

BETTER BRAN FLAKES

a grand total of flavor, pep and health

TASTE THEM! Only Kellogg's Pep Bran Flakes have that matchless flavor—that good-to-the-last-spoonful crispness.

Brimful of vim and zest. Full of crunchy wheat. All the nourishment of the whole grain.

Plus extra bran for extra health. Just enough added fiber to be mildly laxative.

Flavor, pep and health—all combined. That's why Kellogg's Pep Bran Flakes are better bran flakes.

Great for breakfast. Fine for lunch. A special treat for children at every meal. Serve with fruits or honey—with milk or cream.

Look for the red-and-green package at your grocer's. Made by Kellogg in London, Ontario.

IMPORTANT—Kellogg's Pep Bran Flakes are mildly laxative. ALL-BRAN—another Kellogg product—is all bran and guaranteed to relieve both temporary and recurring constipation.

TEN YEARS AGO IN TIMMINS

From data in the Porcupine Advance Files.

Ten years ago The Advance gave a play-by-play account of the match at Sault Ste. Marie between Timmins and the Sault Ste. Marie in the first of the home and home games to decide the N.O.H.A. championship. The report was taken at this end by A. E. Riddell, and read out to the big crowd at the Hamilton B. Wills offices by B. E. Martin, "sometimes" (said The Advance) "in a voice that shook with hockey emotion and sometimes with the triumph of that 'I-told-you-so' feeling."

At the annual meeting of the Hollinger shareholders at Montreal ten years ago, the work of the year and the reports of the officials were shown appreciation. The board of directors were re-elected as follows for 1921: N. A. Timmins, Montreal, president; D. A. Dunlap, Toronto, vice-president; L. H. Timmins and J. R. Timmins, Montreal, and John Holden and Dr. W. L. McDougall, Toronto, directors.

Department of Neglected Children." was the reply. "The many friends of Mrs. J. J. Johnson, formerly of this camp, will regret to hear that she is still very ill. She left New York a couple of months ago for an extended visit to her mother, Mrs. A. Byrne, at Midland, Ontario, to recuperate. The trip, however, proved too much for her strength and she is quite seriously ill. Friends here will sincerely hope for her early and complete recovery."

