**CANADIAN LEGION DANCE ON WEDNESDAY, JULY 16TH**

The Canadian Legion, Timmins branch, announce another of their pleasing dances to be held in the McIntyre hall on Wednesday, July 16th. Dancing from 10 to 3. Tommy Stephens' orchestra will provide the classy music for the occasion, and the Ladies' Auxiliary will furnish their usual fine style of refreshments. There will be a lucky door prize. All dance lovers should turn out for this event and thus help the Legion as well as enjoying themselves for a happy evening.

The Northern News last week among its Cobalt personals had the following item:—"Mr. and Mrs. Joe Davis of Oshawa, who are taking a three months holiday were renewing acquaintances in Cobalt last week and were the guests of their nephew and niece, Mr. and Mrs. T. W. Childerhouse. This week they went on to Timmins to visit their son there for a while before going on to Birch Hill, Sask., to visit another son."

**SOUTH PORCUPINE PASTOR PREACHES HIS FAREWELL**

Rev. T. Mills Leaves for Lemontville. McIntyre Wins From Dome Football Team. Other News from South Porcupine Correspondent.

South Porcupine, July 1st, 1930. Special to The Advance.

Miss Newsham Hanneberry is holidaying in Toronto.

Messrs John Fell, Jr., and James Fell are on a motor trip to Toronto and other points south.

Mrs. Patrick O'Neil, of Ottawa, a former resident here, is visiting in camp the guest of Mrs. W. H. Coots.

Born—At the Porcupine Presbyterian hospital, on Sunday, June 29th, to Mr. and Mrs. R. Mitchell, of Dome Extension, a son, (Richard Kenneth).

Mr. George Humphrys leaves this Wednesday on a motor trip to Montreal.

Rev. T. Mills preached his farewell sermon on Sunday evening. He and Mrs. Mills left on Monday morning for their new charge at Lemontville. On Friday last the Ladies' Guild held a farewell tea at the home of the Mrs. Rapsy, Sr., in honour of Mrs. Mills, when a large number of the ladies of the congregation gathered to bid farewell to Mrs. Mills who has been so active in their work and other departments of the church during her stay here.

Mrs. K. A. Deacon and Master Phillip are visiting in Cobalt and Latchford.

Mrs. William Gagnon and sons are holidaying at her parental home in Cobalt.

Mrs. N. Sullivan, accompanied by Miss Doris Wright, of Cochrane, spent the week-end at the home of her sister, Mrs. Cecil Kavanagh.

Mrs. Charles Kavanagh and children are holidaying at her home on Calumet Island, after which they will take up residence in Kirkland Lake where Mr. Kavanagh is now employed.

Mrs. A. Carlson and daughter, Miss Augusta, of Toronto, are spending the vacation with Mr. Carlson at the Dome Mines.

Miss Martha Michaelson, who is training as a nurse in New York is holidaying at her parental home at the Dome Mines.

Mrs. C. Kehoe and children have left to spend the vacation with her parents at Woodstock.

We are proud to congratulate our young townsman, Mr. Pierre Saly, nephew of Rev. Father Lagrevel, on the splendid standing in his year's work at the College Bourget, at Rigaud in the province of Quebec. This young man, only eighteen years old, finished his rhetoric class with eleven first prizes, five second prizes, and three special prizes. One of the special prizes is a big bronze medal donated by "St. Jean Baptiste" society for the best composition on Canadian history. He passed his baccalaureate examinations with honours and stands tenth among all the candidates of the eleven colleges affiliated with Laval University, Montreal.

Mr. Spencer, Giffin and two friends of Detroit visited friends in town while on a motor trip to the North.

Mrs. Findlay McPherson and little daughter, of the West Dome, are holidaying at Cobalt.

Born—On Sunday, June 29th, to Mr. and Mrs. W. Allan, of the Dome Mines—a daughter.

There will be another softball match on the Dome Recreation grounds on Monday, July 7th, between Dome and Schumacher.

