The REALM of HYDRO-ELECTRIC POWER

NATIONAL development is more pronouncedly along electrical lines in Canada than in any other country. Already the Dominion leads the world with a per capita production of electricity that is more than twice that of the United States, more than four times that of Germany, and nearly six times that of Great Britain.

With electricity's widening scope in Canada comes a steadily increasing consumption per individual. Whereas in 1919 a per capita production of 648 kilowatt hours was sufficient to meet Dominion requirements, more diversified usage had by 1929 necessitated a per capita output of 1,838 kilowatt hours.

The trend continues as Canada looks increasingly to hydro power to accomplish her ambitions. Each year domestic life and industrial progress are more closely bound up with the provision of electrical current.

FURTHER QUESTIONS THAT INTEREST FOOTBALL FANS

Seventh Article in the Series of Questions and Answers in Regard to Football Matters. Official Decisions and Other Information.

Below will be found the seventh of the series of questions and answers in regard to football decisions and the rules and regulations in regard to the same. The Advance in the first article urged football fans to clip these articles and preserve them for reference. Anyone who does so will have reliable guide to football when the series is completed as it will be in the next few weeks. Nearly every phase of football is covered by these questions and answers, and it may be noted once again that the answers are based on direct statements from the rules or the quotation of actual decisions approved by the football experts.

85. What breadth should the cross-bar and uprights be?
Answer:—The surface of the bars or posts facing the field of play must not be more than 5 inches in width.

86. What is the maximum length and breadth of the field of play?
Answer:—The maximum length and breadth is 130 yards by 100 yards.

88. If the goal-keeper handled the ball outside the penalty area, what sort of free kick would be awarded?
Answer:—If the goal-keeper handles the ball outside his own penalty area he is committing a breach of the law, and the award is a free-kick from which a goal can be scored direct.

89. In international matches what is the maximum length and breadth of the field of play?
Answer:—In international matches, the dimensions of the field of play shall be:—maximum length, 120 yards; minimum length, 110 yards; maximum breadth 80 yards; minimum breadth, 70 yards; and at the commencement of the game the weight of the ball shall be from 13 to 15 ounces.

90. What weight should the ball be at the start of the game?
Answer:—At the commencement of the game the ball shall weigh from 13 to 15 ounces, the outer casing must be of leather.

91. What is the circumference of a ball at the commencement of a game?
Answer:—The circumference of the ball shall not be less than 27 inches nor more than 28 inches.

92. What is the size of the corner kick area?
Answer:—The size of the corner kick area is one yard.

93. Can a player be offside if he is behind the ball?
Answer:—A player cannot be offside when the ball has been passed back to him. The important point in connection with offside for the referee to notice is not where a player is when he plays the ball but where he is at the moment it was played to him by a player of the same side.

94. What decision would be given against a player who intentionally stooped before or behind a player with object of throwing him?
Answer:—The penalty would be a free kick from which a goal may be scored direct.

95. On what occasions can a player be ordered to leave the field of play without previously being cautioned?
Answer:—A referee has the power to order a player to the pavilion without any previous caution if he uses violent or bad language towards him; wilfully obstructs the progress of the game; assaults an opponent or wilfully injures an opponent. Swearing at a referee is violent conduct within the meaning of the law.

96. Is there any law as to when players can come on to the field of play to complete the eleven?
Answer:—Law 1 states that "the game should be played by not more than eleven players on each side, "but makes no provision for teams starting the game short of the requisite number, as is often the case owing to the late arrival of some of the players.

97. When would a goal-keeper be penalized for carrying the ball?
Answer:—Carrying by the goal-keeper is taking more than two steps while holding the ball, or bouncing it on the hand. The goal-keeper must not "walk about" bouncing the ball on the hand. After the second step he must be penalized.

98. If the ball had passed over the goal or touch lines when a player was intentionally tripped, etc., would a free kick be allowed or, if inside the penalty area, a penalty kick be awarded?
Answer:—When the ball has passed over the goal or touch lines it shall be considered dead or out of play. If a player commits an infringement when the ball is dead the referee can not award a free or penalty kick, but he can only deal with the player according to the nature of the offence committed.

99. Is wearing India rubber on any part of the boots an offence? If so state the nature of the award that would be awarded.
Answer:—Wearing soft India rubber on the soles of boots is not a violation of the law. Gutta percha is not permitted on boots or shin guards. A player found infringing the law in this regard shall be prohibited from taking further part in the match. The referee shall, if required, examine the players' boots before the commencement of a match or during the interval.