Hollinger Mine to Increase Output

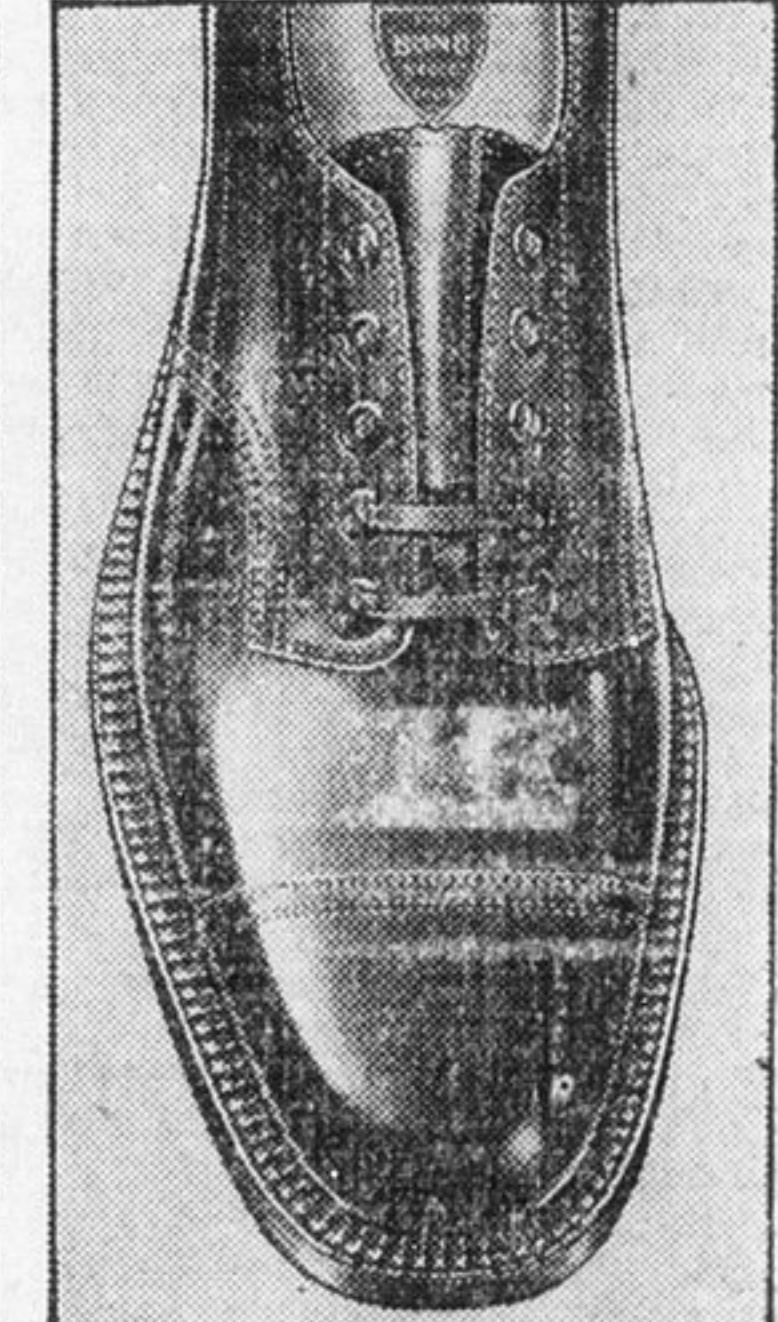

Schumacher Workings to be Deepened to 6,000 Feet. New Veins Discovered. Broad Scheme of Exploration.

Much interesting and encouraging information in regard to the Hollinger Mine and its prospects for the future were given out in a recent interview with President N. A. Timmins by The Northern Miner. As a consequence of the improving physical position of the mine and of steadily enlarging ore reserves, Hollinger Consolidated will this year increase its mill tonnage and production of gold. An expansion of profits should be accepted as a corollary. This important work, which marks the restoration of Hollinger's health, and which carries with it the intimation that the famous Porcupine Mine will hold its place as the premier producer of gold in the Western Hemisphere, carries the stamp of authority. Interviewed by the Northern Miner, N. A. Timmins, President, outlined developments; confirmed the report that the Schumacher workings were to be deepened to 6,000 feet from 4,000; said that ore reserves were continuing to increase this year; spoke of expanding mill tonnage; and surrounded his words with an air of warm enthusiasm.

LOVELY HANDS Busy hands—at hard tasks day in and day out. Persian Balm keeps the skin soft and pliable. Removes redness and relieves irritation. At your Druggist. PERSIAN BALM

ENSURE A HEALTHY CONDITION of the MOUTH, NASAL CAVITIES, and THROAT by regular use of THE ANTISEPTIC VALDA PASTILLES Sold everywhere. Insist on original BOXES bearing the name VALDA Agent for Canada J. Alfred OUMET 84, St. Paul St. East, MONTREAL.

DACK'S "Bond Street" Shoes \$10

Send for Illustrated Folder!

The "Bond Street" is a genuine Dack shoe designed especially for young men. It is styled after the popular London vogue... built from the finest Canadian and imported leathers...

For the convenience of our town customers, we have prepared a catalogue illustrating the many "Bond Street" models for business, sports and formal wear...

ager and the doctor are going to get up a baseball team and the rest of the North Land will find that team not to be sneezed at. These two experienced and clever baseball experts will certainly get up a team worth while and their many old friends and admirers in the Porcupine will hope and expect at least one game with the Associated Goldfields team before the year is over.

Ten years ago C. V. Shervall, a T. & N. O. brakeman, died at New Liskeard from shock caused by his legs being cut off by a moving train. Owing to a broken coupling the caboose separated from the rest of the freight train, and while the unfortunate man was attempting to put the brakes on to stop the caboose he fell onto the train and received the injuries from which he died.

The need for hotel accommodation in Timmins was often noted here ten years ago, and the hotels then running often had to inform guests that they were full up. This prompted The Advance to the following in its issue of March 2nd, 1921—"There is one house of accommodation in town that never turns anybody away with the words, 'We're full up.' Rather this house is inclined to take men in with these words, 'You're full up!'"

The town council meeting ten years ago was largely taken up with discussion of the question of an improved system of garbage collection. The council decided to lay out the town in routes and have regular days for collection of garbage on each route. There was complaint about the number of dogs running around town and Chief Greer said the by-law would be enforced in this regard.