Rev. Mr. Hussey was in town last Wednesday while en route to Toronto and attended the board meeting of the United Church. He is expected to be here to take charge of the parish on Wednesday.

Dr. and Mrs. Kinsman returned from their honeymoon on Tuesday of last week and are now domiciled at the Dome.

Dr. Barry, accompanied by his nephew, Barry Graham, were among the motorists that had to be ferried across the washout by raft down below Hailybury on the Ferguson highway but they have now reached their destination in Muskoka safely.

The football match between the Dome and McIntyre teams on the Dome Recreation grounds was hotly contested last Saturday. P. Larmer, of Timmins acted as umpire. The teams lined up:—McIntyre—goal, Wilkinson; backs, Phillips and Rankin; half-backs, Connor, Robson and Curtiss; forwards, Moore, Chalmers, Hughes, Carroll, McGregor. Dome—goal, Jemmett; backs, Blair, Ewart; half-backs, Cooper, Whyte, Kellow; forwards, Mitchell, Goodman, Harrower, Richmond and Doran; spare, Michaelson. The two teams seemed very evenly matched during the first part of the game, end-to-end play being a feature of that period. The first goal was made by the Dome and was cleverly worked out, the play going from man to man from far down the field until Goodman got the ball from Doran and scored. A few moments later the Dome fans nearly held their breath when a ball kicked from well toward the corner went over the heads of the two backs and was settling down to a safe berth inside the Dome line when Jemmett caught it. The play later was held up for a few moments while a proper corner flag was arranged. Richmond did some good work, nearly getting another tally. Harrower and Goodman were also dangerous, stretching Wilkinson's body as well as his wits in his effort to keep them out. The McIntyres were pressing hard and when a high ball went over Blair's hand, in an effort to save the situation Jemmett was drawn out and before he could get

**COMPLICATIONS ROUTED; WHOLE SYSTEM REBUILT**

"I was in a weakened rundown condition for four years with a complication of troubles, but Sargon straightened me out, and I don't know when

JOHN RAHILLEY

"I've felt better than I do now! My stomach and liver were disordered, my tongue was coated and I was a victim of constipation. The little I ate gave me indigestion and I felt bad all the time. Seven bottles of Sargon ended all my ailments, my entire system is in a strong, healthy condition and I feel good from head to foot!"

"Sargon Pills stimulated my liver in a thorough, natural way and gave me complete relief from constipation."—John Rahilly, 98 McCaul St., Toronto.

Sargon may be obtained in Timmins at The Goldfield Drug Store.

back Carroll from the inside left had placed the pigskin securely in the nets for the McIntyres. There was a little excitement over a kick given to the Dome when the ball stayed fully one foot inside of the line instead of going over, but there was more excitement still when the whistle blew for the first half just as Goodman kicked in another for the Dome which was not allowed. Many watches were consulted on the side lines, some claiming there was still part of a minute to go. The period ended in a 1-1 draw. The second spasm saw some vigorous work by both teams. In a strenuous race for the goal Blair saved what looked like a sure one by shunting the McIntyre player to the corner but soon after from a melee in front of the net Jemmett saved the first onslaught but the second was too much for him, McGregor doing the trick for the McIntyres. The remainder of the period was largely defensive play on the part of the Macs, or what the fans liked less, seemingly putting in time by kicking the ball off the field. Several of the Dome players lost what seemed very likely chances in their over-anxiety. Whyte and Walter Mitchell, were hurt but both were soon able to resume play. Curtiss nearly got another for the McIntyre but was beat by Jemmett. The Dome backs did some excellent work, checking from well down the field and helping to keep the play in the vicinity of the McIntyre nets but the whistle blew with the score 2-1 in favour of the McIntyres.

