**COCHRANE BOARD OF TRADE URGES HELP FOR SETTLERS**

Resolution Before Associated Boards Along Lines of Requests in Petition Signed by Settlers and Backed by the N.O.S.A.

Some time ago petitions were circulated from the settlers of the North Land asking for assistance from the

Ontario Government to help them in the work of pioneering in this North. These petitions were largely signed in this district, as well as in other parts of the North. Later, the Northern Ontario Settlers' Association was formed at Kapuskasing and this association also urged the following out of the Cochrane Board of Trade. Now, the Cochrane Board of Trade has submitted a resolution to the Northern Ontario Associated Boards of Trade along the same lines. This resolution will be dealt with at the coming meeting of the Associated Boards. It reads as follows:—

Resolution adopted by the Cochrane Board of Trade to be submitted to the annual meeting of the Northern Ontario Associated Boards of Trade.

Whereas colonization has been responsible for the present state of development in Northern Ontario, and upon further colonization will depend the future progress and prosperity of this greater and newer part of the province;

And whereas the industries in Northern Ontario have been going ahead with rapid strides while agriculture has been stagnant;

And whereas the greatest prosperity and progress in Northern Ontario will be brought about by a simultaneous development of industry and agriculture;

And whereas a large proportion of the settlers, have not enough capital, and the price paid for pulpwood is not sufficiently high to enable them to save enough money to live on their farms while they do the clearing;

And whereas the present settlers' Loan system has not met the situation.

And whereas while it is true that many thousands of dollars have been spent by the Government in the past in the building of new roads, still there have never been sufficient to meet the urgent requirements of the settlers, a great number of whom are yet without roads;

And whereas the lots of 75 to 80 acres are too small for mixed farming, upon which they depend for a living;

And whereas they are now at a time when a greater acreage of cleared land is essential to their existence;

And whereas they will be compelled to abandon their farms unless these conditions are improved;

And whereas the Government has recognized the benefits of the bonus system by adopting it to aid the iron industry and rural Hydro;

Nor therefore be it resolved:—

1. That a separate Department of Colonization be established and placed under an efficient Deputy Minister who will be responsible to the Minister of Agriculture for the organization and carrying on of a vigorous and progressive colonization policy of judicious settlement of Northern Ontario.

2. That Township roads be built immediately wherever they are urgently needed.

3. That the following bonus be paid to bona fide settlers:

(a) \$10.00 per acre for slashing and burning.

(b) \$10.00 per acre for stumping, grubbing and burning.

(c) \$5.00 per acre for breaking and seeding.

These premiums to be paid for a maximum of 5 acres per year on each lot until a maximum of 35 acres has been bonused.

4. That the size of the lots be restored to the original survey of 160 acres in 6 mile townships and 150 acres in 9 mile townships.

Toronto Mail and Empire:—A hunter mistook a life-long friend for a mossy mouse and shot him. Old friends sometimes observe things in each other which are not apparent to casual acquaintances.

**SOME PARTICULARS OF THE BOY SCOUT MOVEMENT**

Organized in 1908. Now has 377,037 Scouts, 59,578 Leaders, 34,308 Rover Scouts, 178,498 Wolf Cubs, and 4,709 Sea Scouts. Boy Scout: Active in Timmins.

The splendid Boy Scout movement was begun within sight of the Tower Bridge over the Thames, London, in 1908 by Lord Baden-Powell, Chief Scout of the world. The movement in the British Empire which covers one-fourth of the habitable globe, totals 377,037 scouts, 59,578 leaders, 34,308 rover scouts, 178,498 wolf cubs and 4,709 sea scouts.

In Canada there are 28,340 boy scouts, 16,814 wolf cubs, 855 rover scouts, 310 lone scouts, 182 sea scouts and 3,985 leaders, making a total of 50,486.

The whole object of the boy scout movement is to seize the boy's character in its enthusiastic stage and to weld it into the right shape, and to encourage and develop its individuality. The boy is taught through scouting to become a useful member of the community; by instruction in the various handicrafts he is helped to make a career for himself, and as a boy scout he becomes a member of an organized body which is trained to be of public service when required. Thus a troop or patrol can specialize in different forms of usefulness to others, such as fire brigades, ambulance corps, etc. The good influence of scout training is felt in the home and the school, and its inauguration in a community is invariably appreciated alike by the boys themselves and all those interested in the welfare of the boys.

A boy on joining the scouts must be between the ages of twelve and eighteen and pass the following tests before making the promise:—

(1) Know the scout law, signs and salute.

(2) Know the composition of the Union Jack and the right way to fly it.

(3) Tie the following knots: reef, sheet-bend, clove hitch, bowline, fisherman's and sheepshank.

