CENTRING ADVERTISING WHERE BUSINESS IS BEST
Present business conditions put a premium upon newspaper advertising and other local media as opposed to national media, it is pointed out in the current issue of the Business Economic Digest edited by Gage P. Wright, New York business counselor. He is advising his clients to concentrate their advertising in the sections where business is best and to avoid sections where business is worst. The Digest says:—
"Because spotty conditions in business now prevailing throughout the country are likely to continue throughout much of the early recovery from the present business depression, clients should plan their advertising for the near future in such a way as to take full advantage of the relatively best sections of the country.
"This means concentration upon local mediums, such as newspapers, dealer helps, and direct mail, at the expense of national advertising. Mediums of national coverage may retain their present volume of circulation, or even increase it, but there is little reason for the advertiser purchasing coverage for territories in which there is little, if any purchasing power. Until prosperity is once more reasonably general throughout the country, advertising appropriations can best be devoted to mediums circulating in those sections of the country where the return toward normal business is most evident."
Ottawa Journal.—The extreme fluidity of motor traffic, the growing interchange of cars between provinces and province, state and province, country and country, makes it more important that there should be some uniformity in the regulations which direct the endless line of automobiles on street and highway.

Kirkland Hoodlums Given Terms in Jail
Six Draw Two Months Each for Part in Assault on Police at Kirkland Lake Some Weeks Ago.
On Thursday last there were ten communists in police court at Kirkland Lake on charges resulting from the communist demonstration and exhibition of hoodlumism on Sept. 8th. Six of those arraigned were sentenced to two months each in jail with hard labour, three were remanded one week for sentence, and the case against the tenth was withdrawn, the accused being only a half-grown boy of 16, Alpo Salminen. In this case of the children used by the communists in their disorders it would seem that the youngsters are not so much to blame as those training them to partake in hoodlumism. Perhaps, if some of the leaders of the communists were prosecuted for contributing to the delinquency of children this particularly mean and contemptible feature of the situation would be overcome. The six men sentenced at Kirkland Lake on Thursday were tried and found guilty of participating in an affray on the public street, while those remanded were charged with obstructing the police. The six men sentenced answered to the names of:—Paavo Niemi, Myk Sych, Antti Peltova, Mike Bunder, Aini Waarala and Toiva Berbacks, all being classed as Finlanders. The three remanded for sentence were Joe Billings, Peter Boychuk, and Jalo Ketola, or words to that effect. Those remanded had their bail of \$1000.00 each renewed for the week.
The hoodlumism from which the cases arose occurred on the evening of Sept. 8th, when the communists attempted to hold a demonstration at Duncan avenue and Government Road, one of the main intersections of the town of Kirkland Lake. The communists had been allowed to hold meetings in Kirkland Lake previously and no one had paid any special attention to them. They had shown themselves bolder and meaner, however, as time went on, mistaking as they always do, good nature and tolerance for weakness and fear. Apparently they considered that they had everything their own way and after using the town storage lot in peace for some meetings, they announced that they intended to hold a meeting on one of the busiest corners of the town. The police notified them that this would interfere with traffic and could not be allowed. However, that did not bother the communists any. They proceeded to hold their meeting, irrespective of the convenience of anybody else and contrary to the police orders. When the meeting started they refused to adjourn to any other site and the fire hose was brought into use to clean the dirt off the corner. The communists responded with throwing rocks, injuring six of the police and breaking windows in nearby stores as well as doing other damage. They also used an axe to chop the hose line. After half an hour's struggle the Kirkland Lake police, assisted by provincial police, and by groups of citizens who were very hostile to the impudent alien hoodlums, the riot was suppressed, the crowd dispersed, and ten of the ringleaders landed in jail. As usual, according to reports from Kirkland Lake, some of the chief alien agitators responsible for the trouble, sneaked away on the first appearance of the police after urging the other misguided members of the communist group to the disorder.
At the police court at Kirkland Lake on Thursday the police were commended by Magistrate Atkinson for the fair attitude they had taken in the affair. The crown was represented by F. L. Smiley, K.C., while the communists had as their counsel a lawyer from Toronto. The courtroom was jammed to capacity for the hearing which lasted three full hours. It is said that more than three hundred people, chiefly Finlanders, though many of them were "White" Finns, waited outside for the verdict. There is general satisfaction expressed in Kirkland Lake with the verdict, the feeling being that terms in jail will prove efficacious in checking the disorder and annoyance caused by the hoodlumism of the alien agitators who have been a nuisance and a danger to the North for some time past. The people in general are heartily sick of the insults and the annoyance and damage caused by this group of ignorant foreigners, led by well-paid alien agitators who have no purpose except the creation of trouble.

