

Remand for the Five Arrested Saturday

Man Given Three Months for Keeping Liquor for Sale. Other Cases at the Timmins Police Court This Week.

The chief interest in the police court on Tuesday of this week was in the cases of the five arrested Saturday evening after the injury to two citizens of the town through stones thrown by the communists who gathered with objectionable banners on the rocks at the foot of Fourth avenue. The charges against the five were laid under the criminal code, the vagrancy section, 38 (g), against wanton disturbance. No evidence was taken, the cases being remanded to next week. Those charged were:—Oliver Ronko, Finn, alien, allowed out on \$250.00 bail; Vaino Gronholm, 30 years, baker's helper, Finn, \$1,000.00 property bail; Eddie Jackensky, who gave his age as 15 years, his address as Garson Mines, and said he was born in Canada; Mary Bobassky, who said she was 16 years of age, and born in Canada; Mrs. Lillie Martiniuk, born in Austria; naturalized; 30 years old. Jackensky and the two women were allowed out on \$50.00 bail each.

A woman laid a charge against a man for using bad language on the street, and the man's wife preferred a similar charge, but both cases were dismissed. Another case in which man and wife were both charged was that of a taxi driver and his wife both of whom were charged with the theft of a watch. It was shown in court that neither stole the watch but that the watch had been held as security for a taxi bill. The both cases were dismissed.

The police some days ago raided the premises of Rudolph Leprade, 551 Wilton avenue. There were men in there drinking and a quantity of liquor was seized. Leprade was given a term of three months for keeping liquor for sale. It will be noted that Chief Jones and his men are after the places where liquor is believed to be illegally handled and the intention is to close them all up. Another liquor case was dismissed. For allowing a cow to run at large one woman was assessed \$2.00 and costs. One speeding case cost the offender \$5.00 and costs. Another similar case was remanded to next week.

There were some common drunks and one not so common or perhaps too common, the fine being \$50.00 and costs in this case. One drunk charge was withdrawn.

Timmins Shots Win Prizes at Cochrane

Timmins Club Wins Board of Trade Trophy in District Tournament. Other Prizes Won by Members of Porcupine Rod and Gun Club.

The first annual tournament of the Cochrane Gun Club took place on Monday of this week at the field day in Cochrane. Unfortunately neither Kapuskasing nor Iroquois Falls teams were present, being unable to attend on account of weather conditions.

However, the Timmins club members were on hand and carried away the Board of Trade trophy. In a thousand bird shoot they beat Cochrane by six birds.

Mr. Stanton won first prize in the first twenty-five bird event and Mr. Clement was second.

In the second twenty-five bird event Mr. Tickner and Mr. Hobson of Cochrane won first and second.

The trap was fast, angles acute and a high wind, making birds very hard to get. The Timmins team going to Cochrane for the occasion were:—Jos. Clement, J. Staunton, Chas. Brown, J. D. Brady, Capt. D. Jones, P. Beau-dreau and M. O'Brien.

THE SENATOR'S HONOUR

(Halifax Herald)
The Senate is now hard up against the duty of purging itself, of asserting its own integrity and guarding its own honour before the eyes of the people of Canada. Is the Senate equal to that duty? For its members may be very sure that the Senate as a parliamentary institution is going to be judged solely upon results; upon actions, not professions; upon deeds, not words.

Fled From Chile

PRESIDENT CARLO IBANEZ OF Chile, who, when called upon to resign by rioting students at Santiago, said he would uphold his Administration even if it cost his life, but who has since then left the country.

Conference on Wage Reduction at Falls

Union and Company Confer to Avert Labour Trouble. Men Opposed to Wage Cut Under the Conditions Obtaining.

There was danger of a strike at the Abitibi Power and Paper Co. plant at Iroquois Falls this week following the announcement that a five per cent. cut would take place in the wages of employees on August 1st. The men at Iroquois Falls are all union men and the unions took up the question of the proposed reduction in wages. So far as the reports go in the matter the men generally were strongly opposed to the cut in wages, claiming that it was unfair and burdensome and not in keeping with the understanding between the men and the company. The wages paid at the Falls plant appear good at the present time ranging from 42 cents to \$1.25 per hour, but against this is set the fact that employment has not been steady, there being considerable part time, and also that the high cost of living must be considered as an important factor. The claim of the men is that as they say rent to the company for the houses at the Falls and have to make any purchases made at the Falls to company stores, the only fair way in which wages could be reduced would be after rents and prices had been reduced by the company. Late last week it appeared as if the question of the reduction of wages would precipitate a strike at Iroquois Falls. This however, was averted for the present at least, by the arrangement of a conference between the officials. This week this conference of heads of the union and the company is being proceeded with, and in the meantime the plant at the Falls is continuing work as usual, the recent rate of wage being continued until the conference comes to a decision. About 1000 men at the Falls would be affected by a strike and all possible should be done to avoid any trouble of this kind at the present time. Word from Iroquois Falls is to the effect that the proposed cut in wages had been announced in regard to the mills at Pine Falls, Manitoba, at Fort Frances, Kenora and Fort William, and that except at Pine Falls the men had refused to accept the cut. The same cut would affect Sturgeon Falls, Espanola and Sault Ste. Marie if these mills were operating, all being under the ownership of the Abitibi. It does appear as a hardship that men out of work for some time or on part time only should be faced with a cut in pay to make it harder for them to recover their former standing. The men at Iroquois Falls have always been fair and reasonable in their requirements and so have a large body of public opinion behind them. It is to be hoped that the matter will be adjusted to mutual satisfaction by the conference now in progress so that the paper industry may not add to its difficulties just at the time when prospects are beginning to brighten up all round.

