930

PRICE FIVE CENTS

1930 KIWANIS CARNIVAL TO BE BIGGER AND BETTER

Vaudeville to Feature Big Event at the Skating Rink, Timmins, All Next Week. Other Features Include Dorothy's Circus, Balloon Descension, Etc.

"Bigger and better" rightly describes the 1930 annual Kiwanis carnival to be held in the skating rink during the entire week of July 7th to 12th. Special attention has been given this year by the Kiwanis Club to the entertainment features and they are providing a programme worth many times the price of

Vaudeville acts will feature each evening's programme. Twice nightly at 7.30 and again at 11 o'clock, a vaudeville programme will be presented, consisting of Hardman, "the Pocket Hercules," in a strong man act that makes the audience fairly gasp at his feats of super-strength and endurance, and Arnott, "the Talkative Funster," whos works of magic mixed with wholesome fun keeps his audience spellbound ar in a riot of laughter.

An added attraction this year also is Derothy's Circus of trained ponies, dogs and monkeys. This act has been travelling on the big-time vaudeville circuits and is well-known and popular throughout the entire North American continent. Prince Leo, "the pony with the human brain," does problems in arithmetic with an accuracy that is positively uncanny. This act will be here all week at the Kiwanis carnival. Another feature will be the "balloon descension." Each night at about 11 o'clock a number of toy balloons will be released, in some of which will be coupons entitling the holder to the prize indicated on the coupon. These prizes will include articles of value up to \$10.00. The attendance prizes can only be secured by attendance. Each night during the Kiwanis carnival a balloon descension will take place.

The midway of games will be stronger and more interesting than ever this year. Those in attendance at this year's carnival will be agreeably surwon at the various games. These prizes have been selected for their usefulness and value. This is what always makes the Timmins Kiwanis carnival a success. This year's selection of prizes surpasses the beautiful prizes of last

for three valuable prizes as well as four admission tickets to the carnival. Everybody will enjoy a wonderful week roadway is being speeded along. at the Kiwanis carnival.

SCHUMACHER FIRE BRIGADE

Win First in Ladder Race, Second in Dressed Brigade in Parade, and Other Prizes.

At the annual tournament of the accident, but later were able to resume held at New Liskeard beach on Tues- | repairs made. day of this week, July 1st, the Schumacher Fire Brigade took high hon- hoped to have repairs so far advanced curs and reflected much credit on the to the railway bed and the roadway town and camp it represented at the that traffic may be resumed as usual.

Schumacher brigade took first in the First Open Air Band ladder race, its time being 18 2-5 seconds. For the winning of this event there is a large cup and seven smaller individual cups.

In the wagon race, Schumacher took second place, the time made by the Schumacher team being 57 2-5 seconds. The prizes for this include \$50.00 in cash and nine silver medals.

Schumacher also won first prize for having the best dressed brigade in the parade.

is the holder of the shield for the year for securing the most points at the tournament.

Individual members of the Schumacher brigade also figured in the prize list. Fire Chief Chas. Jucksch won second place in the fire chief's race, and A. Angrignon won first in the 100 yards dash for firemen.

Thus, it will be seen that Schumacher made a pretty good sweep of the boards in the way of winning prizes at the firemen's annual tournament. Congratulations are being extended on all sides to the Schumacher brigade for the success achieved.

SPECIAL MIDSUMMER DANCE

IMPLICIT DIRECTIONS FOR WORK OF RESUSCITATION

Kiwanis Club Members In pired and Impressed by Address by R. C. Wood, Toronto, on the Art of Artificial Breathing to Revive Life.

There was a large attendance at the Kiwanis Club luncheon on Monday and all present were delighted to be there for they felt they received a special measure of helpful information as well as a most interesting time. The speaker for the day was R. C. Wood, of Toronto, of the firm of R. C. Wood & Co., real estate and business brokers. Mr. Wood spoke on resuscitation, on the art of inducing artificial breathing to restore life after certain forms of accident, and it is no play on words to say that his effective and intensely interesting address was listened to with almost breathless interest. Other visitors for the day included W. G. A. Wood, formerly of South Porcupine but now of Toronto, who was given earty welcme back here. A special teature of the occasion was the talentd violin playing of Michael Rose, the gifted violinist who recently took over

the Birrell Bell studio here. The first selection by Mr. Rose met with most enthusiastic encore and he was equally popular in his responding number Community singing was led by J. D. Brady, with W. H. Wilson at the piano Kiwanian C. G. Keddie made reference to the golf between the Hollinger and the Kiwanis and arrangements were made for the game this week President Karl Eyre made brief but clear explanation of the ticket-selling terfered with on the Ferguson highway campaign for the Kiwanis carnival, dethrough bad washouts of railway bed tailing the attractive list of prizes concerned. The members of the Kiwanis are to secure the tickets from G. N.