SOURDOUGH SYNDICATE TO START DRILLING NEXT MONTH
The Sourdough Mining Syndicate which holds claims both to the south and the northwest of the Mining Corporation group in the Matachewan district, plans to start active exploration and diamond drilling early next month. Sourdough interests are of the opinion that they will pick up the extension of the Ashley vein from Mining Corporation on their property.
GREAT PROGRESS WAS MADE IN RE-BUILDING PORCUPINE
In the column in The North Bay Nugget last week reproduced from The Nugget's files for Sept. 20th, 1911, there was the following paragraph of interest to this district. The paragraph related to the aftermath of the Porcupine fire of 1911, twenty years ago now. The paragraph from The Nugget files of Sept. 20th, 1911, said:—
"The most astonishing progress has been made in the rebuilding of the town of Porcupine during the past six weeks. Nowhere on the continent has there ever been an instance of a town recovering from a fire in anything like the brief period of time that has elapsed since the conflagration of July 11. There are now in South Porcupine twice the number of buildings that were standing previous to the fire and all are of a much larger and more substantial nature."
Nashville Banner.—Mr. Gandhi, we read, wants a prohibition law for India. We know where he can get one that it only slightly used.

DACK'S Famous "YORK" Now \$12
WITH HEAVY DOUBLE SOLES \$12.50

Order by Mail
THROUGH savings made possible by increased production, Dack's now offer many of their Custom-grade shoes at the lowest prices in years.
For example, the "York"... most popular custom-style shoe in Canada, and one of the finest-fitting lasts ever designed... now sells as low as \$12. We have filled more repeat orders on the "York" than on any other Dack shoe.
You can order the "York" by mail. Send today for catalogue and self-measuring chart... and learn about our broad guarantee.
Custom-grade shoes from \$12. to \$14.50; "Bond Street" for young men, \$10. Special Scotch Grain model at \$10.50.

