FIVE ADMISSIONS TO THE SKATING RINK AND TWO CHANCES TO WIN VALUABLE PRIZES

Dr. Moore Addresses Kirkland Kiwanis

Under-privileged Child is Topic of Splendid Talk to the Kiwanis Club at Kirkland Lake, Says The Northern News.

Kirkland Lake Kiwanis were greatly interested and impressed by the address given there recently by Dr. H. H. Moore, of Timmins, on the underprivileged child. In referring to the address The Northern News last week says:—

"Laying stress on personal service and club activities as two distinct forms of aiding under-privileged children, Dr. H. H. Moore, of Timmins, gave a very thoughtful and helpful address to the Kirkland Lake Kiwanis Club at their weekly luncheon last Thursday. The speaker was accompanied by Jack Walker, president of the Timmins Kiwanis Club, Karl Eyre, past president; Scotty Wilson, Ken Fitzpatrick, J. C. Tolman, Wilson Lang and Del. Chapple. "After a cordial welcome had been extended to the visitors by Kiwanian Mel Hunt, Reeve of Teck Township, and to which the Timmins president replied, including an invitation to visit their club, Vice-president MacBain called upon Dr. Moore for his address. The speaker first testified to his whole-hearted and sincere interest in the work of the Kiwanis organization, one of its main principles being to help the under-privileged child, and upon which its future usefulness depended.

"Defining the under-privileged child as one living in a community, who was deprived of those conditions which make for normal mental, physical and moral development, Dr. Moore said it was the Kiwanis aim to build happy useful lives by helping these children and the only way of doing it was by service. He felt there should be no entertainment in the Kiwanis programme for the normal healthy child though he would not exclude giving leadership in sports for children. The care of the child with a chronic mental or moral deficiency should also not come in their programme.

"Speaking on personal service and club activities as two ways Kiwanis

members could help under-privileged children, Dr. Moore stated the former meant devotion of a small part of a Kiwanian's time and thought to study a child and help him attain his fullest possible development. To be able to help a child in the best manner, it was essential to have the entire confidence of the boy and the approval of the parents. A boy without a father was in special need of someone to fill the gap, as he felt the need of a hero which was a strong feeling among boys since time immemorial.

"The Doctor enumerated some of the ways by which Kiwanians could help a boy as follows: by taking an interest in school work, guidance in reading, encouragement to work, helping him decide his life work, teaching him the right idea as to language, conduct and moral difficulties, encouragement to attend church and Sunday School, direction over physical habits and promoting an interest in sports. It was not money so much a boy wanted as the person, the speaker added.

The activities of the various clubs varied a lot according to the location of each. Any programme should be carried out without interfering with the personal work of a member and care should be exercised in the selection of an activity. Dr. Moore recommended among others the adoption of the various clinics, naming the dental, eye, chest, orthopaedic and tonsil branches as examples.

"Acting chairman MacBain expressed the appreciation of the Kirkland Club for Dr. Moore's worth while address in a fitting manner. He also made the announcements of the visit of the District Governor Isaac P. McNab, of Peterborough, on July 14th, and of the inter-club visit to New Liskeard on July 15th."

Manchester Guardian:— Fat men may not be regarded with approval by modern doctors, but one consolation is theirs—prison authorities, at any rate in Japan, look upon them with considerable respect and esteem. A medical officer at one Japanese jail has just received a diploma from the Imperial University for a thesis on the proposition that fat men are rarely criminals and that most crime is committed by the lean and slender sort.

EXONERATED FROM ANY BLAME IN AUTO ACCIDENT

The following is from The North Bay Nugget last week, and will be of interest to many here where P. M. Bardessono, who was one of the old-timers of the camp, has many friends:—

"Peter Bardessono, of North Bay, was completely exonerated by a coroner's jury in the verdict returned at the inquest in Huntsville on Friday afternoon, sitting to enquire into the death of Archie Norman Muirhead, of Toronto. Death resulted from gangrene, caused by the accident. Muirhead's left arm was badly smashed when his car turned over, and gangrene set in. An

Addresses Unemployed

JOS. BRADETTE, M.P. Addressing a mass meeting of unemployed at Cochrane, Ontario, recently, Jos. Bradette, M.P., expressed his appreciation for the wonderful behaviour of the men under their trying circumstances, and said something should be started by the Government, such as the highway to Hudson Bay, and the trans-Canada highway. Mr. Bradette promised to take the matter up in the House of Commons.

operation for the removal of the arm did not save his life. Mr. Bardessono was returning to North Bay, and seven miles south of Huntsville, at 10 p.m., his coupe collided with one driven by the deceased man. It was shown in the evidence that Muirhead's light car travelled 120 feet before turning over in the ditch. The other car only went 18 feet after the impact. A ten-ounce bottle of 40 per cent. alcohol was said to have been found in Muirhead's pocket, and several bottles of beer in the car. One woman and two girls in Muirhead's car escaped injury. The jury's verdict was to the effect that Muirhead had come to his death as a result of a collision between the two cars, and added that the collision was due to the negligence of Muirhead, and also found that Peter Bardessono was in no way responsible for the accident. Mr. Bardessono's car was at the extreme right of the road when the impact occurred. Harry J. Reynolds acted for Mr. Bardessono, and Crown Attorney Johnson, Bracebridge, for the crown. Dr. McDonald, coroner, presided."