**Congratulations Given Messrs. Ennis and Denny**

In an editorial article last week The Northern Miner says:—

"Congratulations are due to R. J. Ennis, general manager of McIntyre-Porcupine Mines, and to Jas. J. Denny, mill superintendent, for their achievement in bringing to a head the proposal to instal the new flotation process in the company's 2,000-ton mill. Mr. Denny, well known to mining and milling authorities all over the continent, with more than 20 years' experience in the North, is responsible for the process; Mr. Ennis for the welcome he has given in this instance, as always, to a new idea. The encouragement given by the president and directors should not go unmarked either. Flow sheet and details of the latest adaptation of flotation to gold recovery are not, unfortunately, available at the moment. When they appear they will be studied with interest all over the world by gold miners responsible for the waging of the unending fight against costs. A valuable contribution to milling practice can be anticipated and another sign of Canada's vigour of mind and power of achievement. It had been said that no really important change in ore milling practice has been made since the invention of the revolutionary cyanide process nearly 40 years ago. Mr. Denny's new method does not revolutionize that process but it importantly alters it and utilizes the newer method of flotation in a manner not before adapted to the treating of gold ores. The gold and the metals holding it are separated and concentrated from the ore-rock by flotation, and these concentrates are treated by flotation. In the recently issued McIntyre report it was said that the new process promised to improve the extraction and reduce costs, both current and capital. Anything that cuts costs adds to the profits of shareholders. This may be considered a selfish viewpoint, but unless shareholders make profits no money to find and make new gold mines will be forthcoming. From the public standpoint cost cutting is extremely important for it inevitably leads to the treating of ore previously considered waste rock and therefore the employment of more men in mines, fields and factories."

**ALLEGED DISCOVERY MAY REVOLUTIONIZE INDUSTRY**

Italian Professor Claims to Have New Process That Promises to Have Unusual Effect on the Gold Industry of the World.

When the tailings at Cobalt mines were treated and much silver recovered from what had before been considered as no more than waste ore, there were some outside the mining industry who considered that such a procedure was not likely to become practical in the gold industry. Others, however, had the idea that improved methods might be adopted in the gold industry that would mean a considerably larger recovery from the gold ores than that obtaining. As a matter of fact all the important gold mines of the world have been working to increase the percentage of recovery and there is no question but that they have made material advancement along these lines. Whether they have reached anything like the limit in this particular, or whether still larger percentages of recovery are possible are questions to be decided by time.

In the meantime, an Italian professor claims to have made a discovery that will revolutionize the gold industry if all his claims can be sustained in the practical work of the mining industry. It is likely that the claims of the Italian professor will be taken with some reservations for the presentation, but at the same time they will undoubtedly be given every consideration, and he will no doubt be allowed every opportunity to substantiate in actual practice the theories offered.

It does not appear to be justified to hold as references to his discovery generally seen to do, that the gold standard may be imperilled by the process referred to. The supply of gold at the present time is not adequate to the world's financial and commercial needs and there is quite a margin allowable before the supply will threaten the practicability of gold as the standard for the world. Indeed, many will think that a method such as that outlined by Prof. Bartoli would have the effect of greatly strengthening gold as the standard by its increase in the possible amount of gold in controllable form. In any event the alleged discovery will be of interest. Here is the story as outlined in a recent issue of The Chicago Daily News:—

"Prof. Bartoli of Italy has made a discovery which promises to revolutionize the world's gold production and which may have a serious effect on the gold standard."

"Gold assays made in the Witwatersrand are all wrong," Prof. Bartoli told me, claiming that by his new process ten times as much gold could be extracted from ore as by present methods.

"Precious metals always are alloyed with base or other metals, and gold is not found merely in a state of purity," he continued. "Gold exists as salts, just as in the case of silver salts. Where chemists have assayed five or six dwts. (denarius weights)—a dwt. is 3.90 grams—I will show how to realize sixty to seventy dwts. On one sample from a mine dump assayed at two dwts. to the ton I realized 20.2 dwts. Three ounces of river sand have produced 15 milligrams of gold, or the astonishing yield of 100 dwts. to the ton."

"What this discovery means to the gold industry may be shown by comparison of assays. A metallurgist of the South African government estimates the value of the remaining gold deposits in the Transvaal at \$25,000,000,000. Prof. Bartoli's assay shows its value as \$300,000,000,000. The present yield of the Witwatersrand gold mines is \$250,000,000 annually."