Official Report on Jack Munroe's Find
Preliminary Report by Geologist of the Ontario Department of Mines on Red Lake Gold Property.
The prompt way in which the Ontario Dept. of Mines makes report on properties that are of outstanding interest is of great service to the prospectors, mining men and the public in general. The Advance made mention of this at the time of the Matachewan area find when the Dept. of Mines report on the field was of double value because of the promptness with which it was made. Now there is the Jack Munroe find in the Red Lake area with the report issued very promptly, thus being doubly valuable. M. E. Hurst, geologist of the Ontario Dept. of Mines, was detailed to visit the Munroe and Rowan discoveries in the Red Lake area following gold discoveries reported there. The Munroe discovery created very special interest because it was made by the noted Jack Munroe, formerly known as the mayor of Elk Lake, and early pioneer of the mining areas of the North and famous for his romantic history. This discovery of Munroe's was on Mackenzie Island in the Red Lake area. Munroe had optioned the property from the North Bay Syndicate owning it, and he in turn has optioned it to the Coniagas Mines, Limited.
Mr. Hurst's preliminary report reads as follows:—
"The spectacular showings of visible gold discovered recently by Jack Munroe, are located on claim No. 87 of the McNeely group on MacKenzie Island (Red Lake).
"The mineralization occurs along zones of fracturing and shearing that intersect what E. L. Bruce has designated in his map of the Red Lake area as a hybrid or marginal phase of the Howey granite boss. In the vicinity of the workings the country rock is considerably more basic than granite. It is locally referred to as granodiorite, although some phases of the rock closely resemble anorthosite. A lamprophyre dyke one to three feet wide runs parallel to or along the hanging wall of the mineralized zone.
"The principal mineralized zone strikes N. 10° W. and dips at an angle of approximately 55° to the west. It has been traced in pits Nos. 3, 4, 5, and 6 (see plan) for a distance of 150 feet. To the north (pit No. 8) and south (pits 1 and 2) similar shearing and mineralization have been exposed but further exploration will be necessary to determine whether these sections are continuations of the principal zone or separate and parallel zones.
"The mineralized zones consist of quartz veins ranging from an inch to three feet in width, separated by sheared and altered granodiorite (anorthosite). Some portions of the quartz veins are marked by conspicuous amounts of visible gold. In addition to pyrite, which is widely distributed throughout the mineralized zones, arsenopyrite, chalcopyrite and sphalerite are occasionally found. Altered portions of the granodiorite contain numerous streaks and stringers of quartz, much disseminated pyrite and some carbonate.
"The best showings are in pits Nos. 5 and 6 (55 feet apart) where the mineralization has been exposed over widths of nine feet and fourteen feet respectively. This portion of the deposit is now being explored by diamond drilling, the holes being directed toward the east to intersect the mineralization at a vertical depth of approximately 100 feet. Mr. R. H. Hutchinson, engineer for Coniagas, is supervising the work."
The Rowan Property
Mr. Hurst also visited the Rowan property in the same area and his report reads as follows:
"The Rowan property lies about 11 miles east of the head of Golden Arm in the Pipestone Bay section at the west end of Red Lake (about 18 miles west of the Munroe find). During the last two months considerable exploratory work has been done on this property under the direction of Mr. H. G. Young.
"The principal showings are on claims K.R.L. 10235. A series of deep trenches have been excavated across a zone of fracturing and shearing in greenstone. This zone strikes N. 45° W. and dips about 60° N.E. Throughout most of its length the hanging wall is coarse, massive greenstone or diorite and the footwall is greenstone. The mineralized zone consists of several quartz veins ranging from a few inches to four feet in width. These veins are separated by shattered greenstone, and in places by chloritic schist, containing disseminated pyrite and some chalcopyrite. The combined width of quartz and mineralized greenstone (i.e. the whole zone) varies from eight to twenty feet. This zone has been traced and exposed by cross trenches for a length of 300 feet.
"The quartz in the veins is white or watery grey. It contains variable amounts of pyrite and occasionally streaks and needles of black tourmaline. Native gold was observed both in the quartz and in seams along the vein margins. Tellurides are reported to be present in some of the veins.
"At the time the property was visited the trenches were being put in shape for extensive sampling."
Chatham News.—The approach of the short evenings, again impresses the need of lights on all vehicles at night. Bicyclists or the drivers of horse-drawn vehicles, are endangering their own lives as well as the lives of others on the highways—and even the city streets—when they forget to conform to this regulation.

BULL MOOSE ATTACKS CAR ON ROAD NEAR NORTH BAY
The proverb says that evil communications corrupt good manners. Also, it may be noted that wild Sault yarns seem to be contagious. There have been things happening in this country lately in the news despatches that formerly could not have occurred except in the Sault. Last week a car at Cochrane was supposed to be surrounded by wolves. There have also been groups of wild animals called the skunko-wolfums, or communists, howling around Cochrane, Kirkland Lake and Timmins. These simply raise a big dust and a bad odor, but the yarn coming from North Bay has a touch of romance and adventure. Believe it or not, here is the story! Anyone who doubts it can be shown the exact spot in The North Bay Nugget where it occurred. Here it is:—A Detroit tourist, whose name was not secured, reported at a North Bay service station on Tuesday that his car had been attacked by a bull moose on the Ferguson highway, about 20 miles north of North Bay. As proof, he displayed a long dent in the side of his car, and a door almost ruined. His story was that the moose came out of the forest into the road ahead of the car, and after traveling about 500 feet in the centre, moved to one side of the road. On the motorist attempting to pass, he turned and charged the car. The tourist said the impact was terrific, and that for a moment he thought the car was going over. Had it been lighter it probably would, according to the damage done. The blow apparently dazed the moose who allowed the car to proceed."

bowling
—the most popular of all indoor sports
Bowling is not a fad. Like any other national game, it is here to stay. Its health-giving qualities are endorsed by medical men and enjoyed by everyone.
Come in to-night and bowl on Brunswick Alleys. Surroundings are clean, equipment is modern and cozy.