He is then enrolled as a tenderfoot scout and is entitled to wear the button-hole badge. A boy does not stand still in scouting. The opportunity and incentive for progress is always at hand. First a tenderfoot, then a second class scout, then a first class scout, king's scout, and so on. The whole sphere indeed of the scout programme is made available by the boy's own efforts and the assistance of the troop officials.

The Timmins troop of boy scouts meet every Wednesday evening at seven p.m. in the basement of the Anglican church.

On Wednesday, February fourth, some of the members of the South Porcupine troop, all of the Chikadee patrol and their S.M., paid a visit to the Timmins troop. There was the usual programme of about an hour's work on scouting, such as signalling, knot tying and baseball. In this game of baseball a ball is not thrown for the batter to hit. Instead a question is asked and he has to answer immediately or is counted out. There was a knot-tying competition to find the four slowest knot-tiers in the troop, the object being to make these boys wash dishes after lunch. There were also several games played and the meeting was closed at nine fifteen p.m.

The scout law consists of ten laws the first one being: A scout's honour is to be trusted. If a scout says, "On my honour it is so," that means that it is so, just as if he had taken a most solemn oath. Similarly, if a scout officer says to a scout, "I trust you on your honour to do this," the scout is bound to carry out the order to the very best of his ability, and to let nothing interfere with his doing so. If a scout were to break his word of honour by telling a lie, or by not carrying out an order exactly when trusted on his honour to do so, he may be directed to hand over his scout badge and never to wear it again.

Surveyors Started on Survey at Moose Factory

The North Bay Nugget last week says—

"George Angus, O.L.S., of the firm of Angus and Angus, architects and surveyors, North Bay, left on Sunday for Moose Factory where he will locate and lay out the new town site to be established there. This work is being done by order of the T. & N. O. Railway commission and will probably take three weeks. It is expected that the trip will take a week, that a week will be occupied in making the survey, and that the third week will be taken up in the return to North Bay. Mr. Angus took three men with him from North Bay and will further augment his force from the staff at the crossing of the Moose River. At this latter point he will also get his dog teams, toboggans and supplies for the trip."

St. Mary's Journal-Argus:—In front of one of the Toronto churches in Parkdale was the sign: "Subject of Sunday sermon—Do you know what hell is?" and beneath in smaller letters: "Come and hear our new organization."

Pembroke Standard-Observer:—Maine wants an embargo on Russian pulpwood. Canada needs the same thing. In fact all the civilized world would start well on the road to prosperity by placing an embargo everything Russia produces.

**To Marry Commoner**

PRINCE LINNERT

Grandson of King Gustav of Sweden, wants to marry Miss Karin Nisswan, daughter of a prominent Stockholm industrialist, so he has renounced his remote rights to succeed to the throne. He is the son of Gustav's second son.

**DEATH OF LORNE KENNEDY, SON OF A. J. KENNEDY, M.P.P.**

Friends of the family in Timmins and district will regret to learn of the death last week of Lorne A. Kennedy, son of A. J. Kennedy, M.P.P., New Liskeard. The New Liskeard Speaker last week refers as follows to the death:—

"The citizens of New Liskeard were indeed shocked to hear, Tuesday night, that Mr. Lorne A. Kennedy, only son of Mr. A. J. Kennedy, M.P.P., had passed away from pneumonia, after but a few days' illness. The deceased had been in Ottawa on a business trip and returned home suffering from this disease. The late Mr. Kennedy was born in Maxville, Glengarry County, in 1887, but had been a resident of the north for the past twenty-two years, and a most popular member of the North's population, being well known in business centres and having the aptitude for making and holding friends.

In 1911 he married Susan Rice Ferguson, daughter of the late Dr. James Ferguson, Cumberland, Ont. Surviving him are his widow, two daughters, Margaret and Elizabeth, his father and one sister, Mrs. Glen White, of North Bay. During the Great War, the late Mr. Kennedy was in uniform, holding the commission of Captain in a Forestry Battalion. The funeral services will be held in the Presbyterian Church at 2 p.m. on Friday and will be in charge of the Masonic Lodge, in which association the deceased had held the positions of Past Master of the "Blue" Lodge and Past Superintendent of Royal Arch Chapter. Interment will take place in New Liskeard Cemetery. The sincere sympathy of a very large circle of friends goes out to the bereaved family in their sorrow.

Sudbury Star:—To refer to an individual as "a good listener" is by way of paying a high compliment, but it is a compliment scarcely deserved. The "good listener" is held in high esteem because of the rarity of the type, not because of any intrinsic merit. The demand is greater than the supply.

Port Arthur News-Chronicle:—During 1930 there was a gain of 833 tons in the per day capacity of Canadian newsprint mills. The total rated capacity is now 4,645 tons daily. As the troubles in the newsprint industry were in development considerably before the dawn of 1930 it looks as if someone was seriously at fault in permitting the subsequent heavy expansion.