Fire Chief A. Borland introduced the speaker of the day, R. C. Wood, of Toronto. The subject of Mr. Wood's address was "Resuscitation" and he not only made the art clear and understandable but he gave it an interest that caught the attention of all. He stressed the importance of such an art in dealing with the numerous accidents and incidents that occur. To be powerless to aid an unfortunate friend or other human being who was the victim of drowning, gas, electric shock etc., was a heartrending experience, while there was no joy like that following the successful effort to bring Meloche found his wife in the shack back life in such cases. Anyone could practise artificial respiration. Wood hoped to see the day when it would be taught in the schools. Today there were more laymen than docare hard at work repairing the damage | tors expert at resuscitation. The need for its use is very apparent. The speaker defined the art as "to make the patient breathe artificially when he had ceased to breathe naturally. clear and simple terms Mr. Wood desrepairs to the railroad embankment cribed resuscitation and what it does. He divided the body into two parts, the upper and lower, separated by the diaphram. The upper part contains the part of the North were on their way vital organs, the heart and lungs, and the lower, the stomach, liver, spleen, etc., the organs mentioned being the ones concerned chiefly in the matter being so serious as might be expected. Temiskaming Firemen's Association, their journey through the temporary of resuscitation. Mr. Wood explained He is a young man of about 21 or 22 the condition that resulted in each In the course of a few days it is case from drowning, gassing, electric shock, choking, etc., an dhe showed how resuscitation would help to remedy and believing there was serious trouble the condition. Time was the essential element in such accidents, and not moment should be lost. It was right to driving the officers back to the scene send for a doctor, but in the meantime of the shooting. MURDER AND SUICIDE AT

Timmins People Concerned in Shooting Affray. Two Dead and One Badly Injured in Kirkland Lake This Week, All Well-Known to

Police Here. Elio Meloche and his common lay wife are dead and Emile Groulx is in the hospital at Kirkland Lake as a result of a shooting affray at a shack about a mile and a half from Kirkland Lake at an early hour on Tuesday morning of this week. So far as the story can be learned, the shooting resulted from a jealous quarrel between Meloche and his common law wife. Mrs. Meloche, as she was known in Timmins where she lived for a couple of years, coming here from South Porcupine, had been in Kirkland Lake for some days prior to the tragedy. On Monday Elio Meloche had Alfred Therrien, taxi driver here, take him by car to Kirkland Lake. They arrived there shortly after one o'clock Tuesday morning, and after a lunch Meloche in structed Therrien to drive him to a shack a mile and a half from the town. He told Therrien to turn his car and wait outside for him. It appears that where a party seemed to be in progress. He and his wife quarrelled and after heated words he drew a gun and shot her through the heart, the woman dying almost instantly. He is then said to have turned the gun on a man named Lesroches. Emile Groulx apparently tried to get the gun away from Meloche and in the proceedings was shot through the hand the bullet also passing into his jaw. Meloche then turned the gun on himself. The first

his head. He died in the hospital at p.m. that evening. Groulx is in the Kirkland Lake hospital with the best chances for recovery his injuries not In the meantime the waiting taxi driver heard the shots in the house afoot, hurriedly drove to Kirkland Lake and secured the help of the police,

WORK AT CANUSA MINE TO RESUME IMMEDIATELY

Important Financial Interest: Now Behind the Prospect. D. Tolman to be Consulting Engineer. Important Programme of Development Planned for Property.

Geo. J. Miller, president of the Canusa Mine, in the Golden City area, was a visitor to the camp this week, and was accompanied here by E. G. Joy, of Detroit. All will be pleased to know that work on the Canusa is to be resumed immediately.

Recently very important and prominent financial interests in Chicago and Detroit have become concerned in the Canusa and as a result the property will have ample financing. Work will be commenced immediately on the exploration and development of the property. When the property discontinued work there were interesting conditions disclosed in connection with the development of the property and the present prospects for the making of a real mine are of the best. Oldmers in the camp have believed that all the Canusa needed to prove itself a mine of important value was ample capital to carry on work on a definite plan suitable to the needs. This is now being fully provided, the capital behind the Canusa being ample, and so the general confidence in the development of a notable mining property in the Canusa will be high indeed D. Tolman will be the consulting engineer for the property. A mine captain will be in charge of the property for the present. The plans for development and exploration will be determined after the consulting engineer. Mr. Tolman, has made his examination and report. In the meantime surface work, including the stripping of some of the large veins across the property. will be carried along. On these veins considerable free gold has been found and the results are most encouraging. Work will likely be centred on the porphyry dyke at the south of the property. This porphyry formation most interesting and promising and indicates unusual chances. There has been considerable work done on the Canusa in years past and all with very pleasing results. There is a small mining plant on the property. The new interests in the Canusa represent very prominent financial people. The board of directors of the Canusa is to be increased from five to seven and it is understood that three men of outstanding standing in financial affairs in Chicago and Detroit will be on the new board. Dewatering of the mine preparatory to the general resumption of work on the property will be pro-