ABOUT AFFAIRS OF THE ASHLEY GOLD MINES LTD.

A despatch from Elk Lake says:—"As the shaft on the Ashley Gold Mines has been finished to 250 feet in depth, and with the work of the next few months to include drifts along the ore-body at 125 and 250 feet in depth, the shareholders of Mining Corporation of Canada are found wondering whether they will reap the full benefit, or whether it will be necessary to offer stock of Ashley Gold Mines to the public. Official information is available on this question, and sets at rest some of the uncertainty. Mining Corporation increased its own capitalization some time ago and holds 340,000 shares in its treasury. When these shares are sold or disposed of, they will first be offered to the present shareholders of Mining Corporation of Canada on a pro rata basis."

New York Editor and Publisher:— In these days when nearly all the foundations of the civil institutions are wobbling, newspapermen must fight to a finish each and every invasion of press rights.

RULES TO OBSERVE WHEN SWIMMING IN IS SEASON

A list of rules to observe in regard to assuring safety in the swimming season has started the rounds of the press this summer. These rules are all right, but in view of a couple of accidents in this district this year, another rule might well be added to the list. This rule would have to do with the use of air tubes and similar appliances by those not able to swim. Water wings may be all right when of standard make, but the inner tubes of automobile tires and similar makeshifts appear to present a danger on occasion. There have been two deaths in this immediate district recently with these air tubes figuring in the fatality. Accordingly The Advance would add to the other rules referred to:—"Use very particular care in dealing with artificial aids for learning to swim. This rule might well be specially remembered in conjunction with the first rule given in the list below:—

Never go in the water alone, whether you can swim or not.

Never go in the water after eating a meal; you should at the very least wait one hour.

Never dive into water that you are not sure of the depth for water that you may think to be 10 feet is liable by different currents to be about one foot deep.

Never venture into the water if you feel at all ill.

Do not try to overdo yourself the first time you go in swimming, take it gradually until you become accustomed to water and your muscles are in condition.

Never fool that you are in difficulty, because you may be in that position some day and unable to secure help.

Never go into deep water if you are subject to fainting-spells no matter how good a swimmer you may be.

Never venture to swim in water that is over your head, unless you have confidence in yourself. A lot of people lose heart when they cannot touch bottom and very often drown.

Do not swim in water where there are weeds; these are very dangerous to swimmers.

LARGE AMOUNT PULPWOOD BURNED NEAR WAWBEWAWA

Recently a large quantity of pulpwood was destroyed by fire near Wawbewawa, which place is not far from New Liskeard. It is said that the amount of pulpwood so burned will total in the neighbourhood of 800 cords. Further even than the loss in money is the injury felt to be done to the peace of mind of the people in this North Land at the statement made more or less freely to the effect that though the fire is officially recorded as of unknown origin, there is a general belief that it was of incendiary origin. It is a disturbing thought that there should be men in this country who for spite or any other reason should consider the burning of valuable forest wealth for any reason except the public welfare. There have been few cases in this country of incendiary fires, but even that few is far too much. In commenting on the fire and its results, The New Liskeard Speaker says:—

"And it was only by the prompt arrival and wonderful work of Chief Ranger E. Gardiner and assistants Frank Thib and Thos. Clark, that over a thousand cords piled on the same place were saved. Chief Gardiner was there in less than an hour after he got a call at 2 o'clock in the morning, and worked without a stop over nine hours, until noon. Over a quarter of a mile of hose was laid and the power pump was used continually. When a well that was near the wood was pumped dry a call was put in to the T. & N. O. station at Englehart and a tank car of water was promptly supplied. Without doubt the power pump saved over a thousand cords of wood and the Chief and his men should be complimented for their work. The wood that was burned belonged to Chas. Henrick and was sold to T. S. Woollings, and is said to be insured. The fire was noticed by the crew of the south bound paper train who gave the alarm when they arrived at Englehart"

Sudbury Star:— An aviator predicts that before long men will live 200 miles from their work and fly in. Or where possible, they will merely live 200 miles from their work. It certainly sounds attractive.

HAPPY BIRTHDAY PARTY HELD AT 75 WAY AVENUE

This year the twelfth of July was observed by more events than the Orange parades. At the home of Mr. and Mrs. Wm. Spinks, 75 Way avenue, a very delightful party was held in honour of the third birthday anniversary of their little daughter, Helen. A number of friends of the little guest of honour were present and a happy time was enjoyed by all, many pleasing gifts being received by the little girl. Among the guests present for the occasion were:—Edward Reasbeck, Birthie Laughton, Lilly Laughton, Edward Walker, Mildred Walker, Reta Morrisette, Hermine Morrisette, Noyle Morrisette, Eude Morrisette, Dorothy St. Denis, Rosa St. Denis, Colombe Malette, Brenda Hunt, Helen Hunt, Mervin Hunt, Edith Beard, Roger Beard, Jeanne Groulx, Laurette Groulx, Gilbert Malette, June Charette, Esther Charette, Viola Charette, Serrane Sequin, Aza Morrisette, Theresa Charette. Lunch was served to the little guests and a generally happy time enjoyed by all.