**DEATH RESULTS FROM FALL AT LIBERAL CONVENTION**

John A. Sutherland, chief electrician for the Abitibi Power and Paper Company at Sturgeon Falls, died in the hospital there last week as a result of injuries to his head sustained in a fall off the theatre stage platform during the convention of the Liberal party on June 11th at Sturgeon Falls. The late Mr. Sutherland accidentally stepped backward off the stage platform as he was about to deposit his delegates ballot at the convention. He was on the outer edge of a group who were standing round a table. The fall was about six feet and in the fall he struck his head on the outer railing of the orchestra pit. He was taken to the hospital at once and though until about a week previous to his death it looked as if he had good chances to recover, death followed several days when he was in a condition that the doctors realized to be a very serious one, indeed. He was widely known and popular all through the district and his death is looked upon a serious loss. He is survived by a widow, four children, and one brother and one sister. The funeral was held on Thursday last week at the Sacred Heart Church at Sturgeon Falls. The late Mr. Sutherland was born in Eganville, Ontario, April 2nd, 1881. In early youth he was apprenticed to the electrical trade, and after a wide and varied experience he came to Sturgeon Falls and joined the staff of the Spanish River Pulp and Paper Company then operating the local mill, as electrician in charge of installations on construction in July, 1921. His qualifications soon won him appointment to the position of chief electrician, the position which he occupied at time of death.

Miss Mabel MacDonald and little sister, Mildred from North Bay, are visiting at the home of their grandmother, Mrs. A. Senecal, and their aunt, Mrs. Oscar Chalut.

**TIMMINS KIWANIS CLUB**

**All Next Week**

**ANNUAL**

**Kiwanis**

**Karnival**

in the SKATING RINK TIMMINS

**VAUDEVILLE ACTS**

TWICE NIGHTLY—7.30 P.M. AND 11.00 P.M.

**HARDMAN**—"The Pocket Hercules" in a strong man act that is more than spectacular. Bending heavy iron bars is one of his simplest feats.

**ARNOTT**—In a programme of magic and comedy. Arnott, a clever magician, is a comedian with unusual entertaining ability.

**Dorothy's Circus**

Trained ponies, dogs, monkeys. An act from Big Time Vaudeville Circuits of unusual merit. Clean, wholesome, clever, entertaining. Prince Leo "the pony with the human brain" gives a remarkable demonstration of accuracy in problems of arithmetic as well as other acts.

**Balloon Descension**

Each night a large number of toy balloons will be dropped over the crowd in quite a number of which will be placed coupons entitling the holder to claim valuable prizes worth up to \$10.00. This is an attendance prize and can only be won if you are there at 11 o'clock when the balloons are dropped.

**Free Attraction**

Each evening at 7.15 Mr. Hardman "The Pocket Hercules" will give a free demonstration of super strength when he will attempt to pull a motor car along Third Ave. by his teeth, possibly increasing to several cars later in the week.

**Grand Draw**

An unusual arrangement has been made whereby admission tickets are being sold by a group of young ladies. These tickets are made up of four admission tickets at 10c each and a draw ticket for three prizes. The three prizes are for \$25.00, \$15.00 and \$10.00 worth of goods purchased from any Kiwanian or cash. To the young ladies will be given cash prizes of \$15.00, \$12.00, \$10.00, \$8.00 and \$5.00 for the ones selling the greatest number of tickets. A prize of \$10.00 in cash is also being given to be drawn for by all the young ladies who sell over 2 books of tickets and who were not prize winners. Purchase these tickets now from your favourite young lady. Save money yourself and help the young ladies win these prizes. Any young ladies wishing to enter this contest should see Mr. G. N. Ross, Room 10, Reed Block for particulars. The proceeds are "to furnish and maintain a ward in St. Mary's Hospital for Underprivileged Children."

**Huge Midway**

A Bigger and Better Midway of Games has been arranged than last year with bigger and better prizes—well worth taking home. The games will all be operated by local Kiwanians and their friends and are all fair and square. Don't miss a single night.