TIMMINS MAN BEREAVED BY DEATH OF FATHER LAST WEEK
The Halleyburian last week says:—
"One of the old residents of Halleybury, in the person of Mr. John W. Spiane, passed away on Sunday, September 13th, at his home on Albert street. He had suffered from heart trouble since last April and his death was not unexpected. The late Mr. Spiane, who was 64 years of age, was born in Smith Falls, Ont., and came to Halleybury 22 years ago. For many years he followed the mining industry, holding positions at the mines at Cobalt, and was well known here ever since first coming to the North Country. He is survived by his widow, a daughter, Mrs. Nelson Bidgood, of Halleybury, and one son, Melvin, of the Hollinger Mines at Timmins. A sister, Mrs. Black, of Shawville, Que., and a brother Mr. James Spiane, of Ottawa, also survive and, with a nephew, Ivan Prendergast, of Shawville, and a niece Miss Black, came to town on hearing of Mr. Spiane's death. The funeral was held on Tuesday afternoon at 2.30, with services at the home on Albert street and interment in Mount Pleasant cemetery. Mr. Chas. Innis, of St. Catharines, a pastor of the Brethren, to which the family belong, conducted the services and was assisted by Mr. H. W. Rowdon, of Cobalt, and Mr. Eric E. Smith, of New Liskeard. There were many old friends present to pay their last respects and many floral tributes from friends and relatives in Timmins, Ottawa, North Bay and Halleybury. Mrs. Spiane and her daughter, Mrs. Bidgood, will continue to reside in Halleybury for the present. The family had the sincere sympathy of a large circle of friends and acquaintances."

Simple Home Recipe For Bad Stomach Gives Swift Relief
If you are a victim of Stomach Troubles—Gas, Sourness, Pain or Bloating—you may have quick and certain relief by following this good advice.
Artificial digestants and starvation diets are seldom needed. Within reason, most folks may eat what they like, if they will keep their stomach free from souring acids that hinder or paralyze the work of digestion. And the best and easiest way to do this is to follow every meal with a little Bisurated Magnesia—a pleasant, harmless form of Magnesia that swiftly neutralizes acidity and keeps your stomach sweet and clean.
A few days' trial of Bisurated Magnesia (powder or tablets), which any good druggist can supply at trifling cost, should quickly convince you that fully 90% of ordinary stomach distress is absolutely unnecessary. Try Bisurated Magnesia to-day!

WHEN GASTRIC JUICES FAIL TO FLOW
You know how badly an engine runs when it gets clogged up. It's the same with your body when your gastric—or digestive—juices fail to flow. Your food, instead of being assimilated by your system, simply collects and stagnates inside you, producing harmful acid poisons. What you need then is a tonic—Nature's own tonic—Nature's six mineral salts. You get all these six salts in Kruschen Salts, and each one of them has an action of its own. Together, they stimulate and tune up the bodily functions from a number of different angles. The first effect of these salts is to promote the flow of the saliva and so awaken the appetite. The next action occurs in the stomach, where the digestive juices are encouraged to pour out and act upon the food. Again in the intestinal tract certain of these salts promote a further flow of these vital juices which deal with partly digested food and prepare it finally for absorption into the system.
So you see there is no mystery about Kruschen. It works on purely scientific and well-known principles. Prove it for yourself.

An Income for Life—Guaranteed!
Here is the picture of a Life Income plan that combines protection, savings and income for retirement.
It provides for You... a definite monthly income commencing at a certain age, and continuing for life, with a guaranteed minimum number of monthly income cheques. Or, if you so desire, you may withdraw a substantial amount in cash when the plan matures.
It provides for You... a definite monthly income if you become totally disabled by sickness or accident. All deposits are waived during such disability, and the plan remains in full force.
It provides for Yours... a substantial estate if you die before the plan matures. An income for life may be substituted if desired.
It provides for Yours... twice the amount of the estate, or twice the income, if death results from accidental causes. This plan combines a life income for retirement with complete family protection.
TODAY, while it is fresh in your mind... fill in and mail the coupon for full information.