**NOTABLE EXPANSION IN PRODUCTION OF MINERALS**

New Records Established in Both the Quantity and the Value of Gold Produced in the Dominion During the Past Ten Years.

In a recent address here Hon. W. A. Gordon, "Minister from the North," and in charge of the Dominion Dept. of Mines referred to the stabilizing influence of the mining industry in Canada during these days of depression throughout the world. Hon. Mr. Gordon quoted facts and figures to prove his statements and showed the value of the mining industry to Canada's general welfare. The same period is made by the monthly letter sent out by the Royal Bank of Canada. The February issue of the Royal Bank letter says, in part:—

"Mineral production in Canada showed greater expansion during the decade just closed than any other major branch of industry. The total output of Canadian mines was valued at \$172,000,000 in 1921. This increased to a total of more than \$310,000,000 in 1929. The industry shared the effects of the prevailing business depression and operations during 1930 were curtailed in many fields. As a whole, however, mining continued to progress and provided one of the greatest stabilizing influences in business during the year. New records are established in both the quantity and value of gold, petroleum and natural gas produced."

After referring to the production of copper, zinc, silver and other metals, the letter continues:—

"Further, the maintenance of such a high level of production under the adverse conditions of 1930 is striking evidence of the soundness and underlying strength of Canada's mining industry."

Taking up the gold production, the Royal Bank letter says:—

"In 1930, for the first time gold production exceeded two million ounces. This is more than double the output of 1921. There are good prospects for further expansion as there are still many developments pending, involving the increase in the productive capacity of existing mines, and exploration work is continuing in promising areas. Canada has become an important factor in the world's supply of gold, her production having been exceeded in recent years only by South Africa and the United States. The output in the United States has been falling off and some time ago the forecast was made that by 1932 Canadian production would be greater than that of the United States. The total output in the United States in 1930 is officially placed at 2,232,593 ounces. If the production of the Philippine Islands is deducted from this total, however, Canada already occupies second place in gold production."

"Ontario mines, mainly in the Porcupine and Kirkland Lake areas, produced 1,720,239 ounces or 82 per cent. of the total for all Canada. Quebec has been producing gold for many years but until 1927 the production consisted only of the small quantities recovered in the treatment of other ores. Important copper-gold deposits were discovered, however, and the development work already completed gives promise of a substantial volume of production. The output increased from 8,000 ounces in 1927 to nearly 139,000 ounces in 1930. Manitoba also gained prominence as a gold producer in 1928 with a total output of nearly 20,000 ounces. This was increased over 27,000 ounces in 1930. British Columbia and the Yukon territory were long important for their gold production. British Columbia established a record of more than 288,000 fine ounces in 1902, which was equalled only in 1913. This pro-

**Relief for Colds**  
**BUCKLEY'S MIXTURE**  
A SINGLE SIP PROVES IT  
*Acts like a Flash*

vince now stands second to Ontario as a producer with an output of 163,300 ounces in 1930. The Yukon production in 1930 is estimated at more than 38,200 ounces."

**EMPLOYEE OF NORTHERN DEVELOPMENT LOSSES LIFE**

A despatch this week from England says that struck by a piece of clay which had become dislodged as he was climbing the face of a pit, Herbert Watson, who lived on a farm in Robillard township, was instantly killed Friday while at work for the Northern Development Branch in a gravel pit in Chamberlain township.

Watson was a member of the "break down gang," and three holes had been prepared for dynamite charges, the men then moving on to another point.

For some unknown reason, Watson returned alone to the section of the pit where the gang first had been working and started to climb the bank. He was some distance from the bottom when the clay broke loose, struck and killed him and carried his body down with it. An inquest will be held. Watson was about 30 years of age and unmarried.

High River (Alberta) Times:—They call Edmonton the seat of the government; meaning, of course, the proper place to register your kicks.

Toronto Mail and Empire:—The remarkable thing is that having had nothing to eat for four months a bear is substantial enough to cast a shadow.

New Liskeard Speaker:—A North Bay despatch to the Journal says the "world's meanest man" is making his rounds, and five dogs have paid the penalty. Sometimes it is the "meanest man" who is responsible for the death of his neighbours' dogs when he keeps a "cur" which is a menace to the life and limbs of his neighbour and his neighbour's children.

**WALTER'S Clorophita Salve**  
**should not fail to be in any Household or Camp. It is very necessary for Prospectors, Hunters, Motorists and Travellers.**

Guaranteed for any Sore that no Poison sets in if properly applied. Walter's Clorophita Salve is a special preparation for Poisoned Wounds, Cuts, Bruises, Burns, Frozen Parts, Bad Legs, Chapped Hands, Insect Bites, and all Inflamed Parts and Sprains. Excellent for Deafness and Earaches; Put a couple of warm drops in the ear at night relieves the pain and stops running ears. A little Poultice on an Inflamed Eye is an excellent reliever. Hundreds of Testimonials have been received and are on file.