100. If the ground markings become obliterated during the first portion of a game what action should the referee take?
Answer:—Should the ground markings become obliterated through unfavourable weather conditions during the first portion of game it is advis-

BOYS' LIFE MAY HAVE BEEN SAVED THROUGH FIRST AID.

The value of the teaching of first aid was shown in notable way recently at Halleybury. A boy of eight years of age was out with some other lads around the same age and in their play this one lad, Jack Rogers had occasion to use a small hatchet. In some way or another he sunk the hatchet into his leg, severing a small artery. There was danger of the lad bleeding to death before he could reach medical aid. If the boy had become hysterical or anything like that he would certainly have been in bad way. The little lad, however, having had lessons in first aid from the classes under the supervision of the public school principal and the town nurse was not unduly alarmed but simply used his knowledge to remedy his difficulty. He tried to stem the flow of blood with his handkerchief but finding this unavailing he simply held the leg as well as he could while he sent some of his chums to a nearby store to get some cord. With this cord and the help of the other lads, not to mention what they had learned, about first aid, the youngster fashioned a tourniquet that stopped the loss of blood and left the wound ready for stitching. The boys dragged the injured boy home on a small wagon and medical aid was then secured. The doctor is quoted as saying that the tourniquet was a good one and answered the purpose in excellent way. The fact that the boys knew what to do and how to do it is not only an argument in favour of the teaching of first aid but it is also an evidence of the value of knowledge of first aid to boys as well as to grown-ups.

SIXTY CANADIAN INFANTS PERISH EVERY 24 HOURS

The following has been prepared by the Child Hygiene Section, Canadian Council on Child Welfare:

When we read of thirty babies dying in twelve hours, we are forced to think "Why cannot something be done?"

When we realize that not only thirty babies die, but that every twelve hours during 1928, Canada lost thirty infants under one year of age, a total of 21,195 lives, we ask ourselves, "Why did they die? Could they have been saved?"

Some of the chief causes of these deaths, according to the Dominion Bureau of Statistics, are: Premature Births and Injuries at Birth—5,586; Diarrhoea, Dysentery and Diseases of the Stomach—4,144; Congenital Malformations and Disabilities—3,634; Bronchitis and Pneumonia—2,334; and other Communicable Diseases—1,459.

Lack of knowledge, or ignorance, definitely contributed to the death of 50% of these children; this ignorance was evidenced by the lack of antenatal service, lack of satisfactory medical and nursing care at the time of, and following birth, and by artificial feeding, etc.

In co-operation with the Federal and Provincial Departments of Health, the Canada Council on Child Welfare is making an effort to try to reduce this tremendous loss of life in Canada. A series of pre-natal and post-natal letters, the latter covering the first year of the baby's life, and including habit-training, may be secured in French and English, free of charge, by writing the Provincial Department of Health, or the Child Hygiene Section of the Canadian Council on Child Welfare, 406 Plaza Bldg., Ottawa, Ont.

NEW LISKEARD YOUNG MAN SENTENCED FOR PERJURY

At New Liskeard last week, John Brown, 21-year-old resident of the town, was sentenced to three months in jail when convicted on a charge of perjury. The charge was laid by the parents of a 15-year-old girl whom Brown had said in his affidavit for a marriage licence was 18 years of age. W. H. Wattier appeared for the accused and asked for leniency for his client, but magistrate Atkinson pointed out that Brown had perjured himself in court when he had denied the evidence of witnesses in the case and the court felt that some penalty must be given to discourage the tendency to false swearing. The charge against Brown developed from the statements made by Brown in the early part of June when he married a Halleybury girl of 15, giving her age at the time as 18 years. The girl appeared to be more than her actual age according to reports of the case, but Brown was said to have known her real age when he made the false statement.

LONDON LIFE CO. EXCEEDS BUSINESS OF LAST YEAR

A very optimistic comment on Canada's present economic condition is found in the results of a six weeks' Production Drive just concluded by the London Life Insurance Company. The field representatives wrote a total of \$17,028,014 life insurance, which exceeds the results of a similar drive a year ago by a fairly large margin. In view of general business conditions officials of the Company are highly gratified with this figure. It is the second time since the first of the year that the London Life has launched a special drive which was warmly received by the public. The March Campaign, in honor of John D. Buchanan, Actuary, resulted in the biggest month's business in the history of the Company. These facts lend strength to the theory that as far as Canada is concerned, "depression" is to a great degree a mental condition exerting a "hold back" influence on the average Canadian's pocketbook. The personal salesmanship methods by which life insurance is merchandising are evidently equal to the task of placing this commodity at the regular rate in spite of the depression bogey. Life insurance is, in addition, being more and more sought as a safe and profitable investment.