A New Co-operative Store Opens Aug. 10

Consumers Co-operative Society Formed by Members of Old Co-operative Dissatisfied with Present Management.

The Consumers Co-operative Society will open on Monday next, August 10th, with a full line of groceries and meats in the premises at the corner of Birch and Fourth avenue. The Consumers Co-operative Society has been organized by an important group of the former members of the Workers' Co-operative of New Ontario, Limited. This group of members is dissatisfied with the present management and wish to control and manage their own organization along the lines of co-operation and without any political or other motives other than the avowed principles of co-operation. The claim has been made that the Workers' Co-operative has been appropriating money under the head of educational funds for purposes that are not more than communist propaganda. The chief complaint of the dissenting members is that the principles of co-operation have been more or less side-tracked and that the old society is being chiefly considered for its value as a means of furthering communist plans that have nothing to do with co-operation. As a means of getting back to the principles of co-operation, the Consumers Co-operative has been formed. The members of the new co-operative society are all loyal to Canada and concerned only in their society with the principles of co-operation. Among those concerned in the new co-operative society is a former manager of the co-operative store, which achieved its greatest measure of success under his management. The building to be occupied by the new co-operative society was also pleasingly associated with the success of the co-operative movement in this camp, and so the opening of the new store on Monday next is under happy and very favourable auspices and with the best chances for success for the principles of co-operation and for the benefit of the members of the new society.

CORNISH SOCIAL CLUB HAD ENJOYABLE PICNIC SUNDAY

The Cornish Social Club had a pleasant picnic at Golden City on Sunday and managed to enjoy themselves despite the unfavourable weather. There was a good attendance and the event was as successful as the weather would permit.

About McArthur and Bartlett Townships

Northern Prospector Writes Further on the Prospects of These Porcupine Gold Areas. Another Interesting Letter Received.

In recent issues The Advance has published letters from "Northern Prospector" on promising properties in McArthur and Bartlett. Here is another interesting letter just received. Northern Prospector writes:—

"Last week I endeavoured to describe Mr. Theriault's property in McArthur Township, and I think it fitting to describe, also, other promising prospects in that vicinity which have encouraging features.

"Adjacent to the east of Joe Theriault's claims lie Martin Harkness's claims which resemble, geologically, the Theriault property. It is reported by the owner that good panning is obtainable, and some free gold is found in quartz porphyry. Mr. Harkness has other claims a little over one mile west of the Theriault property where he reports that he panned gold while doing this year's assessment work in July.

"Hugh McEachren's claims lie south of the Theriault property in Bartlett Township, and on the boundary between Bartlett and McArthur. These claims caused the first sensational excitement in the early days of this district, when the first gold discovery was made in a heavy sulphide and pyrrhotite dike which also contained a great deal of quartz. Free gold was, and still is, to be seen in quartz stringers which cut the dike almost at right angles.

"The McEachren property was optioned by the Nipissing Mining Com-

pany of Cobalt in 1912. It was understood that this company relinquished its option for the reason that the average of analyses did not show commercial ore, although considerable free gold was visible in these cross-stringers of quartz, and the ore-body was of encouraging size. However, the work done on this property by the company was mostly of a superficial nature, and one could not in justice to the property conjecture whether or not commercial values existed at depth. And the facts remain that there are good initial values and large tonnage right from the surface, which should attract other capital in the near future. Besides Mr. McEachren has done some fresh work during the past spring which has uncovered a contact between the porphyry and a strip of basal lying on the west alongside the sulphide dike. He believes that this contact is of importance, first because it lies near and parallel to the sulphide dike, and second, because the rich gold-bearing stringers which cut across the dike are perpendicular to the contact, and it could be possible that the gold in the quartz stringers came from the nearby porphyry.

"At the point where Mr. McEachren uncovered the contact the overburden is considerably heavy, and the porphyry is visible only in the trenches, but at about a half-mile southeast, what appears to be the same porphyry dike outcrops on a claim of Martin Harkness's and Mr. Harkness reports that he panned gold from this dike. Financial assistance for further work on the McEachren claims might open up something very worth while.

"Provided that the necessary financial backing is secured for development work, the outlook for Bartlett and McArthur Townships is most promising. For what has been accomplished so far, credit must be given to those stout-hearted prospectors who have worked in this district unceasingly and to the foresight of those good sports and generous business men who have supplied the prospectors with funds so that they might better handle themselves in their search for a gold mine."

Mr. and Mrs. P. Maltas returned last week from a motor trip to the south.

F. H. HEPBURN TAKES OVER OFFICE IN THE REED BLOCK

F. H. Hepburn, for some time one of the popular insurance men of this district, has taken over the office formerly occupied by W. S. Macpherson, Room 10, Reed block, having also taken over some of the leading insurance agencies formerly held by Mr. Macpherson. Mr. Hepburn is well known and has high standing in the district in insurance circles and will no doubt retain and increase the clientele built up for the agencies carried over. An announcement by Mr. F. H. Hepburn will be found elsewhere in this issue.

FEAR OF UNPOPULARITY IS TROUBLE TO POLITICIANS

(Melbourne Australasian)
The fear of temporary unpopularity is the nightmare of weak and timid politicians, and especially of those whose chief stock-in-trade is sentimentality. When stern measures are urgently demanded they are a worse impediment than unscrupulous politicians, who play upon the cupidity of the unthinking with promises which cannot be fulfilled. Both varieties trouble the Commonwealth at present.

"ALL YOU CAN EAT"

(Subury Star)
Here and there restaurants are beginning to advertise, "All you can eat for 50 cents." Though hoping for the best, we recall that in many instances about 10 cents' worth is all one can eat of an all-you-can-eat-for-50-cents-meal.
