Here and There

Successful Canadian exhibitors in the International Grain and Hay Show to be held at Chicago, November 23-December 5, will be awarded liberal bonuses in addition to the regular premiums offered in the prize list now being distributed. The provincial governments of Quebec, Ontario, Alberta, Saskatchewan and British Columbia, the Calgary Board of Trade and the Canadian Pacific Railway have also announced offers of special awards for Canadian exhibitors.

That elk are attracted by music seems to be established by the actions of two fine specimens of that animal which stroll out of the bush when dancing begins at the Banff Springs Hotel every evening. Under the ballroom windows they begin to shake their heads and prance, cavort and caper while the music lasts, not even stopping to eat until the orchestra has ceased playing.

Canadian poultry are rapidly being recognized throughout the world as reaching unusually high standards and recently the S.S. Empress of Canada, clearing from Vancouver to China, Japan and the Philippines, carried 60 head of registered white leghorns consigned to Manila to be used in building up the poultry industry of the islands. The birds came from a poultry farm near Vancouver.

Captain R. W. McMurray, for the past five years marine superintendent of the Canadian Pacific's British Columbia coast steamship service at Vancouver and prior to that a commander with the Canadian Pacific trans-Atlantic fleet, has been gazetted in the London Times of July 14 captain in the Royal Naval Reserve, promoted from the rank of commander, R.N.R. Captain McMurray, whose rank is equivalent to the army rank of brigadier-general, is one of the few living Canadians holding such a high position in the R.N.R.

The province of Manitoba last month celebrated its sixtieth birthday. Where 60 years ago the buffalo reigned alone, Manitoba farmers are now pasturing 350,000 horses and 680,000 cattle and the prairie dweller instead of returning to fort or wigwam from his day's work, spends his evenings in his radio-equipped home or motors over good highways to the nearest city.

About a thousand tons of zinc concentrates from Field, B.C., on the main line of the Canadian Pacific Railway, were shipped to Japan recently, this being part of a movement of 1,500 tons monthly from a mine which started five months ago and which ships lead concentrate to California.

Nearly 12,000 extra men are finding employment this summer in the Canadian Pacific Railway program of construction, maintenance and improvement from coast to coast of the Dominion. Program includes laying of branch lines, repairing and renovating of right-of-way, bridges, tunnels, stations, and other buildings. The men in general are recruited as near as possible to the scene of work and kept steadily employed until each job is finished.

A number from Timmins and district went over to Iroquois Falls on Monday for the Labour Day celebration there. They report the event as a good one but hardly up to the standard of the big events at the Falls in Labour Day in old times, when the Labour Day celebration at Iroquois Falls was the big feature of all this part of the North Land.

McIntyre Loses Out in Race for Championship

Word received last night is to the effect that the McIntyre Baseball team is out of the running for further baseball honours this season. On Labour Day in a game carried on for 11 innings, Kirkland Lake won out 5 to 4. The McIntyre also lost the other game at Kirkland Lake, 8 to 7. Yesterday Kirkland Lake took up the battle for further honours with the Temiskaming, Que., team and were defeated 17 to 14. There is reason for believing that the Temiskaming, Quebec, team will represent the North for further baseball honours this season.

TIRED OF SYSTEM

(St. Catharines Standard)
Governor Franklin D. Roosevelt of New York is the latest American public man who desires to introduce a Canadian idea into the jurisprudence of that country. At Lockport yesterday he placed himself on record as favouring non-political selection of judges. Explaining his recent endorsement of Judge Cuthbert W. Pound, who is seeking re-election to the Court of Appeals, the governor said: "You may have been surprised at my endorsement of your fellow-townsmen. I did that for two reasons: First, because I believe the judiciary should be taken out of politics and second, because Judge Pound is one of the best known jurists in this country." In his brief speeches both here and at Medina, the Governor appealed to his listeners to make available as much work as possible to relieve unemployment. "We are headed for a hard winter and every job will help," he said. "When I was on the crew at college we used to say that every man would have to row his own weight. "That is what we must do now. Every man must support his own weight."

"PINEAPPLE REIGN"

(From The Toronto Telegram)
Sandwiched in between the burst of machine-gun fire in the beer gang wars in United States cities may be observed the sabotage of the racketeer preying upon legitimate trade union and business organizations. Canadian cities can think British institutions and police forces untrammelled by politics for so long escaping the "reign of the pineapple," but these rackets have grown so such an extent that it would not be surprising if attempts were made to fasten them upon Canadian municipalities by organized bands of thugs from across the border.

The Building Owners' and Managers' Association of St. Louis has become so impressed with the extent of the rackets which exist in American cities that they have circulated their members with reports of the working methods of the racketeers. This report was prepared by Paul Y. Anderson, of the St. Louis Post-Dispatch. The situation which exists in Chicago appears also to have been spreading to St. Louis.

District Attorney Johnson, who understands it better and shows more determination to end it than any public official in Chicago, divides organized crime into four general classifications which he lists in the order of their importance and the size of their profits as follows:

1. Violations of the prohibition laws.
2. Trade and labour racketeering.
3. Gambling (including handbooks and slot machines).
4. Vice.

A drive by the police closed 5,000 resorts, thus throwing a large number of professional thugs and hoodlums out of work; they turned to rackets. The procedure was simple. An agent canvassed all the garage owners in a certain area, inviting them to join the newly formed "garage owners' association." If an owner refused, a "pineapple" was tossed into place within a week. He hastened to join. The night after his subscription was received, two men went along the rows of automobiles parked for the night in adjoining streets and punctured the tires with ice picks. The next day most of the owners of the cars rented space in the garage (and so forth). Such are the methods by which the racketeers organize the smaller business establishments, and collect monthly dues from the "members." It is infinitely more important from the "members' standpoint than belonging to the Chamber of Commerce. Now take the other side of the street: If a labour union is in existence, the procedure is to "muscle in." That means the racketeers get themselves elected officers of the union, the strategic office being that of treasurer. The campaigning consists of threatening to kill any union member who appears at a meeting to vote against the racketeer candidates. Occasionally they carry out the threat, just to show they mean business.

WORK FOR ALL

(St. Catharines Standard)
The "Buy-in-Canada" campaign has swept through the nation. What is the purpose of it? What good will it do? How soon will it do it, if any? Why bother with it? These are questions the average shopper must ask. Fair enough. And here is the answer: "Its purpose is to provide work, with pay, for every Canadian. It will do just that. It will, if applied by Cana-

dians generally, show its effect almost immediately. Put it this way: For example, suppose we spend only 10 cents a day more per capita on Canadian goods. That is not much. But there are 10,000,000 Canadians. Then this 10 cents a day would make a million dollars. In a year it would make \$365,000,000. Now, suppose labour forms 40 per cent of the cost of the goods and that is a safe estimate. Forty per cent of \$365,000,000 is \$146,000,000 spent in wages.