The New Liskeard Speaker last week says:—"We have already told the story of the boys who made the dog, "Carlo," draw the lawn-mower. The latest manoeuvre to get the better of toil was that of attaching the mower to a bike. Eddie rode the bike and did the strenuous propelling, while Johnnie guided the mower. However, they did not stay long on the job. It means one thing to ride a bike for fun, and another thing to ride a bike when it comes to work. Boys and men are very much alike in this respect."

When th' pitcher Goes wild

then the fielders suffer!

It's the same with your radio. When one tube gets weak, the other four or five are overtaxed, and their life is shortened badly.

Let us test your tubes. Perhaps we can save you much money.

PILOT MAKES LANDING IN SAFETY WITH PLANE ON FIRE

The Halleyburian last week says—"The large Fokker Universal aeroplane of the General Airways, operating in Northern Ontario and Quebec, was destroyed by fire on Friday last at the base of operations in Amos, Que. W. H. Clarke, chief pilot for the company, was coming in to the base and had the engine running very slowly. He explained, when in Halleybury on Saturday, that the slow speed of the engine caused a flame from the exhaust and that this set fire to the plane. He was quite close to the shore and, although the plane was quickly enveloped in flames, he was able to get out on to dry land before he suffered any injury. The plane is almost a total loss. Mr. Clarke was on his way south to get another machine, he stated, as the company has so much transportation in and out of the mining camps at the present that the loss would seriously hamper the operations. He expects to have another plane on the ground this week."

LATE PRELATE HONOURED

Thousands of people have gone to Vatican City to pay tribute to the mortal remains of Cardinal Vanutelli, Dean of the Sacred College at Rome, who has passed away at the age of ninety-three. The late cardinal was one of the most revered of the Roman Catholic prelates.

PRIEST'S RESIDENCE AT NEW LISKEARD COMPLETED

The New Liskeard Speaker last week says:—"On Tuesday morning Mr. A. Boivin, of the Swastika Planning Mills, contractor for the new priest's residence on Dymond Crescent, New Liskeard, turned over the new dwelling to Rev. Father Paquin, in its completed state. In making delivery of the building to the owners Mr. Boivin beat the time limit by some two weeks. The new residence is of considerable size being 26 x 30 with kitchen annex of 10 x 24 and contains some thirteen rooms, two baths and large halls. It is heated by hot water, the outside consisting of slate shingle siding pattern. The interior is of gyproc, wall paper and wood work, with three coats of varnish. The outside painting consists of three coats. To increase the accommodation of the building there are 92 feet of verandah space. The new residence is situated on the property adjoining the Roman Catholic Church and all connected with its construction are to be congratulated."

BIRTHDAY PARTY HELD AT G. B. REDDEN'S ON FRIDAY

Between forty and fifty guests gathered at the home of Mr. and Mrs. Guy B. Redden, 34 Columbus Avenue, on Friday evening, August 1st, to celebrate Mr. Redden's birthday. Dancing was enjoyed until midnight. Then a three-storey birthday cake was brought in and Mr. Redden was called upon to light it and carry it through the rooms. When he arrived back from the excursion with the cake Harry Redden was waiting with a mysterious bundle which he presented to Mr. Redden with appropriate comment and good wishes. When the bundle was opened it revealed a particularly handsome sweater coat. Although completely taken by surprise Mr. Redden thanked the guests present in suitable way and expressed his pleasure at having them with him on his birthday. Then three rousing cheers were given him, after which the crowd joined in singing, "For He's a Jolly Good Fellow." Then supper was served and more dancing following. The music for the occasion was supplied by E. Watson. The evening was a very enjoyable one throughout, and all joined in wishing the guest of the evening many happy returns of the day.

In several recent issues of The Advance there have been references to brave rescues by Timmins men of youngsters about to drown. Timmins has not the monopoly on such rescue work. At Sudbury last week a young girl was seized with a cramp while in swimming and Gerald Faire, the 11-year-old son of Mr. and Mrs. W. A. Faire, seeing her difficulty, went to her assistance and was successful in rescuing her from the very imminent danger of being drowned.

WORK BEING RESUMED ON THE HAYDN GOLD MINES

James S. Pierce, president of Hayden Gold Mines Limited, whose operations are in the Porcupine district, reports that active mining has been resumed. The pilot drilling campaign successfully located the big contact vein on the 700-foot level, close at hand to the west; it also successfully located it both east and west on the 300-foot level. In addition, as reported, the pilot drilling also located a promising deposit in the surface "diamond drill vein area to the south." In view of the actual opportunities for direct mining work, operations have been resumed on the major vein system on the 300-foot and 700-foot levels.—The Northern Miner.