The honour roll for Timmins public school for February, 1921, was about a quarter the length of the similar report of this school for a month in this year of 1931. Among those heading their classes in the various grades in February, 1921, were:—Harry Fox, Alvin Lundston, Charlie Cushing, Mary Williams, Isabel Carter, Fanny DePeco, Lewis Field, Ann Young, Laino Huhtalo, Helen Williams, Winnifred Mounce, John Cavaney, Dorothy Porter, Ingrid Hakala, Hilda Finnari.

There were pessimists and optimists in the Porcupine ten years ago, but then as now the optimists were in the ascendant. The following was one reference in The Advance ten years ago: "Mr. Geo. Grey, an old-time resident of the Porcupine, but recently in charge of the Associated Goldfields Mines, is in the camp on a business visit and as usual he has cheerful news. Geo. will always be remembered for his never-fading good humour in all sports, particularly baseball, no less than his skill and experience in such matters. The blacker the prospects the more cheerful 'Old Pop' would grow, and an umpire could steal everything about a game except the pitcher's smile, and call all strikes 'balls' and all 'outs' safe, but he could never by any stretch call Geo. Grey anything but hopeful to the end. And Geo. is hopeful to-day for the prospects of the North Land and particularly for the chances in the gold mining industry. He is even hopeful about the coming weather. He says that there is going to be an early spring sure. 'How do I know?' says Geo. 'Why, the pussy-willows tell me so!' The pussy-willows are all out in bud these days and this is considered an unfailing sign of spring. And Geo. wants that early spring, as well as a long summer. Jack Edis, formerly of the Dome champions, is the camp doctor now at the Associated. The man-

Among the local and personal items in The Advance ten years ago were the following:—"Pete, the Irishman, says that the Farmers' Government is threatening to milk dry the goat that lays the golden grain. Quite true, even though a little mixed, though not more mixed than the apparent intentions of the Government." "Born—In Timmins, Ont., on Tuesday, March 1st, 1921, to Mr. and Mrs. J. Salomone—a son." "Mr. and Mrs. W. Armitage, of Timmins, and Mr. J. E. Boyle and Miss M. Boyle, of South Porcupine were among the many from the North Land attending the funeral of the late Mr. M. A. Ellis at North Bay last week."

Astounding! Can Eat Anything. Mr. Frank Chatburn, of Blackburn, writes:—"I have suffered long from acid stomach and constipation, but since being advised to try your wonderful Carter's Little Liver Pills I began to feel the benefit after almost the first dose. I can now honestly say that I can eat anything and enjoy my food knowing that I will not suffer any disagreeable after effects."

President Timmins ascribed the betterment to good general developments throughout the mine. New ore had been found on every level from the surface down. They had not found "a new mine," as has been reported. There has been no great revelation of a major situation unsuspected before.

"By diamond-drill exploration we have found new veins. And we have gone again into veins which we always knew existed, but which, where intersected were only a foot or so wide or of low-grade character. By intensively exploring and developing several of these occurrences we have revealed ore bodies of mineable size and profitable grade. The increase in ore reserves which we had in the latter months of last year is continuing on into this year, and I feel certain that we will be able to show at the end of 1931 another very satisfactory enlargement of our developed ore reserves."

"This year," Mr. Timmins continued "and probably in the latter months, we will increase the mill tonnage. The suggestion has been placed before me that the mine would stand an increase of 500 tons a day, but my mind at present rests on the idea that 250 or 300 tons will be sufficient."

"For nearly two years the mine had seen no new exploration work. We had engaged Dr. Graton to closely examine the geological and structural conditions, and to make recommendations as to where he thought new ore investigations should be directed. Our mine staff knew that Dr. Graton's report was coming, and expected it would demand a large-scale scheme of exploration and other work. However, while awaiting his recommendations, the mine staff had decided to go ahead on its own initiative, and has found new ore on every level. Despite a greater production in 1930 than in 1929, we were able to increase ore reserves by approximately \$1,000,000, bringing them to almost \$49,000,000 at Dec. 31. The increase, which was mostly gained in the final half of the year, is continuing on this year. Dr. Graton has given our staff a little general guidance, but has not really suggested any places to look for ore. It is expected—in fact, it has been intimated to us—that he will recommend a very broad scheme of exploration in areas previously untouched—and we will carry out his recommendations."
